Congressional Record

PROCEEDINGS AND DEBATES OF THE 99th CONGRESS, FIRST SESSION

SENATE—*Tuesday, April 2, 1985*

(Legislative day of Monday, February 18, 1985)

The Senate met at 2 p.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

"He that would be greatest among you—let him be servant of all."—Jesus.

Father in heaven, may we never be guilty of taking for granted those without whose faithful service the Senate could not function as it should. Thank You for those whose routine tasks—day in, day out—receive little if any recognition and sometimes abuse rather than gratitude. With profound appreciation, we remember all who are in food service—those who maintain buildings, grounds, and equipment—the subway and elevator operators—and all who provide security: police, plainclothes people, doorkeepers and floor men. Thank You, Lord, for the pages—for their availability, their courtesy and efficient responsiveness, their hard work. Help us, loving Father, not to ignore this dedicated service which surrounds us daily. Help us especially to appreciate these friends who are so supportive. We pray Your blessing upon them all with their families and friends. In the name of Him who was the Servant of Servants. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

Mr. DOLE. I thank the Chair.

THE CHAPLAIN'S PRAYER

Mr. DOLE. Mr. President, let me indicate that I think the Chaplain's prayer today was particularly appropriate. He just recently had lunch with a number of members of the staff and different agencies, different groups—law enforcement, food service, the Architect of the Capitol. I guess it was historic in the sense that there has not been such a meeting in a while. But it was an excellent meeting. We had a chance to discuss a lot of things of mutual interest. In fact, one result is the spring cleaning we see going on up and down the hallway. There is a real effort on the part of the Architect of the Capitol and others to spruce up the Capitol a bit.

I appreciate the Chaplain's reference to not only those outstanding employees but also to other members of our Senate staff.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders each have 10 minutes, to be followed by a special order of not to exceed 15 minutes by the Senator from Wisconsin [Mr. PROXMIRE].

There will be a period for routine morning business not to extend beyond the hour of 3 p.m., with statements limited therein to 5 minutes each.

Following the period for routine morning business, it will be the intention of the majority leader to turn to the conference report to accompany H.R. 1239, the African relief appropriations. I hope we might take that up. I do not know of any demand for a rollcall.

It will also be the intention of the majority leader to turn to any legislative or executive items which have been cleared, including the war risk insurance and the Export Administration extension legislation, if they can be taken up without floor amendments.

I can also report that on the House side, they have cleared for action—in fact I think cleared for the floor—the contemporaneous record requirements that were adopted last year and have now been repealed. That will be of some satisfaction particularly to farmers and businessmen and women who are required to keep contemporaneous records of time they get in or out of their car. So that little turkey is on its way out.

In addition, it is my understanding that the Ways and Means Committee has approved a phaseout of Federal supplemental unemployment compensation. It is also my understanding that it is identical to the action taken in the Senate Finance Committee this morning. Hopefully, that can be taken up tomorrow. I assume there will be a rollcall vote. I have been advised by the distinguished Senator from Pennsylvania [Mr. SPECTER] that when that matter comes before us, he will have a germane amendment.

FEDERAL SUPPLEMENTAL UNEMPLOYMENT COMPENSATION

(Mr. DENTON assumed the chair.)

Mr. DOLE. Mr. President, I am prepared to respond to any question the Senator from Pennsylvania may have.

Mr. SPECTER. I thank the distinguished majority leader.

Mr. President, is my understanding correct that the Senate Finance Committee has acted this morning to pass the phaseout, which would mean that those who are currently on extended unemployment compensation benefits will receive those benefits, but that the committee has not approved the amendment offered by my distinguished colleague from Pennsylvania [Mr. HEINZ] to extend the benefits for a longer period of time?

Mr. DOLE. That is correct, Mr. President. There was a record vote on the amendment by the distinguished senior Senator from Pennsylvania [Mr. HEINZ]. I do not recall the result of that vote, but it was rather lopsided against the 3-month extension by both Democrats and Republicans.

I also understand that, notwithstanding any vote in the Finance Committee, the Senator from Pennsylvania would like to pursue that further on the Senate floor at the appropriate time.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Mr. SPECTER. Mr. President, I thank the majority leader. I thank the chairman of the Committee on Finance and the committee itself for acting as they have.

The action which they have taken is of some help. Some 30,000 Pennsylvanians are receiving extended unemployment compensation benefits at this time, and some 340,000 people in the United States are receiving extended unemployment compensation benefits, so that the legislation will affect nearly 400,000 families in Pennsylvania and perhaps in the range of 1.5 million Americans.

Speaking for myself, I believe that the action, although helpful, is not sufficient. There are major problems of unemployment in this country. Unfortunately, my State of Pennsylvania has not shared in the economic recovery to the same extent as have other parts of the country. We have worked on this together with the distinguished Senator from Michigan [Mr. LEVIN] who has now come to the floor.

I appreciate the announcement made by the majority leader as to scheduling the floor action today and his statement that I notified him earlier today of my intention to propose an amendment to try to have broader benefits than those which are comprehended with the phaseout. I do acknowledge that the phaseout is at least a step in the right direction. I do not think it goes far enough.

I, along with Senator LEVIN and others, will be proposing an amendment to have broader coverage of unemployment benefits, because of the urgency for doing so for those who are not beneficiaries of this growing economy.

Mr. DOLE. Mr. President, let me thank my colleague from Pennsylvania for his continued assistance, along with the concerns expressed by both the minority leader [Mr. BYRD] and the Senator from Michigan [Mr. LEVIN]. The vote in the committee, as I understand it, on the amendment, was 11 to 2 opposed to any extension.

Obviously, the Senator has a perfect right, on that matter coming before the Senate, to offer an amendment.

I also point out that, even in the phaseout, the cost went overnight from about $90 million to somewhere between $160 million and $180 million. Apparently, an estimating mistake was made somewhere, OMB or the Labor Department. The cost of the 3-month extension, we were told, would be in the neighborhood of $420 million. But we have at least addressed partly the concern expressed to me a number of times, personally and on the floor, by the Senator from Pennsylvania, my colleague [Mr. SPECTER], and others on both sides.

Mr. LEVIN. Mr. President, will the majority leader yield for just a moment?

Mr. DOLE. Yes, I yield.

Mr. LEVIN. First, let me indicate my support for Senator SPECTER.

Let me also suggest that there may be some alternative that we are working on that just really struck us this morning. The problem is this: with the elimination of the Federal Supplemental Compensation Program, there will be only two States that will be eligible for extended benefits.

Right now most States have a 26 weeks minimum benefits program. And then we have an Extended Benefit Program where the States and the Federal Government share 50-50, but there are only two States because of the triggering level of that program that would be eligible for extended benefits, so it is not a safety net at all. There are many other States that are now getting Federal compensation, I think most of us would say, that should have a safety net, but with the elimination of the FSC Program they would fall right through. I mentioned to the minority leader just a few moments ago—and I have not even yet had a chance to share this with my friend from Pennsylvania—that there is a very modest way, at a very modest cost, that we could lower the trigger EB Program from 6 percent to 5 percent that would bring about 10 States onto that program at a cost of $20 million to $40 million.

My State, by the way, is not one of them because of the peculiarities of the insured rates that we use. Even though we have high, real unemployment, the insured rate is not high at the moment, so Michigan is not a beneficiary at the moment. Pennsylvania would be immediately.

It is a very modest cost. It would help some of the hardest hit States. It is a Federal-State-sharing approach and may be an alternative.

Again, I hope my friend from Pennsylvania will forgive me because I have not had a chance to share this idea with him, but I would like to work with the majority and minority leaders and my friends from Pennsylvania, Senator HEINZ and Senator SPECTER, and Senator PACKWOOD, who has also been helpful on this. If we could work on this this afternoon, it would perhaps give us some daylight on an amendment with a very modest cost which would give a little protection to a few more States.

Mr. DOLE. I cannot speak for the distinguished chairman of the committee, Mr. PACKWOOD, but I am certain he would want to entertain any discussion. I am not prepared to say what his reaction would be, but certainly he would be happy to do that.

Mr. President, do I have 1 minute?

The PRESIDING OFFICER. The Senator has 2 more minutes.

Mr. DOLE. I yield the remainder of my leader time to the distinguished Senator from North Carolina.

Mr. HELMS. I thank the distinguished majority leader.

I shall be delighted to defer to the distinguished minority leader if he wishes to make a statement.

Mr. BYRD. Will the distinguished Senator, whoever has the floor, yield?

Mr. HELMS. I certainly do.

Mr. BYRD. I will be happy to yield such time as he may desire from my time to the distinguished majority leader for his use.

THE HATCH AMENDMENT: MUCH CUSSED BUT MUCH NEEDED LEGISLATION

Mr. HELMS. Mr. President, it has been interesting to observe the reaction to a much-needed, well-justified amendment enacted into law in 1978 by our distinguished colleague from Utah [Mr. HATCH]. The Hatch amendment, as it has come to be known, has caused fussing and cussing in certain circles. But it is good law, and it deserves the support of all Americans interested in the schoolchildren of America.

On November 12 of last year, Mr. President, the Department of Education issued regulations under the Hatch amendment, which, by the way, was enacted without one iota of question or controversy in 1978 as section 439(a) of the General Education Provisions Act.

No sooner than the regulations were issued, professional educators—that is what they call themselves—began to squawk all around the country. In typical Henny-Penny style, there were protests that the skies were falling. According to them, the Government was interfering with "their" classrooms and the Government should get its nose out of what is being taught to "our Nation's children." The Hatch amendment, they proclaimed, would cause the school curricula to become subject to the whims of parents.

Those are not my words, Mr. President; those are the words of those protesting educators.

In January 1985, the National School Boards Association, a Washington-based education organization, complained to Congress about what it called "the chilling effect that could be placed on the teacher/student relationship" if parents are permitted to veto "sensitive" subjects of discussion in the classroom.

Mercy! And then the news media jumped on the anti-Hatch bandwagon as well. Headlines such as "Academic Freedom is Nicked" and "Control on School Topics Sought" appeared in papers across the country. The Hatch amendment was painted as a vehicle of the "radical right" being used to inject "rightwing" values and beliefs into the school curricula thereby, according to

the media, jeopardizing "academic freedom."

Bosh! Mr. President, once again, the liberal press and various education lobbyists have misled the American people. Senator HATCH deserves applause for his wisdom and foresight in sponsoring this legislation.

Let the record be set straight: The Hatch amendment does not allow parents to censor the school curricula. Nor does it give parents the right to remove books which they find offensive from the library. So the claim that the Hatch amendment infringes "academic freedom" is totally without merit.

What the Hatch amendment does is to give parents the right to have their children excused from programs with psychiatric or psychological testing or treatment when the primary purpose of the examination is to reveal information about the seven areas specified in the statute. That is all. The Hatch amendment was enacted to protect the rights of parents to oversee the education of their children and to maintain family privacy.

Mr. President, not only has the Hatch amendment returned to parents their legal rights to determine the educational fate of their children, it has brought to light the effects of federally funded affective behavior teaching techniques which were introduced into the American classroom in the 1970's. Promoted as a way to help students clarify their own values, affective behavioral techniques often manipulate and weaken the values which parents have sought to instill in their children. Because of such techniques, the local public school has been transformed, all too often, from a center for learning to a laboratory for psychological testing.

Mr. President, in 1984, hundreds of parents testified at Department of Education field hearings throughout the United States on the Hatch amendment. Distraught parents told stories of how their children were required to participate in discussions, role-playing, questionnaires, and skits focusing on death, adultery, and abortion, among other subjects.

One mother testified:

My 16-year-old son's chemistry teacher explicitly described in class how to kill yourself "painlessly" by drowning yourself. The next night, my son tied some weights to his ankles and drowned himself in the swimming pool. It certainly was not painless, as he'd been told; he tried in vain to get loose and choked to death.

Another mother testified:

We recently lost a son to suicide from something he learned at school. My daughter was required to fill out a questionnaire on which she was asked if she had ever contemplated suicide.

A third witness testified,

My fifth-grade child was taken to a local funeral parlor to view the embalming room.

A fourth witness testified:

In a required English class, my daughter was asked to participate in a role-playing skit. She was asked to play the part of a prostitute and a boy in the class was asked to play the part of a married man. She was to ask the married man to come and live with her, as his wife had thrown him out over some disagreement.

And the horror stories go on and on.

Mr. President, I think it is essential to read the 1,300 pages of testimony in order to understand what is happening to our children in the classroom and to avoid being misled by catchy headlines railing at the Hatch amendment as some kind of an assault on academic freedom, which it absolutely is not.

Public outcry over these testing techniques will perhaps force school systems to reevaluate their curricula and to return our educational system to the responsible institution it once was. The American public deserves that.

Mr. President, I ask unanimous consent that a statement by Malcolm Lawrence be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objective, it is so ordered.

(See exhibit 1.)

Mr. HELMS. Mr. Lawrence, on March 1, along with Phyllis Schlafly, briefed congressional staff members on the effects of the Hatch amendment regulations, as well as the situation currently existing in many of our classrooms.

Mr. Lawrence holds an undergraduate degree in foreign affairs and a graduate degree in government and economic policy. In addition to a distinguished career in the Foreign Service, he has worked with former administrations on international narcotics control and drug abuse. Additionally, he has been active on the local level by founding the War-On-Narcotics League in Montgomery County and by serving on numerous education groups including Taxpayers for Quality Education [TQE] and Parents Who Care [PWC]. Currently, he is coordinator of the Maryland Coalition of Concerned Parents on Privacy Rights in Public Schools.

EXHIBIT 1

MALCOLM LAWRENCE

My name is Malcolm Lawrence. I am Coordinator of the Maryland Coalition of Concerned Parents, a group formed in 1974 to combat psychological probings, non-academic testing, and invasions of privacy of students and their families by public schools. The Coalition was a strong supporter of the Hatch Amendment, which became law on November 2, 1978, and of its implementing regulations, which became effective on November 12, 1984.

As widely reported by the media, parents throughout the United States are protesting against the performance of our public schools. Complaints are ranging from objectionable propaganda to invasion of privacy in the classroom to disagreement with the changing trends in education philosophy. The development of a nationwide pattern of educational materials and teaching techniques dating from the mid-1960s has been accompanied by a sharp deterioration in achievement test scores—a trend that has improved only slightly in the last two years. The schools have turned out millions of functional illiterates, and college textbooks are having to be rewritten because high school graduates simply cannot understand them.

Thanks in large measure to billions of dollars in federal government grants and contracts since 1965, the traditional basic skills of reading, writing, structured oral expression, history, and mathematics are gradually being squeezed out of the classroom by an onslaught of innovative conceptual social studies, new math, rap sessions, interpersonal relationships, non-verbal communication, role playing, psychodrama, sociodrama, and other psychotherapeutic techniques, self-actualization, self-revelation, and self-criticism through the use of personal diaries and logs, values clarification, behavioral modification, psychological testing, questionnaires, and other inquisitions, human sexuality and contraception techniques, worthless drug education, death education, and a steady flow of unevaluated pilot projects.

Classroom emphasis is rapidly shifting from the cognitive domain—what a student knows—to the affective domain—what a student thinks, feels, or believes. In recent paid advertisements, Mary Hatwood Futrell, President of the National Education Association, proclaimed that the schools must move away from the stuffed "sausage" approach—that is, learning facts—to the Mastery Learning Project. This is not only a cop-out for the past failures of the educators, but would get the classroom teacher deeper and deeper into psychological manipulation of the children. Mastery Learning uses stimulus response mechanisms to bring about so-called correct responses. The federally-funded ECRI program (Exemplary Center for Reading Instruction), a teacher training program for reading instruction, uses Mastery Learning and has been under attack from teachers as well as parents because it unabashedly recommends the use of Skinnerian stimulus-response operant conditioning techniques to promote "mastery" of the program's objectives. Mastery Learning experts label children as "human animals."

Parents throughout the country oppose these new and unevaluated programs not only because they are damaging their children's psyches, but also on the grounds that they are threatening the role of the family unit and bringing about a resocialization process for their children that is contrary to the principles on which our nation is based.

Under U.S. law based on well-recognized court decisions and legislation, parents have the primary responsibility for their children's education and pupils have certain rights which the schools may not deny. Parents have the right to assure that their children's beliefs and moral values are not undermined by the schools. Pupils have the right to have and to hold their values and moral standards without direct or indirect manipulation by the schools through curriculum, textbooks, audio-visual materials, or supplementary assignments.

Let me cite just a few Supreme Court cases:

Meyer v. *State of Nebraska* (1923)—Parents have the power to control the education of their own and the right to determine the subject matter taught to their children in school.

Pierce v. *Society of Sisters* (1925)—Struck down an Oregon law which attempted to force all children to attend public schools and gave parents the right to send their children to private schools.

Price v. *Massachusetts* (1943)—Ruled that the custody, care and nurture of the child reside first in the parents, whose primary function and freedom include preparation for obligations the state can neither supply nor hinder.

Abington School District v. *Schempp* (1963)—Ruled that the State may not establish a religion of secularism in the sense of affirmatively opposing or showing hostility to religion, thus preferring those who believe in no religion over those who do believe.

Wisconsin v. *Yoder* (1972)—Gave parents the right to keep their children out of schools when they believe that school attendance would endanger their children's religious faith and salvation. Quoting from the decision: "The history and culture of Western civilization reflect a strong tradition of parental concern for the nurture and upbringing of their children. This primary role of the parents in the upbringing of their children is now established beyond debate as an enduring American tradition."

We are most happy that on February 11 during his first press conference, the new Secretary of Education, William J. Bennett, made some strong statements in favor of parental rights on education. He said (and I quote): "Parents need to become more involved and assume greater responsibility in their children's education . . . parents are our children's first and most important teachers; classroom teachers are parent's trustees." Secretary Bennett also said that parents have seen materials that students have brought home from school and have been upset—they have been burned. And he concluded he would take a very close look at what his son was being asked to study because there are lots of things in schools that don't belong there.

In press interviews, Secretary Bennett has gone on record as favoring the Hatch Amendment and disagreeing with the groups that are lobbying for its repeal. He says he is opposed to values clarification, simulation exercises, guided fantasy techniques, encounter groups, and other such activities. He says parents have been sidestepped, even worse than sidestepped; they have been "opposed, ignored, laughed at, told to go away."

The Hatch Amendment and its implementing regulations have served as a rallying point for the many parents throughout our nation who have campaigned assiduously for the protection of their children from federally-funded programs designed for psychological and psychiatric examination, testing, and treatment in the classrooms of America. They view this law as a welcome measure to help preserve their parental rights in education, the most effective feature being written parental permission for sensitive areas for which federal funding has been and is being provided.

Consider the following examples of federally-funded programs and strategies:

A values strategy for elementary school children: "Who Comes to Your House?" In this exercise, children are asked to write the names of persons invited to their homes in the past year and indicate whether they are relatives, friends or other. Also, what their religion and race are and whether the children like or dislike them. The teacher is warned that this activity generates a good deal of emotional involvement and should not be entered into without enough time to work through some of the issues it raises. This exercise is used to detect racial and religious bigotry.

So-called drug abuse education: The curriculum entitled *Ombudsman*, which is disseminated through the National Diffusion Network ostensibly as a drug prevention course, has little if anything to do with drugs. Rather, it is a psycho-social, values clarification manual dealing with such techniques as role playing, encounter activities, feelings charades, warm fuzzies, love lists, self portraits, personal questionnaires, the trust fall, the human knot, who shall survive exercises, gravestone statements and death notices. The students are told that a creative tombstone may be an indication of a creative life.

In the National Institute of Education funded course *Global Education: State of the Art*, nationalism is labelled a narrow perception that must be changed. The course calls for a globalization of international education. Specifically, it states: "Certain changes must take place in the content, in the methods, and in the social context of education if schools are to become more effective agents of citizen education in global age."

Under the Federal Gifted Model Project *Chrysalis* for grades 5 through 9, students are asked to collect seven days of data on their dreams and to analyze the data to determine whether any patterns exist. They then write a summary telling they learned about their sleeping and dreaming patterns. In the same program, students are asked to imagine themselves lying on a sunny beach or sitting in a lush green meadow and to feel the sun beating down on them or feel the soft green grass; hear the waves on the shore; see the birds in the sky. Students are asked to share their visions with the class.

Life after death simulation mind games used to act out death, suicide and drug trips. In one exercise, children are asked to pretend they are dead, lying on the floor in a dark room with burning candles. They are to see themselves rise from their bodies and look down from the ceiling and watch their loved ones mourning. The students are asked: Do you think a suicide or violent death would yield as pleasant an experience as the one just acted out?

In a new Johns Hopkins University project supported by the National Institute of Education, students are asked the following questions:

Have you stolen or tried to steal something worth more than $50?

Been involved in gang fights?

Sold marihuana or other drugs?

Taken a car for a ride without the owner's permission?

Used force to get money or things?

Do you want to be like your mother or father?

How close do you feel to your parents?

How much do you like your parents?

Would you care if your parents were disappointed in you?

How often do you cheat on tests, come late to class, fight with other students, argue with your teacher?

Such exercises and questionnaires are commonplace in public schools throughout the United States and the use of psychology and group therapy is rapidly growing. Parents must have the rights to preview such activities and to give written permission for their use or non-use on children.

The Hatch Amendment should not only be retained, but should be broadened. As currently written, the Hatch Amendment provides parental rights only for programs and activities funded and administered by the U.S. Department of Education. It thus excludes education programs and activities funded and administered by the National Endowment for the Arts, the National Endowment for the Humanities, the National Science Foundation, the Department of Health and Human Services, and all other federal agencies which let contracts and provide grants relating to education programs and materials and classroom practices at the elementary and secondary levels. Clearly, these loopholes need to be closed.

In the meantime, let's give the Hatch Amendment—such as it is—a chance to work.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, do I have time remaining under my order?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. BYRD. I thank the Chair.

Mr. President, I yield back my time.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 15 minutes.

Mr. PROXMIRE. Thank you, Mr. President.

IS THE AMERICAN PRESS, OUR MOST IMPROVED INSTITUTION, THREATENED?

Mr. PROXMIRE. Mr. President, what is the most improved institution in America today? Is it the American corporation, the Congress, the Presidency, the American newspaper, our magazines, radio, television, the medical profession, the legal profession, the university in America, the American military forces, the economics profession, American science, our professional sports, American churches and synagogues, our vigorous trade associations, our public schools, the entertainment industry? Or is it some institution I have overlooked? Mr. President, my nomination for the most improved institution in America—and by a country mile—is the institution that is the most demeaned, insulted, and scorned: the American press.

Hardly a month has gone by in the past 200 years when the American press has not been scolded, derided,

sneered at, belittled. Our greatest philosophical Founding Father, Thomas Jefferson, often expressed his hatred of the press. At one time, he wrote that mankind would be better off without the press, that the important knowledge would become known anyway, and that the world would be saved the gross lies and distortions that color so much of what the press discloses. This was the same man who was our greatest champion of freedom of the press and insisted on riveting that freedom right into the Constitution in the first amendment. He was also the Founding Father who said that if he had to choose between government on the one hand and the press on the other as the most vital institution for the advancement of mankind, he would unhesitatingly choose the press. Some 150 years later, in 1941, H.L. Mencken aimed this diatribe at the American press. He wrote:

> The average American newspaper, especially of the better sort, has the intelligence of a hillbilly evangelist, the courage of a rat, the fairness of a prohibitionist boob jumper, the information of a high school janitor, the taste of a designer of celluloid valentines and the honor of a jailhouse lawyer.

But, Mr. President, that was not all. Mencken was just getting warmed up. Remember, H.L. Mencken was a newspaperman himself and one of the best in the long history of great American newspaper personalities. That same year, 1941, Mencken wrote:

> To the best of my knowledge and belief the average American newspaper, even of the so-called better sort, is not only quite as bad as Sinclair says it is but 10 times worse, 10 times as ignorant, 10 time as unfair and tyrannical, 10 times as complacent and pusillanimous and 10 times as devious, hypocritical, disingenuous, deceitful, pharisaical, pecksniffian, fraudulent, slippery, unscrupulous, perfidious, lewd, and dishonest.

The American press throughout our history and certainly today has had its critics in abundance. Today there are members of this body as well as members of the press itself who feel so strongly that the American press constitutes such a threat to basic American values that they are calling for a takeover of the Columbia Broadcasting Co. Such a takeover may be unlikely, but it is perfectly possible, if not of CBS, certainly of other networks and of important newspaper properties. Once such an ideological takeover succeeds in any area of the American press, it could lead the prompt way to a series of ideological seizures of the American press that could revolutionize the face of this free country far more decisively than any Presidential election.

And do not laugh and say it can not happen. The recent takeover of the massive American Broadcasting Co. by a relatively small firm may not have any ideological content, but it suggests how easily corporate raiders with real power in mind could change the face of the American press and in the process change the nature of American society.

Mr. President, this brings me back to my original contention that the American press is the most improved institution in this country. The criticisms of the American press by H.L. Mencen were written in 1941. Actually, they applied to the press that had existed in this country until it started to change in the 1930's. Senator HELMS and President Reagan are exactly wrong in inveighing against bias in American journalism in 1985. Apply those statements to 1930 or earlier and they would be right on target.

Do you deny this improvement? If you do, here is a challenge. Take a Chicago Tribune of 1930 and a Tribune today—or any other paper. Do a content analysis on a random text of news stories in each of the two periods. Apply your own standard of objectivity, balance, fairness, accuracy. What will you find? I will bet my mortgage against your nickel that in 95 percent of the cases you will find the 1985 paper conspicuously more balanced, more fair, more objective, more accurate. I challenge any Member of Congress to make this judgment based on his own standards.

For a number of reasons, the American newspaper and American television and radio are extraordinarily objective, fair, accurate, and comprehensive in their reporting. The typical Hearst paper of the 1920's and 1930's or the Chicago Tribune of that period made no bones about living up to every syllable of Mencken's condemnation. What a difference today. Virtually every newspaper article, every radio or television news report is conspicuously balanced, fair, and objective. Of course these reports emanate from human beings. Sometimes they make mistakes. But it is the rare editor who does not absolutely insist on fair and objective reporting. Indeed, most reporters today have been trained in journalism school. They have learned that the ethics of journalism requires a constant effort to be as truthful, as balanced, as objective as possible.

Self-respecting and trained reporters refuse to work for an editor who insists on prejudiced reports. Fifty years ago, a typical editor would determine that nothing good would be reported in his newspaper about any public figure he did not like. He could insist that nothing bad would be reported about a figure he did like. And he could get away with it. Not today. His reporters would not stand for it. His peers in the newspaper business would denounce it. And his readers have been conditioned by fair reporting long enough so they probably would resist it. Further, the business-oriented ownership of many newspapers, especially chain newspapers, have discovered that fairness and equal treatment for all is good business whether dealing with corporate management or labor unions.

For radio and television news reports, the same fairness forces that have done so much to improve our newspapers apply to TV and radio but with a strongly enhancing economic and technological difference. In the overwhelming majority of radio and television stations, virtually all the Federal news and most of the State news comes from the wire services. The AP and UPI are necessarily unbiased, and I mean scrupulously unbiased. And for a very obvious reason. These services sell to all kinds of clients—conservative, liberal, promilitary, antimilitary, pro big business, anti big business; so the wire service can only survive as a universal service by telling the truth and providing all important sides to controversial issues.

A Rather, a Koppel, a Jennings, or a Brokaw does indeed select the news, but these men cannot physically cover the stories they report. They must rely on reporters in the field. They and their network employers know that millions hang on their words and feel very free to criticize whatever any of the millions of listeners might view as biased, unfair or incomplete. These national mucky-mucks provide only a small part of the access to the facts that the typical American enjoys today. Does anybody get all—I repeat, all—of their news from Dan Rather or Tom Brokaw? Of course not.

The overall result today, Mr. President, is that the typical American gets more honest, more balanced, more unbiased, more accurate news about our country, our foreign policy, as well as local and State problems, than human beings have ever received before.

So what is the problem? The problem is that this remarkably improved system is threatened. The threatened takeover of CBS dramatizes the threat. The actual takeover of ABC, while probably devoid of any ideological consequence, describes the means. Today we have the best system of news gathering and dissemination we have ever had. But there is at least an outside chance that a combination of new corporate takeover techniques and ideological hubris may—just may—undermine it. It is worth watching, and closely.

S. 826—WESTWAY LANDFILL FUNDING PROHIBITION AND HUDSON RIVER HABITAT PROTECTION ACT OF 1985

Mr. PROXMIRE. Mr. President, today, along with Senators BRADLEY, HUMPHREY, and LAUTENBERG, I am introducing a bill to prevent the Federal Government from spending any funds for the design and construction of the Westway landfill.

New York deserves to replace the old West Side Highway, but the Westway project as designed gives new meaning to the phrase "highway robbery."

Instead of a simple highway replacement, costing as little as $54 million, project proponents went for the whole hog—a tasty $4 to $6 billion, for a real estate project masquerading as a highway.

And, what do New Yorkers get for this incredible price tag? About 10 percent of the entire Hudson River for 4.2 miles, over 200 new acres of landfill meant for real estate development and destruction of the prime habitat for an important fish species.

While this project was outrageous enought to merit my Golden Fleece Award in 1982, it looks even worse in 1985 in light of our $200 billion deficit. How can we ask anyone to sacrifice while a few well-connected real estate developers will get a multibillion dollar bonanza?

Not all New York politicians are dazzled by Westway's promises. In fact, the vast majority are opposed, including the Manhattan borough president, the city council president and city comptroller. Even two out of three current democratic candidates for mayor have come out in opposition to Westway.

No less than Robert Moses, the respect builder of New York's most important roads, said of Westway a decade ago:

> I am for public works and for government aid within reason but my imagination is staggered by the demand of a ninety or even fifty percent handout at Washington for a racetrack highway on the West Side of Manhattan. How much longer can such a shindig go on? Five years? Ten years?
>
> This is not orderly consideration. It is a mob dividing up state money, an Anvil Chorus, a byword, a hissing and a yapping, a spectacle of bamboozlement. If this is the road to progress, I am the retired Gaekwar of Baroda.

Even worse, Westway may prove a financial albatross for New York State and the Nation. Although the project is eligible for 90-percent Federal funding, the interstate highway construction program runs out in 1990, at least 5 years before Westway completion.

Where will the money come from to finish this road? From your pocket. Even with the highway trust fund, a $4 billion Westway eats up the equivalent of all of the Federal highway aid for a dozen States, for 5 years.

It is time to say—Westway, no way.

I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 826

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Westway Landfill Funding Prohibition and Hudson River Habitat Protection Act of 1985".

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) cost effective, environmentally sound transportation expenditures are necessary to enhance urban economic vitality and preserve efficient transportation systems in both urban and rural areas;

(2) demands upon the Highway Trust Fund for current authorizations through 1990 may exceed the revenues of the Fund, and national needs for the repair of existing highways and transit systems will place additional demands upon the Fund;

(3) the 4.2 mile Westway highway and landfill project is estimated to cost between $4,000,000,000 and $6,000,000,000 (including cost overruns, inflation, and interest) over its projected 10-year construction period, and the transportation needs of the area could be met for substantially less money by using nonlandfill alternatives;

(4) construction of landfills are not purposes for which funds in the Highway Trust Fund should be appropriated, expended, or obligated;

(5) the Hudson River is a valuable riverine and estuarine resource which makes major contributions to the marine ecology of the Atlantic coast and to the people of New York, New Jersey, and the Nation; and

(6) the landfill to be built in the Hudson River as part of the proposed Westway highway project would irreversibly destroy approximately 200 acres of this vital resource, eliminating forever an important habitat for striped bass and 21 other species of fish.

(b) PURPOSES.—The purpose of this Act is to prevent the expenditure of any Federal funds, including funds from the Highway Trust Fund, for the design and construction of the Westway landfill.

SEC. 3. PROHIBITION ON USE OF FEDERAL FUNDS FOR DESIGN AND CONSTRUCTION OF THE WESTWAY LANDFILL.

After the date of the enactment of this Act, the Secretary of Transportation may not make available, expend, or obligate any Federal funds (including funds from the Highway Trust Fund) for the design and construction in the city of New York, New York, of the Westway landfill which is proposed to extend an average of 600 feet beyond the bulkhead of Manhattan Island from North Moore Street to 42nd Street and is authorized by the permit numbered 13493 issued by the Department of the Army to the New York State Department of Transportation on February 25, 1985.

Mr. HUMPHREY. Mr. President, I am delighted to join the distinguished Senator from Wisconsin, Mr. PROXMIRE, and others in offering the Westway Landfill Funding Prohibition and Hudson River Protection Act of 1985.

With a massive tidal wave of deficits threatening to drown the economy of this country in a bottomless sea of red ink, it strikes me as absolutely outrageous that the Federal Government is prepared to needlessly spend billions of dollars on the gold-plated boondoggle called Westway. Yet that is exactly what will happen unless this legislation is enacted.

Westway is a proposed 4.2-mile stretch of highway to be constructed along the West Side of Manhattan. It is estimated that the total cost of the project could end up being in excess of $4 billion, maybe far more. In any case, the Federal taxpayer will be picking up the tab to the tune of billions.

At over $1 billion per mile, one would think that Westway's streets were paved with gold. Not quite. But Westway is without doubt one of the most extravagant projects to ever line up at the Federal trough. At the heart of the plan is the "luxury landfill" of more than 240 acres into the Hudson River. The roadway would tunnel through part of the landfill, and would be elevated on other parts. In all, however, the Westway landfill will create some 100 new acres of prime commercial real estate which will be available for development.

There will be a price for creating what will undoubtedly become fertile territory for countless UDAG grants of the future. First, there is the matter of the striped bass. After spawning in the Hudson River further north, the striped bass come to the shelter provided by the existing piers at the Westway site to spend their first two winters before migrating up and down the eastern seaboard.

The striped bass is not just another fish. It is a remarkable species which spawns in fresh water and then heads out for the ocean where it can grow to more than 60 pounds. It is the basis of a $200 million sports and commercial industry along the eastern coast which employs 6,000 people, There have traditionally been two other prime spawning areas besides the Hudson River—the Chesapeake region and the Albemarle Sound in North Carolina. But the Chesapeake area has been declining over the past 10 years, contributing to an overall decline of the total striper population. The situation has become so critical that last year Congress passed, and the President approved legislation that attempts to relieve pressures which have been put on the species. Moreover, the State of New York has passed legislation which would restrict the size and age of stripers which can be taken.

The National Marine Fisheries Service [NMFS] has estimated that up to 50 percent of the striped bass from Maine to the Carolinas now come from the Hudson River. Three Federal agencies—the U.S. Environmental Protection Agency, the Fish and Wildlife Service, and NMFS—have opposed the landfill because it would needlessly destroy an invaluable wildlife habitat. Indeed, it should be noted that dozens of other species call the Hudson home for all or part of the year, including the Atlantic sturgeon, menhaden, the blue-black herring and the shad. Evidence strongly suggests that the

Hudson is a critical link in the aquatic life system along the eastern seaboard.

What is so disturbing about the Westway plan is that the fiscal and environmental catastrophe that it would wrought can easily be avoided. There is no question that the city of New York has some pressing transportation needs. Those could be addressed by building an interstate highway on a scale more familiar to most Americans; that is, without a multibillion dollar real estate development area. Or, the city and the State could exercise their option to trade in interstate money for funds to improve mass transportation. More than 30 communities, including Boston and Washington, have used this option with considerable success.

The city and the State, hovever, are committed to pursuing the Westway plan. I do not believe that Congress should simply look on and watch Federal funds be spent so foolishly. There are many important issues of concern to the Nation involving the Westway plan, and it is important that they be given a hearing in Congress.

Mr. President, I commend the Senator from Wisconsin for again taking the lead on an issue as important to our environment as it is important to the Nation's Treasury. I am pleased to join in this effort, and I pledge to do all I can to ensure passage of this important legislation.

RESOLUTION CALLING FOR JOINT UNITED STATES-SOVIET COMMISSION ON NUCLEAR WINTER

Mr. PROXMIRE. Mr. President, we all hope and pray that the arms reductions talks the United States and the Soviet Union are conducting in Geneva will go well.

These are critically important talks not only for our national security, but also for the security of the entire world.

As these talks proceed, Mr. President, I believe it is crucial that both sides have a clear idea of what actually is at stake with these negotiations.

That is why today I am introducing with my good friend and colleague from Oregon, Senator HATFIELD, legislation calling for a Joint United States-Soviet commission to study nuclear winter and its implications for the national security of both nations.

Mr. President, I can think of no more important study that the United States and the Soviet Union could undertake than investigating the phenomena of nuclear winter.

If the nuclear winter theories prove correct, a nuclear confrontation between the United States and the Soviet Union might just result in a climatic catastrophe that could just about wipe out the human race.

If the nuclear winter theories prove correct, the nation launching a nuclear attack could face devastation from just from the climatic catastrophe its exploding warheads would touch off.

If the nuclear winter theories prove correct, the strategic doctrines of both superpowers might well be turned on their heads.

In other words, Mr. President, nuclear winter represents a deep, dark unknown—not only for this Nation, but for the Soviet Union as well.

Nuclear winter, therefore, is not only something the United States should begin studying intensively.

It's a phenomena we should make sure the Soviets are fully aware of.

Why? Because, both sides' arsenals have the capacity to touch off a nuclear winter. This should not be a case where one side investigates nuclear winter and the other side remains blissfully ignorant.

We cannot afford to let that happen. This is one area where we should have nothing to hide from the Russians.

Our resolution, Mr. President, expresses the sense of the Congress that the President should propose to the Soviet Union that the two countries establish a joint commission to study the atmospheric, climatic, environmental and biological consequences of nuclear war, which have been called nuclear winter, and to examine their impact for the national security of both nations.

The resolution asks that the work of the joint commission should include the exchange of information and findings on the nuclear winter phenomena, and the conduct of joint research projects that would benefit both nations.

The resolution also states that at some point the three other nuclear weapons states—Great Britain, France, and the People's Republic of China—should be involved in the work of the commission.

In the past few years a number of agencies have been researching nuclear winter and a number of studies and reports have been issued. The Department of Defense is presently investigating nuclear winter.

Last December, the National Academy of Sciences released a study which stated that there is a "clear possibility" that nuclear winter would be touched off by the detonation of just one-half of the world's nuclear arsenals.

And just last week, the Academy held a major symposium to review even more sophisticated studies of nuclear war's effect on the climate.

We also know that Soviet scientists have been studying nuclear winter.

It's time for both countries to begin pooling their research. The December report by the National Academy of Science recommended that a major research effort to narrow the uncertainties which remain with nuclear winter should be given "high priority."

That research should not only be a high priority in the United States. It should also be a high priority in the Soviet Union.

In the past, the two superpowers have established scientific exchange programs that have benefited both countries.

Certainly, a scientific exchange where the fate of the Earth may hang in the balance falls into that category. In fact, this is one research project we cannot afford not to work together on.

I ask unanimous consent to have the concurrent resolution printed in the RECORD.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

S. CON. RES. 36

Expressing the sense of the Congress regarding the establishment of a joint commission between the United States and the Soviet Union to study the concept of "nuclear winter" and its impact for the national security of both nations.

Whereas recent scientific studies indicate that a nuclear war would have disastrous atmospheric, climatic, environmental, and biological consequences, sometimes known as "nuclear winter";

Whereas such studies have revealed that a nuclear winter could result from a wide range of possible nuclear war scenarios, including a limited nuclear war;

Whereas a nuclear winter could have devastating consequences not only for the United States and the Soviet Union, but also for other nations of the world;

Whereas on December 10, 1984, the National Academy of Sciences released a report stating that there is a "clear possibility" such a climatic catastrophe would be touched off by the detonation of one-half of the current world arsenal of nuclear weapons;

Whereas the National Academy of Sciences reported that uncertainties remain over the nuclear winter phenomena and recommended that a major research effort to narrow those uncertainties be given "high priority";

Whereas research is also being conducted into the nuclear winter phenomena within the scientific community of the Soviet Union;

Whereas the research the United States and the Soviet Union are conducting into the nuclear winter phenomena could have a profound impact on the arms control policies and national security of both nations; and

Whereas, in the past, the United States and the Soviet Union have established scientific exchange programs that have benefited both countries and the establishment of a Joint United States-Soviet Commission to study nuclear winter would benefit both countries: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should propose to the Government of the Soviet Union during any arms control talks held with such Government that—

(1) the United States and the Soviet Union should establish a joint commission to study the atmospheric, climatic, environmental, and biological consequences of nuclear explosions, sometimes known as "nu-

clear winter", and their impact for the national security of both nations;

(2) the work of such joint commission should include the sharing and exchange of information and findings on the nuclear winter phenomena and the conduct of joint research projects that would benefit both nations; and

(3) at some point the other nuclear weapons states—the United Kingdom, France, and the People's Republic of China—should also be involved in the work of such joint commission.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

ARMENIAN GENOCIDE ANNIVERSARY COMMITTEE NAMES HONORARY CHAIRMAN

Mr. PROXMIRE. Mr. President, Krikor Derderian, at the ripe age of 109, is honorary chairman of Armenian Martyrs' Day on April 24, 1985.

Mr. Derderian is a truly remarkable man. He lives in Methuen, MA, in the heart of the Merrimack Valley. This soft-spoken man, hands calloused from years of hard work, has survived many hardships including famine, bloodshed, and deportation. His main wish is not to burden anyone. He is successful in his attempts, by living alone, staying self-sufficient, and has never seen the inside of a nursing home.

He is an admirable man on these merits alone. May we all live to be 109 and remain self-sufficient. His story, however, is even more remarkable. His life has spanned six massacres of Armenians dating back to 1894. During the 1915 massacres he dug a well and hid there for 2 weeks to avoid capture. He eventually escaped to the mountains where he lived with a mountain tribe for 4 years until the massacres ended. His recollection of the massacres are vivid.

> The Turks would come in and annihilate as many as they could and deport the rest. You could see the dead bodies littered all over the valley.

The high point of his life was when he became an American citizen. While life in America was a struggle at first, it was a struggle he did not mind making. When he first saw the Statue of Liberty, his eyes filled with tears. He is greatful for the freedom he enjoys in America, "Thank God I'm in America where there's so much freedom. You have to be an oppressed person to understand." It is the memory of oppression and death that Mr. Derderian believes must be passed on to future generations. It is the memory of genocide that also must not be forgotten. The events of the Armenian holocaust are a very real part of Mr. Derderian's life. We must ensure that personal experience with genocide does not become part of future generations' lives.

Mr. President, there would have been no more significant step we could have taken for Mr. Derderian, for all of the survivors of the Armenian and Nazi Holocausts, than to have completed our debate on the Genocide Convention this month. The symbolism of that action would have been incalculable but, at our current pace, we will not even have opened debate as the Days of Remembrance for the Victims of the Holocaust draw to a close.

The time for remembrance will always be with us, Mr. President. But the time for concrete action—the ratification of the Genocide Convention—is with us right now. Let us not delay any further. As soon as the Foreign Relations Committee reports the Genocide Convention, let us open debate immediately.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business, not to extend beyond 3 p.m., with statements therein limited to 5 minutes each.

VILLANOVA WINS NCAA CHAMPIONSHIP GAME

Mr. SPECTER. Mr. President, today is a day of particular pride for the Commonwealth of Pennsylvania as Villanova University has just emerged as the national champion for the NCAA basketball competition in a very exciting game played last night in Lexington, KY, where Villanova defeated an outstanding Georgetown team by the narrow score of 66 to 64.

The Villanova basketball team has a roster of heroes which brought the national championship to the school and to Pennsylvania. That roster of heroes includes Harold Pressley, Dwayne McClain, Ed Pinckney, Dwight Wilbur, Gary McLain, Harold Jensen, Mark Plansky, and Chuck Everson. These fine players are listed in the scoreboard for their outstanding play yesterday, under the leadership of Rollie Massimino, an outstanding basketball coach who is now a familiar figure in many households around this Nation and around the world. He is recognized for his energy, his enthusiasm, and his intensity as he masterminded and led the Villanova team to that remarkable victory.

The Villanova Wildcats were the cinderella team of the competition; a team which could not match other vaunted records coming into the playoffs, could not match the height of other teams, but surpassed all when it came to determination, to grit, to intensity, and to pure accuracy from the field goal range as well as from the free throw line.

Georgetown University also played masterfully. Their roster is deserving of great recognition—Bill Martin, Reggie Williams, Patrick Ewing, Michael Jackson, David Wingate, Perry McDonald, Horace Broadnax, and Ralph Dalton, under the leadership of Coach John Thompson.

The caliber of play was characterized, I thought eloquently in a column by Mr. Ken Denlinger in the Washington Post today, pointing out that:

> In losing the title this year, the Hoyas may well have played better than in winning it a year ago. It took a performance for the ages to wrest the crown off the Hoyas' heads.
>
> Make this one Cinderella marries Rocky, for Villanova's victory was more stunning than North Carolina State's in 1983. The Wildcats have just one player destined to make any impact on the pros; Georgetown is lots better than Houston.

In essence, the Georgetown Hoyas played masterfully. It took a virtually perfect game from the Villanova Wildcats to wrest the championship from the defending champion Georgetown Hoyas in one of the greatest basketball games ever played in this country, and certainly in the finals of the NCAA competition.

Obviously, Pennsylvania is very proud of Villanova's championship season, and I think the Nation can be proud of the great competition of college basketball, NCAA tournament, and the two teams which emerged last night to play for the national championship with the ultimate victor being the Villanova University Wildcats.

I know that I speak for many in the Senate, the House of Representatives, and the Congress of the United States in extending these congratulations to Villanova University for its outstanding performance in the championship game.

I thank the Chair, and I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SYMMS). Without objection, it is so ordered.

FREEDOM OF RELIGION

Mr. HEFLIN. Mr. President, recently I received from that great former Senator from North Carolina, Sam Ervin, a letter and an article he has written entitled, "The First Amendment Stands in Peril," which appeared in the publication Church and State in its February 1985 edition. Senator Ervin requested that this article appear in the CONGRESSIONAL RECORD, and I am delighted to bring it to the attention of all Members of the Senate and readers of the CONGRESSIONAL RECORD. While I am not in agreement with all of the positions that Senator

Ervin takes in the article, nevertheless, the article illustrates his scholarly and succinct thinking and throws light upon a subject that is dear to the hearts of all Americans. That subject is freedom of religion.

I ask unanimous consent that the attached article heretofore mentioned be printed in the RECORD of the proceedings of the Senate for this day.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE FIRST AMENDMENT STANDS IN PERIL

The most heart-rending story of history is that of man's struggle against civil and ecclesiastical tyranny for the simple right to bow his own knees before his own God in his own way. This is so because the story constitutes plenary proof of the truth of the observation of the French mathematician and philosopher, Blaise Pascal, who said: "Men never do evil so completely and cheerfully as when they do it from religious conviction."

North Carolina Supreme Court Justice Walter P. Stacy, one of America's wisest jurists of all time, described in a nutshell the nature and history of religious intolerance in his 1930 opinion in *State v. Beal.* He said: "There are those who feel more deeply over religious matters than they do about secular things. It would be almost unbelievable, if history did not record the tragic fact, that men have gone to war and cut each other's throats because they could not agree as to what was to become of them after their throats were cut. Many sins have been committed in the name of religion. Alas! the spirit of proscription is never kind. It is the unhappy quality of religious disputes that they are always bitter. For some reason, too deep to fathom, men contend more furiously over the road to heaven, which they cannot see, than over their visible walks on earth. . . ."

Learning from the lessons of history, the Founding Fathers of this nation desired that all Americans of all generations should enjoy religious freedom. To this end, they added the First Amendment to the Constitution: "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof. . . ."

What did the Founding Fathers intend to accomplish by the establishment and freedom of worship provisions of the First Amendment?

The meaning of the freedom of worship clause is clear. This clause is designed to secure to every individual within our borders the right to entertain any religious beliefs compatible with his own conscience, to practice his religious beliefs in any mode of worship not injurious to himself or others, to endeavor by peaceful persuasion to convert others to his religious beliefs, and to be exempt from taxation for the teaching of religion.

The meaning of the establishment clause is also crystal clear. By those words, James Madison and his contemporaries intended to prohibit the government from establishing any official relation between government and religion and to prevent government from using tax moneys to support religion in any way.

While I was one of its members, the U.S. Senate was confronted by two crucial questions relating to the First Amendment. The first was whether federal courts had jurisdiction to determine the constitutionality under the First Amendment of federal financial aid to church-related schools or colleges, an issue later settled favorably by the Supreme Court. The second question was whether the Congress should amend the First Amendment to allow school prayer.

The religion-in-public-schools issue developed because of court challenges to state laws mandating prayer and Bible reading. In cases decided in 1962 and 1963, the Supreme Court adjudged that by using their public school systems to require these religious exercises, New York, Pennsylvania, and Maryland violated the establishment clause of the First Amendment and that the regulation, statute, and rule requiring them were unconstitutional.

The Supreme Court decisions provoked an uproar of nationwide proportions. Multitudes of sincere Americans deemed the decisions to be an attack on religion in general and Christianity in particular.

The offices of senators and representatives were flooded with mail from constituents condemning the decisions and demanding that Congress submit to the states a constitutional amendment authorizing prayer and Bible reading in the public schools. Many senators and representatives hastened to comply with the demand.

On March 22, 1966, Senator Everett M. Dirksen, one of the Senate's most eloquent and influential members, introduced S.J. Res. 148, which proposed an amendment to the Constitution for the avowed purpose of permitting voluntary prayer in public schools and public buildings.

The political popularity of the Dirksen Amendment was revealed by the facts that it had the sponsorship of 48 senators, and the Gallup and Harris polls indicated that 80 percent of the American people supported it.

In speaking to the British House of Commons in 1842, Thomas B. Macaulay said: "Timid and interested politicians think much more about the security of their seats than about the security of their country." In making this comment, Macaulay had in mind the agonizing temptation which confronts legislators when they are compelled to choose between what they know to be politically expedient and what they believe to be right. As an exceedingly popular proposal surcharged with religious emotions, the Dirksen Amendment presented this agonizing temptation to many senators in an excruciating way.

As the result of much study of the history of man's struggle for the simple right to worship. Almighty God according to the dictates of his own conscience, I entertained this abiding conviction: When they decreed by the First Amendment that government "shall make no law respecting an establishment of religion, ior prohibiting the free exercise thereof," the Founding Fathers stated with precision the conditions indispensable to religious freedom in America, and any effort to alter their words by amendment poses an unacceptable threat to religious freedom in our land.

This abiding conviction impelled me to oppose the Dirksen Amendment, notwithstanding I was a senator from a Southern state where the King James Version of the Bible was generally accepted as truth, and where it was freely predicted that a senator would put his seat in jeopardy if he dared to oppose an amendment whose professed objective was simply to permit children to participate in voluntary prayer in public schools.

Fortunately for me, however, the future made it manifest that North Carolina clergymen comprehended the drastic implications of the Dirksen Amendment, and North Carolina laymen understood I was doing what I believe to be right in opposing it.

Senator Dirksen opened the Senate debate on his amendment on September 19, 1966. In a well prepared and well delivered speech, he asserted that the overwhelming majority of Americans favored his amendment; that his amendment harmonized with the traditions of the nation; that the Supreme Court had misinterpreted the First Amendment in the school prayer cases; that atheists and communists were trying to destroy religion in our country; and that prayer in public schools was vital to the moral education of our youth.

Opponents of the Dirksen Amendment selected me to bear the brunt of the debate against it. Their reasons for so doing were two-fold. First, they deemed it advisable for a senator from the so-called Bible Belt of the South to lead the attack on the amendment; and, second, they knew I had studied in detail the history of the First Amendment and the Supreme Court cases construing it.

At the outset of my remarks against the Dirksen Amendment, I emphasized the value of religion and traced the history of man's struggle for religious freedom. I emphasized the supreme importance of keeping church and state separate. I noted that the Supreme Court's decisions were not concerned with the voluntary prayers of individuals, but, on the contrary, merely adjudged unconstitutional state-sponsored and required religious exercises in public schools.

I pointed out that the Supreme Court had demonstrated (by the released time arrangement it upheld in *Zorach* v. *Clauson*) how interested groups could provide religious instruction for children attending public schools additional to that made available to them by home and church.

It is an idle dream to expect that prayer authorized or permitted by an official body will be voluntary in fact. The power conferred upon public school boards by a prayer amendment would be virtually unlimited and uncontrollable. The only professed limitation—that they could not prescribe the form or content of any prayer—amounts to no more than a pious hope. This is so because they could let others, such as ministers, priests, or rabbis selected by them, determine the forms and contents of prayers.

A school prayer amendment would confer upon public school boards a power the First Amendment now denies to Congress and the states, that is, the power to establish religion. The majority of a public school board could establish religion by directing or permitting prayers conforming to their religious opinions to the exclusion of prayers conforming to any and all other religious beliefs. Hence, the Dirksen Amendment would stir up religious discord by encouraging religious groups to fight each other for control of public boards having the awesome power to "provide for or permit" prayer in the schools they govern.

I told the Senate that some of my ancestors were among the Scottish Covenanters who were run down and murdered upon the crags and moors of Scotland because they dissented from the doctrines of the established church in that land. Others of them were Scotch-Irish Presbyterians, who were denied political and religious liberty in Ulster. Some of them were among the Huguenots, who were massacred in France

merely because they worshipped Almighty God according to the dictates of their own consciences instead of the dictates of the ecclesiastical and political rulers of France. Some of them were English Pilgrims, who were driven from their native England by way of Leyden, Holland, to Plymouth, because they did not want to use the prayers which the Church of England had inserted in the prayer book established by the act of Parliament. Some of them were Quakers who were despised because of the simplicity of their religion and way of life.

All of them came to America to obtain the simple right to bend their own knees and raise their own voices to their own God in their own way. I believe their experiences have some relation to the creation of my abiding conviction that religious liberty is the most precious of all freedoms.

In closing, I asked the Senate to ponder these questions: Why did the Founding Fathers incorporate freedom of religion in the First Amendment? What purpose did the Founding Fathers have in view when they did this?

The answer to these questions, it seems to me, appears with great clarity in the opinion of the late Supreme Court Justice Jackson in *West Virginia Board of Education v. Barnette.* I quoted what he had to say on this point:

"The very purpose of a Bill of Rights was to withdraw certain subjects from the vicissitudes of political controversy, to place them beyond the reach of majorities and officials and to establish them as legal principles to be applied by the courts. One's right to . . . freedom of worship . . . and other fundamental rights may not be submitted to vote; they depend on the outcome of no elections."

I closed with a prayer that the Senate would stand by the First Amendment as it had been written and interpreted.

When the roll was called in the Senate, 49 senators voted for the Dirksen Amendment, and 37 senators voted against it. Since the two-thirds majority required for a constitutional amendment was lacking, the amendment failed. William Fulbright of Arkansas, Ralph W. Yarborough of Texas, and I were the only Senators from the eleven Southern states who voted in the negative.

In an editorial comment, the *Washington Post* graciously called me "the authentic hero" of the debate on the Dirksen Amendment.

If any provision of the Constitution can be said to be more precious than the others, it is the provision of the First Amendment which undertakes to separate church and state by keeping government's hands out of religion and by denying to any and all religious denominations any advantage from getting control of public policy or the public purse.

This is so because the history of nations makes this truth manifest: When religion controls government, political freedom dies; and when government controls religion, religious freedom perishes.

The First Amendment stands in peril at this moment. It is being attacked on two fronts by divergent groups who possess much political power. One of these groups is composed of multitudes of well-intentioned people, whose piety blinds them to the nature of religious freedom. They are demanding that Congress submit to the states proposed constitutional amendments which, despite their protestations to the contrary, are based on the proposition that the public schools should undertake to teach state-supported religious views to the children attending them.

If religious freedom is to endure in America, the responsibility for teaching religion to public school children must be left to the homes and churches of our land, where this responsibility rightfully belongs. It must not be assumed by the government through the agency of the public school system.

The second group consists of clergymen, educators, parents and politicians who want the taxes of Caesar to finance the things of God. They demand that all Americans be taxed to finance the operations of private schools whose primary purpose is to teach to the children attending them the religious doctrines of the denominations which control them.

If religious freedom is to endure in our land, those of us who love it must heed the warning implicit in John Philpot Curran's aphorism: "The condition upon which God hath given liberty to man is eternal vigilance." Otherwise we will learn to our sorrow that Justice Sutherland spoke tragic truth when he said the saddest epitaph which can be carved for the loss of a vanished right is that those who had the power failed to stretch forth a saving hand while there was yet time.

Mr. HEFLIN. Mr. President, an article appeared in the March 1985 Progressive Farmer entitled "Tax Breaks for Farmers: Help or Hindrance?" I ask unanimous consent that the article appear in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TAX BREAKS FOR FARMERS: HELP OR HINDRANCE?

The U.S. Treasury would like to simplify your income tax. It has proposed repeals and consolidations of about 65 provisions of the law. And it would eliminate at least 16 tax forms and 10 lines from Form 1040.

Farmers applaud the idea. Very few are able to complete their annual income tax returns without professional help. But simplification would eliminate many of the tax breaks that farmers, and others, now enjoy.

At present, almost any farmer can reduce his tax bill by using just a few tax breaks. We took a recent study of farmers in Dodge County, Ga., by Peggy F. Barlett of Emory University to figure out some tax examples for the types of farmers she found.

RETIRED AND DISABLED FARMERS

This group made up 21% of all farmers, an important minority that is often overlooked. For the retiree, a judicious use of tax breaks shelters all income.

Farm work adds $4,000 to their annual cash flow in this example, all of which probably would be taxed if it came from a part-time job in town.

PART-TIME FARMERS

More than one-third of Dodge County's farmers fall into this category. A part-timer can shelter all of his income, but it costs him money out of pocket to do so. In this example, the amount of money spent for soil and water conservation must be proved. It can be borrowed money.

The part-timer must also pay his Individual Retirement Account (IRA) or other retirement fund contributions for himself and his spouse.

FULL-TIME FAMILY FARM

The man who farms full time is often described as the one who suffers most from the effects of tax breaks. In this example, however, the breaks are worth 13% more income, a good portion of which is net.

A high percentage—49% of the wives and 20% of the husbands—have off-farm income, according to Barlett. Almost all of this income is sheltered by tax breaks. A reduced tax rate, as proposed by the Treasury, would have to be substantial to offset these tax benefits.

LARGE-SCALE FARM

There's not much question that large-scale farmers, 8% of the Dodge County total, benefit from tax breaks. The ACRS and the investment credit together are enough to reduce tax bills sharply. These two breaks are the ones that the Treasury and other tax reformers want to get rid of most.

For these farmers, however, the farm is no more of a tax shelter than any other kind of business. According to Barlett, the median operator has been farming 25 years and is not what you would consider a tax-loss farmer.

She also reports that about half of these farmers are in financial trouble as measured by debts at 75% of assets or above.

HOW FARMERS WOULD FARE UNDER TREASURY CHANGES

Except for the loss of capital gains treatment if they sold the farm, retired and disabled farmers would probably be a bit better off with the changes. They would lose all the tax breaks except gas tax credits.

Their personal exemptions would double, and the elderly, blind, and disabled would gain an enlarged credit equal to 15% of their tax base. When that is deducted, a retiree's tax base income drops to $5,950, none of which would be taxable under the Treasury proposal.

Our sample part-time farmer would fare worse under the Treasury proposal. Taxes on his tax base before breaks would be cut in half by larger personal exemptions and child-care deductions.

At that point, however, the part-timer is hamstrung in sheltering income. He can still take deductions for IRA's for himself and his spouse. And these would be larger—$2,500 each instead of $2,000. But all other deductions from income are lost, as is the investment credit. The child-care deduction wouldn't reduce taxes as much as the child-care credit.

Our part-timer also would lose his capital gain treatment. If he produces livestock, this could push his taxable income a good bit higher.

Eliminating tax breaks would sharply boost the full-time farmer's tax bill. His bill before breaks would be nearly $1,000 lower, but after-break taxes would zoom to about $2,500 compared with only $51 under current law.

We assume that the full-time farmer will make capital improvements and replacement no matter how the tax law is written. Thus the loss of ACRS and investment credit would be a serious blow. He could reduce taxes by investing the maximum in an IRA or even more in a Keogh plan. But this would have to come out of money that had previously been used for living expenses.

Expensing is about the only worthwhile tax break left for the full-time farmer. This would allow him to reduce income by $5,000 in a good year by buying equipment.

As might be expected, the largescale farmer would be the hardest hit by the loss of tax breaks. Of course, he and all the rest

would pay no income taxes if there were no taxable income. According to the IRS, about two-thirds of all farmers who file returns report losses.

The end of ACRS and investment credit would cost our large-scale farmer more than $4,000 in taxes. Much of his capital outlay would have to be made irrespective of tax laws. Again, his taxes could be reduced by contributions to IRA's or Keogh plans, but would cost him more than $6 in contributions for every $1 of tax benefit.

The large-scale farmer could be looking at a big tax bill if he sold out without capital gains treatment.

Since there are as many examples as there are farmers, it's possible that the Treasury's tax proposal, or others like it, might be of benefit to some. But since land, improvements, and other capital assets make up the bulk of most farm estates, the loss of capital gains would hurt.

Except for the retired or disabled farmer with only modest returns from farming, the other Treasury proposals would hurt more farmers than they would help.

RETIRED AND DISABLED FARMERS

21 percent of farms (100 acres).

Depreciable buildings and equipment—$10,000.

No hired labor. About one-third work off the farm.

Estimated income and income taxes, 1982

Gross farm sales	$7,500
Cash expenses	−3,500
Cash farm income	4,000
Straight-line depreciation	−1,000
Farm income	3,000
Wages and salary	3,000
Social security (not taxed)	6,000
Other income	5,000
Gross income	17,000
Social security	−6,000
Two age-65 exemptions	−4,000
Tax base before breaks	7,000
Tax from schedule Y	411
Tax breaks deducted from income:	
ACRS on $3,000	−630
60 percent capital gains exemption	−540
Tax base after deductions	5,830
Tax from schedule Y	271
Tax breaks deducted from taxes:	
Credit for the elderly	−150
Gas tax credit	−20
Investment credit, $1,000 for used tractor	−100
Tax	1

PART-TIME FARMERS

37% of farms (130 acres). Depreciable buildings and equipment—$15,000. Seasonal hired labor.

One works full time off the farm, one works part time.

Estimated income and income taxes, 1982

Gross farm sales	$6,500
Cash expenses	−3,500
Cash farm income	3,000
Straight-line depreciation	−1,500
Other noncash	−500
Farm income	1,000
Wages and salaries	24,000
Gross taxable income	25,000
Four exemptions	−4,000
Tax base before breaks	21,000
Tax from schedule Y	2,673
Tax breaks deducted from income:	
ACRS on $5,000	−990
Soil and water conservation	−1,625
Two-earner marrieds	−500
IRA contributions	−4,000
Tax base after deductions	13,885
Tax from schedule Y	1,403
Tax breaks deducted from taxes:	
Investment credit	−503
Child-care credit	−810
Gasoline credit	−45
Tax	45

FULL-TIME FAMILY FARMERS

20 percent of farms (340 acres). Depreciable buildings and equipment—$40,000. Less than 50 percent hired labor; wife works off the farm part time.

Estimated income and income taxes, 1982

Gross farm sales	$75,000
Cash expenses	−52,500
Cash farm income	22,500
Straight-line depreciation	−4,000
Other noncash costs	−1,000
Net farm income	17,500
Wages and salary	10,000
Other income	3,000
Gross taxable income	30,500
Four exemptions	−4,000
Tax base before breaks	26,500
Tax from schedule Y	3,940
Tax breaks deducted from income:	
ACRS on $20,000	−3,780
Family wages	−2,000
Capital gains on cattle sales	−1,000
Two-earner married	−500
Tax base after deductions	19,220
Tax from schedule Y	2,321
Tax breaks deducted from taxes:	
Investment credit	−1,000
Child-care credit	−1,000
Gasoline credit	−270
Tax	51

LARGE-SCALE FARMERS

8 percent of farms (1,040 acres). Depreciable buildings and equipment—$170,000. More than 50 percent hired labor. Both work part time off the farm.

Estimated income and income taxes, 1982

Gross sales	$225,000
Cash expenses	−180,000
Cash farm income	45,000
Straight-line depreciation	−17,000
Other noncash costs	−4,000
Farm income	24,000
Nonfarm income	14,000
Gross taxable income	38,000
Four exemptions	−4,000
Tax base before breaks	34,000
Tax from schedule Y	5,100
Tax breaks deducted from income:	
ACRS on $85,000	−17,000
Two-earner marrieds	−500
Tax base after deductions	16,500
Tax from schedule Y	1,831
Tax breaks deducted from taxes:	
Gasoline credit	−800
Investment credit	−2,000
Tax (carryover investment credit)	−969

ALCOHOL EDUCATION INITIATIVES OF DISTILLED SPIRITS INDUSTRY

Mrs. HAWKINS. Mr. President, on February 7, 1985, the Senate Subcommittee on Alcoholism and Drug Abuse, which I chair, heard extensive testimony on the subject of beer and wine advertising on radio and television. The subcommittee heard from Federal agencies, consumer groups, brewers, vintners, broadcasters, advertisers, constitutional scholars and others.

Absent from the panels giving testimony were representatives from the distilled spirits industry. These corporate citizens and their trade association representatives were not kept out of the proceedings nor were they being derelict in their duty of presenting the interests of the industry on a very important issue. They did not testify for the very simple reason that for over 50 years now, America's distillers have voluntarily refrained from advertising on the electronic media.

Within months of the passage of the constitutional amendment repealing prohibition the distilling industry's leaders approved the first provisions of a still modern, voluntary code of good practice. The first code was approved on October 27, 1934. Restriction on radio advertising, advertisements in religious publications and the use of women in advertising date from early 1936. New language, modifying and strengthening this early code, was introduced as circumstances changed and new questions arose. Thus, the restriction on television advertising was added in 1948. The latest version of this code of good practice, enforced and monitored by the Distilled Spirits Council of the United States [Discus], was approved November 15, 1983. Discus represents approximately 90 percent of the Nation's distillers.

I am very much impressed with the initiatives taken by the distilled spirits industry to recognize and accept a special responsibility for the legal, moral and health problems attendant to alcohol abuse. A number of these initiatives, undertaken with the cooperation of other national and local citizen, research, health and education organizations, merit particular attention:

In 1982, Discus cosponsored, with the Department of Transportation [DOT] and other leading traffic agencies, the first national drunk driving conference held in 10 years. Both 1983 and 1984 saw another national "lifesavers conference" on drunk driving being held, with Discus as the preeminent cosponsor of the conference.

As an ongoing project, Discus has sponsored independent development of objective source materials for alcohol education in our Nation's schools. "Learning about Alcohol" is one of the major source books developed by the

National Education Association [NEA] under a series of Discus grants.

Discus is proud to be a continuing major supporter of the BACCHUS—Boost Alcohol Consciousness Concerning the Health of University Students—program and SADD—Students Against Driving Drunk.

Since the mid-1970's Discus has cosponsored public advertisements with the National Football League [NFL]. Last year Brian Holloway of the New England Patriots served as campaign spokesman. He urged communities through print, radio, and TV ads, to start alcohol education programs.

The Contract For Life, a document which both parents and teenagers sign agreeing that either may call home for help at any time they or their driver has had too much to drink to drive safely, is a public service program of Discus, the NFL, and SADD.

Know Your Limits [KYL] is a perennial safe driving campaign cosponsored by Discus, local industry groups, and government traffic safety agencies. More than 40 million KYL cards have been distributed to the public since the program began.

Discus also sponsors a cooperative, nationwide campaign of public service advertising. The educational theme is "If you choose to drink, drink responsibly." These award-winning messages appear in national magazines such as Business Week, Industry Week, Washingtonian, Changing Times, U.S. News & World Report, Newsweek, Rolling Stone, and TV Times as well as in over 120 newspapers.

In 1979, 10 national beverage alcohol associations, including Discus, in cooperation with the U.S. Treasury, formed the Licensed Beverage Information Council [LBIC] to undertake a public and medical education campaign on drinking and pregnancy.

During 1983-84, LBIC cosponsored with the Department of Health and Human Services [HHS] the Healthy Mothers, Healthy Babies public education campaign aimed at expectant mothers. In January 1985, LBIC was given the HHS Award, signed the Surgeon General and the Assistant Secretary for Health, for this program.

In 1982-83, the LBIC, in conjunction with the Outdoor Advertising Association of America [OAAA], initiated a Friends Don't Let Friends Drive Drunk billboard and radio public service campaign.

The 1984 billboard campaign was launched at the Department of Transportation with an endorsement by Secretary of Transportation, Elizabeth Hanford Dole. President Reagan lauded the campaign in a holiday season media broadcast.

In November 1984, Discus began its most recent educational, awareness program—Moderation is in the Public Interest—which encourages alcohol education at the community level.

Finally, let me say how pleased I am that one of my corporate constituents, the Miami-based Bacardi Imports Inc, is spending some $3 million this year, 30 percent of their advertising budget, on a series of ads educating consumers about the potency of various beverages and encouraging moderation in consumption. One particularly striking ad notes that "Bacardi Rum mixes with everything—except driving."

HONORARY CONSULAR CORPS

Mr. CRANSTON. Mr. President, I rise today to commend the services of the Honorary Consular Corps.

Honorary consuls, who number approximately 1,100, are U.S. citizens appointed by foreign governments to represent them in this country. The Honorary Consular Corps serves an extremely useful function because many nations cannot afford to have full-time consular officers throughout the United States. Honorary consuls step in to fill the gap providing information and assistance to foreign nationals visiting the United States and helping to expand our knowledge and understanding of other countries.

Honorary consuls perform many functions similar to those of career consuls. Like career consuls, they assist foreign representatives visiting the United States, and they help to welcome ambassadors, foreign ministers, trade officials and foreign dignitaries. They act as liasion when necessary and promote economic and cultural ties.

Because honorary consuls come from a variety of backgrounds and are not career diplomats, they also offer a different perspective on the United States. At the same time, they lend their own experience and expertise to the nations they represent and share useful insights about the United States.

One service of particular value is the work honorary consuls do to foster friendships between our country and a host of nations. In a world that daily becomes more intertwined, we cannot underestimate the importance of understanding and being understood by our neighbors on this Earth.

The work done by the members of the Honorary Consular Corps is a testament to their good will. They do not receive monetary compensation for their efforts. Theirs is a freely given and valuable contribution to making our world a better and more peaceful one.

THE MARY McLEOD BETHUNE COMMEMORATIVE POSTAL STAMP

Mr. THURMOND. Mr. President, one of the greatest tributes any American could receive is to have their image appear on a U.S. commemorative postage stamp. Thus, I am pleased that the U.S. Postal Service has recently issued a 22-cent stamp honoring the late Mary McLeod Bethune, a native of South Carolina.

Born in Mayesville, SC, in 1875, Ms. Bethune was the daughter of former slaves, and was raised in economic and educational poverty. Her determined family members pooled their humble efforts to send Ms. Bethune to a mission school. This was the beginning of a long, arduous, and legendary pilgrimage for one of our Nation's greatest educators.

After graduating from the Moody Bible Institute in Chicago, Ms. Bethune taught school in Georgia and South Carolina. She later moved to Daytona Beach, FL, were she founded the Daytona Normal and Industrial School, now Bethune-Cookman College.

Upgrading educational opportunities for blacks was only one of Mary McLeod Bethune's many achievements. She rose to national prominence as a pioneer in civil rights reform, and served as a leading government official and a trusted adviser to three U.S. presidents.

Indeed, Ms. Bethune's lifetime contributions continue to inspire others faced with seemingly insurmountable obstacles. Mary McLeod Bethune, a woman of conviction and determination, proved that no goal is unattainable when you believe in your cause, yourself, and most importantly, God.

Mr. President, on March 9, 1985, nearly 30 years after Ms. Bethune's death, the U.S. Postal Service held a ceremony in Mayesville dedicating the new stamp to this remarkable individual. My fellow South Carolinians and I are proud of the significant achievements of Mary McLeod Bethune, and I commend the U.S. Postal Service for commemorating her in such a deserving manner. In order to provide more details about Ms. Bethune, I ask unanimous consent that the following article from the Columbia (SC) Record and Ms. Bethune's biography be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Columbia (SC) Record, Mar. 10, 1985]

"CEREMONY RECALLS MRS. BETHUNE"

Mary McLeod Bethune was the 15th child in a Sumter County sharecropper's family, but she rose to be an adviser to four presidents.

Yesterday, at a ceremony in her hometown of Mayesville, U.S. Postal Service officials recalled Mrs. Bethune's extraordinary accomplishments and the legacy she left behind—a legacy or racial dignity.

The ceremony, which about 400 people attended, was held to cite the many reasons for issuing a stamp in honor of the late social activist and educator. The 22-cent commemorative stamp was issued last Tuesday.

On hand for the presentation was Rebecca McGee, Mrs. Bethune's 91-year-old niece, and Estrella McCoy, a high school student who asked postal officials in 1981 to issue a commemorative stamp in Mrs. Bethune's honor.

"I can remember how good she was," said Mrs. McGee, who was presented a framed portrait of the stamp. "She was a loving person. To know her was to love her."

Postal official Hebert L. Brown said Mrs. Bethune, who died in 1955 at the age of 80, was chosen for the stamp because "her character exemplifies the character of the nation, which is love, hope and faith.

He said Mrs. Bethune was a "very dignified" woman.

"She would want all black youths to be dignified, to be proud, and she left her legacy behind so you can be a dignified black person," Brown said.

Mrs. Bethune started Bethune-Cookman College and also founded the National Council of Negro Women. In 1936, she was appointed director of the Division of Negro Affairs for the National Youth Administration.

[Taken from the Dictionary of American Negro Biography]

BIOGRAPHY OF MARY JANE MCLEOD BETHUNE

Bethune, Mary Jane McLeod (1875–1955), educator, civil rights leader, advisor to presidents, and government officials. She was born July 10, 1875, in Mayesville, S.C., the fifteenth child of former slaves, Samuel and Patsy McLeod. Since she was one of their first children born free, her family struggled of send her to the local Presbyterian Mission School for Negroes. Through scholarships and jobs she attended Scotia Seminary (now Barber-Scotia College) in Concord, N.C., and Moody Bible Institute in Chicago. Upon graduation from Moody in 1895 she returned south to teach, first at Haines Institute in Augusta, Ga., and then in Sumter, S.C. In Sumter she met and married a fellow teacher, Albertus Bethune. The following year (1898) their only son, Albert McLeod Bethune, was born. In 1899 Mrs. Bethune taught in the Palatka (Florida) Mission School. After four years of work, she moved on to Daytona Beach, Fla., where in 1904 she founded the Daytona Normal and Industrial School (now Bethune-Cookman College).

Her herculean struggle to build this school over the next two decades brought her to national attention. In 1920 she became a vice-president of the National Urban League, She also served two terms as president of the National Association of Colored Women (1924–1928). Beginning with the Coolidge administration, she served as counsellor and advisor on Negro education and general problems of minority groups to five succesive presidents. Her participation in this capacity reached its zenith during the administration of Franklin D. Roosevelt. In 1935 she founded the National Council of Negro Women (NCNW) as an umbrella organization of Negro women organizations. Under the New Deal's National Youth Administration (NYA), Bethune served as director of the Division of Minority Affairs from 1936 to 1943. In 1945 as special representative of the State Department she attended the conference in San Francisco which established the United Nations. She was also special assistant to the secretary of war (1945) for the selection of candidates for the Women's Army Corps (WAC), established as the Women's Army Auxiliary Corps in 1942. From 1945 to her death in 1955 she was one of the more influential women in the United States. She died of a heart attack at her home in Daytona Beach on May 18, 1955. Funeral services were held in Bethune-Cookman Auditorium, where the eulogy was delivered by Howard Thurman. She was buried on the campus. She was survived by a son Albert, a grandson, a granddaughter, and five great-grand-children, all of Daytona Beach.

Among her many awards were the Spingarn Medal from the NAACP (1935), the Medal of Honor and Merit from the Republique d'Haiti (1949), the Star of Africa from the Republic of Liberia (1952), the Frances Drexel Award for Distinguished Service (1937), and the Thomas Jefferson Award (1942) for outstanding leadership. She was the recipient of numerous honorary degrees. Her death, just prior to her eightieth birthday, brought to a close an intense and unrelenting struggle for Negro progress and opportunity that spanned some sixty years.

The McLeod family, poor by national standards, were the symbol of stability and unity in the Negro community of Mayesville. Deciding against migration at the end of slavery, Samuel and Pasty McLeod gathered together their surviving fourteen children (some having been sold to neighboring plantations) and grandmother Sophia and struggled to buy land for a small farm. This tightly knit Methodist family fashioned, as far as their material resources allowed, a life that reflected highly set goals. Their priorities of securing land, storing food for harder times, and sharing with those less fortunate soon included an education for Mary Jane.

As a child, Mary McLeod was keenly aware of the differences between the comforts of the more affluent white family for whom her mother worked and the more barren realities of her home. Education, especially reading, became a key to this great gap in her early years because of an incident she experienced with the white daughter of that family. One day while playing, Mary picked up a book that was snatched by her white playmate who explained that since Negroes could not read, the book was not for her. To this child, reading then became the symbol of such differences between whites and Negroes as houses with windows and log cabins without them. Education remained high on her list of necessities for eliminating the gaps between Negroes and whites, although as her world widened she added many others, including political organizations, pride in oneself, faith, and skilled use of power.

The resources of the family were galvanized to send her to the local school. After she completed her studies there, her teacher, Emma Wilson, found a patron for her in a Mary Crissmon, a white Quaker schoolteacher from Denver, Colo., to finance her education at Scotia Seminary and the Moody Bible Institute, where she planned to become a missionary. When she finished in 1895 she was unable to gain placement as a missionary in Africa. At the age of twenty she was teaching school at Haines Institute in Augusta, Ga., under Lucy Laney. It was Laney who showed McLeod that there was an essential mission to be carried out among Negroes in the United States that was as worthy as a comparable one in Africa.

In 1897, while teaching at the Kindall Institute in Sumter, she married Albertus Bethune. When their son was only six months old, Mrs. Bethune accepted a teaching position in Palatka, Fla. After the reorganization of the Palatka Mission School, she was attracted by the problems and needs of the Negro workers building the railroad in Florida. In 1904 she and her son joined them in Daytona Beach, Fla. The Daytona Normal and Industrial School for Negro Girls was started the same year with the sum of $1.50. Within two years this school had grown to 250 students and included boys in the student body.

Bethune saw the school as the center of the community and thereby responsible to the entire Negro community. This philosophy, guiding her work over the next twenty years, led her to have a day and night school, a curriculum that included the development of the mind, hands, and heart through an integrated academic, vocational, and religious program; the organization of a series of mission schools serviced by her students in the turpentine camps surrounding Daytona Beach. She organized a hospital for Daytona Negroes after her students were refused service in the white hospital; her singing group visited jails as well as the local hotels; and in 1920 she organized the local Negro community to vote for municipal services in face of overt hostility from the local Ku Klux Klan.

The needs of the community soon demanded a larger campus, and in 1907, on the city dump nicknamed "Hell's Hole," the first building was completed on the new campus. Faith Hall and other buildings followed. Of her efforts to buy land for the campus, she wrote: "I have learned already that one of my important jobs was to be a good beggar; I rang doorbells and tackled cold prospects without a lead. I wrote articles for whoever would print them, distributed leaflets, rode interminable miles of dusty roads on my old bicycle, invaded churches, clubs, lodges, chambers of commerce. If a prospect refused to make a contribution I would say "thank you for your time." No matter how deep my hurt, I always smiled. I refused to be discouraged, for neither God nor man could use a discouraged soul."

These efforts brought her and the school lifelong friends among the affluent visitors who vacationed in Daytona. The major contributors were James M. Gamble of Procter and Gamble Enterprises and Thomas H. White of the White Sewing Machine Company. The needs of the school led her to travel in search of funds and support. Her work brought her much-needed support from the Negro leaders of the day such as Booker T. Washington and Mary Church Terrell of the National Association of Colored Women.

After serving on the National Child Welfare Commission during the Coolidge and Hoover administrations, she came to Washington in 1935 as a special advisor on minority affairs under the Roosevelt administration. By 1936 she had become the director of the Division of Negro Affairs in the NYA, and one of the few Negroes in the country who had personal access to the president. In her role as director, Bethune traveled the country inspecting the various projects set up to serve the needs of youth during the Depression. She was also able to influence the expenditure of NYA funds for such Negro institutions as Bethune-Cookman College.

The New Deal period provided fertile ground for national organizations. In 1935 Bethune organized the National Council of Negro Women in keeping with her theory that such a coalition would provide a more powerful platform from which to be heard. Following the same strategy, in August 1936

she called together Negroes holding various positions in the Roosevelt administration to her home to plan ways to secure the Negro's fair share of the New Deal. This group became known as the Black Cabinet, and was the foundation of two national conferences organized by Bethune, and supported by the NYA, to explore problems and solutions further. The "Blue Book" was the result of the first conference on civil liberties, held in January 1937. It was Bethune's task to deliver this report to the president, although the response to this statement of Negro concerns was slight, it remained a testimony of Bethune's efforts at effecting change and opportunity for her people. Her influence was particularly strong because of her personal friendship with Mrs. Eleanor Roosevelt.

With the United States entry into World War II, Mrs. Bethune pledged the support of the NCNW and saw the first Negroes hired in the National Defense plants who had been trained in the NYA centers. Although she supported the national effort, she never allowed it to be construed that she supported segregation in the armed forces, especially in the training of the Women's Auxiliary Army Corps at Fort Des Moines, Iowa (1917).

After the NYA ceased on Aug. 3, 1943, Bethune continued her work as an advocate of her people, though ill health had forced her to give up the presidency of Bethune-Cookman College in 1942. She missed no opportunity to make a point in the name of dignity and respect due every human being. She was widely known for not answering to "Mary," or "Auntie," or any of the other names commonly used to refer to Negro women. During a stay at Johns Hopkins hospital for a sinus operation in 1940, she demanded that two Negro doctors be allowed to observe the operation, a first for Johns Hopkins. Her doctors were among the many whites who were reprimanded for not addressing her properly as "Mrs. Bethune." Bethune developed a flair for dress, characterized by long capes, velvets, jewelry, and a cane that she said she carried for "swank." A big woman who made an impressive figure, she used it and her superb oratorical ability to influence audiences, especially in the United States. Of herself she said many times, "Look at me, I am Black, I am beautiful."

In the latter years of her life she continued to travel, against the wishes of her doctor, and to publish her views, with the assistance of Constance Daniels, in newspaper columns in the *Chicago Defender* and the *Pittsburgh Courier.* Her theories and philosophy were published in several anthologies, notably chapters in *What the Negro Wants* (1944) edited by Rayford W. Logan, and *Thirteen Americans, Their Spiritual Autobiographies* (1953) edited by Louis Finkelstein. In these efforts Bethune's image of herself as a missionary for her people, and all mankind less fortunate and shackled by racial and economic discrimination, was prominent. In her "last Will and Testament" (first published in *Ebony,* Aug. 1955, again in Sept. 1963, and for a third time in Nov. 1973) she emphasized several essentials for the forward movement of her people. Self-respect, pride, and love for oneself as a Negro were among the gifts she left to here "children." On her death, Mrs. William Thomas Mason, then president of the NCNW, said: "She built innumerable bridges between the races through her depth of understanding of the problems of the Negro people and the ideals of America." The *Pittsburgh Courier* ended its tribute to her with these words: "The accident of color made here Negro and she ennobled the word." On the ninety-ninth anniversary of her birth, a bronze statue commemorating her leadership was unveiled in Lincoln Park, Washing on, D.C. It was the first statue in hono of any woman and of any Negro in a put ic park in the nation's capital.

A more thorough treatment of Mrs. Bethune's life is in the following biographies: Catherine Owens Peare's *Mary McLeod Bethune* (1951), Rackham Holt's *Mary McLeod Bethune, a Biography* (1964), and Emma Gelders Sterne's *Mary McLeod Bethune* (1957). There is an obituary in *JNH,* probably written by William M. Brewer (Oct. 1955, pp. 393-95). Bethune kept a diary for most of her productive years and her papers are in the memorial erected for her on the Bethune-Cookman campus in Daytona Beach, Fla.—Bernice Reagon

TRIBUTE TO HON. PATRICIA ROBERTS HARRIS

Mr. HATCH. Mr. President, it is commonly said of those with whom we may disagree at the moment that they are "living in the past." None of us wants to be accused of using yesterday's solutions—which are now inadequate—as salves for today's problems. And so many here on the banks of the Potomac scramble to avoid that accusation that we are incapable of recognizing someone who may go to the other extreme, someone who truly lives in the future.

Just as we shun those who live in the past, so should we seek out and follow those who have a vision worth following of what life is to be. One such person, who perhaps lived so far in the future that she left us much too soon, was Patricia Roberts Harris.

Two examples of her forward thinking have been highlighted in comments about her since her death. As many people did who are now prominent in the United States, Mrs. Harris led a movement to desegregate a lunch counter here in Washington, DC. And as we have come to expect of many other women, Mrs. Harris graduated first in her class at the national law center at the George Washington University. What makes these events noteworthy to us is that she did these things so early. She led the lunch counter desegregation drive in 1943, years before President Truman ordered the military desegregated, and a generation before the famous sit-ins of the early 1960's that stirred the rest of the country to action against racial segregation. She graduated from law school in 1960, 4 years before the Civil Rights Act that many credit with opening the doors of professional education—and professional opportunity—to others of her sex.

Our national debates feature arguments that achievements such as these are difficult for women or blacks in 1985. It must have been nearly impossible for a woman and a black then.

Yet, Mrs. Harris did these things, and she did them as if to offer a preview of the life of service to Americans that was to follow.

She was the first black woman to serve in the Cabinet, first as Secretary of Housing and Urban Development, then as Secretary of Health, Education, and Welfare—the Department was restructured during her tenure, to become the Department of Health and Human Services when the Department of Education was created. Before that she was the first black woman to become an Ambassador, to become dean of a law school, and the first U.S. black to serve as a delegate to the United Nations. She ambitiously carried out the duties of these high Government positions. She performed her duties with great dignity and honor.

But these were only the most visible of her public services. Her service to education when she was outside of Government, as a member of the board of directors of Georgetown University and as a member of the Carnegie Commission on the Future of Higher Education—to pick two examples—is much less known, but no less noteworthy. Mrs. Harris pushed for reform of laws and government wherever she thought good might be accomplished during more than three decades—as a member of the United States-Puerto Rico Commission on the Status of Puerto Rico, and a member of the executive committee of the National Women's Committee on Civil Rights in 1963 and 1964—just prior to the passage of the landmark Civil Rights Act of 1964—as a member of the District of Columbia Law Revision Committee, as a member of the National Capital Area Young Womens Christian Association [YWCA], as a member of the Home Rule Committee for the District of Columbia, as a member of the National Committee on the Causes and Prevention of Violence, and as a trustee of the 20th Century Fund.

In honor of her outstanding accomplishment, no fewer than 23 different colleges and universities awarded her honorary degrees.

I was impressed again with Mrs. Harris' drive last year when the George Washington University was debating how and whether its outstanding part-time division of the national law center should be continued. I followed the controversy because that program has a disproportionately large impact on Utah, my home State. Outstanding graduates from the national law center's part-time division are found in all corners of the legal community in Utah, as lawyers and judges, and as congressmen and senators. The issue was a crucial one. When it appeared that a faculty vote on the issue would be very close, Mrs. Harris—who was by that time already

stricken with the disease that would eventually take her life—could not be kept from the faculty meeting, where she voted to continue the program. She voted in the minority that afternoon. But the simple fact that Mrs. Harris felt so strongly about the issue helped persuade the board of directors of the school to conduct an extensive study of the proposal to close the part-time division. In the end, the board crafted a plan to save and improve the program. That faculty vote which required so much effort for Mrs. Harris was, ultimately, not the deciding vote. She could have stayed away for the good of her health, and no one would have condemned her. But she made the effort to get to the meeting, sat through the hours of debate and voted—and that simple act, made under trying circumstances, helped push the decision the other way.

We suffer from a lack of people with the vision to see the solutions to the many problems we face. We suffer from a lack of people who can inspire others to see their vision of a better future, and inspire others to follow them to work to achieve that future. So, Mr. President, it is a serious blow to our Nation when we lose such a person, as we have recently lost Patricia Roberts Harris. I do not know of anyone to take her place, although I hope for our sake such people with such great talents exist. But I do know that our Nation will be much the better if just a few people would try to achieve as much as Mrs. Harris did in her life. Our Nation would be much improved if those who try were able to achieve only half as much.

Our Nation needs beacons, and she was a lighthouse. Patricia Roberts Harris will be sorely missed.

100TH, 150TH, AND 200TH ANNIVERSARIES OF SOUTH CAROLINA CITIES AND COUNTIES

Mr. THURMOND. Mr. President, the great State of South Carolina enjoys a rich heritage steeped in tradition. As one of the Original Thirteen Colonies, the Palmetto State has long been in the forefront of America's history.

During the American Revolution, South Carolina was a focal point of many pivotal events crucial to our Nation's founding. Battles such as Kings Mountain, Cowpens, Ninety Six, and Camden are just a few of the skirmishes which set the stage for an ultimate colonial victory over British troops.

Years later, South Carolina was the setting for yet another important occurrence. In Charleston Harbor, the first shots of the War Between the States resonated the deafening inauguration of our country's darkest era.

Throughout South Carolina, there are several towns, cities, and counties that have served as the backdrop to these historical occasions. These regions have matured with America, and have played an important role in the progress of our State and Nation.

Mr. President, 1985 marks the 100th, 150th, or 200th anniversary of 30 towns, cities, and counties in South Carolina. All across our State, these areas will be celebrating their foundings and incorporations with festivals, galas, parades, and banquets. I am especially pleased to congratulate those localities on their respective centennials, sesquicentennials, and bicentennials.

I know that my fellow South Carolinians and colleagues in the Senate would want to join me in recognizing the following towns, cities, and counties as they celebrate anniversaries this year:

200-YEAR CELEBRATION

Counties: Abbeville, Chester, Chesterfield, Clarendon, Darlington, Edgefield, Fairfield, Lancaster, Laurens, Marlboro, Newberry, Richland, Spartanburg, Sumter, York.

150-YEAR CELEBRATION

Cities: Aiken, Darlington.

100-YEAR CELEBRATION

Cities or towns: Foreston, Glenn Springs, Grahams, Knightville, Lewisdale, Martin's Depot, Modoc, Moncks Corner, Mt. Carmel, Rumphville, Tatum, Waterloo, Windsor.

TRIBUTE TO SAFER FOUNDATION

Mr. DIXON. Mr. President, I would like to call to the attention of my colleagues the superb work by the Safer Foundation of Chicago in easing the return to society of persons who have completed a sentence in prison.

The foundation will celebrate its 15th anniversary on April 18 with a dinner at the Hyatt Regency Hotel in Chicago, and a happy occasion it is.

The safer foundation is a not-for-profit group funded by both government and private sector contributions. It assists ex-prisoners in finding work and in so doing makes the entire community a better place to live.

Mr. President, the safer foundation serves as an excellent example of what can be accomplished when caring people work together with government and business.

I want to commend everyone involved with the safer foundation on the work they do, and I wish the organization the best of luck and a bright future.

THE SHINING PATH

Mrs. HAWKINS. Mr. President, late last summer my Subcommittee on Children, Family, Drugs and Alcoholism conducted a hearing into the connection between drugs and terrorism. During this hearing, numerous terrorist groups, funded in large part from the profits of illegal narcotics trafficking, were discussed. One of these groups struck me as particularly terrifying—"Sendero Luminoso"—the Shining Path of Peru.

This view is substantiated in a recent article in the Outlook section of the Washington Post on Sunday, March 24. In this article, a reporter who had lived in Peru, and had become familiar with Peruvian culture and society, discusses the adverse changes brought about by this terrorist group in Peru.

The Shining Path has had an impact not only on rural areas in Peru, but also on Peru's capital city of Lima. While this guerrilla group seems to specialize in terrorizing rural people who do not accept its domination, the city of Lima has also reacted to the terrorism of the Shining Path. As the author of the Washington Post article puts it:

> I was stunned to find soldiers and police with sub-machine guns on every corner facing the congested sidewalks. Arrests, explosions, and blackouts have become commonplace. At night, taxi drivers follow complex detours through the darkened streets to avoid the many barricades set up around police and military installations. The city's tension is palpable, all because of this small, strange band of revolutionaries.

The Shining Path is recognized as unique among terrorist groups for many reasons. Its emphasis on secrecy, its organization into small, independent cells, its small membership—estimated at 1,500 to 2,000—and its violent tactics tend to obscure its origins and its objectives. One conclusion is inescapable, however—the Shining Path of Peru is the most mysterious, and perhaps the most dangerous, terrorist group in Latin America today.

An aspect of the Sendero Luminoso particularly difficult to comprehend is the focus of their violence on members of their own ethnic group and economic class. The Shining Path uses the Communist logo—the hammer and cycle—and espouses Communist philosophy, but its sheer ruthlessness has led even the Chinese Communist Party to disavow the movement. This terrorist group continues to impose its presence, though, not by philosophical persuasion, but by imposing a reign of terror in whole sections of Peru.

The unstable economic, political, and social situations that exist in Peru certainly contribute to the success of the Shining Path; this, and the increasingly lucrative coca crop that funds their operations. In their professed desire to destroy modern society, the Shining Path has, and will, utilize any means, whether it is drug trafficking, murder, or kidnaping, to bring about this destruction. Through violence and fear, both the rural, Indian-speaking peasant population, and the urban, Spanish-speaking population of Peru are coerced into cooperating with the Shining Path. Peru's security forces have proved themselves unwill-

ing or unable to deal with this group. Although the military has exerted some effort to resist the growing domination of the Shining Path, it has too often been misdirected, and innocent citizens pay the price.

Mr. President, if there is anyone left on this Earth who thinks that illicit narcotics doesn't affect each and every one of us—from the most primitive, hut-dwelling peasant in the Peruvian mountains, to the most gifted, successful comedian in Hollywood—I would like him or her to read about the Shining Path. It is incontrovertable proof that those who deal in drugs are as deadly and destructive as the drugs themselves.

ADMINISTRATION POLICY ON CHILE

Mr. KENNEDY. Mr. President, on March 5, I placed in the RECORD an editorial from the New York Times of February 25, with remarks of my own, relating to the administration's questionable policy toward Chile. Subsequently, it came to my attention that the Times on February 28 had printed an Editors' Note acknowledging that part of the editorial had been based on a news dispatch published on February 21 that had quoted Assistant Secretary of State Langhorne A. Motley out of context.

Yesterday, the Senator from Alaska, Mr. MURKOWSKI, placed the Editors' Note in the RECORD. Although my remarks on Chile in the March 5 RECORD referred to other comments by Mr. Motley, they did not mention the quotation at issue in the Editors' Note published by the Times on February 28.

Mr. President, in this situation, I believe it is worthwhile to have all the relevant materials appear in one place in the RECORD. I ask unanimous consent that my comments of March 5, the original New York Times editorial of February 25, the news dispatch printed on February 21, and the Editors' Note of February 28 may be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Congressional Record, Mar. 5, 1985 (p. S2457)]

ADMINISTRATION POLICY ON CHILE

Mr. KENNEDY. Mr. President, I have read with interest recent press reports that the Reagan Administration has stepped up efforts to move Chile's 11-year-old military dictatorship toward a return to democracy. The first manifestation of this policy was the administration's commendable decision to abstain on a $130 million industrial recovery loan to Chile by the Inter-American Development Bank in order to protest the renewal for another 90 days of the state of siege imposed by General Pinochet last November. The recent visit of Assistant Secretary of State Langhorne Motley to Chile and the upcoming visit of Deputy Assistant Secretary of Defense Nestor Sanchez were reportedly planned for the purpose of pressuring the Chilean Government and the non-Communist opposition to resume a dialog on a timetable for a transition to democracy.

The visit of Mr. Motley, however, suggests that the administration's new approach to Chile is more smoke than fire. According to press resports, he told American businessmen in Chile that the administration's abstention on the bank loan was a concession to congressional pressure and did not indicate a change in policy toward Chile. Mr. Motley is also reported to have said that "it would not be appropriate for a gringo to try to muscle General Pinochet." This statement stands in sharp contrast to the administration's willingness to use pressure to force the leftist regime in Nicaragua to democratize—even to the point of threatening to overthrow it if it does not include opposition elements in the Government.

Given his reluctance to exert pressure on Pinochet, it is not surprising that Mr. Motley's trip brought such meager results. A State Department official said that Pinochet "did not give * * * any specific dates nor calendars nor chronology" for democratic reforms but only gave Mr. Motley vague assurances about an eventual transition to democracy.

Mr. President, unless the United States is willing to use its substantial economic leverage by blocking multilateral development bank loans to Chile, the Pinochet regime will not budge from its stubborn refusal to carry out democratic reforms. High-level visits that signal the administration's unwillingness to use pressure will not persuade Pinochet that we are serious about encouraging democracy in Chile but will only give him greater respectability and demoralize the democratic opposition. In a recent editorial, the New York Times eloquently described the folly of the administration's approach to Chile. I request that the entire text be included in the Record at this point.

There being no objection, the material was ordered to be printed in the Record, as follows:

FOUR MORE YEARS IN CHILE?

The Reagan Administration is reconciled to four more years of military dictatorship in Chile and not even embarrassed to say so. That is the incredible message delivered there this week by Assistant Secretary of State Lanhorne Motley. He rests easy with the Pinochet regime's plan to permit no elections until 1989. No one should be either alarmed or fooled by Washington's recent refusal to vote for new international loans to Chile. That was only an empty gesture intended to impress liberals in Congress.

Mr. Motley's diplomacy is truly breathtaking. He was the highest ranking American visitor to Chile since General Pinochet reimposed a state of siege last fall and ended all pretense of liberation. The mass roundups of a decade ago were resumed, alienating Chilean politicians of every stripe and leading to the dismissal of Sergio Onofre Iarpa, the most impressive civilian in the Pinochet Cabinet.

How did all this impress Mr. Motley? "My impression is this destiny of Chile, in Chilean hands, is in goods hands."

This appalling stance is particularly hard to take from an Administration that has been claiming so much credit for the restoration of democracy in a number of South American countries. Its unwillingness to give any credit to the pressures applied by the Carter Administration once seemed only partisan. Now it seems right to wonder whether the Reagan team feels any responsibility for political trends in the hemisphere.

Much depends on the Chilean drama. Across the continent the future constitutional position of the military is a subject of delicate negotiation. Continuing violence and unrest in Chile, which the dictatorship invites with its policies, make life even more difficult for the fragile democracies in neighboring states. A democratic restoration, however, could brighten economic prospects, facilitating regional cooperation and pressure foreign investors.

For decades prior to 1973, Chile was a democratic redoubt in a sea of Latin dictators. Today, the reverse is true. It may take four years or more to get rid of this dictatorship, but even one year should be too long for representatives of the United States.

[From the New York Times, Feb. 21, 1985]

U.S. ENVOY, ENDING CHILE VISIT, AVOIDS ANY CRITICISM OF PINOCHET

SANTIAGO, February 20.—A high-ranking Reagan Administration official said tonight that Chile still has "a way to go" in its political development, but in contrast to recent State Department declarations, the official avoided virtually any criticism of the Chilean Government.

"My impression is this destiny of Chile, in Chilean hands, is in good hands," said Langhorne A. Motley, Assistant Secretary of State for InterAmerican Affairs, who was ending a four-day visit here.

Mr. Motley's departure statement at the airport and responses to questions seemed to underscore the feeling among some opposition leaders and businessmen he met with during his four-day trip here that the United States would not dramatically step up pressure on Chile's leaders to bring about a transition to democracy.

"Fundamentally, President Reagan believes each country sets the pace at which it goes through the transition to democracy," Mr. Motley said. In response to a question about the concerns of the United States, he added that he would not use the word "concern," but "interests."

Mr. Motley listed those interests as "stability" and the country's ability "to have economic development for the people."

Recent State Department declarations have stressed Washington's "concern over the course of events in Chile and specifically the absence of a dialogue between the Government and the democratic opposition." Mr. Motley's unexpected visit was announced soon after Gen. Augusto Pinochet renewed a state of siege earlier this month, and restated his intention to remain in power until at least 1989. It was viewed as one of a series of recent developments that could signal a possible change in American policy toward Chile.

But while here, Mr. Motley stressed to various groups that the Reagan Administration would not change its policies substantially, according to opposition leaders.

Some diplomats have said they favor the idea of pressing the Government to appoint a congress or hold mayoral elections. These proposals, however, seem unlikely in the current political situation, in which the Government has imposed strict press censorship and delayed acting to permit political parties to organize.

The Administration, opposition leaders and officials seemed more concerned that the Government follow through in prepar-

ing the country for a transition to democracy in 1989 than in speeding up that process.

In line with this objective, they said they expected the United States to continue to apply diplomatic pressure to end the state of siege and lift press censorship, but did not expect stronger action such as attempts to block loans from international lending agencies.

"They are not ready to use any economic leverage," an opposition leader said.

To protest the Government's human rights record, the United States recently abstained from voting on a loan from the International Development Bank. But Mr. Motley tried to reassure businessmen here that the abstention was a concession to Congressional pressure and did not indicate a change in policy toward Chile, according to an American businessman.

Mr. Motley did not comment on any loans, but seemed to indicate the Reagan Administration was willing to give Mr. Pinochet more time to show progress in a transition to democracy. He said that the Government had yet to carry through with certain tasks the 1980 Constitution envisioned as taking place between 1980 and 1989, such as the law to legalize the registration of political parties. However, he added, "it is also correct to say that this is 1985 and not 1989."

In the next six months, the World Bank will consider two loans for Chile—one for $10 million to $12 million and another for $600 million over the next three years, according to economists.

Failure to get the larger loan would be devastating to Chile, they said. But diplomats and politicians here doubted that the United States would make a serious effort to block the loans.

In part, they said, Washington was unlikely to pursue such action because officials doubted it would have any effect. "The fact of the matter is that Pinochet doesn't give a damn about the U.S.," a businessman said.

Mr. Motley met with general Pinochet, nearly all top Government officials and opposition leaders during his visit, which was reported extensively by the press here and included a day of fishing in southern Chile. Rather than making any statements critical of the Government, State Department officials stressed to the local press that he was here "to listen" and "to learn."

One political source said Motley had left his meeting with President Pinochet even more convinced that the military ruler had no intention of giving up power early or making room for the political parties.

The State Department is said to be most concerned about the delay in the law legalizing political parties and would consider an announcement of the law as an indication of some progress, according to diplomats and local party leaders.

"We will have a political parties law soon and that will calm things down," a Chilean political leader said. "The U.S. will be happy with that."

But even if the law was announced, parties would still be prevented from organizing because of the state of siege.

[From the New York Times, Feb. 28, 1985]

EDITOR'S NOTE

Under this heading, The Times amplifies articles or rectifies what the editors consider significant lapses of fairness, balance or perspective.

A dispatch from Santiago in late editions last Thursday reported on a visit to Chile by a high-ranking official of the Reagan Administration.

The official, Langhorne A. Motley, Assistant Secretary of State for Inter-American Affairs, was quoted as saying in his departure statement, "My impression is this destiny of Chile, in Chilean hands, is in good hands." (An editorial on Monday, based partly on that report, also cited the quotation.)

By omitting the context of Mr. Motley's remarks, the dispatch may have left a misleading impression about the "Chilean hands" to which he referred.

Mr. Motley's full comment was: "From my perspective, I think that Chile has faced challenges and come a long way and, I think, still has a way to go. But the important thing, I think, for me to take back to the leaders of my Government is that the destiny of Chile is in Chilean hands—and by that I mean all Chileans: people in the Government, people that want to participate in the political process, people in the economic and social arena. And the impression that I take back to the leaders of my Government is that this destiny of Chile, in Chilean hands, is in good hands."

MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate on April 1, 1985, during the recess of the Senate, received a message from the President of the United States submitting sundry nominations; which were referred to the appropriate committees.

(The nominations received on April 1, 1985, are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 4:50 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 730. An act to declare that the United States hold in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, Arizona.

The message also announced that pursuant to the provisions of section 3 of Public Law 94-304, as amended by section 1 of Public Law 99-7, the Speaker appoints as majority members of the Commission on Security and Cooperation in Europe the following Members on the part of the House: Mr. HOYER, Cochairman, Mr. FASCELL, Mr. YATES, Mr. WIRTH, and Mr. MARKEY.

The message further announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1239) making urgent supplemental appropriations for the fiscal year ending September 30, 1985, for emergency relief and recovery in Africa, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 13, and agrees thereto, and it recedes from its disagreement to the amendments of the Senate numbered 2, 6, 8, 9, and 14 to the bill, and agrees thereto, each with an amendment in which it requests the concurrence of the Senate.

MEASURE HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent pending further disposition:

H.R. 730. An act to declare that the United States holds in trust for the Cocopah Indian Tribe of Arizona certain land in Yuma County, Arizona.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-133. Concurrent resolution adopted by the General Assembly of the State of Arkansas; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE CONCURRENT RESOLUTION EXPRESSING FULL SUPPORT FOR UNITED STATES RESOLUTION 65 OF 1985 BY ARKANSAS SENATOR DALE BUMPERS

"Whereas, Arkansas is in the forefront of states concerned about the future of our soil and water resources; and

"Whereas, the Soil Conservation Service is an integral part of insuring the future value of these resources; and

"Whereas, United States Senate Resolution 65 of 1985, by Arkansas Senator Dale Bumpers et al, commends the Soil Conservation Service and the agency's efforts to strengthen our Nation's agriculture base and expresses full support for continued funding for the Soil Conservation Service and the critical programs that it administers. Now therefore,

"Be it resolved by the Senate of the seventy-fifth General Assembly of the State of Arkansas, the House of Representatives concurring therein; That the Arkansas General Assembly fully supports the intent of United States Senate Resolution 65 of 1985, and hereby voices its support for the Soil Conservation Service and the program it administers, and that upon adoption of this Senate Concurrent Resolution, a copy hereof shall be transmitted by the Secretary of State to the presiding officer of the United States Senate, the United States House of Representatives, and to each member of the Arkansas Congressional Delegation."

POM-134. Concurrent resolution adopted by the Legislature of the State of Michigan; to the Committee on Agriculture, Nutrition, and Forestry.

"SENATE CONCURRENT RESOLUTION No. 64

"Whereas, High interest rates, coupled with low grain prices, decreasing land values, the strong dollar and declining exports have caused grave concern among farmers and economic experts throughout the United States; and

"Whereas, There is currently serious concern within the agricultural community that the federal government will repeal programs that have provided farmers financial aid during recent years and enact a federal

farm program that is less than attentive to the urgent needs of American agriculture; and

"Whereas, With the spring planting season just weeks away, farmers need capital to put in their crops; now, therefore, be it

"Resolved by the Senate (the House of Representative concurring), That the members of the Michigan Legislature strongly urge the Congress of the United States to expeditiously enact legislation authorizing the Commodity Credit Corporation to advance part of the non recourse loan that farmers receive for sealing grain to pay for spring planting expenses. This advance could be handled by local Agricultural Stabilization Conservation Service offices which are already in place, requiring no extra funding and would be paid back at the 9⅛ percent rate at which the Commodity Credit Corporation receives money; and

"Be it further resolved, That copies of this resolution be transmitted to the President of the United States, the Speaker of the United States House of Representatives, and to the members of the Michigan Congressional delegation."

POM-135. A resolution adopted by the Kodiak Island Borough Assembly supporting continued funding of the Essential Air Service Program; to the Committee on Appropriations.

POM-136. A resolution adopted by the Council of the City of Honolulu, Hawaii recommending that the City Council and the Executive Branch combine efforts to obtain Fort Derussy; to the Committee on Armed Services.

POM-137. Joint resolution adopted by the Legislature of the State of Wyoming; to the Committee on Commerce, Science, and Transportation.

"ENROLLED JOINT RESOLUTION No. 2

"Whereas, Congress enacted the Staggers Rail Act of 1980 to provide for the deregulation of competitive rail traffic; and

"Whereas, Congress in the Staggers Rail Act also provided certain protections for captive shippers against the exercise of monopoly power by the railroad; and

"Whereas, the Interstate Commerce Commission has failed to implement the protections for captive shippers provided in the Staggers Rail Act; and

"Whereas, the Interstate Commmerce Commission has implemented the Staggers Rail Act in such a way that captive shippers cannot effectively challenge the reasonableness of rail rates; and

"Whereas, the uncontrolled exercise of monopolistic pricing power by railroads has resulted in excessive rates and has seriously affected the markets for coal, trona, agricultural and other products and other commodities produced in Wyoming and other states; and

"Whereas, the demand for Wyoming coal and other commodities will continue to be depressed by unreasonably high rail rates, thereby affecting the Wyoming economy generally through the loss of jobs and tax revenues; and

"Whereas, the protection of captive shippers is not inconsistent with the maintenance of a strong and viable railroad system; Now, therefore,

"Be it resolved by the members of the legislature of the State of Wyoming:

"SECTION 1. That the members of the Wyoming legislature urge Congress to enact legislation that will provide captive shippers with workable protections against unreasonably high rates imposed by railroads exercising monopolistic powers and establish fair and equitable procedures which require the railroads to establish the reasonableness of such rates or which allow effective competition so the free market may establish more reasonable rates.

"SECTION 2. That the Secretary of State transmit copies of this resolution to the Secretary of State and presiding officers of the houses of the legislature of each of the other states in the Union, to the President, and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from Wyoming in the Congress of the United States, to the clerk of the United States House of Representatives and to the Secretary of the United States Senate."

POM-138. A joint resolution adopted by the Legislature of the State of Idaho; to the Committee on Environment, and Public Works.

"S. JOINT MEMORIAL No. 104

"Whereas, International, trade is and will continue to be a significant factor of the United States' economy; and

"Whereas, the economy of the State of Idaho is dependent upon domestic and international trade; and

"Whereas, shallow-draft and deep-draft waterborne commerce plays a dominant role in the transportation of Idaho's major commodities; grain, forest products, manufactured goods and petroleum; and

"Whereas, almost 9 million tons of cargo moved through the lock at Bonneville Dam in 1984, which brings Bonneville Lock close to its annual capacity of 13 million tons; and

"Whereas, a new lock is necessary at Bonneville Dam to make it conform with the dimensions of the other lock systems on the Columbia-Snake River system; and

"Whereas, the increasing volumes moving through Bonneville Lock are causing congestion and time delays for barge traffic and could surpass Bonneville's capacity by the end of the decade; and

"Whereas, a study conducted by 34 ports along the Columbia-Snake River system in Idaho, Oregon, and Washington have identified Bonneville Lock as the major constraint to growth on the system; and

"Whereas, a potential threefold increase in the amount of cargo moving on the system by the end of the century is foreseen if the constraits are removed; and

"Whereas, the Idaho congressional delegation has made authorization of the new Bonneville Lock a priority issue because of its importance to the economic health of the region. Now, therefore

"Be it resolved by members of the First Regular Session of the Forty-eighth Idaho Legislature, the Senate and the House of Representatives concurring therein, That the Congress of the United States support construction of a new lock at Bonneville Dam with dimensions of 86 feet by 675 feet that would thereby make it compatible with other lock systems on the 465 mile Columbia-Snake River system.

"Be it further resolved, That the Congress of the United States is urged to make timely approval of project authorization for the construction of the new lock at Bonneville Dam.

"Be it further resolved, That the Secretary of the Senate be, and she is hereby authorized and directed to forward copies of this Memorial to the President of the United States, the President of the Senate and Speaker of the House of Representatives of Congress, and to the congressional delegation representing the State of Idaho in the Congress of the United States."

POM-139. A resolution adopted by the Chief Executives' Conference of the Federated States of Micronesia; to the Committee on Energy and Natural Resources.

"CEC RESOLUTION No. 7-1

"Whereas, on October 1, 1982, the Government of the Federated States of Micronesia and the Government of the United States of America executed a Compact of Free Association, culminating 15 years of evaluation and negotiations on the question of the future political status of the Federated States of Micronesia and its relationship with the United States of America; and

"Whereas, on June 21, 1983, a United Nations-observed plebiscite on the future political status of the Federated States of Micronesia was held, with 79% of the voters participating in the plebiscite choosing to approve the Compact of Free Association; and

"Whereas, the plebiscite constituted a valid act of self-determination by the people of the Federated States of Micronesia, and was conducted in such a manner as to represent a free and voluntary choice by the citizens of the Federated States of Micronesia as to their future political status and relationship with the United States of America through informed and democratic processes; and

"Whereas, promptly following the plebiscite, the Compact of Free Association was approved unanimously by the Congress of the Federated States of Micronesia and the requisite number of State Legislatures of the Federated States of Micronesia in accordance with the constitutional processes of the Federated States of Micronesia, as required by section 411 of the Compact of Free Association; and

"Whereas, it is now approaching two years since the people and governments of the Federated States of Micronesia clearly expressed their deep desire to terminate the United Nations Trusteeship which has now endured for almost 38 years, and to enter into a free association relationship with the United States of America, based on mutual cooperation and friendship; and

"Whereas, approval of the Compact of Free Association without further dealy is in the interest of the people and governments of the Federated States of Micronesia to complete their transition to full self-government according to their clearly expressed desires; and

"Whereas, it is also essential to the interests of the United States of America to foster long-term stability and close relationships in the region and to facilitate timely termination of the last U.N. Trusteeship by approving the Compact of Free Association with undue delay; now, therefore,

"Be it resolved, by the Seventh Chief Executives' Conference of the Federated States of Micronesia, that the Congress of the United States is urged to approve the Compact of Free Association as early as possible during its current session; and

"Be it further resolved, that certified copies of this resolution be transmitted to the President of the United States of America, the Speaker of the United States House of Representatives, the President of the United States Senate, the President Pro Tempore of the United States Senate, the Majority and Minority leaders of the United States House of Representatives and the United States Senate, the Chairmen and

Ranking Minority Members of the appropriate U.S. Congressional Committees and Subcommittees, the President's Personal Representative for Micronesian Status Negotiations, the U.S. Secretary of State and the U.S. Secretary of the Interior."

POM-140. A resolution adopted by the Chief Excutives' Conference of the Federated States of Micronesia; to the Committee on Energy and Natural Resources.

CEC RESOLUTION No. 7-2

"Whereas, on October 1, 1982, the Government of the Federated States of Micronesia and the Government of the United States of America executed a Compact of Free Association, which will serve as the basis for termination of the "Trusteeship Agreement for the Former Japanese Mandated Islands"; and

"Whereas, the Compact of Free Association has been approved by the people and governments of the Federated States of Micronesia in accordance with the constitutional processes of the Federated States of Micronesia and the terms of the Compact; and

"Whereas, the Compact of Free Association is now pending before the Congress of the United States for approval; and

"Whereas, the people and governments of the Federated States of Micronesia deeply hope and desire that the Compact of Free Association will be approved by the United States Congress and the Trusteeship terminated early in 1985; and

"Whereas, under the present Trusteeship Agreement, the Government of the United States agreed to promote the economic . . . social . . . and . . . educational advancement . . . of the Federated States of Micronesia in fulfilment of the United States' obligations under the United States Charter; and

"Whereas, the people and governments of the Federated States of Micronesia have repeatedly raised over a number of years certain issues, including funding for the construction of new national capital facilities in Pohnpei; funding for a new campus to replace the existing deteriorated and inadequate facilities of the Community College of Micronesia; full completion of the five-year Capital Improvement Program and correction of deficiencies in existing infrastructure, particularly public facilities such as schools and hospitals; funding for the prior service benefits program; compensation for past and future use of indefinite land use properties; and war claims; and

"Whereas, the Federated States of Micronesia considers the above-mentioned matters to be outstanding Trusteeship obligations; and

"Whereas, these matters were not addressed in the Compact negotiations, on the assumption that the United States Government would fulfill its obligations prior to the implementation of the Compact; and

"Whereas, fulfillment of these obligations is essential to achievement of the goals forming the foundation of our future free association relationship with the United States and our mutual objective of achieving increased economic development and self-sufficiency; and

"Whereas, upon implementation of the Compact of Free Association, the Federated States of Micronesia will face an overall reduction of around $16.0 million in U.S. grant assistance available for operational and service activities, particularly as the result of the termination of U.S. federal programs; and

"Whereas, immediate withdrawal of U.S. federal programs, without careful formulation of transition plans for the phase-out or replacement of these programs, will have serious adverse impacts on essential services currently provided to our people, particularly in the health and education areas, and equally negative impacts on our employment and tax bases; and

"Whereas, in the Compact of Free Association, the United States Government has agreed to provide the Federated States of Micronesia with technical assistance, and continuation of such technical assistance, particularly during the transition to free association, is imperative; now, therefore,

"Be it resolved, by the Seventh Chief Executives' Conference of the Federated States of Micronesia, that the United States Government, in connection with its consideration of the Compact of Free Association, is urged to take action to resolve its outstanding Trusteeship obligations, either by appropriating funding in FY 1986 or making a firm commitment now to appropriate the necessary funding in the future; and

"Be it further resolved, that the United States Government is urged to take steps to ensure successful implementation of the Compact of Free Association, including enactment of the authorizations and appropriations necessary for a smooth and orderly phase-out or replacement of U.S. federal programs and for continued provision of technical assistance on a non-reimbursable basis; and

"Be it further resolved, that certified copies of this resolution be transmitted to the President of the United States of America, the Speaker of the United States House of Representatives, the President of the United States Senate, the President Pro Tempore of the United States Senate, the Majority and Minority leaders of the United States House of Representatives and the United States Senate, the Chairmen and Ranking Minority Members of the appropriate U.S. Congressional Committees and Subcommittees, the President's Personal Representative for Micronesian Status Negotiations, the U.S. Secretary of State and the U.S. Secretary of the Interior."

POM-141. A resolution adopted by the House of Representatives of the State of New Mexico; to the Committee on Finance.

"A MEMORIAL OPPOSING THE PROPOSED FEDERAL LEGISLATION TO ACCELERATE DEPOSITS OF SOCIAL SECURITY CONTRIBUTIONS FROM THE PUBLIC EMPLOYEES' RETIREMENT ASSOCIATION TO THE FEDERAL TRUST FUNDS

"Whereas, the members of the Public Employees' Retirement Board of the Public Employees' Retirement Association (PERA) recognize the seriousness of the proposed federal legislation to accelerate the deposits of social security contributions to the federal government trust funds; and

"Whereas, currently, the social security contributions are deposited twice monthly, and should the proposed legislation become law, the state would lose all excess social security interest which is generated as a result of investing the contributions, which would be a loss to the general fund of some five hundred thousand dollars a year, not including the dramatic loss which would be suffered by all local governments and institutions of higher education which would bring the total loss in the entire state to some one million two hundred thousand dollars each year; and

"Whereas, the state and its entities can ill afford to lose this amount of money each year; and

"Whereas, the Public Employees' Retirement Board and Association entered into an agreement on September 29, 1955 and guaranteed one hundred percent of the liability in collecting the social security contributions for the federal social security administration; and

"Whereas, the PERA has complied to the fullest extent in fulfilling its obligations under the federal-state agreement; and

"Whereas, the PERA has never changed the federal social security administration for any of the many services it and its board have rendered to the federal social security administration; and

"Whereas, the PERA has provided a service which has resulted in definite cost savings by providing expertise in administering the very complex coverage under Section 218 of the Social Security Act; and

"Whereas, the PERA has worked hand in hand with the federal social security administration for the betterment of the social security system in all aspects; Now, therefore, be it

"Resolved by the House of Representatives of the State of New Mexico that it opposes the proposed federal legislation to accelerate deposits of social security contributions to the federal trust funds; and be it further

Resolved, that the accelerated deposits would be not only a hardship to all states and their political subdivisions but would also create an unbearable burden on government at all levels; and be it further

Resolved that copies of this Memorial be sent to the President of the United States, the Speaker of the House of Representatives and the President Pro Tempore of the Senate of the United States and to each of the New Mexico Congressional Delegation."

POM-142. Concurrent resolution adopted by the Legislature of the State of South Dakota; to the Committee on Finance.

"SENATE CONCURRENT RESOLUTION No. 16

"Whereas, when South Dakota residents purchase goods via telephone or mail from out-of-state catalog retailers and have the goods delivered to them, no retail state sales tax or use tax is paid to South Dakota; and

"Whereas, in such an aforementioned case no sales tax is paid to the state in which the goods were purchased; and

"Whereas, South Dakota and the other states of the union experience large tax losses when persons purchase goods via telephone or mail from out-of-state catalog retailers; and

"Whereas, it is very difficult for the states to collect this tax revenue without interfering with interstate commerce; and

"Whereas, it is in the common interests of all the states to close this tax loophole; and

"Whereas, the federal government has the authority to regulate interstate commerce and could pass legislation to correct this loophole: Now, therefore, be it

"Resolved, by the Senate of the Sixtieth Legislature of the State of South Dakota, the House of Representatives concurring therein, that Congress be hereby requested to consider legislation to require catalog retailers to collect a uniform state sales tax on retail sales conducted via the telephone or mail to out-of-state purchasers and to provide a mechanism whereby such a tax would be distributed to the state where such purchase was delivered; and be it further

"Resolved, that the Secretary of the Senate of the state of South Dakota forward copies of this Resolution to the South Dakota congressional delegation, the Clerk of the United States House of Representa-

tives and the Secretary of the United States Senate."

POM-143. Concurrent resolution adopted by the Legislature of the State of Hawaii; to the Committee on Agriculture, Nutrition, and Forestry.

"S.C.R. No. 23

"Whereas, Hawaii's sugar industry is a vital component of the State's economy and has provided gainful employment and income for many of the State's residents; and

"Whereas, Hawaii's sugar producers are among the most productive, innovative, and efficient sugar producers worldwide; and

"Whereas, sugar is a widely produced commodity and almost every producing nation has highly protective market mechanisms to support its domestic sugar industry; and

"Whereas, United States' sugar producers cannot economically compete in a world market wherein better than 80 percent of the sugar is either controlled, pre-purchased or subsidized; and

"Whereas, despite the imposition of sugar import quotas, significant amounts of foreign surplus sugar are dumped in the United States which has contributed to depressed sugar prices; and

"Whereas, the sugar price support provisions of the 1981 Farm Bill have enabled U.S. domestic sugar producers to continue operations and have proven to be acceptable to nearly everyone; and

"Whereas, the sugar program has operated without cost to the government, given stability to domestic sugar prices, and assured consumers an adequate supply of sugar at reasonable prices; and

"Whereas, the price supports provided domestic sugar in the Farm Bill as well as the import quotas set by the U.S. Department of Agriculture will expire in 1986; and

"Whereas, the Farm Bill has worked well in the past and is in the best interests of agricultural producers and consumers throughout the United States as well as in Hawaii; now, therefore, be it

"Resolved by the Senate of the Thirteenth Legislature of the State of Hawaii, Regular Session of 1985, the House of Representatives concurring, that the Congress of the United States is requested to include sugar price support provisions within its 1985 Farm Bill; and be it further

"Resolved that certified copies of this Concurrent Resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, the Secretary of the United States Department of Agriculture, and to each member of Hawaii's Congressional delegation."

POM-144. A resolution adopted by the Council of the City of Jacksonville, Florida urging Congress to support the continued funding for the operation of the National Railroad Passenger Corporation (AMTRAK); to the Committee on Commerce, Science, and Transportation.

POM-145. Concurrent resolution adopted by the Legislative Assembly of the State of North Dakota; to the Committee on Finance.

"HOUSE CONCURRENT RESOLUTION No. 3029

"Whereas, due to the severe economic crisis in the agriculture industry it is becoming increasingly common for American farmers to seek protection under federal bankruptcy proceedings; and

"Whereas, the federal bankruptcy law should allow individuals protection and a chance to begin anew after making all nonexempt property available to their creditors; and

"Whereas, the sale of farmland in bankruptcy proceedings presently results in a nondischargeable income tax liability for capital gains on the property due to the low basis of most farmland; and

"Whereas, farmers, having been forced to go through a bankruptcy proceeding and lose their farm, are faced with payment of capital gains tax for the sale of the property, from which they received no benefit, because any benefit from the sale inures to the benefit of their creditors; Now, therefore, be it

"Resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein: That the Forty-ninth Legislative Assembly urges the Congress of the United States to enact legislation to remove the priority for and make dischargeable the income tax debt for capital gains on farmland sold in bankruptcy proceedings to pay creditors of the bankrupt; and be it further

"Resolved, that the Secretary of State forward copies of this resolution to the President of the United States Senate, the Speaker of the United States House of Representatives, and to each member of the North Dakota Congressional Delegation."

POM-146. Joint resolution adopted by the Legislature of the State of Idaho; to the Committee on Foreign Relations.

"HOUSE JOINT MEMORIAL No. 12

"Whereas, Afghanistan has endured five years of occupation by Soviet military forces; and

"Whereas, the Afghan people have been subjected to devastating bombing of their civilian population; and

"Whereas, strong evidence indicates that chemical and/or biological weapons have been used against the Afghan people; and

"Whereas, the valiant Afghan Freedom Fighters continue to bravely resist the Soviet occupation forces; and

"Whereas, the Freedom Fighters are ill-equipped to resist the powerful and sophisticated Soviet war machine with the World War II vintage weapons available to them; and

"Whereas, the Mujahedin will fight to the last man to resist the Soviet aggressors, and with a minimum amount of modern weaponry could inflict great and costly damage, especially to the Soviet Air Force.

"Now, therefore, be it resolved by the members of the First Regular Session of the Forty-eighth Idaho Legislature, the House of Representatives and the Senate concurring therein, that the Idaho Legislature condemns the unforgivable actions of the Soviet Union against the people of Afghanistan.

"Be it further resolved that the Idaho Legislature recognizes the valor of the Afghan people and honors, supports and encourages them in their struggle for freedom.

"Be it further resolved that the Idaho Legislature urges the President of the United States and the Congress of the United States to increase our support for the Freedom Fighters to include the supply and delivery of modern anti-tank and surface-to-air missiles to allow the totally committed and brave Afghan people a chance for victory, and causing costly losses to the Soviet Union.

"Be it further resolved that the Chief Clerk of the House of Representatives be, and she is hereby authorized and directed to forward copies of this Memorial to President Ronald Reagan, Secretary of Defense Caspar Weinberger, Director of the Central Intelligence Agency William J. Casey, the President of the Senate and the Speaker of the House of Representatives of Congress, and the congressional delegation representing the State of Idaho in the Congress of the United States."

POM-147. A joint resolution adopted by the Legislature of the State of Idaho; to the Committee on Foreign Relations.

"HOUSE JOINT MEMORIAL No. 5

"Whereas, the Soviet Union does not work toward the best interest of the Free World but rather works to advance the oppressive and suppressive principles of Communism; and

"Whereas, the Constitution of the United States is based on the principles of freedom, including freedom from oppression; and

"Whereas, the government of the United States is burdened with a tremendous fiscal deficit.

"Now, Therefore, be it resolved by the members of the First Regular Session of the Forty-eighth Idaho Legislature, the House of Representatives and the Senate concurring therein, that we urge the Congress of the United States to take action necessary to prevent loans to the Soviet Union including, but not limited to, notifying banks that the United States will no longer guarantee loans to the Soviet Union and that any existing loans should be collected and paid in full.

"Be it further resolved that the Chief Clerk of the House of Representatives be, and she is hereby authorized and directed to forward copies of this Memorial to Ronald Reagan, the honorable President of the United States, the President of the Senate and the Speaker of the House of Representatives of Congress, and the congressional delegation representing the State of Idaho in the Congress of the United States."

POM-148. A resolution adopted by the House of Representatives of the State of New Mexico; to the Select Committee on Indian Affairs.

"A MEMORIAL RELATING TO THE SANTA FE INDIAN SCHOOL

"Whereas, the Santa Fe Indian School has been located in Santa Fe, New Mexico and has been providing education to all the native American people of New Mexico since New Mexico was formed as a territory; and

"Whereas, the school continues to provide education to hundreds of native American children each year; and

"Whereas, the United States Department of Indian Education is attempting to limit the service area of the Santa Fe Indian School to the Pueblo Indian communities only; and

"Whereas, all the Indian Pueblos and tribes of New Mexico have gone on record opposing this restriction and have indicated that the school be open and available to all the Indian people who have historically been served by the institution;

"Now, therefore, be it resolved by the House of Representatives of the State of New Mexico that it respectfully requests the United States Department of the Interior to:

"A. Refrain from any policy directives and oppose any regulations or legislation that might limit the geographic area of service by the Santa Fe Indian School;

"B. Keep the Santa Fe Indian School open for admittance of all Indian children historically served by the school; and

"C. Expend every effort to ensure its existence through financial and administrative support; and

"Be it further resolved that copies of this memorial be sent to the Secretary of the Interior, the President pro tempore of the United States Senate, the Speaker of the United States House of Representatives and to each member of the New Mexico congressional delegation."

POM-149. A joint resolution adopted by the Legislature of the State of California; to the Committee on Labor and Human Resources.

"ASSEMBLY JOINT RESOLUTION No. 24

"Whereas, Since 1970 the State of California has been receiving Developmental Disabilities Act funds from the federal government for researching, planning, and monitoring activities on behalf of citizens with "developmental disabilities"; and

"Whereas, California has used this federal funding to support the State Council on Developmental Disabilites, the Area Boards on Developmental Disabilities, the University Affiliated Facilities, and Protection and Advocacy, Inc.; and

"Whereas, The Developmental Disabilities Act of 1984 (P.L. 98-527) was signed by President Reagan and became effective on October 19, 1984; and

"Whereas, Pursuant to Sections 122 and 142, the act established new requirements which the state must comply with and implement by March 15, 1985, in order to continue receiving federal funds; and

"Whereas, The federal Administration on Developmental Disabilities issued program instructions on November 9, 1984, requiring certain assurances from California's State Council on Developmental Disabilities and Protection and Advocacy, Inc. relative to the new requirements and as a condition for continued receipt of federal funds; and

"Whereas, Assurances that the new requirements will be met must be submitted to Regional Office IX of the Administration on Developmental Disabilities not later than March 15, 1985, or continued funding for the formula grant awards for the third and fourth quarters will not be issued to California; and

"Whereas, Certain statutory changes to the Lanterman Developmental Disabilities Act will be necessary before the assurances can be given; and

"Whereas, A.B. 41 (Margolin) has been introduced with the intent of making the necessary statutory changes, but the bill cannot be enacted with the requisite statutory changes to become effective by March 15, 1985; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California jointly, That the Legislature of the State of California affirms its intent to proceed diligently to enact legislation to make statutory changes necessary to facilitate compliance with and implementation by the state of the new requirements of the Developmental Disabilities Act of 1984 (P.L. 98-527); and be it further

"Resolved, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States and the federal Administration on Developmental Disabilities to continue federal funding participation in the state's developmental disabilities programs with the understanding that the state is moving diligently toward full compliance with the law; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the federal Administration on Developmental Disabilities."

POM-150. A resolution adopted by the House of Representatives of the State of Kansas; ordered to lie on the table.

"HOUSE RESOLUTION No. 6049

"Whereas, Kansas farmers and all other members of the Kansas agricultural economic community are in immediate need of government support; and

"Whereas, Senator Dole is to be commended for restructuring the debt adjustment program concerning farmers home loans and commercial and cooperative loans to farmers to provide farm credit relief through unlimited loan guarantees and thereby provide immediate assistance to farmers; and

"Whereas, Kansas banks and other financial institutions are to be commended for their participation in federal farm credit relief programs; and

"Whereas, On February 27, 1985, the United States Senate has passed House Resolution 1096 providing for significant agricultural credit relief in response to the needs of American farmers; and

"Whereas, The United States House of Representatives is on this day expected to pass and forward House Resolution 1096 to the President of the United States; and

"Whereas, President Reagan has indicated that he is considering a veto of House Resolution 1096: Now, therefore,

"*Be it resolved by the House of Representatives of the State of Kansas:* That the President is hereby urged to sign House Resolution 1096 thereby demonstrating his concern and support for the farmers and people of the midwest; and

"*Be it further resolved*: That copies of this resolution be immediately telegraphed to President Reagan, The President and Majority Leader of the Senate, and the Speaker of the House of Representatives."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE (for Mr. GARN), from the Committee on Banking, Housing, and Urban Affairs:

Special Report entitled "First Monetary Policy Report for 1985" (with minority views) (Rept. No. 99-22).

By Mr. PACKWOOD, from the Committee on Finance, with an amendment in the nature of a substitute and an amendment to the title:

S. 245: A bill to amend the Internal Revenue Code of 1954 to repeal the requirement that contemporaneous records be kept to substantiate certain deductions and credits (Rept. No. 99-23).

By Mr. HATCH, from the Committee on Labor and Human Resources, without amendment.

Senate Resolution 116: An original resolution authorizing expenditures by the Committee on Labor and Human Resources; referred to the Committee on Rules and Administration.

By Mr. PACKWOOD, from the Committee on Finance, without amendment:

S. 840: A bill to amend the Federal Supplemental Compensation Act of 1982 to provide that individuals who are eligible for compensation in the last week of the current program shall receive the full number of weeks of compensation without regard to the termination date of the program.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. DANFORTH, from the Committee on Commerce, Science, and Transportation:

Mr. DANFORTH. Mr. President, for the Committee on Commerce, Science, and Transportation, I report favorably a nomination list in the Coast Guard which appeared in full in the CONGRESSIONAL RECORD of March 20, 1985, and, to save the expense of reprinting the list on the Executive Calendar, ask that these nominations lie at the Secretary's desk for the information of Senators.

By Mr. LUGAR, from the Committee on Foreign Relations:

Faith Ryan Whittlesey, of Pennsylvania, to be Ambassador Extraordinary and Plenipotentiary of the United States to Switzerland:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Faith Ryan Whittlesey.

Post: Ambassador to Switzerland.

Contributions, amount, date, donee.

1. Self.

National Federation of Republican Women, Washington, D.C.: $25.

Haverford Township, Pennsylvania, Republican Executive Committee: $100.

Committee to Reelect Matt Ryan, Member, Pennsylvania Legislature, Media, Pennsylvania: $100.

2. Spouse: N/A.

3. Children and spouses names: None.

4. Parents names: None.

5. Grandparents names: N/A.

6. Brothers and spouses names: N/A.

Haverford Township Republican Party, Haverford Township, Pennsylvania: $50.

Haverford Township Republican Party Haverford Township, Pennsylvania: $100.

7. Sisters and spouses names: N/A.

(The above nomination was reported from the Committee on Foreign Relations with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PROXMIRE (for himself, Mr. BRADLEY, Mr. HUMPHREY, and Mr. LAUTENBERG):

S. 826. A bill to direct the Secretary of Transportation not to expend or obligate any Federal funds for design and construction of the Westway landfill in New York City, New York; to the Committee on Environment and Public Works.

By Mrs. HAWKINS (for herself, Mr. HATCH, Mr. BUMPERS, and Mr. MATSUNAGA):

S. 827. A bill to amend the Public Health Service Act to provide for the compensation of children and others who have sustained vaccine-related injuries, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MELCHER:

S. 828. A bill to define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable incomes for purposes of the Federal income tax; to the Committee on Finance.

By Mr. MELCHER (for himself and Mr. BAUCUS):

S. 829. A bill to authorize the Secretary of Interior to convey certain lands withdrawn by the Bureau of Reclamation for townsite purposes to the Huntley Project Irrigation District, Ballantine, Montana; to the Committee on Energy and Natural Resources.

By Mr. MELCHER (for himself, Mr. INOUYE and Mr. MATSUNAGA):

S. 830. A bill to amend the Indian Education Act and other Acts relating to Indian Education; to the Select Committee on Indian Affairs.

By Mr. HEFLIN:

S. 831. A bill for the relief of Henry Ford Harrison; to the Committee on Veterans Affairs.

S. 832. A bill for the relief of Bassam S. Belmany; to the Committee on the Judiciary.

S. 833. A bill to improve the administration of justice by providing greater discretion to the Supreme Court in selecting the cases it will review, and for other purposes; to the Committee on the Judiciary.

By Mr. BRADLEY:

S. 834. A bill to increase competition in the transportation of natural gas; to the Committee on Energy and Natural Resources.

By Mr. McCLURE (for himself, Mr. GARN AND Mr. SYMMS):

S. 835. A bill to amend the Food Stamp Act of 1977 to reform and reduce the cost of administering the food stamp program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. SIMPSON (by request):

S. 836. A bill to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear power plant siting and licensing process, and for other purposes; to the Committee on Environment and Public Works.

By Mr. HEINZ (for himself, Mr. GLENN, Mr. CHILES, Mr. PRESSLER, Mr. MELCHER, Mr. WILSON, Mr. BURDICK, and Mr. NICKLES):

S. 837. A bill to amend the Social Security Act to protect beneficiaries under the health care programs of that Act from unfit health care practitioners, and otherwise to improve the antifraud provisions of that Act; to the Committee on Finance.

By Mr. CHAFEE (for himself, Mr. MATHIAS, Mr. WEICKER, and Mr. METZENBAUM):

S. 838. A bill to repeal title VIII of the Education for Economic Security Act, relating to equal access to public secondary schools; to the Committee on Labor and Human Resources.

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. ROTH, Mr. DURENBERGER, and Mr. SYMMS):

S. 839. A bill to amend the Internal Revenue Code of 1954 to provide a method for determining the value of certain air transportation provided to employees; to the Committee on Finance.

By Mr. PACKWOOD, from the Committee on Finance:

S. 840. An original bill to amend the Federal Supplemental Compensation Act of 1982 to provide that individuals who are eligible for compensation in the last week of the current program shall receive the full number of weeks of compensation without regard to the termination date of the program;

By Mr. BUMPERS:

S. 841. A bill to amend section 144 of title 23, United States Code, to give States the discretion of using a portion of their bridge replacement funds to replace certain bridges of ferryboat operations; to the Committee on Environment and Public Works.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HATCH, from the Committee on Labor and Human Resources:

S. Res. 116. An original resolution authorizing expenditures by the Committee on Labor and Human Resources; to the Committee on Rules and Administration.

By Mr. PROXMIRE (for himself and Mr. HATFIELD):

S. Con. Res. 36. Concurrent resolution expressing the sense of the Congress regarding the establishment of a joint commission between the United States and the Soviet Union to study the concept of "nuclear winter" and its impact for the national security of both nations; to the Committee on Foreign Relations.

By Mr. MELCHER (for himself and Mr. BAUCUS):

S. Con. Res. 37. Concurrent resolution providing for acceptance of a statue of Jeannette Rankin presented by the State of Montana for placement in National Statuary Hall, and for other purposes; to the Committee on Rules and Administration.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE (for himself, Mr. BRADLEY, Mr. HUMPHREY, and Mr. LAUTENBERG):

S. 826. A bill to direct the Secretary of Transportation not to expend or obligate any Federal funds for design and construction of the Westway landfill in New York City, NY; to the Committee on Environment and Public Works.

(The remarks of Mr. PROXMIRE and the text of the legislation appear earlier in today's RECORD.)

By Mrs. HAWKINS (for herself, Mr. HATCH, Mr. BUMPERS, and Mr. MATSUNAGA):

S. 827. A bill to amend the Public Health Service Act to provide for the compensation of children and others who have sustained vaccine-related injuries, and for other purposes; to the Committee on Labor and Human Resources.

NATIONAL CHILDHOOD VACCINE INJURY COMPENSATION ACT

● Mrs. HAWKINS. Mr. President, I rise today to introduce a revised version of the National Childhood Vaccine Injury Compensation Act. The key component of this bill is the establishment of a no-fault program for compensating those children who suffer permanent adverse reactions to one of the seven mandated childhood vaccines.

I first became involved in this issue in April 1982 as my Senate Labor and Human Resources Subcommittee on Investigations and General Oversight prepared for hearings on the proposed budget reductions in the Federal Childhood Immunization Program. Since that time the Labor and Human Resources Committee has held four hearings on this subject, May 7, 1982, on immunization and preventive medicine, July 23, 1982, on oversight of immunization costs, July 23, 1983, on the Pertussis Task Force Report and May 7, 1984, on the National Childhood Vaccine Injury Compensation Act. These congressional hearings and the subsequent task forces, reports, studies, and investigations conducted by other interested parties on this issue have led to a better understanding of the factors that are threatening the stability of the U.S. supply of vaccines and preventing injured children from receiving the compensation they need and deserve.

We have learned that the dramatic increase in the price of the DPT vaccine, from 11 cents a dose in 1983 to $2.80 a dose today is primarily attributable to the lawsuits pending against the vaccine manufacturers. We have learned that the tremendous increases in the lawsuits filed can be traced to the number of adverse reactions associated with pertussis vaccination. Fortunately efforts are being made to develop a safer vaccine for pertussis. But even assuming a problem-free, expedited consideration of the FDA applications, we are still years away from obtaining FDA approval of a new pertussis vaccine, which hopefully will be just as effective but with less adverse reactions.

Unfortunately, we cannot wait and hope that technological and scientific improvements will resolve this situation. We are in the midst of a crisis in our childhood vaccination program. The adverse reactions associated with the current vaccine are eroding the public's confidence in the immunization program itself, the withdrawal of two of the three pharmaceutical manufacturers of DPT from the market have resulted in a shortage of the vaccine which has led to the unprecedented action of Centers of Disease Con-

trol issuing a request for physicians and other health providers to delay giving the DPT booster shots in order to insure a sufficient supply of the vaccine to immunize infants from these highly contagious diseases. The liability concerns and considerations that prompted Wyeth and Connaught Laboratories to cease distribution of the DPT vaccine are still confronting Lederle Laboratories, the sole pharmaceutical distributor of the DPT vaccine. It is obvious that a legislative solution is needed to stabilize the supply of childhood vaccines and restore public confidence in the childhood immunization program. I think this can be achieved without sacrificing the legitimate needs and legal rights of the children who have been permanently injured by an adverse reaction to a vaccine.

S. 2117, introduced in the 98th Congress, was an attempt to develop a legislative, solution that would stabilize the supply of vaccines while at the same time providing simple justice to the injured children. That version, like the bill I am introducing today was developed by the American Academy of Pediatrics and a parents organization known as Dissatisfied Parents Together. These organizations have labored long and hard to develop a bill, which although not perfect from either organization's viewpoint, is a compromise version which meets the twin goal of insuring an adequate supply of vaccine to immunize children against deadly and infectious diseases as well as providing just and expedited compensation for the children who suffer adverse reactions to a vaccine.

Many of the revisions contained in this bill were prompted by the comments, suggestions, constructive criticisms and testimony by interested parties directly involved in this issue. A task force appointed by the American Medical Association and headed by Dr. Alan Nelson of Utah, was particularly useful. I think that it is important to point out that although the AMA, the vaccine manufacturers and the administration differ on the particular components of a vaccine compensation bill, we are in agreement on many key issues. We are in agreement that a legislative solution is needed and that a no-fault system is the best method of addressing this problem. Although I cannot agree to many of the provisions suggested by the AMA task force, the vaccine manufacturers, and some parents groups, I commend all parties on their efforts, and wish to point out that their suggestions and comments did prompt many of the revisions that are contained in the bill we are introducing today.

It is time to stop trying to assess blame for the situation we find ourselves in, it is time to stop pretending that the problem will resolve itself. Instead, it is time to work together toward our common goals of improving the quality and safety of childhood vaccines, assuring a stable supply of vaccines to protect children from deadly and infectious diseases, and provide just and expedited compensation for those children who are injured by an adverse reaction. I am encouraged that we will be able to work together to develop legislation that will meet all of these goals. I am encouraged by the administration's appointment of a Cabinet-level task force on vaccines. I am encouraged by the willingness of vaccine manufacturers to speak openly and honestly about the problems and pressures facing their industry. I am encouraged by the parents and the pediatricians' willingness to review and modify their original bill in order to address the concerns of other parties to this issue. And I am encouraged by the willingness of my Senate and House colleagues to address this issue now, before we are in a crisis situation, rather than legislate in a panic. As I stated earlier, I believe that it is possible to enact legislation that will achieve all our goals; stabilizing the supply of vaccines, providing incentives for development of safer vaccines, and providing simple justice to the unfortunate children who are injured by an adverse reaction to a childhood vaccine.

The following organizations agree with the need to enact legislation that meets those twin goals of stabilizing the supply of vaccines to guarantee that children will be immunized against deadly and infectious diseases while at the same time protecting the legitimate need and legal rights of children who are injured by an adverse reaction to the vaccine. The organizations that have endorsed the concepts contained in this legislation are: The American Academy of Pediatrics, Dissatisfied Parents Together, Association of State and Territorial Health Officers, American Nurses Association, National Association of Community Health Centers, National Association of Children's Hospitals and Related Organizations, Association of Schools of Public Health, Association for Maternal and Child Health and Crippled Children's Programs, Epilepsy Foundation of America, American College of Physicians, American Public Health Association, and the Association of Retarded Citizens.

Mr. President, I ask unanimous consent that a summary of this bill and a summary of the differences between this bill and S. 2117 be printed in the RECORD following my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL CHILDHOOD VACCINE-INJURY COMPENSATION ACT

National Vaccine-Injury Compensation Program—Bill establishes a no-fault, national program to compensate children who are injured by a childhood vaccine. Program is an alternative to compensation through litigation.

Advisory Commission—Establishes a nine member advisory commission on childhood vaccines to be comprised of three members who are health professionals, including two pediatricians, three members who are from the general public including two who represent parents of children injured by vaccines, and three members from the field of law. The Advisory Commission will advise the Secretary on the implementation of the program, recommend changes in Vaccine Injury Table (VIT), recommend ways to improve the safety, efficacy and supply of vaccines, and recommend changes in surcharge and research priorities.

Recording—Requires each health care provider administering vaccines to record and make available to patients, information regarding the date of vaccination, vaccine manufacturer and lot number and serious events occurring within 30 days after vaccination.

Reporting—Requires each health care provider who administers a vaccine and becomes aware of a listed reaction occurring within a designated period after vaccination to enter all relevant information on patient's permanent medical record and report it to Centers for Disease Control.

Contraindication—Requires Secretary, after conducting broad based studies of vaccines, to issue regulations regarding circumstances in which the vaccine should not be administered, or should be delayed beyond its normal time of administration, and the groups, categories or characteristics of potential recipients who may be at significantly higher risk of adverse reactions. This information is to be disseminated to physicians, professional health associations, and state and local governments.

Parent Information Materials—Requires Secretary to develop parent information materials containing information regarding the frequency, severity and potential risks of both the vaccine and the disease to be prevented by the vaccine. The materials should include information regarding the symptoms and reactions to vaccines which should be reported to physicians, precautionary measures which should be taken to reduce the risk of adverse reactions, when how and to whom parents can report possible high risk categories, and a summary of relevant state and federal vaccination laws, including information about the availability of the National Vaccine-Injury Compensation Program.

SUMMARY OF REVISIONS

VACCINE INJURY TABLE

S. 2117 would have provided compensation for acute vaccine-related injuries resulting in $2,500 or more in expenses. The new bill would delete provisions for acute injuries and compensation would be limited to vaccine reactions which resulting in (a) complications or residual effects lasting at least one year or (B) death.

EARLIER ELECTION OF REMEDIES

S. 2117 would have allowed a claimant for compensation to get the special master's recommendations before having to decide whether to elect the compensation program or a tort suit. It would also enable a claimant to pursue the feasibility of a lawsuit, and as long as no verdict has resulted in a tort suit, the plaintiff could elect into the compensation program. The new bill would

require a binding election between the tort system and the compensation system at the time of filing of the lawsuit or compensation claim. Once the compensation claim or lawsuit is filed, the claimant can not change their mind. In the case of a current lawsuit, parties would have two years after enactment to decide whether to drop their lawsuit in favor of this administrative remedy.

REMOVE STATUTORY DUTY TO WARN

S. 2117 contained no provisions on this subject. However, one of the recent court cases on vaccines held the manufacturer liable for $10 million ($8 million punitive) for failure to warn the parent of the immunized child. This provision would not affect the manufacturers duty to warn the health provider nor the health providers duty to warn the patient, but merely states that a manufacturer can not be held liable in a lawsuit solely because of failure to warn the parent directly. The new bill retains the provisions requiring full disclosure to parents of the risks, benefits and contraindications of the childhood vaccines.

REINSURANCE AUTHORITY

S. 2117 contained no provisions on this subject. The new provision was developed in response to the loss of insurance coverage by vaccine manufacturers. Under the reinsurance provision, HHS would be authorized, but not required, to provide reinsurance, pooling assistance and even direct insurance to vaccine manufacturers. HHS could only do this if it finds that adequate insurance is not available from the private sector and the insurance arrangement could not undermine the incentives for development of safer products. We actually hope this provision is never needed, but we want to give the Secretary additional powers to prevent a loss of the supply of childhood vaccines.

DEADLINE FOR COMPENSATION

S. 2117 placed no deadline on the administrative system for determination of compensation claims. Since one of the arguments for an administrative system was that it will be quicker than the tort system, we placed a 270 day deadline to reach a decision after the date of filing and required any appeal to be briefed, argued and decided on an expedited schedule.

COMPENSATION/MEASURE OF DAMAGES

S. 2117 provided for compensation for medical care, rehabilitation, loss of earnings and other uncompensated expenses directly related to the injury or illness. The pain and suffering was limited to the injured party only, not the family and was capped at $100,000. Compensation for a death had a minimum of $300,000 and a maximum of $700,000. The new version makes it clearer that diagnostic costs, parents costs in obtaining care for vaccine victims, life and health insurance are also permissible items for compensation. The new bill also permits limited recovery for attorney fees and other costs associated with lawsuits. This revision was needed to remove the economic disincentive for individuals with current claims from dropping those claims and opting into the administrative system. The provision specifies that the attorneys fees can't exceed the amount of attorney's fees eventually awarded under the administrative compensation system.

CITIZEN SUITS

Both S. 2117 and the new revised version contains authority for HHS to carry out a number of items, such as improve the systems for regulating vaccine processing, use instructions, field surveillance and follow-up, adverse reaction reporting and recall of reactogenic lots of vaccines. S. 2117 contained citizen suit authority to enforce these provisions, but it was criticized as being too weak. The new revised bill has language making it clearer that HHS has a non-discretionary duty to work to develop safer vaccines and reduce adverse reactions. It also removes the jurisdictional barriers to bringing such a suit.

REVIEW OF WARNINGS

S. 2117 had no specific requirement for the Secretary of HHS to review the vaccine manufacturers warnings to determine whether or not they are adequate to reduce the risk of reactions and if not to require their revision. The new revised bill contains a mandate for a review of the manufacturers contraindications. This is designed to deal with the problem of reluctance to add new warnings as well as the problem of new contraindications that are added without prior notice or comments (i.e. the controversy over the new Central Nervous Disorder contraindication for DPT).

AUTHORITY FOR FACILITIES FOR THE ADULT MULTIPLY HANDICAPPED

S. 2117 had no provision on this subject. The revised version contains authority for the Secretary to fund three regional facilities for the care and treatment of the adult multiply handicapped. The authorization is for "such sums".

ADVERSE REACTION REPORTING

S. 2117 required adverse reaction reporting by doctors and public health clinics and authorized reporting by parents as well of adverse reactions following immunization. The revised version retains this requirement but adds two other features. It expands the duty to report to any significant symptom of a compensable event by any vaccine and HHS would have a duty to notify the vaccine manufacturer of any reported reaction for that manufacturers product.

RECORDKEEPING AND TEST RESULT REPORTING REQUIREMENTS

S. 2117 had no provisions directly on this point because at the time we felt that the citizen suits would be used to force this issue. The revised bill mandates vaccine manufacturers to create and retain records on the manufacturing history of each batch of vaccine, on testing the vaccine, on production problems and on distribution patterns.

RECALL AUTHORITY

This revised version gives the Food and Drug Administration the authority to recall vaccines and other biologics when warrented. Currently FDA has not authority for a mandatory recall of vaccines.●

● Mr. HATCH. Mr. President, I am pleased to join Senator HAWKINS today in introducing a revised version of the National Childhood Vaccine-Injury Compensation Act, which I cosponsored with her in the 98th Congress. Senator HAWKINS has been a stalwart and vigilant champion, and true friend, of families—parents and children—throughout this country, on many issues. I am proud to stand beside her and compliment her on her commitment and her legislative successes in this area. The bill we are introducing today reflects Senator HAWKINS' total commitment to a very special group of parents and children, about whom we are all extremely concerned and who suffer, both physically and psychologically, because of injuries related to adverse reactions to vaccines given to prevent childhood diseases. The legislation introduced today to address these problems does not provide the final solution and, in fact, includes provisions I do not support. But it again brings to national attention an urgent public health problem.

We have made a commitment in this country to promote health and prevent disease. I have a strong personal commitment to that concept, to a national disease prevention policy, and to the vaccination of children against preventable communicable diseases. Our national program of vaccination has been, without question, one of the greatest—if not the greatest—health success stories of all time. And I want to make certain that the program not only remains successful, but is improved. To accomplish this, legislative action is necessary to address problems we have only recently become aware of, and which jeopardize our ability to vaccinate our Nation's children.

Over the past few years, there has been increasing publicity about adverse reactions to vaccines. There has been a major focus on the pertussis vaccine. This publicity has had the beneficial effect of making parents aware of the possibility that on rare occasions, a child may have an unexpected and serious reaction to vaccines. Parents and physicians have been alerted to the need to understand this possibility, and to discuss the risks, as well as the benefits of vaccinations.

Unfortunately the publicity has had some very negative results as well. It has generated considerable misinformation, fear, and distrust. I fear too many of our citizens have begun to focus on what might go wrong if their children are vaccinated and to doubt the tremendous value of immunizations. Pertussis, commonly called whooping cough, is a horrible, lethal disease which used to kill hundreds of thousands of children. Polio also used to be a devastating crippler and killer of children. I could go on, but suffice it to say that I believe we ought to keep in mind, while addressing problems with our vaccination program, that without it we could go back to a relative dark age of health care in this country. Taking the childhood population as a whole, the injuries from using the existing vaccines are clearly and substantially less than the injuries that would result without their use.

Another unfortunate consequence of the publicity about vaccines has been a large increase in the number of lawsuits brought against manufacturers and health care providers. These law-

suits are not, in most cases, alleging that a defective or unsafe vaccine is being used, or that the administration of the vaccine is improper. But manufacturers and health care professionals are being asked to take responsibility for side effects and injuries that have occurred even though the best available product has been provided and all of the manufacturing, labeling, and distribution requirements of the governments are being met.

Public concern about the safety of vaccines and the economic burdens of liability have reached a point where the future availability of vaccines, particularly the pertussis vaccine, is in question. The situation is critical. Two of the three commercial manufacturers of the DPT vaccine have stopped distribution of their product in the last 8 months because they have been unable to obtain insurance. The unavailability of insurance is a direct result of increasing numbers of lawsuits, and increasingly large amounts requested and awarded for damages. We are currently facing not only a temporary shortage of this vaccine, but also the possibility that no company will be able to obtain the liability coverage necessary to stay in the market.

It is time to do something—for parents, for children, for future generations, and for the future of our disease prevention policy.

Vaccine manufacturers and the Government must continue to pursue every possible avenue to safer and better vaccines. I am encouraged to learn that clinical trials are underway or about to begin on two new kinds of pertussis vaccines which may be safer. I think this illustrates a strong dedication to vaccine research on the part of the Government and the private sector, and we need to foster this.

We need more information about risks and side effects of vaccines; we need better education of parents and physicians; we need more accurate reporting of adverse reactions. All of these need to be done cooperatively by the private sector and the Government.

I want to add my thanks to those of Senator HAWKINS to the many individuals and groups whose dedicated efforts have been so important in analyzing this issue—including Dissatisfied Parents Together, the American Academy of Pediatrics, Lederle Laboratories, and the American Medical Association. All of them have contributed essential ideas and points of view.

I am also pleased to report that the administration is preparing legislation to address this problem. As soon as it is available, I will introduce their proposal and make sure it has careful consideration at full Labor and Human Resources Committee hearings in the Senate.

Senator HAWKINS has agreed to work with me to arrive at expedient passage of appropriate legislation to guarantee an ongoing, safe supply of vaccines for our Nation's children.●

● Mr. BUMPERS. Mr. President, I am pleased to join Senator HAWKINS in introducing the vaccine injury compensation bill. This bill will provide a fair compensation system for those few children who are tragically injured by vaccines and will help guarantee the continuation of the immunization program for all our children.

During my years as Governor, Betty and I became involved in the immunization program, and my interest in the program has never waned. In the last 20 years we have seen a dramatic increase in the percentage of American children who are immunized and, as a result, we have made many childhood diseases a thing of the past. I have consistently fought for adequate funding for the immunization program, and I am now cosponsoring this legislation so the progress we have made will not be turned back.

We are now facing a situation where some children are the victims of tragic injuries, and I fear that public confidence in the immunization program will erode. We also have serious problems with supplies of some vaccines. The events of the last year have made clear that the situation cannot continue without action by Congress.

For some time we have had single manufacturers for many of our childhood vaccines, but there were several manufacturers of the DPT vaccine. In the summer of 1984 two DPT manufacturers ceased the manufacture or distribution of DPT vaccine, and we are now down to a single manufacturer for all seven childhood vaccines.

We began to notice spot shortages of DPT vaccine in some areas of the country early in 1984, and by early fall of 1984 the American Academy of Pediatrics was recommending that DPT booster shots be delayed for older children so the available vaccine could be used for infants. When the remaining manufacturer of DPT had problems with one vaccine batch, the spot shortages became nationwide shortages. In December 1984 the Centers for Disease Control echoed the request that the DPT boosters for older children be delayed until supply problems are eased.

We still face some short term problems of supply, but I am hopeful that the Senate will act soon on this vaccine injury compensation bill so parents of injured children will have a fair compensation system and some of the pressures on the immunization program will be eased.

Even when the compensation system is in full force, we can't sit back. There are some remaining problems with the program that demand our attention. We must provide adequate funding for the immunization program to meet the current high prices of vaccine. Our children deserve the protection of the immunization program, and we know that the program is a cost-effective one. We must not allow the pressing need to trim Federal spending to make us compromise this vital program.

We must also provide adequate funding for stockpiling so we don't again face vaccine shortages like the current shortages of DPT vaccine. We still have a single manufacturer for all of childhood vaccines, and we cannot assume that this legislation or any other will change that situation immediately.

The primary reason we are introducing this bill today is because we know some children are the victims of injuries caused by vaccines. Their suffering and the suffering of their parents should not be forgotten, and neither should the need for continued research on improved and safer vaccines. We must strive to develop vaccines which will protect our children from disease and not cause injury.

I do not want parents to lose confidence in the immunization program because of vaccine injuries and recent reports of problems with vaccine supplies. We have to renew our commitment to the immunization program and work to renew confidence in the program. I believe we are taking a big step in that direction today.●

By Mr. MELCHER:

S. 828. A bill to define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable incomes for purposes of the Federal income tax; to the Committee on Finance.

DEDUCTION FOR TRAVEL AND TRANSPORTATION FOR CONSTRUCTION WORKERS

Mr. MELCHER. Mr. President, today I am introducing a bill to clarify our tax laws concerning the right of construction workers to deduct travel expenses to job sites at least 30 miles from a construction worker's principal place of residence for a period of less than 2 years in duration. Furthermore, the bill requires that the deductibility of travel expenses for jobs lasting more than 2 years be determined on a case-by-case basis without regard to the employee's first 2 years of employment at that job site.

Most importantly, this legislation specifically notes that the deduction of travel expenses by construction workers shall not be disallowed solely because the construction worker's employment at a job site is of "indefinite duration."

These provisions recognize that construction industry employment is often temporary and transient, and accordingly provides reasonable standards for determining the deductibility

of related travel expenses. Both the construction worker and his or her employers will benefit from this clarification in the law.

I have been pressing for clarification of the tax laws in this area since 1982. Prior to 1983, the Internal Revenue Service used a so-called 1-year rule, which was adopted by administrative fiat, to determine that any construction worker who remained employed at a temporary job site for more than 1 year automatically lost not only future rights to deduct travel expenses related to the job, but retroactively lost any deductions that might have already been claimed.

This ruling so obviously discriminated against construction workers that both the Eighth and Ninth District Courts found in favor of construction workers in cases brought before them under the "1-year rule."

Because of these adverse court decisions, the IRS issued new regulations in 1983 making some changes. The most recent guidance from the Internal Revenue Service on this issue, Revenue Ruling 83-82, was helpful, but nevertheless left many uncertainties. That ruling allowed or prohibited travel expense deductions based on three principal criteria:

First, the nature of the travel expenses;

Second, the length of employment; and

Third, the substantiality of the employee's abode.

According to this ruling, employment must be classified as "temporary" in order for travel expenses to be deductible. Employment is defined as "temporary" if it is expected to last less than 1 year or, in certain circumstances, if it exceeds 1 year but is less than 2 years in duration. Jobs greater than 1 year in duration are considered "indefinite" or permanent unless the employee can demonstrate that:

First, he has used his claimed tax home as his lodging and worked in the vicinity immediately prior to the current job and that the taxpayer continues to maintain bona fide work contacts in that area during the temporary employment;

Second, his living expenses at the claimed tax home are duplicated because work requires the taxpayer to be away, and

Third, he has either a family member or members—marital or lineal only—currently residing at the tax home or whether he continued to currently use the claimed home frequently for his lodging.

The ruling holds further that all jobs longer than 2 years in duration would disqualify the worker from receiving travel expense deductions.

While not so obviously discriminatory as the 1-year rule, these new rules still place unfair and unmanageable requirements on construction workers which are not required of business people who must travel as part of their job. Further, there will continue to be numerous court cases, and construction workers around the country will still not have any assurance that they can take a job away from their home and be able to deduct legitimate expenses for traveling to that job.

Congressman PETE STARK, chairman of the Select Revenue Measures Subcommittee of the Ways and Means Committee, held hearings on this issue last fall in preparation for the further consideration of specific legislation to bring about a permanent solution to this problem. My legislation parallels that supported by Chairman STARK and I hope it can become the basis for action this session in the Senate.

By Mr. MELCHER (for himself and Mr. BAUCUS):

S. 829. A bill to authorize the Secretary of the Interior to convey certain lands withdrawn by the Bureau of Reclamation for townsite purposes to the Huntley Project Irrigation District, Ballantine, MT; to the Committee on Energy and Natural Resources.

CONVEYANCE OF CERTAIN LANDS TO THE HUNTLEY PROJECT IRRIGATION PROJECT, MONTANA

Mr. MELCHER. Mr. President, I am introducing legislation that will direct the Secretary of the Interior to convey Bureau of Reclamation lands reserved for public purposes to the Huntley Project Irrigation District in Ballantine, MT.

These lands lie in several small plots and are deeded to the U.S. Bureau of Reclamation which developed the land along the Yellowstone River corridor. The Federal Government, when reserving these lands, dedicated them for public use as the local community sees fit. The local communities have energetically maintained these lands—they haul away the trash, pick up after storms, cut the grass—but because these towns were never incorporated, the deed to the land cannot legally be transferred. Incorporation is a specific requirement of the applicable law, the Townsite and Power Development Act of 1906.

This transfer of ownership has the support of all the principal players, including the local Bureau of Reclamation office. Since the Federal Government has in effect transferred all rights to the land except title, and since the community has complied with the Townsite and Power Development Act by using their time and money to develop the areas for the benefit of the public, it seems fair to convey all rights of ownership to a unit of government closer to the community, in this case the local irrigation district.

Mr. President, these communities have converted these reserved lands into ball parks and picnic areas and on one piece of land, a museum dedicated to traditional practices of farming. These folks would hate to see these lands, widely used by the communities and their visitors, taken from them to become part of a scheme hatched in Washington. This bill would ensure that the local communities may maintain these public lands for the benefit of the community, forever.

By Mr. MELCHER (for himself, Mr. INOUYE, and Mr. MATSUNAGA):

S. 830. A bill to amend the Indian Education Act and other Acts relating to Indian education; to the Select Committee on Indian Affairs.

INDIAN EDUCATION

Mr. MELCHER. Mr. President, on May 30 and 31, 1979, the Select Committee on Indian Affairs held hearings on S. 916, legislation providing education programs for native Hawaiians. At these hearings the committee explored ways in which the education of native Hawaiians could be improved and enhanced. The hearings revealed that native Hawaiians, who comprise nearly 20 percent of the Hawaiian population, were at the bottom of almost every socioeconomic indicator. They had the highest rate of poverty, the highest rate of unemployment and the lowest level of education of any ethnic group in Hawaii.

Rather than adopt S. 916, Congress created a Commission to assess the needs of native Hawaiians.

In March 1984, the results of the Commission's study the Native Hawaiian Educational Assessment Project [NHEAP], were presented to the Selected Committee on Indian Affairs. This report, by the Department of Education and the Bishop Estate/Kamehameha Schools, represented the most thorough review of the educational needs of native Hawaiians to date. The report concluded that native Hawaiians still rank lowest of all Hawaiian ethnic groups in education and income levels. Their problems do not end there. These figures are accompanied by high incarceration rates, high incidents of affliction with certain diseases and relatively low life expectancy.

Mr. President, last month while I was in Hawaii, I met with representatives from a number of native Hawaiians organizations. These officials uniformly agreed that education is the key to survival for the native Hawaiians people. Since that meeting both Senators from the State of Hawaii, Senator INOUYE and Senator MATSUNAGA, and I have been drafting legislation to promote education programs that focus on the special needs of native Hawaiians. The bill we are introducing today would broaden current Federal education programs designed for American Indians so that

they include native Hawaiians within their scope.

Mr. President, I believe that the approach this legislation takes in expanding Indian education programs to include native Hawaiians is fitting and proper. The social and historical similarities native Hawaiians share with other native Americans is clear as is the manner in which their rights were abrogated. Congress has already spoken to this point when in 1920 it enacted the Hawaiian Homes Commission Act to address the issue of lands lost by native Hawaiians through outside intervention. This act established a trust relationship between native Hawaiians and the United States. This Federal trust responsibility to native Hawaiians was reaffirmed in the Hawaiian Admissions Act. More recently, in 1974, the Community Services Act included Hawaiians as native Americans as has certain Indian health legislation in recent years.

Mr. President, every year our Government spends billions of dollars providing aid to other countries so that their citizens can have a better life. However, we do not have to look beyond our own borders to find people, our own native people, in need of help. This legislation is a small step to provide some of our native citizens their wherewithall to help themselves. I urge my colleagues to support this effort.

● Mr. INOUYE. Mr. President, Senator MATSUNAGA and I are pleased that Senator MELCHER is introducing legislation today that will amend the Indian Education Act and other acts relating to Indian education to include native Hawaiians.

In 1982, the Department of Education along with the Bishop Estate/Kamehameha Schools conducted the first comprehensive study on the educational needs of native Hawaiians. This report concluded that native Hawaiian children score below national norms on standardized tests while other major groups in Hawaii score at or above national norms. It also concluded that Hawaiian students and their families are disproportionately represented in areas of special needs including absenteeism, learning disabilities, multiple health problems, and family stress. The legislation that is being introduced today will give the native Hawaiians the opportunity to develop education programs to meet the specific and unique needs that have been earmarked in this study.

Mr. President, we feel that is an important measure for the residents of Hawaii and requires favorable consideration.●

● Mr. MATSUNAGA. Mr. President, the educational needs of native Hawaiians is a subject of profound importance to the people of my State. For this reason, I am pleased to join the distinguished Senator from Montana (Mr. MELCHER) in introducing legislation which will amend the Indian Education Act of 1972 in order to provide special funding for education of native Hawaiians.

In March 1983 a comprehensive report of the Native Hawaiian Educational Assessment Project [NHEAP], relative to the educational needs of native Hawaiians, was submitted to former Education Secretary Terrel Bell. This report, which was originally authorized by the Senate Labor and Human Resources Committee, documented the finding that native Hawaiians rank at the bottom of most measures of educational achievement and have unique educational needs as a consequence of their culture and socialization process. Hawaiian children are hampered in their development by numerous economic, social, and institutional barriers which all contribute to their low academic achievement—a situation similar to that which exists among American Indians.

Poor academic performance is not the only problem facing those of Hawaiian blood, who comprise 19 percent of Hawaii's population. They occupy the bottom rungs of our social and economic ladders relative to other groups in the State, a situation inextricably related to academic performance. The unemployment rate among Hawaiian adults is twice that for the State as a whole. Forty percent of those living below poverty level in the State are Hawaiians; 66 percent of the youth in correctional institutes are Hawaiians and 46 percent of adults in correctional institutes are Hawaiians. Hawaiian children also are disproportionately victimized by child abuse and neglect, and are absent from school in disproportionate numbers.

The report recommends a comprehensive, multiagency approach to address the unique educational needs of native Hawaiian children with a final goal of complete self-sufficiency for the native Hawaiian population. This approach is designed to attack the education problems of native Hawaiians on all fronts. Some of the report recommendations include:

First, the creation of a child and family resource center to direct early attention to problems relating to health, nutrition, learning and motivation, and other signs of family stress which impact on a child's academic performance for many years thereafter;

Second, the inclusion of native Hawaiians as native Americans under the Indian Education Act;

Third, the expanded availability of scholarships and loans to native Hawaiian students to be used for study in undergraduate, graduate, and professional programs at institutions of higher education; and

Fourth, the development of programs to address the special needs of gifted and talented native Hawaiians or native Pacific islanders.

There is a clear Federal responsibility for native Hawaiians, as there is for Indians. As with the Indian, the native Hawaiian was profoundly affected by the arrival in this country of the Western European. By the middle of the 19th century, the Hawaiian had seen his lands pass from his hands into the hands of the newcomer and in 1893, his government and the lands of the crown also were taken from him. The initial failure of the U.S. Government to restore the monarchy, or at least to compensate the Hawaiians for their losses, still remains insufficiently recognized in public policy today.

Recognition of Federal responsibility is demonstrated in several pieces of legislation beginning in 1920 with the Hawaiian Homes Commission Act, which placed approximately 200,000 acres of land under the jurisdiction of a Commission for the Rehabilitation of Persons of Hawaiian Ancestry. Significantly, in 1974, native Hawaiians were first defined in statute as native Hawaiians in the Community Services Act. In the past decade native Hawaiians have been deemed eligible as a population targeted for Federal support as part of several Indian education and health measures.

Inclusion of native Hawaiians in the Indian Education Act of 1972, as amended, would provide the most comprehensive solution in addressing the educational deficits of native Hawaiians. This is an appropriate measure, particularly in view of the evidence provided by NHEAP that Hawaiians suffer the same difficulties associated with other indigenous Americans. Amendments providing funding within this act for native Hawaiians proportionate to that which is currently targeted to other native groups are certainly compatible with the precedent recently set in the Carl D. Perkins Vocational Education Act of 1984 (Public Law 98-524).

Mr. President, I urge my colleagues to give their fulll support to this essential legislation.●

By Mr. HEFLIN:

S. 831. A bill for the relief of Henry Ford Harrison; to the Committee on Veterans' Affairs.

RELIEF OF HENRY FORD HARRISON

Mr. HEFLIN. Mr. President, I rise today to introduce a bill for the relief of Henry Ford Harrison.

During the Second World War, Mr. Harrison served as a pharmacists' mate aboard the U.S.S. *Haven*, a Navy hospital ship. About a month after the atomic explosion at Nagasaki, he was sent ashore to help set up an evacuation center for POW's. Mr. Harrison was stationed near the center of the atomic blast area. His principal duties were to spray the prisoners of war

with DDT. Over a 2-week period, Mr. Harrison sprayed 9,000 to 10,000 men. For his service, Mr. Harrison was honorably discharged.

Less than a year after his service ended, Mr. Harrison developed lung cancer and bronchial asthma. He suffered headaches, fever, seizures, and impaired vision. In addition, he has suffered loss of both hair and teeth.

Mr. Harrison then filed a claim with the Veterans' Administration Appeals Board, but the Board refused to consider relief on the grounds that no claim was made within 12 months of his experience at Nagasaki.

Mr. Harrison's suffering has been great. The facts of his case show a strong link between his military service and his cancerous and asthmatic condition. His only hope for relief is in private legislation. This bill will hold that Mr. Harrison's disability is service connected. I urge you to give Mr. Harrison's situation your favorable consideration.

By Mr. HEFLIN:

S. 832. A bill for the relief of Bassam S. Belmany; to the Committee on the Judiciary.

RELIEF OF BASSAM S. BELMANY

Mr. HEFLIN. Mr. President, I rise to introduce a bill for the relief of Bassam S. Belmany. This bill would provide Bassam with permanent resident status in the United States.

Bassam now resides in Mobile with his uncle. He came into this country from Lebanon, on a student visa. An excellent student, he attends the University of South Alabama where he was awarded a substantial academic scholarship. He has an exemplary academic record, and plans to attend dental school. His college advisers believe that he has a promising career ahead of him and will be a talented dentist. Indeed, Alabama could well use his talents.

As you all know, the situation in Lebanon today is unstable and in fact, dangerous. The current situation is particularly threatening to Bassam, because he is a member of the Druz faith, a religious sect currently persecuted in Lebanon. Bassam's home village has been sealed off by the Christian Militia, and it is unlikely that he could ever return there.

In short, Bassam Belmany's situation presents extraordinary circumstances which need to be addressed by the passage of this legislation. He has the potential to make an enormous contribution to this country through his profession. He is completely supported by his uncle and will never present a burden to our taxpayers. He has shown initiative and drive through obtaining an academic scholarship to support his education. He cannot return to Lebanon, given the certainty that he will suffer religious persecution. I urge my colleagues to give Mr. Belmany's situation their favorable consideration.

By Mr. HEFLIN:

S. 833. A bill to improve the administration of justice by providing greater discretion to the Supreme Court in selecting the cases it will review, and for other purposes; to the Committee on the Judiciary.

MANDATORY JURISDICTION OF THE SUPREME COURT

Mr. HEFLIN. Mr. President, in a continuing effort to address the problems facing our Federal judicial system, today I am introducing additional legislation aimed at court reform.

This bill will provide the Supreme Court with greater discretion in selecting the cases it will review. This bill eliminates mandatory Supreme Court review for several classes of cases brought before the court of appeal. Included among those classes would be those Federal district court decisions invalidating acts of Congress, where the United States is a party; those decisions of U.S. courts of appeal which hold a State statute invalid because it violates the Constitution, treaties or laws of the United States; and those cases where the highest court of a State has either held a treaty or statute of the United States invalid, or has upheld the validity of a State statute in the face of a constitutional challenge.

This legislation does not preclude Supreme Court review of these cases and the other statutes outlined in the bill, but provides for review by certiorari.

Under the current law, the Supreme Court devotes an inordinate amount of time deciding these cases on the merits—not because these decisions will have a significant national impact, but because they fall within a certain class.

If we invest in the Supreme Court the power to act as the final arbiter of the laws of this Nation, then we should entrust the Justices with the corresponding discretion to choose the cases that warrant this consideration.

The administration of justice in the United States depends in large part on the ability of the Supreme Court to manage its own docket. That is fundamental.

Other proposals for court reform have generated both support and opposition. This bill is one of the few court reform proposals that seems to have the unqualified support of all of the affected parties. The nine Justices of the Supreme Court have unanimously supported attempts to curtail the mandatory review of certain classes of cases. The American Bar Association has been supportive of this concept. The administration has also endorsed this legislation in the past. In fact, last week, Attorney General Edwin Meese indicated that this was a viable approach to lessening the burden facing the Supreme Court.

This is not a new idea. Similar legislation has passed both Houses of Congress. I think a statement made by Prof. Maurice Rosenburg, during a hearing on court reform, best summarizes the frustrations of those of us who have worked to enact this legislation: "The removal of the Supreme Court's obligatory jurisdiction is so clearly needed, long-overdue and widely supported that the failure to accomplish it before now is a tribute to nothing so much as gross inertia."

I hope that this statement does not reflect the future of this legislation in the 99th Congress.

By Mr. BRADLEY:

S. 834. A bill to increase competition in the transportation of natural gas; to the Committee on Energy and Natural Resources.

NATURAL GAS COMPETITION ACT

Mr. BRADLEY. Mr. President, today I am introducing the "Natural Gas Competition Act of 1985." By requiring natural gas pipelines to transport natural gas for others when they have available capacity in their pipelines, we can save natural gas consumers and the economy over $10 billion.

At both ends of the natural gas pipeline, Mr. President, competition is working for the consumers and the economy. The 15,000 U.S. producers of natural gas are competing with each other, as well as with Canadian and Mexican producers, to sell gas to the 1,500 natural gas distributors in this country. These local distribution companies are competing for markets with home heating oil, electricity and conservation. There is little competition, however, in the middle. It is here where the Natural Gas Competition Act would apply.

In the 98th Congress, the Energy and Natural Resources Committee took a long and careful look at contract carriage. After 3 weeks of markup on this issue alone, the committee adopted my contract carriage proposal by an 18-to-1 vote. The bill I am introducing today embodies the same concept as the contract carriage provision adopted by the committee.

The bill would accomplish the following:

Require pipelines to transport natural gas for other people if so requested and if the pipelines have available capacity;

Exempts local distribution companies and intrastate pipelines from this requirement if their State regulatory authorities have the authority to order them to transport gas for others;

Protects local distribution companies from loss of natural gas sales to contract carriage customers as determined by their State regulatory agencies;

Places the burden of proving adequacy or lack of capacity on the pipeline;

Protects existing customers of pipelines from adverse effects;

Protects essential and high priority users during periods of capacity constraint;

Authorizes FERC to allow an incentive rate to pipelines that voluntarily transport gas for others;

Adjusts pipeline service obligation, minimum bills and take-or-pay obligations to facilitate transportation;

Requires FERC to initiate rulemaking procedures to establish a pipeline rate design that would encourage voluntary carriage; and

Ensures that State regulatory agencies have the authority to encourage contract carriage.

I ask unanimous consent that the full text of the bill be included in the RECORD at the conclusion of my remarks.

Mr. President, how would consumers benefit from contract carriage? Very simply: lower natural gas prices. The Department of Energy has estimated that competition in the pipeline industry would lower prices by $7.4 billion due to lower profit margins. In addition, DOE estimates that contract carriage will bring on additional supplies of gas, further pushing down gas prices. This would provide an estimated $2.3 billion in economic benefits. The DOE report concludes, "Mandatory carriage was shown to be the most effective means to ensure that consumers have access to the lowest cost gas supplies." That is my goal.

I also ask unanimous consent that the portion of the DOE report dealing with contract carriage be included in the RECORD following the text of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 834

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Natural Gas Competition Act of 1985."

SEC. 2. Findings and Purposes.

(a) FINDINGS.—The Congress finds that—

(1) a national market for natural gas is necessary to promote both lower and nondiscriminatory natural gas prices and reliable supplies; and

(2) transportation of natural gas by interstate pipelines and local distribution companies is an essential element in establishing a national market for natural gas.

(b) The purposes of this Act are to—

(1) promote development of a national market for natural gas; and

(2) provide lower natural gas prices to consumers on a nondiscriminatory basis by providing competitive alternatives to purchases from interstate pipelines.

SEC. 3. Contract Carriage.

(a) IN GENERAL.—The Natural Gas Policy Act of 1978 (15 U.S.C. 3301 and following) is amended by adding the following new section:

"SEC. 316. Contract Carriage.

"(a) GENERAL RULE.—A person subject to this section shall, without discrimination, according to publicly filed tariffs, transport natural gas on the reasonable request of any person to the extent the pipeline, distribution company or gathering system has firm or interruptible available capacity for transportation on a firm transportation basis or on an interruptible transportation basis.

"(b) REQUIRED CARRIAGE.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the section shall apply to any person engaged in natural gas transportation.

"(B) SPECIAL RULES.—This section shall not apply to any local distribution company, intrastate pipeline or field gathering system if the State Commission having regulatory jurisdication over such local distribution company, pipeline or system certifies to the Commission that: (i) it has, and will exercise, the authority to require such local distribution company, pipeline or system (if it has available capacity) to transport natural gas without discrimination under terms and conditions comparable to those for transportation under this section, or (ii) that the local distribution company, intrastate pipeline or gathering system to which this section may otherwise apply has filed and in effect a tariff, rate schedule or service agreement covering nondiscriminatory transportation service which is available without discrimination within the service area of the local distribution company, intrastate pipeline or gathering system.

"(ii) EXTENT OF COMMISSION JURISDICTION.—A person shall not be subject to the jurisdiction of the Commission solely by reason of any transportation pursuant to this section except to the extent necessary to assure compliance with this section.

"(iii) STATE AUTHORITY OVER CERTAIN TRANSPORTATION.—In the case of any person who requests service from an interstate pipeline under this section for a facility which, at any time in the immediately preceding four years, received gas from a local distribution company or from any person for which a service area has been determined under section 7(f) of the Natural Gas Act, the Commission shall not permit such interconnection or transportation unless

"(A) the local distribution company involved contracts with the facility to transport or deliver the gas under terms and conditions approved by the state agency, or

"(B) The state agency having ratemaking jurisdiction over the area within which such facility is located gives its approval subject to such terms and with such conditions as the state agency may apply.

"(2) PROCESS.—

"(A) FILING REQUIREMENT.—The commission shall require each pipeline to file a report every 6 months after the effective date of this section (or more frequently) describing capacity in the pipeline's facilities (indicating the geographic location and projected duration of such capacity) and current and anticipated transportation and such other information as the Commission finds appropriate to carry out this section. The Commission shall also require any person requesting transportation of natural gas under this section or any modification of any such transportation to file with the Commission such information regarding said request as may be necessary to implement this section. The Commission shall establish procedures under which material filed under this section shall be made available to affected persons, and to any State and local agencies having jurisdiction or authority. The Commission shall provide procedures and restrictions which protect the confidentiality of that information which the person requesting service or the pipeline demonstrates to the Commission is confidential or proprietary.

"(B) PROCEDURES.—

"(i) Any pipeline or distribution company which receives a request to transport natural gas under this section shall,

"(A) provide transportation as requested within 45 days of receiving such request, or

"(B) petition the Commission within 10 days for a determination that the pipeline or distribution company lacks available capacity to provide the transportation requested.

"(ii) In the event that a pipeline or distribution company petitions the Commission under paragraph (b)(i)(B), such pipeline or distribution company shall have the burden of demonstrating that it lacks the available capacity to provide the transportation requested.

"(iii) In the event that a pipeline or local distribution company provides transportation pursuant to paragraph (B)(i)(A), any interested party may petition the Commission for a determination that the pipeline or the distribution company lacks the available capacity to provide the transportation requested. In the case of any such petition, the burden of demonstrating that the pipeline or distribution company lacks available capacity shall rest with the petitioner.

"(C) COMMISSION AUTHORITY.—The commission shall establish public procedures to resolve any petitions filed under paragraph (B)(i)(B) and paragraph (B)(iii), and shall make a final determination with regard to any such petition within 45 days of the date on which the petition is filed. With respect to such determination:

"(i) If the Commission determines that a pipeline or distribution company has available capacity to provide the transportation requested, it shall require said pipeline or distribution company to provide such transportation.

"(ii) The Commission shall, to the extent that available capacity is lacking, require a pipeline or distribution company to desist from the transportation of gas under this section if, based on a petitioner's demonstration, the Commission determines that the pipeline or distribution company does not have the available capacity pursuant to paragraph (3).

The Commission shall have the authority to establish interim requirements for the transportation of natural gas pending final determination on any petition.

The rules issued by the Commission pursuant to this section shall be designed to discourage frivolous petitions under this section for determination by the Commission that a pipeline or distribution company lacks available capacity.

"(3) AVAILABILITY CAPACITY.—For the purpose of carrying out this section, the Commission shall establish the methodology for determining whether available capacity exists to transport all or a portion of the natural gas requested on a firm transportation basis or on an interruptible transportation basis, as defined in paragraph (5). For the purpose of establishing such regulations:

"(A) Available capacity for transportation on a firm basis shall be considered to exist if it could be provided without impairing delivery of natural gas necessary to meet the

maximum quantities applicable to each then existing customer for the receipt of natural gas under all rate schedules, tariffs, governmental licenses, or certificates in effect at the time of application to receive such service. Provided, however, that capacity in the pipeline shall be deemed available for transportation on a firm basis to a firm customer of a local distribution company to the extent that the state agency having ratemaking jurisdiction over the local distribution company authorizes such utilization. Such authorization may be for any number of days of the year and may be subject to interruption for use by the local distribution company. Nothing in this subsection shall affect the requirements of subsection (4).

"(B) Pending promulgation by the Commission of a rule pursuant to subparagraph (C), available capacity for transportation on an interruptible basis for any month shall be considered to be the greater of (i) the difference between the pipeline's total capacity and its average actual throughout over the previous three years, or (ii) the difference between the pipeline's total capacity and the reasonably foreseeable requirements of its existing customers.

"(C) Within 12 months after date of enactment, the Commission shall issue a rule adopting or modifying the provisions of subsection (B). The rule shall achieve the objective of establishing an objectively verifiable standard, the objective of maintaining approximately the same average daily volumes of gas that were received prior to the date of enactment by existing customers purchasing under interruptible rate schedules, and the objective of this section to promote nondiscriminatory contract carriage.

"(4) ESSENTIAL AND HIGH PRIORITY USERS.—The Commission shall prescribe regulations which allocate capacity whenever a pipeline does not have sufficient available capacity to satisfy all of its obligations. Such regulations shall be prescribed and issued jointly with the regulations under paragraph (3), and shall provide that no customer shall be interrupted with respect to its entitlement to firm sales or firm transportation under any rate schedule, tariff, governmental license or certificate until all interruptible requirements have been fully interrupted, and, in the event any curtailment of firm sales and transportation is necessary such curtailment shall be on the basis of the priorities applicable under the Natural Gas Act (and Title IV of this Act) for curtailment of deliveries. In determining the curtailments among interruptible customers, the Commission shall apply the priorities established under Title IV of this Act for curtailment of deliveries. Such regulations shall not discriminate between the obligations arising under this subsection and other obligations.

"(5) DEFINITIONS.—For purposes of this section—

"(A) FIRM TRANSPORTATION BASIS.—The term "firm transportation basis" means the ability, consistent with accepted engineering principles, to transport, store, and deliver a given volume of natural gas to a given location through all means, including direct haul, storage, compression, flow reversal, or transportation by displacement without interruption except in the case of force majeure; and

"(B) INTERRUPTIBLE TRANSPORTATION BASIS.—The term "interruptible transportation basis" means the ability, consistent with accepted engineering principles to transport, store and deliver a given volume of natural gas to a given location through all means, including direct haul, storage compression, flow reversal, or transportation by displacement, subject to interruption on short notice to meet peak-load requirements or to meet the needs of firm and high priority users or due to circumstances of force majeure.

"(c) JUST AND REASONABLE RATES.—

"(1) IN GENERAL.—Except as provided in paragraph (2), any rates and charges of any pipeline or distribution company made with respect to any transportation provided pursuant to this section shall be just and reasonable (within the meaning of the Natural Gas Act) and shall recover the full cost of providing such services to the customer or customers receiving such services. Such rates and charges shall not discriminate between transportation under this section and any other transportation of gas including transportation of gas for sale or resale. No pipeline customer or distribution company customer shall be subject to a demand charge for the portion of its firm entitlement to receive gas which it uses to receive gas transported under this section unless such charge is levied on all customers receiving gas transported under this section.

"(2) REQUIREMENTS IF RATE IS LESS THAN MAXIMUM JUST AND REASONABLE RATE.—

The Commission may not authorize any pipeline or distribution company to impose a rate or charge which is less than the maximum that would be just and reasonable unless.

"(i) the pipeline or distribution company provides the same lower rate or charge for all classes of customers; and

"(ii) the pipeline or distribution company is prohibited from recovering from any of its other customers any amount to compensate the pipeline or distribution company for revenue forgone by the pipeline or distribution company in offering such lower rate, and

"(iii) the rate is publicly filed as a tariff with the Commission.

"(3) ALLOCATION OF PREEXISTING TAKE-OR-PAY LIABILITIES.—To the extent that the Commission permits a pipeline to recover in rates any costs associated with prepayments (or any similar liability) for gas that was not taken prior to the date of enactment of this section (without regard to whether the costs were incurred before or after enactment), it shall allocate such costs to all transportation of gas including transportation under this subsection, and the transportation of gas for sale or resale.

"(d) OBLIGATION TO CONTINUE SERVICE.—Nothing in this section shall be construed to affect in any way a pipeline's obligation at any time to continue to render service under contracts and certificates then existing with local distribution companies and other customers. A then existing customer shall be entitled to use the maximum capacity it has available under all existing rate schedules, tariffs, government licenses, contract or certificates to receive gas purchases from the pipeline or to transport gas under this section or both. If a customer of an interstate pipeline elects to reduce its obligation to purchase natural gas from such pipeline, the obligation of such pipeline to sell natural gas to such customer pursuant to the Natural Gas Act shall be reduced to the extent, and such pipeline shall not be required to seek Commission approval of such reduction under Section 7(b) of the Natural Gas Act.

"(e) MINIMUM BILL AND PIPELINE PURCHASE REDUCTION.—

"(1) Any minimum bill obligation existing on the date of enactment shall be reduced to the same extent that the customer's purchase from the pipeline has been reduced due to such customer's transportation of natural gas under this section.

"(2) REDUCTION IN PIPELINE PURCHASE OBLIGATION.—The interstate pipeline may elect to reduce its purchase obligations existing on the date of enactment from its suppliers by an amount necessary to offset any reduction in volume of natural gas sold by the pipeline from its system supply due to transportation under this section. In making any such reduction the pipeline shall reduce volumes ratably among all purchase contracts. This provision shall not be available as to any reduction in sales volumes due to transportation of gas produced by a production affiliate of the purchaser.

"(f) NONDISCRIMINATION PROVISION.—The Commission shall prohibit any pipeline or distribution company from discriminating in favor of or against any person under this section with respect to, but not limited to, any rate, charge, classification, rule, regulation, policy, practice or service; further, service rendered by a pipeline or distribution company pursuant to this section shall not be conditioned upon the provision by the pipeline of any other service offered by the pipeline or distribution company."

"(g) BUYER'S COOPERATIVES.—The rules issued by the Commission pursuant to this section shall facilitate and encourage any local distribution company or municipality to cooperatively purchase gas. Nothing in this section shall be construed to prevent or impair formation of any buyer's cooperatives for the purchase and transportation of natural gas."

"(h) EXPEDITED PROCEEDINGS.—In carrying out subsections (a) and (b), the Commission shall, if appropriate, use expedited procedures."

"(i) VOLUNTARY TRANSPORTATION ALLOWANCE.—Any pipeline or local distribution company that voluntary agrees to transport natural gas under this section shall be permitted to charge a nondiscriminatory incentive allowance (in excess of the just and reasonable rate, or the fair and equitable rate) for such transportation as established by the Commission.

"(j) TERMINATION.—The Commission may, by order, reduce or terminate the transportation service provided for under this section if the Commission determines that the service is not in accordance with this section.

"(k) RATE DESIGN.—Within 45 days of enactment of this section, the Commission shall initiate rulemaking procedures to establish a new interstate pipeline rate design that will encourage voluntary transportation of natural gas. The objectives of such rate design shall be as follows:

"(1) to establish incentives that encourage pipelines to provide adequate transmission services at minimum cost;

"(2) to make pipelines indifferent between selling their own system supply and providing transportation for others;

"(3) to ensure clear and prompt transmission of price signals in both directions between the wellhead and burnertip markets; and

"(4) to allocate risk to those who have chosen to bear it in exchange for the opportunity to earn profits.".

(b) STATE RATEMAKING AUTHORITY.—Section 602 of the Natural Gas Policy Act of 1978 is amended by adding new subsection (c) to read as follows:

"(c) STATE REGULATORY AUTHORITY.—(1) Nothing in this Act, or in the Natural Gas Act, shall preclude any state regulatory authority, acting pursuant to State law, from reviewing the natural gas purchasing practices or from disallowing the natural gas purchase costs of any utility subject to its jurisdiction in accordance with State law.

"(2) Nothing in this section shall authorize any State agency to establish maximum lawful prices for the first sale of natural gas. A State agency shall not have authority under this section to establish, by rule, order, or statement of policy, a presumption respecting the level of natural gas purchase price from producers or pipelines at or above which payment by a local distribution company is presumed imprudent or at or below which payment by a local distribution company is presumed prudent.".

(c) MONITORING AND REPORTING REQUIREMENTS.—

(1) MONITORING.—The Federal Regulatory Commission shall monitor and gather data concerning transactions carried out pursuant to section 316 of the Natural Gas Policy Act of 1978, including volumes of natural gas transported, problems concerning available capacity, costs and reliability of service of the pipelines transporting natural gas, protection of the capacity required by then existing customers of the pipeline, and the impact of such transportation on other users or customers of the pipelines.

(2) REPORT.—The Commission shall, after evaluating such data and consulting with appropriate State regulatory authorities and other persons, prepare and submit a report to the Congress within 24 months after the date of the enactment of this Act. Such report shall include an evaluation of the implementation of the authority provided in section 230(b) of the Natural Gas Policy Act of 1978, recommendations (if any) for modifications of such authority, and an analysis of whether requiring interstate pipelines to operate as common carriers would be in the public interest.

(d) COORDINATION WITH THE NATURAL GAS ACT.—All transportation of natural gas shall be provided under Section 316 of the Natural Gas Policy Act and that section shall supersede all other authorities previously enacted which authorize transportation of natural gas.

INCREASING COMPETITION IN THE NATURAL GAS MARKET

CHAPTER 7: CONTRACT CARRIAGE

Under the current system of private and voluntary carriage of natural gas, the private interests of pipeline companies are not compatible with the public interest. Thus, increases in the relatively small volumes of voluntary carriage for end-users are not an indication that changes in pipeline carrier status are unnecessary. Pipeline companies do not have proper incentives to pursue least-cost purchasing strategies. The ability to control access to citygate markets also has allowed pipeline companies to prevent competitive purchases by end-users and competitive sales by producers to end-users, distribution companies, and other pipeline companies. Only by separating gas purchasing from gas transportation under either mandatory or common carriage will consumers be assured of receiving the full benefits of competition in citygate markets. These benefits include lower transmission margins, competitively priced gas supplies, and the elimination of the gas surplus.

Alternative types of carriage

Currently, natural gas pipeline companies buy and resell gas as private carriers and also transport some gas under voluntary contract carriage. As private carriers, the pipeline companies purchase gas in the well head market and transport it for resale in the citygate market.

Common and contract carriers are agents who transport a commodity owned by others. Common carriers, unlike contract carriers, have a legal obligation to "serve the public." A pipeline company acting as a voluntary contract carrier transports gas as a result of an arrangement between the pipeline company and the shipper, negotiated at the discretion of the pipeline company. In contrast, a pipeline company acting as a mandatory contract carrier must transport gas at the request of a shipper as long as capacity is available. This requirement is similar to the legal obligations of a common carrier but does not disturb the ability of the pipeline company to transport gas that it owns or to serve the customers who buy gas from it.

Natural gas transportation under voluntary carriage

Voluntary carriage increased slightly as a share of market sales in 1983. However, as in 1982, there was a decline in absolute annual volumes. The annual volumes of gas transported or compressed by others (voluntary carriage) and the fraction of total deliveries that these volumes represent are shown in Table 7-1.

TABLE 7-1.—CONTRACT CARRIAGE BY ALL CLASS A AND B INTERSTATE PIPELINE COMPANIES

[Billion cubic feet]

	Transported or compressed for others [1]	Percentage of total deliveries
1978	4,060	13
1979	5,208	15
1980	5,686	16
1981	6,546	17
1982	6,359	17
1983	6,232	18

[1] Gas Account Statistics, "Deliveries of Gas Transported or Compressed for Others," table 16.

Source: EIA, "Statistics of Interstate Natural Gas Pipeline Companies 1983," November 1984.

A recent study conducted by the Interstate Natural Gas Association of America (INGAA) showed that the volume of voluntary carriage for end-users also increased in 1983.[1] However, voluntary carriage for end-users remains a small fraction of total voluntary carriage and an even smaller fraction of total sales. According to the INGAA study, about 600 billion cubic feet, or about 10 percent, of all voluntary carriage in 1983 was for end-users or distributors. This is equal to about 3 percent of total sales in 1983.

Several instances of actions by pipeline and distribution companies to discourage transportation of gas for end-users were cited in the public comments. Pipeline companies have strong incentives under private and voluntary carriage to prevent transportation of gas that they do not own or have not released from contracts in return for take-or-pay relief. In fact, the public comments reveal that many pipeline companies have a stated policy to refuse to carry any gas that competes with their system supplies. These examples are described in detail in Appendix B.

These examples give an indication of the problems that arise when pipeline companies act as private and voluntary carriers. Because the private interests of pipeline companies as buyers and sellers of gas diverge from the public interest, consumers are denied access to competitively priced gas supplies. Pipeline companies are able to exert their interests in the marketplace because private and voluntary carriage allows them to extend their market power over gas transportation—where they are regulated—into the natural gas purchasing market—where they are not regulated. This market power allows them to choose both the gas to be transported and the shippers who can use contract carriage. An additional problem may arise when pipeline companies are affiliated with producers. These pipeline companies may have perverse incentives to maintain high gas costs.

Market Power

One important factor leading to passage of the Natural Gas Act (NGA) in 1938 was the potential abuse of market power by interstate natural gas pipeline companies. For this reason, the NGA gave the Federal Power Commission the authority to regulate interstate natural gas pipeline companies. This authority now rests with the Federal Energy Regulatory Commission (FERC).

Interstate pipeline companies continue to possess considerable market power at the point of delivery—that is, in the citygate market. A 1981 FERC study found that on average a distribution company is served by only 1.8 pipeline companies and that roughly 70 percent of all distributors are served by only one pipeline company.[2] This study indicates that little competition exists between pipeline companies in most citygate markets at present.

However, these results still underestimate the degree of market power held by many pipeline companies. Even when a particular citygate market is served by several pipeline companies, there is usually only one pipeline company that links this citygate market to a particular gas field. If a distribution company or end-user wishes to purchase gas from this field, it must usually rely on one or at most two pipeline companies to transport the gas. At the same time, it may be in the interest of the pipeline companies involved to prevent access to that field. Thus, a pipeline company still may possess market power in a citygate market served by several pipeline companies.

The degree of market power held by a pipeline company also is determined by the number and cost of alternatives available to the end-users served by that pipeline, including alternative fuels and other sources of gas supplies. Alternative fuel prices and the per-unit cost of switching from natural gas to the alternative place a ceiling on the gas price that end-users are willing to pay. This price ceiling is considerably lower for industrial and electric utility gas consumers than for commercial and residential consumers. At present, alternative fuels are competing directly with natural gas for many industrial and electric utility consumers. This is generally not true for residential and commercial customers. Thus, pipeline companies serving end-use markets that are

[1] INGAA, "Voluntary Carriage in 1983," Washington, DC, September 1984.

[2] David E. Mead, Federal Energy Regulatory Commission, "Concentration in the Natural Gas Pipeline Industry," Washington, DC, October 1981.

primarily composed of residential and commercial customers possess greater market power than those pipeline companies that serve markets containing a high percentage of industrial and electric utility customers.

Pipeline companies currently possess the legal right to refuse transportation services to willing buyers and sellers of gas. This creates two major problems. First, this right to refuse carriage allows the pipeline company to choose the quantity and cost of gas to be transported into its markets. The company may have the incentive to carry particular volumes of gas. For example, in a surplus market a pipeline company will want to transport the gas it already has contracted to buy before arranging to transport nonsystem gas supplies. Likewise, a pipeline company may transport its most expensive gas first. This would depend upon the relative strength of two factors: the savings that result from making prepayments on less expensive supplies while taking higher cost gas, and the elasticity of demand of the pipeline company's customers. If the savings are high and if the pipeline company believes that higher gas prices will not significantly reduce consumption, then they will have the incentive to transport the most expensive gas first.

Second, in addition to choosing the quantity and cost of gas to transport, pipeline companies also determine which customers are allowed access to transportation. In doing so, pipeline companies have the incentive to discriminate in favor of industrial and electric utility customers, who are more likely to reduce their demand when gas prices rise. Because alternative fuel costs and the per-unit cost of switching are higher for residential and commercial customers than for industrial consumers and electric utilities, pipeline companies are not as threatened by the possibility of reduced residential and commercial demand. Ultimately, customers with more elastic demand gain access to the gas transportation network while those with less elastic demand do not.

Pipeline Incentives as a Purchasing Agent

As private carriers, natural gas pipeline companies act as purchasing agents for their downstream customers. However, for two reasons, pipeline companies do not have the proper incentives to purchase the least expensive gas supplies.

First, cost-of-service regulation insulates pipeline companies from losses when they purchase higher cost gas. The purchased gas adjustment mechanism allows the pipeline company to pass through any increase in gas costs to consumers. If sales fall as a result of higher gas prices, the pipeline company may still ensure full cost recovery by requesting a rate increase for the remaining customers in its next rate case. This diminishes the pipeline company's incentive to seek the lowest cost gas available.

Second, a more onerous problem may exist if the pipeline company is vertically integrated or if it is a subsidiary of a parent company that also owns production facilities. A recent study sponsored by the National Association of State Utility Consumer Advocates showed that interstate pipeline companies may benefit from increased gas costs through the increased profits of producing affiliates.[3] For the 12 largest interstate pipeline companies, which control 76 percent of winter heating season requirements, this study found that each 10-percent increase in gas costs adds 6 percent to pre-tax profits.[4] Note that this does not require a pipeline company to pay higher prices to its own affiliate than it pays to other producers; it simply means that the pipeline company or its parent company benefits from higher gas prices. Clearly, this fact will be considered when the pipeline and the parent company determine their optimal purchasing strategy.

Arguments for mandatory contract carriage

Benefits for Mandatory Carriage

Under a system of mandatory carriage, consumers and the economy will realize net economic benefits of at least $9.7 billion. Mandatory carriage creates these benefits by giving buyers and sellers of gas greater access to the pipeline transmission network, which promotes increased competition in both purchasing and transportation of natural gas. Pipeline system supplies will compete both with supplies from other pipelines and with the supplies that are transported under mandatory carriage requested by producers, other pipeline and distribution companies, and end-users. To meet this competition, pipeline companies must reduce either their purchased gas costs or their transportation rates. Introducing competition in the purchase and transportation of natural gas will stimulate more efficient operations by natural gas pipeline companies. As a result, both consumers and the economy will benefit from lower transmission margins, competitively priced gas supplies, and the elimination of the gas surplus.

We estimate that under mandatory carriage average transmission margins of interstate pipeline companies would be at least $0.08 per thousand cubic feet lower than they are now. With a reduction of $0.08 per thousand cubic feet in transmission margins, consumers and the economy would realize net economic benefits of $7.4 billion. By increasing competition between gas suppliers, mandatory carriage would eliminate inefficient increases in transmission magins, such as excessive growth of operating and maintenance cost.[5] To meet competition from lower cost gas suppliers, pipeline companies, particularly those with smaller gas cushions,[6] would be forced to reduce transportation rates. Clearly, some flexibility exists to do so.

It is important to note that a reduction in unnecessary operating and maintenance expenses is only one area in which pipeline companies could reduce transmission margins. Pipeline company rates of return remain high relative to those in other industries, including both regulated and unregulated industries.[7] This could explain why none of the major interstate pipeline companies filed rate cases in 1983. In a rate case, all elements of the pipeline's cost of service, including return, are subject to review.

Many economists also have shown that rate-of-return regulation encourages firms to overcapitalize to increase the size of the rate base.[8] Because pipeline companies are allowed a return on their rate base, the size of the rate base determines the absolute profits that a pipeline company may earn. Greater competition brought on by mandatory carriage would maintain pipeline company returns at reasonable levels and would reduce incentives for pipelines to incur unnecessary capital costs. These benefits were not measured.

Mandatory carriage also produces benefits of $2.3 billion by bringing the current gas surplus to the market. As stated above, manadatory carriage increases competition between existing gas suppliers, forcing them to lower gas costs. To remain competitive, pipeline companies and producers must renegotiate contracts or take other actions to lower gas prices.[9] This reduction in gas prices will continue until the surplus is eliminated.

Mandatory carriage would provide additional benefits since it allows all producers to have access to end-use markets. Very few pipeline companies have purchased new contract gas since 1982, when many companies began to incur prepayment liabilities. By providing new gas producers with access to end-use markets, mandatory carriage introduces additional supplies into the market, which promotes increased competition in the gas-purchasing market. These benefits were not measured.

Eliminating Market Power Over Natural Gas Brokerage

Domestic pipeline companies act as natural gas brokers and as gas transporters. As brokers, they participate in a competitive wellhead market. As gas transporters, they operate as natural monopolies. As discussed above, combining these two functions allow pipeline companies to extend their market power to the purchasing market. Under mandatory carriage, local distribution companies and end-users may act as their own brokers, or may use independent brokers, to purchase the least costly gas supplies available at the wellhead.

Mandatory carriage would subject pipeline companies' natural gas sales to greater competition, thereby limiting pipeline companies' market power to the transportation function, which is regulated by FERC. Competition from consumers seeking least-cost supplies would encourage pipeline companies to purchase the lowest priced supplies that are available. This is not true under the current system of voluntary and private carriage.

Nondiscriminatory Access to Transmission

Under private voluntary carriage, pipeline companies face some competitive pressures from customers who can switch quickly to an alternative fuel if gas prices exceed the alternative fuel price. Pipeline companies have a clear incentive to provide carriage for this group. Local distribution companies that serve residential and commerical cus-

[3] J.S. Graves, W.W. Hogan, and R.T. McWhinney, "Mandatory Contract Carriage: An Essential Condition for Natural Gas Wellhead Competition and Least Consumer Cost," Putnam, Hayes, & Bartlett, Inc., September 1984.

[4] This figure was adjusted downward by Putnam, Hayes, & Bartlett, Inc., from 11 percent, using affiliated data supplied by INGAA. While the magnitude of the effect has declined, the result remains—affiliated pipeline companies have an incentive to maintain higher prices for natural gas.

[5] A review of nongas operating and maintenance costs revealed a per-unit increase between 1981 and 1984 of $0.08 after adjusting for inflation and volumes. These expenses should not have increased since sales volumes declined over this period. For a more detailed explanation, see chapter 1.

[6] Pipeline companies with smaller "cushions" possess a higher cost mix of gas—that is, they possess a smaller percentage of old and low-cost gas supplies.

[7] See EIA, "Competition and Other Current Issues in the Natural Gas Market," Washington, DC, June 1984; and Merrill Lynch, "Those Poor Pipelines," Natural Gas Monthly, August 1983.

[8] For a review of this literature, see W. Baumol and A. Klevorick, "Input Choices and Rate of Return Regulation: An Overview of the Discussion," The Bell Journal of Economics and Management Science, vol. 1, No. 2 (Autumn, 1970).

[9] See chapter 5 on contract renegotiation.

tomers who cannot readily switch fuels will have more difficulty obtaining carriage as pipeline companies will use their market power to limit other sources of supply available to these customers.

Under mandatory carriage, local distribution companies can act freely to obtain their own gas supplies or may use an independent broker to carry out this function for them. If pipeline companies offer local distribution companies gas at prices that are not competitive, distribution companies or their brokers can negotiate directly with producers to purchase lower cost gas supplies, with some assurance that carriage will be provided by the pipeline company.

Removal of Distortions Caused by Vertical Integration

Many pipeline companies are affiliated with producers or distribution companies. As discussed above, vertical integration in the natural gas industry allows integrated companies to make business decisions that reduce profitability in one part of the company while more than offsetting these losses with increased profitability in another part of the company. This problem is exacerbated by regulations that minimize the losses of pipeline operations.

Mandatory carriage should eliminate the ability of integrated companies to maintain high wellhead gas prices when market forces dictate that these prices should be lower. Under such conditions, nonaffiliated producers will not hesitate to lower prices and sell more gas directly to consumers, if they are free to do so. Thus, mandatory carriage will result in increased production and lower retail prices by removing the distortions caused by vertical integration.

Increased Market Stability and Flexibility

Recent activities to develop spot and futures markets demonstrate that the natural gas market is becoming more dynamic and flexible. The ability to obtain transportation without delay is critical for the ability of the market to adjust prices or supplies through spot or other short-term sales. Futures markets add investment capital to the natural gas industry and mitigate the volatility of price changes over time. The successful operation of these two new markets depends on the ability of the parties involved to transmit gas from one point to another, both now and in the future. Mandatory carriage makes such movements possible.

Voluntary contract carriage significantly inhibits the development of spot and futures markets. Voluntary carriage introduces too much uncertainty and delay concerning access to transportation services to allow the spot and futures markets to reach their true potential. Thus, voluntary carriage will deprive consumers of the full benefits that spot and futures markets can provide by ensuring that gas supplies reach consumers where and when they are needed the most. Mandatory carriage is an essential component of a flexible and stable natural gas market.

Incremental Benefits of Common Carriage

Some of the problems addressed by mandatory carriage may be resolved better by common carriage. For example, common carriage prohibits pipeline companies from purchasing and reselling gas. Under common carriage, pipeline companies only transport gas, though they may own or be owned by gas producers. Thus, under common carriage, the monopolistic transportation role of a pipeline company is separated entirely from its role as a gas broker. The incentives of the natural monopoly are not carried over into the buying and selling of gas. Under mandatory carriage, the extent of the competition may depend on the capacity available for unaffiliated gas. A pipeline company without excess capacity is unlikely to face the competitive pressures that a pipeline company with excess capacity would face. Thus, while both mandatory and common carriage are more effective than voluntary contract carriage at separating the two roles of existing pipeline companies, common carriage may prove to be the most effective alternative if pipeline companies are able to maintain a greater degree of market power under mandatory carriage.

Common carriage also may more effectively remove the distortions of vertical integration than mandatory carriage does, since it is more certain that common carriage will maximize competition in the purchase, transport, and sale of natural gas. Common carriage leaves little or no opportunity for pipeline companies to purchase more expensive gas and pass the costs on to the end-user while increasing their affiliated company's profits.

Arguments against mandatory carriage

This section will review several of the more important prominent objections to mandatory carriage and show that they are either completely invalid or overstated. The objections are listed below:

Mandatory carriage will benefit only large-volume gas users and may increase rates for the remaining pipeline customers.

Mandatory carriage requires pipeline companies to maintain unwarranted service obligations.

Mandatory carriage will dramatically increase regulatory costs.

Mandatory carriage is unnecessary since greater volumes of gas are moving through voluntary carriage.

Mandatory carriage is a temporary solution to the current problem of the gas surplus.

Mandatory Carriage Benefits All Gas Consumers

A common criticism of mandatory carriage is that it benefits only large industrial gas consumers and that it also may cause cost-shifting among consumers, which increases rates for residential and other small-volume gas users. These were two conclusions of the Cambridge Energy Research Associates' critique of mandatory carriage.[10] In that report, the first conclusion was based upon the premise that mandatory carriage is only available on an interruptible basis. Thus, the only customers able to use carriage are those with storage or alternative fuel capabilities. These presumably are not small-volume consumers, such as residential and commercial consumers.

This argument is not valid for two reasons. First, most mandatory carriage proposals give small-volume consumers access to the gas transmission network through their local distribution company. The local distribution company often is able to use storage facilities. In addition, Order 380 has greatly increased the flexibility that the local distribution company has in obtaining nonsystem gas supplies.[11] The order substantially reduces the payments that the local distribution company must make to its original pipeline supplier when obtaining onsystem gas supplies. Second, the local distribution company can replace firm-service supplies with lower cost supplies obtained through mandatory contract carriage. In other words, the local distribution company is able to reserve portions of the pipeline company's capacity to ensure adequate service capability, while obtaining its gas supplies through mandatory carriage.

The increase in competition between gas suppliers that occurs under mandatory carriage ensures all gas consumers of obtaining the lowest cost gas supplies available. Mandatory carriage also increases pressure on pipeline companies, producers, and local distribution companies to renegotiate contracts that prevent gas prices from falling. Thus, all gas consumers can expect to benefit from reduced gas costs under mandatory carriage.

A second conclusion of the Cambridge Energy Research Associates' report is that mandatory carriage will result in cost-shifting between gas consumers. This conclusion is based on the premise that each gas consumer makes some contribution to the fixed costs of the pipeline company when the consumer purchases system supplies. Thus, when a gas consumer replaces system supply purchases with nonsystem supply purchases, it reduces its contribution to the pipeline company's fixed costs. These fixed costs must then be recovered from the pipeline company's remaining customers. However, it is clear that this cost-shifting need not occur. State and federal regulatory commissions have full authority to design transportation rates in a way that will retain the original allocation of fixed costs. This adjustment in transportation rates can even be used to sustain a cross-subsidy between gas users if such a subsidy is considered desirable.

Mandatory Carriage Does Not Require Pipeline Companies To Maintain Unwarranted Service Obligations

Mandatory carriage also has been criticized because it requires pipeline companies to maintain an ability to provide system supplies to mandatory carriage customers. This criticism was put forth in a January 1984 American Gas Association (AGA) report that asserts that mandatory carriage will affect the reliability and cost of gas suply.[12] According to the AGA, mandatory carriage customers, buying from a limited number of sources, face a higher probability of emergency shut-ins. This, in turn, requires pipeline companies to maintain available system supplies for their mandatory carriage customers. The cost of maintaining these system supplies is borne by the remaining pipeline customers.

This argument is completely invalid for two reasons. First, none of the reasonable mandatory carriage proposals requires a pipeline company to maintain system supply capability for a mandatory carriage customer. In fact, most of these proposals explicitly reduce the pipeline companies' obligation to provide system gas supplies for a mandatory carriage customer. Second, state and federal regulatory commissions would not allow a pipeline company to charge its firm-service customers for the cost of maintaining system supply for a

[11] Order 380 is explained in greater detail in chapter 5 on renegotiation.

[12] American Gas Association, "Operating Problems Under Mandatory Carriage, Arlington, VA, January 1984.

mandatory carriage customer. Such a charge is inherently unjust and unreasonable. If a mandatory carriage customer wants to ensure that system gas supply is available, then that customer will pay for it.

Mandatory Carriage Will Not Lead to a "Regulatory Paralysis" of the Pipeline System

Since determination of available capacity in a pipeline system is not always a simple matter, opponents of mandatory carriage often have complained that it causes a dramatic increase in the cost of regulation. The inherent properties of natural gas and the nature of its uses complicate proper capacity determination. For example, because the demand for gas can fluctuate over the course of a day (especially during the winter heating season), the pipeline itself is often used as a temporary storage facility. This method of meeting daily fluctuations in demand is know as linepacking. Obviously, linepacking increases the difficulty of determining available capacity. Temperature and pressure in the pipeline also affect the level of available capacity. According to mandatory carriage opponents, regulatory agencies will have to replicate the expertise of the pipeline companies to determine when and where capacity is available. Because the regulatory process is often time-consuming, this could lead to a "regulatory paralysis" of the pipeline system.

The premise of these arguments is that mandatory carriage will create significant capacity problems in the gas transmission network. However, there is strong evidence to show that this will not occur. Studies have shown that the capacity of the gas transmission network is far greater than current or historical levels of gas transportation.[13] The evidence that capacity is currently available is even stronger. The large increases in take-or-pay liabilities that occurred during 1982 and 1983 also show that pipeline companies expected to sell more gas during those years than they were able to sell.[14] Certainly the pipeline companies would not have contracted to buy these volumes of gas if they did not believe that they had the capacity to transport the gas. While gas demand increased during 1984, it is still considerably below pre-1982 levels. Thus, it is clear that idle pipeline capacity currently exists.

Other factors also indicate that mandatory carriage will not create new, complex capacity problems that require regulatory interference. Mandatory carriage simply involves changing title to gas that is transported through the pipelines. As such, it will not affect factors such as seasonal variations in demand and the cost of storage. Thus, it is unlikely to create a set of capacity problems that the pipeline company does not manage currently.

Insofar as mandatory carriage increases competition between gas suppliers and lowers gas prices, it may increase throughput. However, in the presence of the idle capacity discussed above, any increase in throughput would benefit all pipeline customers by spreading the fixed costs over a larger volume of sales. In the unlikely event that mandatory carriage does create a capacity problem requiring regulatory interference, any increase in regulatory costs must be balanced against the benefits that mandatory carriage provides by increasing competition between gas suppliers. Capacity problems that occur are likely to be the result of lower gas prices that increase throughput. In addition, if increases in costs can be attributed to a specific pipeline customer, then those costs can be charged to that customer. In this situation, the individual customer could evaluate the relative benefits and costs of using mandatory carriage.

The presumption of available capacity in mandatory carriage proposals also reduces the need for extensive regulation. Regulators need only review the capacity constraints of pipeline companies that are unwilling to accept carriage and are able to show evidence that available capacity to do so does not exist. Thus, they avoid the need to predetermine capacity for each pipeline in the transportation network. A pipeline company that uses the complexity of operations to hide available capacity will do so without the protection of the law. In conclusion, mandatory carriage is unlikely to increase the costs of regulation. Because it ensures that consumers have access to the lowest cost gas available, it is the *proper* regulatory policy.

Mandatory Carriage Is Necessary To Ensure That Consumers Have Access to Lowest Cost Gas

Several of the public commentors cited the increase in voluntary carriage for nonpipeline customers as evidence that mandatory carriage is unnecessary. However, the amount of carriage for end-users and distribution companies remains a small percentage of total sales. In addition, Appendix B cites numerous instances of pipeline refusals to provide carriage.

Critics also have asserted that mandatory carriage is a solution to transient problems: the existence of a large surplus, the wide disparity in the price of natural gas, and the willingness of producers to sell gas at "distressed prices" in order to maintain cash flow.[15] As these problems subside, the need for mandatory carriage will disappear.

Both of these arguments against mandatory carriage ignore the fact that mandatory carriage is necessary to ensure least-cost purchasing practices in both the short and the long run. Earlier sections of this chapter showed that, under voluntary carriage, pipeline companies lack the proper incentives to minimize gas costs. Mandatory carriage was shown to be the most effective means to ensure that consumers have access to the lowest cost gas supplies.

APPENDIX B: EXAMPLES OF ANTICOMPETITIVE BEHAVIOR IN GAS TRANSMISSION

The public comments to the Section 123 report reveal several examples of refusals to carry gas by gas transporters. These examples are described in detail below. Following these examples is a list of stated pipeline company policies regarding voluntary carriage that were provided in the public comments submitted collectively by the Aluminum Association, the American Iron and Steel Institute, the Georgia Industrial Group, and the Process Gas Consumers Group. These examples and policies show the great difficulties that producers and end-users often have in obtaining voluntary carriage.

Examples of refusals to carry gas [1]

The comments submitted by Ventura Resources, Inc., of Encino, California, are summarized here:

Ventura owns a small gas field near Creek County, Oklahoma. The three wells on the field are capable of producing 800 to 1,100 thousand cubic feet of gas per day. The original well was completed based on the knowledge that a collection line owned by Transok Pipeline Company was within 2 miles of the well and that Ventura had received a favorable reaction to an initial telephone inquiry regarding the ability of Transok to purchase this gas. However, once the well was completed, Transok required Ventura to ship its gas through another line that required Ventura to install gathering lines and a compressor system. Ventura agreed, and a contract with a 75-percent take-or-pay provision was agreed to at a price of $2.25 per million Btu's. In 1983, after 6 months of "no take," Transok informed Ventura that their take would go down to 25 percent. Ventura then found a new buyer for the gas at a lower price. Transok refused to provide transportation services. Ventura was finally able to sell its gas to Transok at a reduced price, but only after obtaining the services of an independent broker who, through past connections, was able to negotiate a new contract with Transok. The broker received a continuing commission of $0.05 per thousand cubic feet for negotiating this contract.

The following examples were provided by the Aluminum Association et al.:

In the course of more than a year of negotiations, an interstate pipeline company repeatedly found excuses for not transporting specific supplies of gas to a Midwestern company, despite proposals for gas to be delivered from various locations. The company recently announced that the relevant plant will be closed, putting 500 people out of work. The high cost of gas was a major contributing factor to the shutdown.

A Midwestern manufacturer negotiated the purchase of selfhelp gas to replace an alternative fuel. The interstate pipeline company and local distribution company agreed to transport the gas for the manufacturer. After completing 1 year of the contract, the interstate pipeline company refused to continue the transportation on the grounds that the local distribution company was delivering gas to its industrial customers at a cost that was lower than the cost of the alternative fuel. This cost relationship between the local distribution company's delivered gas and the alternative fuel had existed from the initiation of the contracts. The interstate pipeline company had chosen to use this as a means of eliminating gas-on-gas competition.

A major interstate pipeline company refused to transport self-help gas until a group of its largest industrial customers intervened in a rate case involving revised rate structures for industrial customers. Upon analysis of the industrial group's arguments based on cost-of-service principles, a settlement was agreed to that allowed transportation of a percentage of the gas requirement of the pipeline company's largest industrial customers.

[14] For more information on take-or-pay liabilities, see chapter 5 on renegotiation.

[15] Cambridge Energy Research Associates, "Mandatory Carriage."

[1] In many cases, the firms involved consider these examples to be confidential business matters and therefore do not specifically identify the parties to these transactions.

A major interstate pipeline company in the South has refused to transport gas that is from a major producing area of any customer not on its system, whether the customer is an intrastate or interstate end-user. This effectively eliminates a major low-cost gas producing area from being available to off-system industrial consumers.

An industrial user in the East found gas available for direct purchase from a producer, and its local distribution company agreed to transport the gas to the user's plant. Two of the interstate pipeline companies serving the area refused to carry the gas because the user could not certify it would displace an alternative fuel.

Complaints have been filed with the Pennsylvania Public Utility Commission by local distribution companies to prevent industrial users from shifting to another utility for gas supply. With overlapping service areas between utility companies, this request would eliminate all gas-on-gas competition and force industrial customers into situations of being required to purchase gas at noncompetitive prices.

Finally, the National Council of Farmer Cooperatives provided the following comments:

Pipelines currently carry gas for some users; but they all too often have exhibited a notable reluctance to do so. A number of the National Council's members have attempted to lower energy/feedstock costs by negotiating contract carriage rights with natural gas pipeline companies serving their geographic areas. In some instances, the pipeline company has made a good-faith effort to work with the end-users served by its system. Unfortunately, other pipelines have refused to consider contract carriage, even where surplus transmission capacity clearly existed.

Stated pipeline company policies on voluntary carriage

The following were provided in the public comments of the Aluminum Association et al.:

Columbia Gas Transmission Corporation filed tariffs in 1983 that explicitly ban transportation for users whenever Columbia decides that the transported gas would compete with its own sales. Even if the gas displaces oil, Columbia requires the user to give Columbia's existing producer-suppliers a right of first refusal to replace the original seller. The lawfulness of these and other anticompetitive restrictions was challenged and remains pending, in Docket No. RP84-11, a year after the tariff sheets took effect. Columbia Gulf Transmission Company incorporates into its tariffs all of Columbia Gas' transportation restrictions.

Transcontinental Gas Pipe Line Corporation (TRANSCO) submitted responses in a FERC proceeding (Docket No. RP83-137-000) stating that it will not transport gas for any end-user if that will compete with its own sales. Experience confirms that this is TRANSCO's policy.

A witness for Tennessee Gas Pipeline Company testified in Docket No. RP82-125 that Tennessee will not transport gas sold by others if that would reduce its own sales.

Texas Eastern Transmission Corporation has transportation tariffs applicable to end-users that limit such services to instances involving the displacement of oil. Texas Eastern's policy was partly a product of local distributors' desires for protection from competition. Although the reasonableness of that restriction was challenged well over a year ago (in Docket No. RP83-35-000), the issue is still pending at FERC.

Montana Dakota Utilities Company's filed tariffs state as a condition of service that "gas transported hereunder shall not be used to displace volumes of gas that would otherwise be purchased from [MDU]"—that is, it will not transport gas that will compete with its own sales. FERC recently approved that tariff in Docket No. RP84-14-001, et al., over a major producer's objection to that limitation on competition.

Panhandle Eastern Pipeline Company imposes, as a condition of transportation, a "bid-out" procedure that gives its existing producer-suppliers a right of first refusal to supplant another producer's sale upon matching the major contract items.

United Gas Pipe Line Company refused to agree to nondiscriminatory transportation on behalf of users as part of a settlement that included transportation to displace oil for distributors, and FERC refused to correct that deficiency in Docket No. RP-82-57.

Numerous local distribution companies also refuse to transport any gas except to displace alternative fuels, and they pressure pipeline companies in FERC proceedings and elsewhere to do the same.

By Mr. McCLURE (for himself, Mr. GARN, and Mr. SYMMS):

S. 835. A bill to amend the Food Stamp Act of 1977 to reform and reduce the cost of administering the Food Stamp Program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FOOD STAMP REFORM ACT

Mr. McCLURE. Mr. President, today Senator GARN, Senator SYMMS, and I are introducing the Food Stamp Reform Act of 1985. This bill contains 14 changes in the Food Stamp Program that are necessary to eliminate some of the waste and abuse in the system.

Every Member of this body knows that our budget problems will never be solved until Congress has the courage to address the growth in entitlement programs. It doesn't take a Ph.D. in economics to figure out where the problem lies when you have half of the total Federal budget growing over the last 9 years at an average of 9 to 10 percent per year, or by some calculations, 12 to 15 percent per year. We have allowed this situation to go on long enough, and I think Congress has an obligation to the American taxpayer to do something about it. If Congress thinks it can ignore the growth in all the entitlement programs then we are just not living in the real world. Between 1970 and fiscal 1984, the cost of living rose 172 percent, and during that same period Federal spending on entitlement programs went from $65 billion to $400 billion. We could eliminate—not just reduce, but totally eliminate every discretionary program the Government operates, and it isn't going to solve our budget problem. Freezing benefits is not enough. Reform is necessary. The only way to do that is to enact reforms in entitlements. The bill we are introducing today is a step in that direction.

I will not argue that the Food Stamp Program was set up with the best of intentions and that it is a necessary program for many people in this country who find themselves in circumstances beyond their control. Certainly, we, as a society, have a human obligation to help people who are in need. But, Mr. President, I do not believe the American taxpayer is under any obligation to pay for food for people who are perfectly capable of working and who simply find it easier to live off the public dole.

In 1961, the Federal Government established a small antihunger program in eight U.S. counties, at a cost of $13 million. This experimental project blossomed into the current food stamp program that was enacted in 1964 at a cost of $56 million. By 1978, it cost exactly 100 times the original amount. This year, we are talking about a program that will exceed $12 billion. Currently, 1 out of every 10 Americans are receiving food stamps—21 million people. We have 96 million taxpayers in this country. Every one of those taxpayers pays $125 a year to finance this program. The unbelievable growth of food stamps tells me that structural changes are needed in order to reduce the number of able-bodied people who are receiving benefits. Changes are also needed not only to eliminate abuse, but also to cut down on the fraud that is so widespread in the system. The Food Stamp Reform Act achieves these goals by doing the following:

First; restores the food stamp purchase requirement eliminated in 1977, with an exemption for the elderly and disabled. This would save $1 billion each year.

Second; limits eligibililty to those with gross incomes at or below 100 percent of poverty. This would save $240 million each year.

Third; permits the States to use the same assets test as for aid to families with dependent children [AFDC], or in the case of the elderly or disabled, permits the use of the assets test for supplemental security [SSI]. This would save $40 million each year.

Fourth; requires photo identification cards be issued and that food stamps be countersigned.

Fifth; counts as income for eligibility determination such things as income tax rebates, and Federal energy assistance. A savings of $340 million each year.

Sixth; reduces the standard deduction from $85 to $60. A savings of $575 million per year.

Seventh; reduces the age of a child which exempts individuals from work registration from 6 to 3, except where appropriate child care is not available.

Eighth; freezes the indexing of benefit levels, that is, child care deduction,

excess shelter deduction. An estimated cost savings of $500 million per year.

Ninth; requires the States to pay for any excess in the error rate above 3 percent. A savings of $523 million.

Tenth; requires that purchases with food stamps be made in even dollar amounts. Any amount over an even amount must be paid by the recipient in cash.

Eleventh; eliminates the $10 minimum benefit. A savings of $65 million.

Twelfth; permits the States to require repayment through unemployment compensation benefits if a participant has been receiving food stamps through fraudulent means. Savings, $1 million.

Thirteenth; simplifies definition of household. Savings, $65 million.

Fourteenth; permits, rather than requires, the States to provide expedited service for certain households. Savings, $27 million each year.

Back in November 1980 the Investigations staff of the Senate Appropriations Committee reported that: "We believe far too little is being done to detect and prosecute food stamp recipient fraud." Three years later, in its report of February 4, 1983, GAO determined that we lose about $1.2 billion every year from the Food Stamp Program because of overissuance, errors, and fraud. Year after year passes, and we still have done relatively little to clean up the Food Stamp Program. I think it's a national disgrace, and this bill is designed to do something about it. The provisions in this bill are roughly divided into three categories—tightening up on eligibility requirements, addressing fraud and abuse, and cutting back on waste.

Mr. President, I have always thought it was ludicrous to establish a poverty level, and then make food stamp eligibility at something above that level. If the poverty level, as defined by the Office of Management and Budget, it too low, then it should be changed, but until that is determined to be the case, then eligibility for assistance programs should be set at 100 percent of the poverty level. This provision will immediately cut back on the cost of this program by $240 million.

Likewise, I have never understood why we have allowed so many deductions for eligibility determination. If a person receives a low-income energy assistance check—that is income. There is no way you can get around that fact. Money is money, no matter what form it comes in, and all of that should be taken into account when determining eligibility. By including this into the determination of eligibility, a saving of $340 million can be made.

According to the GAO report issued in February 1983, although Federal losses in the Food Stamp Program can occur in any number of ways, the biggest problem lies in how a household's eligibility is determined. The Food Stamp Reform Act simplifies the definition of households eligible to participate in the Food Stamp Program in such a way that, with the exception of elderly or disabled persons, all individuals living together would be defined as a household. Just this change alone will reduce Federal outlays by $65 million. States would be permitted to draw up criteria to provide certain exceptions, if they so desired.

The bill contains several provisions relating to fraud and abuse that I believe are just plain common sense. The requiring of photo-identification cards and countersigned stamps, much like travelers' checks, will help eliminate the blackmarket in food stamps, plus help reduce the estimated $20 million, according to GAO, that is lost each year due to reported losses and theft of food coupons mailed to participating households.

One of the complaints I hear most often from Idahoans about food stamps is when a participant buys a small item and uses the change from the food stamp to purchase beer or cigarettes. By requiring even dollar purchases, this abuse will be eliminated, and the food stamp participant will only have to pay a maximum of 99 cents. Requiring an out-of-pocket expense of 1 to 99 cents is hardly an intolerable burden.

Responsible people who work in food stamp offices will tell you that the expedited service requirement is one of the most abused provisions of the current program. Currently a food stamp recipient can request expedited service and must receive the assistance within 5 days. All this provision does is permit the people to hop from food stamp office to food stamp office. The GAO report indicates that this multiple participation is quite expensive. Savings of $27 million could be made through this provision. Inadequate time for verification precludes early detection of a fraudulent application. Our bill simply allows a State to provide expedited service, rather than requiring it.

Finally, this legislation will require that the States pay for any excess in the error rate above 3 percent. The Food Stamp Program currently has an error rate over 10 percent. That is totally unacceptable, but the States have no real reason to try to correct this problem since the program is 100-percent funded by the Federal Government. I believe it is entirely reasonable to require this rate to be lowered, or to require reimbursement to the Federal Government. This provision will save the Federal Government $523 million.

The GAO report indicates that the four most prevalent abuses of the system include:

Failing to accurately report income and assets.

Opening multiple cases.

Filing false claims of lost or stolen coupons and authorization-to-participate cards.

Failing to report changes that would result in terminated eligibility or reduced levels.

The bill Senator GARN, Senator SYMMS, and I are offering addresses all of these areas and does so in a manner that will not harm those people who are truly eligible for food assistance. The Food Stamp Program is one of the most abused and wasteful programs the Federal Government operates, and I think that a vast majority of the American people agree with me. Why Congress is always so hesitant to take a stand on this issue and clean up the program is beyond me. It is only reasonable to think that when we see abuse, we should act to do something about it. We have made advances in food stamp reform—but it simply hasn't been enough. All of the issues this bill deals with need to be looked at and acted upon. They needed to be done years ago, but it is better late than never.

I ask unanimous consent that the text of the bill be inserted in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 835

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Food Stamp Reform Act of 1985".

(b) The table of contents for this Act is as follows:

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. References to the Food Stamp Act of 1977.

TITLE I—DEFINITIONS

Sec. 101. Purchase requirement.
Sec. 102. Households.
Sec. 103. Adjustment of eligibility and benefit levels.

TITLE II—ELIGIBLE HOUSEHOLDS

Sec. 201. Income standards of eligibility.
Sec. 202. Nonrecurring lump-sum payments.
Sec. 203. Energy assistance payments.
Sec. 204. Standard deductions.
Sec. 205. Resource limitations.

TITLE III—ELIGIBILITY DISQUALIFICATIONS

Sec. 301. Parents and other caretakers of children.

TITLE VI—ISSUANCE AND USE OF COUPONS

Sec. 401. Cash change.

TITLE V—VALUE OF ALLOTMENT

Sec. 501. Minimum allotment.

TITLE VI—ADMINISTRATION

Sec. 601. Expedited coupon issuance.
Sec. 602. Photographic identification cards.
Sec. 603. Countersignature of coupons.

TITLE VII—COLLECTION AND DISPOSITION OF CLAIMS

Sec. 701. Food stamp intercept of unemployment benefits.

TITLE VIII—ADMINISTRATIVE COST-SHARING AND QUALITY CONTROLS

Sec. 801. State agency liability for errors.

TITLE IX—EFFECTIVE DATE

Sec. 901. Effective date.

SEC. 2. Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.).

TITLE I—DEFINITIONS

PURCHASE REQUIREMENT

SEC. 101. (a) Section 3 (b) (7 U.S.C. 2012 (b)) is amended by inserting "and any amount to be paid by the household for the allotment" before the period at the end thereof.

(b) The first sentence of section 4 (a) (7 U.S.C. 2013 (a)) is amended by inserting "which has a greater monetary value than the charge to be paid for the allotment by the households" before the period at the end thereof.

(c) Section 8 (7 U.S.C. 2017) is amended—

(1) by striking out the section heading and inserting in lieu thereof the following: "VALUE OF AND CHARGES FOR ALLOTMENT";

(2) by inserting "which is in excess of the amount charged the household for the allotment" after "household" in subsection (b); and

(3) by adding at the end thereof the following new subsections:

"(e)(1) A household shall be charged for the allotments issued to them, except that—

"(A) allotments shall be issued without charge to a household containing an elderly or disabled member; and

"(B) allotment may be issued without charge to a household with an income of less than $30 per month for a family of four under standards of eligibility prescribed by the Secretary.

"(2) The amount of the charge shall represent a reasonable investment on the part of the household, except that the charge may not exceed 30 per centum of the household's income.

"(f) Funds derived from the charges made for allotments shall be promptly deposited, in a manner prescribed in regulations issued pursuant to this Act, in a separate account maintained in the Treasury of the United States for such purpose. The deposits shall be available, without limitation to fiscal years, for the redemption of coupons.".

(d) Section 11 (7 U.S.C. 2020) is amended—

(1) in subsection (e)—

(A) by striking out "and" at the end of paragraph (20); and

(B) by adding at the end thereof the following new paragraph:

"(22) notwithstanding any other provision of law, for the institution of procedures under which a household participating in the food stamp program may have any charges for its allotment deducted from any payment the household receives under title IV of the Social Security Act (42 U.S.C. 601 et seq.) and have its allotment distributed to it with the payment;"; and

(2) in subsection (h), by striking out "Treasury" and all that follows through the period at the end thereof and inserting in lieu thereof "separate account established under section 8(f), a sum equal to the amount by which the value of any coupons issued as a result of the negligence or fraud exceeds the amount that was charged for the coupons under section 8(e)(2)".

(e) Section 15(a) (7 U.S.C. 2024(a)) is amended by inserting "purchase," after "for the".

(f) Section 18 (7 U.S.C. 2027) is amended—

(1) by adding after the first sentence of subsection (a) the following new sentence: "Such portion of any such appropriation as may be required to pay for the value of the coupon allotments issued to eligible households which is in excess of the charges paid by the households for the allotments shall be transferred to and made a part of the separate account established under section 8(f).";

(2) by amending the first sentence of subsection (b) to read as follows: "In any fiscal year, the Secretary shall limit the value of coupons issued which is in excess of the value of coupons for which households are charged, to an amount which is not in excess of the portion of the appropriation for the fiscal year which is transferred to the separate account under subsection (a).";

and

(3) by adding at the end thereof the following new subsection:

"(f) If the Secretary determines that any of the funds in the separate account established under section 8(f) are no longer required to carry out this Act, the unneeded funds shall be paid into the miscellaneous receipts of the Treasury.".

HOUSEHOLDS

SEC. 102. Section 3(i) (7 U.S.C. 2012(i)) is amended—

(1) by striking out "or who, while living with others," in clause (1) of the first sentence and inserting in lieu thereof "and";

(2) by striking out "separate and apart from the others, or" in clause (1) of the first sentence and inserting in lieu thereof a comma;

(3) by striking out "together" the second time it appears in clause (2) of the first sentence;

(4) by inserting before the period at the end of the first sentence the following: ", or (3) at the option of the State agency, one or more individuals who while living with others, customarily purchase food and prepare meals for home consumption separate and apart from the others"; and

(5) by inserting after the second sentence the following new sentence: "Subject to the preceding sentence and the limitation of clause (2) of the first sentence of this subsection relating to parents and children, or siblings, who live together, a State agency may prescribe criteria to determine whether one or more individuals who while living with others, customarily purchase food and prepare meals for home consumption separate and apart from the others qualify as a household under clause (3) of the first sentence of this subsection.".

ADJUSTMENT OF ELIGIBILITY AND BENEFIT LEVELS

SEC. 103. (a) The second sentence of section 3(o) (7 U.S.C. 2012(o)) is amended—

(1) by inserting "and" after "size," at the end of clause (6); and

(2) by striking out ", and (8)" and all that follows through "household size" at the end of clause (8).

(b) Section 5(e) (7 U.S.C. 2014(e)) is amended—

(1) by striking out the second sentence; and

(2) in clause (2) of the fourth sentence—

(A) by inserting "and" after "March 31," at the end of subclause (i); and

(B) By striking out "and (iii)" and all that follows through "twelve months ending the preceding June 30,".

(c) The amendments made by this section shall become effective on the date of the enactment of this Act.

TITLE II—ELIGIBLE HOUSEHOLDS

INCOME STANDARDS OF ELIGIBILITY

SEC. 201. Section 5(c)(2) (7 U.S.C. 2014(c)(2)) is amended by striking out "by more than 30 per centum".

NONRECURRING LUMP-SUM PAYMENTS

SEC. 202. (a) Section 5(d) (7 U.S.C. 2014(f)(1) is amended by striking out clause (8).

(b) Section 5(f)(1) (7 U.S.C. 2014(f)(1)) is amended—

(1) by inserting ", other than income of the type described in subparagraph (C)," after "one year" in subparagraph (A); and

(2) by adding at the end thereof the following new subparagraph:

"(C) Household income for those households that receive income in the form of nonrecurring lump-sum payments, including, but not limited to, income tax refunds, rebates, or credits, retroactive lump-sum social security or railroad retirement pension payments, and retroactive lump-sum insurance settlements, shall be income of the household in the month received. The household shall be ineligible for participation in the food stamp program for the whole number of months that equals (i) the sum of such amount and all other income received in such month, not excluding under subsection (d), divided by (ii) the nonfarm income poverty guidelines applicable to such household. Any income remaining (which is less than the applicable monthly standard) shall be treated as household income received in the first month following the period of ineligibility determined under the preceding sentence.".

ENERGY ASSISTANCE PAYMENTS

SEC. 203. (a) Section 5(d) (7 U.S.C. 2014(d)) (as amended by section 202(a) of this Act) is amended—

(1) by striking out clause (11);

(2) by inserting "and" at the end of clause (10); and

(3) by redesignating clauses (9), (10), and (12) as clauses (8), (9), and (10), respectively.

(b) Section 2605(f) of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8624(f)) is amended—

(1) by striking out "food stamps,"; and

(2) by inserting ", other than the Food Stamp Act of 1977" before the period at the end thereof.

STANDARD DEDUCTIONS

SEC. 204. The first sentence of section 5(e) (7 U.S.C. 2014(e)) is amended by striking out "$85" and inserting in lieu thereof "$60".

RESOURCE LIMITATIONS

SEC. 205. Section 5(g) (7 U.S.C. 2014(g)) is amended—

(1) by striking out "The" in the first sentence and inserting in lieu thereof "(1) Subject to paragraph (2), the"; and

(2) by adding at the end thereof the following new paragraph:

"(2)(A) In lieu of the resource limitations provided for in paragraph (1), a State may, if it so elects, establish resource limitations provided for in subparagraph (B) only, subparagraph (C) only, or both such subparagraphs.

"(B)(i) As used this subparagraph, the term 'resources' has the same meaning given the term for purposes of determining eligibility for benefits under title XVI of the Social Security Act (42 U.S.C. 1601 et seq.) (relating to the supplemental security income program).

"(ii) If a household includes an elderly or disabled member, the combined resources of all members of the household may not exceed—

"(I) In the case of a household consisting of only one member, the amount referred to in section 1611(a)(1)(B)(ii) of the Social Security Act (42 U.S.C. 1382(a)(1)(B)(ii)) (relating to an individual having no spouse with whom the individual is living); and

"(II) in the case of a household consisting of more than one member, the amount referred to in section 1611(a)(2)(B) of the Social Security Act (42 U.S.C. 1382(a)(2)(B)) (relating to an individual who has an eligible spouse).

"(D)(i) As used this subparagraph, the term 'resources' has the same meaning given the term for purposes of determining eligibility for aid under the State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.).

"(ii) If a household does not include an elderly or disabled member, the combined resources of all members of the household may not exceed the resource limitation applicable to a household of the same size as the household under the State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.).

"(E) The choice by a State to use resource limitations under this paragraph in lieu of the limitations under paragraph (1) shall be uniform throughout the State.".

TITLE III—ELIGIBILITY DISQUALIFICATIONS

PARENTS AND OTHER CARETAKERS OF CHILDREN

SEC. 301. Clause (B) of section 6(d)(2) (7 U.S.C. 2015(d)(2)(B)) is amended to read as follows: "(B) a parent or other member of a household with responsibilty for the care of (i) a dependent child who is under three years of age, (ii) a dependent child who is three years of age or older but under six years of age, in any case in which adequate care is not otherwise available, or (iii) an incapacitated person;".

TITLE IV—ISSUANCE AND USE OF COUPONS

CASH CHANGE

SEC. 401. Section 7(b) (7 U.S.C. 2016(b)) is amended—

(1) by striking out ": *Provided further,*" and all that follows through the period at the end thereof and inserting in lieu thereof a period; and

(2) by adding at the end thereof the following new sentences: "Change in any form, other than uncancelled or unmarked coupons which were previously accepted for eligible foods, may not be given to eligible households for food purchases. Eligible households using coupons to purchase food shall pay cash for the amount of such purchase which exceeds the value of the lowest coupon denomination issued.".

TITLE V—VALUE OF ALLOTMENT

MINIMUM ALLOTMENT

SEC. 501. Section 8(a) (7 U.S.C. 2017(a)) is amended by striking out the colon after "dollar" and all that follows through the period at the end thereof and inserting in lieu thereof a period.

TITLE VI—ADMINISTRATION

EXPEDITED COUPON ISSUANCE

SEC. 601. Paragraph (9) of section 11(e) (7 U.S.C. 2020(e)(9)) is amended to read as follows:

"(9) at the option of the State agency, for the provision of coupons on an expedited basis to categories of households designated by the State agency to be in immediate need because such households each have—

"(A) household income, as described in section 5(d), that is less than $85 per month; and

"(B) financial resources, as described in section 5(g), that do not exceed $100;".

PHOTOGRAPHIC IDENTIFICATION CARDS

SEC. 602. Section 11(e)(16) (7 U.S.C. 2020(e)(16)) is amended by striking out "in those" and all that follows through "integrity,".

COUNTERSIGNATURE OF COUPONS

SEC. 603. Section 11(e) (7 U.S.C. 2020(e) (as amended by section 101(d)(1) of this Act) is amended by adding at the end thereof the following new parargraph:

"(23) that the State agency shall require a member of a household to sign a coupon at the time the coupon is issued to, and used by, the member; and".

TITLE VII—COLLECTION AND DISPOSITION OF CLAIMS

FOOD STAMP INTERCEPT OF UNEMPLOYMENT BENEFITS

SEC. 701. (a) Section 13 (7 U.S.C. 2022) is amended by adding at the end thereof the following new subsection:

"(c)(1) A State agency may determine on a periodic basis, from information supplied pursuant to section 3(b) of the Wagner-Peyser Act (29 U.S.C. 49b(b)), whether an individual receiving compensation under the State's unemployment compensation law (including amounts payable pursuant to an agreement under a Federal unemployment compensation law) owes an uncollected overissuance.

"(2) State agency may recover an uncollected overissuance—

"(A) by entering into an agreement with an individual described in paragraph (1) under which specified amounts will be withheld from unemployment compensation otherwise payable to the individual and furnishing a copy of the agreement to the State agency administering the unemployment compensation law, or

"(B) in the absence of an agreement, by obtaining a writ, order, summons, or other similar process in the nature of garnishment from a court of competent jurisdiction to require the withhholding of amounts from the unemployment compensation.

"(3) As used in this subsection, the term 'uncollected overissuance' means the amount of an overissuance of coupons, as determined under subsection (b)(1), which has not been recovered pursuant to subsection (b)(1).".

(b)(1) Section 11(e) (7 U.S.C. 2020(e)) (as amended by section 603 of this Act) is amended by adding at the end thereof the following new paragraph:

"(23) at the option of the State, for procedures necessary to obtain payment of uncollected overissuance of coupons from unemployment compensation pursuant to section 13(c).".

(2) Section 3(b) of the Wagner-Peyser Act (29 U.S.C. 49b (b)) is amended—

(A) by striking out "or" the second place it appears and inserting in lieu thereof a comma; and

(B) by inserting after "such Act," the following: "or of a State agency charged with the administration of the food stamp program in a State under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.),".

(3) Section 303(d) of the Social Security Act (42 U.S.C. 503(d)) is amended—

(A) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(B) by inserting after paragraph (1) the following new paragraph:

"(2)(A) The State agency charged with the administration of the State law—

"(i) may require each new applicant for unemployment compensation to disclose whether the applicant owes an uncollected overissuance (as defined in section 13(c)(3) of the Food Stamp Act of 1977) of food stamp coupons,

"(ii) may notify the State food stamp agency to which the uncollected overissuance is owed that the applicant has been determined to be eligible for unemployment compensation if the applicant discloses under clause (i) that the applicant owes an uncollected overissuance and the applicant is determined to be so eligible,

"(iii) may deduct and withhold from any unemployment compensation otherwise payable to an individual—

"(I) the amount specified by the individual to the State agency to be deducted and withheld under this clause,

"(II) the amount (if any) determined pursuant to an agreement submitted to the State food stamp agency under section 13(c)(2)(A) of the Food Stamp Act of 1977, or

"(III) any amount otherwise required to be deducted and withheld from the unemployment compensation pursuant to section 13(c)(2)(B) of such Act, and

"(iv) shall pay any amount deducted and withheld under clause (iii) to the appropriate State food stamp agency.

"(B) Any amount deducted and withheld under subparagraph (A)(iii) shall for all purposes be treated as if it were paid to the individual as unemployment compensation and paid by the individual to the State food stamp agency to which the uncollected overissuance is owed as repayment of the individual's uncollected overissuance.

"(C) For purposes of this paragraph, the term 'unemployment compensation' means any compensation payable under the State law (including amounts payable pursuant to an agreement under a Federal unemployment compensation law).

"(D) A State food stamp agency to which an uncollected overissuance is owed shall reimburse the State agency charged with the administration of the State unemployment compensation law for the administrative costs incurred by the State agency under this paragraph which are attributable to repayment of uncollected overissuance to the State food stamp agency to which the uncollected overissuance is owed.".

(c)(1) The proviso of the first sentence of section 16(a) (7 U.S.C. 2025(a)) is amended by striking out "section 13 (B)(1) of this Act" and inserting in lieu thereof "section 13(b)(1) and (c) of this Act".

(2) The first sentence of section 18(e) (7 U.S.C. 2027(e)) is amended by striking out "13(b) of this Act" and inserting in lieu thereof "13 (b) and (c) of this Act".

TITLE VIII—ADMINISTRATIVE COST-SHARING AND QUALITY CONTROLS

STATE AGENCY LIABILITY FOR ERRORS

SEC. 801. (a) Section 16 (7 U.S.C. 2025) is amended—

(1) by striking out subsections (c) and (d) and redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively; and

(2) by inserting after subsection (b) the following new subsection:

"(c)(1) As used in this subsection—

"(A) the term 'dollar value equivalent' means the value of allotments determined by multiplying the payment error rate for a fiscal year by the dollar value of all allotments issued during that fiscal year by a State agency; and

"(B) the term 'payment error rate' means the percentage of all allotments issued in a fiscal year by a State agency which are—

"(i) issued to households which fail to meet the eligibility requirements established under section 5 or 6; and

"(ii) overissued to households which meet such requirements.

"(2) The Secretary shall institute an error rate reduction program under which each State agency shall, other than for good cause as determined by the Secretary, pay to the Secretary or have withheld by the Secretary as described in paragraph (4), the dollar value equivalent of the any payment error rate of the State agency which is over 3 per centum, as determined by the Secretary.

"(3) It the Secretary makes a claim against a State for payment under paragraph (2), the State may seek administrative and judicial review of such claim under the procedures set forth in section 14.

"(4) If a claim made against a State for payment under paragraph (2) is ultimately determined to be valid or is not contested by the State, the claim shall be collected by the Secretary through State payment, withholding amounts otherwise payable to the State agency under this Act, or other mechanisms authorized by subchapter II of chapter 37 of title 31, United States Code. Such a claim may be collected on a monthly, quarterly, semiannual, or annual basis, as determined by the Secretary."

(b)(1) Section 11 (7 U.S.C. 2020) is amended—

(A) by striking out "section 16(e)" in subsection (e)(3) and inserting in lieu thereof "section 16(d)"; and

(B) by striking out "section 16(a) and 16(c)" in the second sentence of subsection (g) and inserting in lieu thereof" section 16(a)".

(2) Section 18(e) (7 U.S.C. 2027(e)) is amended by striking out the second sentence.

(c)(1) Section 11 (7 U.S.C. 2020) is amended by striking out subsection (h) and redesignating subsections (i) through (n) as subsections (h) through (m), respectively.

(2) Section 11(e)(2) (7 U.S.C. 20202(e)(2)) is amended by striking out "subsection (i)" and inserting in lieu thereof "subsection (h)".

(3) The first sentence of section 18(e) (7 U.S.C. 2027(e)) is amended by striking out "11 (g) and (h)" and inserting in lieu thereof "11(g)".

TITLE IX—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 901. Except as provided in sections 103(c) of this Act, the amendments made by this Act shall become effective on October 1, 1985.

By Mr. SIMPSON (by request):

S. 836. A bill to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear power plant siting and licensing process, and for other purposes; to the Committee on Environment and Public Works.

NUCLEAR POWER PLANT LICENSING AND STANDARDIZATION ACT

Mr. SIMPSON. Mr. President, at the request of the Nuclear Regulatory Commission, I am introducing today the "Nuclear Power Plant Licensing and Standardization Act of 1985." I ask unanimous consent that the text of this bill be printed in the CONGRESSIONAL RECORD following my remarks. In addition, I ask unanimous consent that a letter from the Nuclear Regulatory Commission to the Vice President of the United States the Hon. GEORGE H. BUSH, transmitting this legislation, and a section-by-section analysis of the legislation appear in the RECORD immediately following the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 836

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Nuclear Power Plant Licensing and Standardization Act of 1985".

TABLE OF CONTENTS

Sec. 2. Findings and Purposes.

TITLE I. SITING AND LICENSING

Sec. 101. Construction Permits and Operating Licenses.
Sec. 103. Early Site Review.
Sec. 104. Approval of Designs.

TITLE II. MISCELLANEOUS PROVISIONS

Sec. 201. Thermal neutron power generation facility.
Sec. 202. Standardized design.
Sec. 203. Implementation.

TITLE III. CONFORMING AMENDMENTS

Sec. 301. Antitrust provisions.
Sec. 302. General provisions.
Sec. 303. License applications.
Sec. 304. Revocation.
Sec. 305. Table of contents.

TITLE IV—EFFECTIVE DATE

Sec. 401. Effective date.

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress, recognizing that a clear and coordinated energy policy consistent with public health and safety must include an effective and efficient licensing process for siting, construction, and operation of nuclear power plants which meet applicable criteria, finds and declares that—

(1) interstate commerce is substantially affected by the siting, construction, and operation of nuclear power plants;

(2) opportunity for public participation in siting and licensing of nuclear power plants should be assured;

(3) the licensing and construction of nuclear power plants would be facilitated and the public health and safety enhanced by the use of preapproved nuclear power plant designs, particularly standardized designs;

(4) there is a need to encourage the development and use of standardized nuclear power plant designs because such designs can benefit public health and safety by concentrating the resources of designers, engineers, and vendors on particular approaches, by stimulating standardized programs of construction practice and quality assurance, by improving the training of personnel and by fostering more effective maintenance and improved operations, and because the use of such designs can permit a more effective and efficient licensing and inspection process;

(5) the licensing process would be facilitated by procedures for the selection and approval of a site for a nuclear power plant to be accomplished in advance of a commitment to construct a particular facility of a specific design at that site;

(6) the licensing process would be facilitated if licensing decisions are made at the earliest feasible phase of the process and, if an opportunity for hearing has been provided, licensing issues are not subject to further adjudication in the absence of an evidentiary showing called for by this Act and the regulations of the Commission;

(7) all phases of the licensing process should be handled in a timely manner under procedures which, consistent with this Act and the regulations of the Commission, assure that adjudicatory procedures are only invoked where a relevant dispute can only be resolved with sufficient accuracy through such procedures;

(8) consistent with the adequate protection of the public health and safety and the common defense and security, the regulatory process should provide greater stability in licensing standards and criteria for approved designs of nuclear power plants;

(9) consistent with the Commission's paramount responsibility to protect the public health and safety, and recognizing that elimination of all risk is an unattainable goal for any energy source, it is appropriate and in the public interest for the Commission to consider the economic consequences of its regulatory practices including, but not limited to, the cost of safety requirements; and

(b) The purposes of this Act are—

(1) to facilitate the use of preapproved sites and designs for nuclear power plants and to facilitate the development and use of standardization designs;

(2) to provide for the issuance of a combined license to construct and to operate a nuclear power plant under conditions which assure the continued protection of the public health and safety and which will be in accord with the common defense and security;

(3) to improve the stability of licensing standards and criteria for nuclear power plants and thus the finality of prior Commission licensing approvals; and

TITLE I—SITING AND LICENSING

CONSTRUCTION PERMIT AND OPERATING LICENSES

SEC. 101. Section 185 of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

SEC. 185. CONSTRUCTION PERMITS AND OPERATING LICENSES.—

a. All applicants for licenses to construct or modify production or utilization facilities shall be initially granted a construction permit after the Commission has provided an opportunity for public hearing pursuant to section 189 of this Act and if the application is otherwise acceptable to the Commission. Upon the completion of the construction or modification of the facility, upon the

filing of any additional information needed to bring the original application up to date, after providing an opportunity for public hearing pursuant to section 189 of this Act, and upon finding that the facility authorized has been constructed and will operate in conformity with the application as amended and in conformity with the provisions of this Act and of the regulations of the Commission, and in the absence of any good cause being shown to the Commission why the granting of an operating license would not be in accordance with the provisions of this Act, the Commission shall thereupon issue an operating license for the applicant. For all other purposes of this Act, a construction permit is a "license."

b. Notwithstanding any other provision of this section, the Commission shall issue to the applicant a combined construction permit and operating license for a thermal neutron power generation facility after providing an opportunity for public hearing pursuant to section 189 of this Act, if the application contains sufficient information to support the issuance of a combined construction permit and an operating license in accordance with the regulations of the Commission and the Commission determines that there is a reasonable assurance that the facility will be constructed and will operate in conformity with the application, the provisions of this Act, and the rules and regulations of the Commission. The Commission shall identify within such combined construction permit and operating license the inspections, tests, and analyses which shall be performed and the acceptance criteria therefor which will provide reasonable assurance that the plant has been constructed and will operate in accordance with the license. After issuance of a combined construction permit and operating license for a thermal neutron power generation facility, the Commission shall assure through inspections, tests and analyses that construction is completed in conformity with the combined construction permit and operating license, consistent with the regulations of the Commission.

Prior to the commencement of operation of any facility licensed under this subsection, the Commission shall publish in the Federal Register a notice of the intended operation of such facility, and shall provide a thirty-day period during which any person may file a written objection to the commencement of operation on the basis that the facility authorized has not been constructed or will not operate in conformity with the license. Such objection shall set forth in reasonable detail the facts and arguments upon which the objection is based, and may be accompanied by a request for a hearing.

If a hearing is requested, the Commission shall determine whether good cause exists therefor and, if so, the issues to be heard and whether the hearing must precede commencement of operation of the facility in order to provide reasonable assurance of the protection of the public health and safety and common defense and security. The Commission may designate an issue for a hearing only if the issue consists of a substantial dispute of fact, necessary for the Commission's decision, that cannot be resolved with sufficient accuracy except at a hearing and:

(i) the issue was not and could not have been raised and resolved in any proceeding for the issuance, modification or amendment of a license, permit, or approval for that facility, its site, or design; or

(ii) a showing has been made that (I) there has been nonconformance with the license; (II) such nonconformance has not been corrected; and (III) such nonconformance could materially and adversely affect the safe operation of the facility.

Following completion of any hearing held, the Comission shall decide whether the license to construct and operate should be modified. Operation of the facility shall commence based on the combined construction permit and operating license unless the Commission determines that good cause exists for delaying such operation.

c. The Commission shall not modify any final determination on an issue that has been considered and decided in any proceeding for the issuance of a permit or license for that facility, facility site, or approval of design for that facility under section 194, unless it determines, based on significant new information, that a modification is required to protect the public health and safety or the common defense and security and that the modification proposed will substantially enhance the public health and safety or the common defense and security by improving overall safety of facility operation.

EARLY SITE REVIEW

SEC. 103. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 193 to read as follows:

SEC. 193. EARLY SITE REVIEW.—

a. The Commission is authorized to issue a site permit for approval of a site or sites for one or more production or utilization facilities for a period of ten years upon the application of any person or entity notwithstanding the fact that no application for a construction permit or a combined construction permit and operating license for such facility or facilities has been filed. The Commission may issue a site permit with respect to limited aspects of the suitability of the site for its intended purpose, under relevant regulations of the Commission.

b. Notwithstanding section 161 w. of this Act or the Independent Offices Appropriation Act of 1952, no application filing or issuance fees shall be required for an application for a site permit, an amendment, or a renewal of a site permit under this section. The Commission is authorized to allocate the costs that would otherwise have been defrayed by fees required of applicants under this section among applicants for permits or licenses which propose to use the approved site in a manner that will assure full cost recovery by the Commission. If no application for construction of a production or utilization facility is filed within the initial ten-year approval period, any outstanding fee shall become immediately due and payable by the applicant for the site permit.

c. After considering all information submitted in the application and after providing an opportunity for hearing pursuant to section 189 of this Act, the Commission shall issue a site permit if it determines that such approval will not be inimical to the common defense and security or to the health and safety of the public.

d. (1) A site permit issued by the Commission under this section may be referenced in an application for a construction permit or a combined construction permit and operating license which meets the conditions of the site permit and is filed within the period during which the site permit remains valid.

(2) No less than twelve or more than thirty-six months prior to the expiration of the ten year period, the holder of the site permit may apply for a renewal of the site permit. The Commission shall renew the site permit for an additional period of time of not less than five nor more than ten years from the date of renewal unless it finds that the site will not comply with this Act or the Commission's regulations. If no application for a production or utilization facility is filed within the period of renewal, any outstanding fee for the renewal application or issuance shall become due and payable by the applicant for the site permit.

e. Approval of a site under this section shall not preclude its use as a site for an alternate or modified type of energy facility or for any other purpose. Other uses not considered in the approval may, however, affect the validity of the site permit or the conditions of its use for production or utilization facility siting as the Commission may determine.

f. Following the issuance of a site permit under this section, and any subsequent Commission proceeding involving a site for which a site permit has been granted under this section, the Commission shall not modify any final determination on an issue that has been considered and decided in the site permit proceeding unless it determines, based on significant new information, that a modification is required to protect the public health and safety or the common defense and security and that the modification will substantially enhance the public health and safety or the common defense and security.

APPROVAL OF DESIGNS

SEC. 104. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 194 to read as follows:

SEC. 194. APPROVAL OF DESIGNS.—

a. The Commission is authorized and directed to establish procedures permitting the approval of standardized facility designs for thermal neutron power generation facilities for a period of ten years, notwithstanding the fact that no application for a construction permit or combined construction permit and operating license for such facility has been filed. The Commission may also consider, in accordance with its regulations, requests under this section for the approval of the design for any major subsystem which represents a discrete element of a thermal neutron power generation facility.

b. Notwithstanding section 161 w. of this Act or the Independent Offices Appropriation Act of 1952, no application filing or issuance fees shall be required for an application for a design approval, an amendment, or a renewal of an approval of a facility design under this section. The Commission is authorized to allocate the costs that would otherwise have been defrayed by fees required of applicants under this section among applicants for permits or licenses which propose to use the approved standardized plant design in a manner that will assure full cost recovery by the Commission. If no application for construction of a facility is filed within the initial ten-year approval period, any outstanding fee shall become immediately due and payable by the applicant for the design approval.

c. After considering all information submitted in the application, and after providing an opportunity for hearing pursuant to section 189 of this Act, the Commission shall issue an approval if it determines that such approval will not be inimical to the common defense and security or to the health and safety of the public.

d. (1) Any approval issued by the Commission under this section may be referenced in

an application for a construction permit, an operating license or a combined construction permit and operating license which meets the conditions of the approval and is filed within the period during which the approval remains valid.

(2) No less than twelve or more than thirty-six months prior to the expiration of the ten year period, the holder of the approval may apply for a renewal of the approval. The Commission shall renew the approval for an additional period of time of not less than five nor more than ten years from the date of renewal unless it finds that the design will not comply with this Act or the Commission's regulations. If no application for construction of a facility is filed within the renewal period, any outstanding fee for the renewal or issuance shall become due and payable by the applicant for the design approval.

e. Following the issuance of a design approval under this section, and in any subsequent Commission proceeding involving a facility design for which a design approval has been granted under this section, the Commission shall not modify any final determination of an issue that has been considered and decided in the design approval proceeding unless it determines, based on significant new information, that a modification is required to protect the public health and safety or the common defense and security and that the modification proposed will substantially enhance the public health and safety or the common defense and security by improving overall safety or security of facility operation.

f. (1) The Commission shall approve an amendment to a design approval issued under this section upon application by the holder of the design approval if the Commission determines that the amendment will comply with this Act and the Commission's regulations.

(2) Any amendment approved by the Commission under paragraph (1) shall apply to any application for a construction permit or combined construction permit and operating license referencing the design approval for which the amendment has been granted that is filed after the effective date of such amendment.

(3) Any amendment approved by the Commission under paragraph (1) shall not apply to an application for a construction permit or combined construction permit and operating license referencing the design approval for which the amendment has been granted that is filed before the effective date of each amendment unless (A) the applicant requests that such amendment apply to the application, or (B) the requirements of subsection (e) are satisfied with respect to the amendment.

g. Any application for a construction permit, an operating license or a combined construction permit and operating license or any amendment to such licenses referencing a design approval issued under this section may include a request for a variance from one or more elements of the design approval. Such requests shall be granted if the Commission determines that the variance will comply with this Act and the Commission's regulations. Any variance issued under this section shall be limited to the permit or license for which such variance has been requested.

TITLE II—MISCELLANEOUS PROVISIONS

DEFINITIONS

SEC. 201. Section 11 of the Atomic Energy Act of 1954, as amended is amended by adding new subsection dd. as follows:

dd. "Thermal neutron power generation facility" means a utilization facility which is designed to produce electrical energy and in which core power is designed to be produced predominantly by thermal neutron fission.

SEC. 202. For the purposes of this Act the term "standardized design" means a design which the Commission determines is sufficiently detailed and complete to support licensing of a commercial production or utilization facility or approval of a major portion of such a facility when referenced in an application for a construction permit and operating license or a design approval and which is usable for a multiple number of units and/or at a multiple number of sites without reopening or repeating the review.

SEC. 203. a. The Commission shall, within one hundred and eighty days following the effective date of this section, propose regulations establishing procedures and criteria for implementing the provisions of sections 185 d., 193 f., and 194 e. of this Act for the control of the application of new requirements to any thermal neutron power generation facility licensed for construction or operation under this Act.

b. After the regulations referred to in subsection a. of this section become effective, no license, permit or approval granted under this Act for a thermal neutron power generation facility shall be modified except pursuant to such regulations.

TITLE II—CONFORMING AMENDMENTS

ANTITRUST PROVISIONS

SEC. 301. Subsection 105 c. of the Atomic Energy Act of 1954, as amended, is amended in the first sentence of paragraph (2) by inserting "and/" after the word "construct."

GENERAL PROVISIONS

SEC. 302. Section 161 o. of the Atomic Energy Act of 1954, as amended, is amended by inserting the words "or approvals authorized by section 193 and 194" after the number "104."

LICENSE APPLICATIONS

SEC. 303. Subsection 182 b. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

b. The Advisory Committee on Reactor Safeguards shall review each application under section 103 or section 104 b. for a construction permit and/or an operating license for a facility; any application under section 104 c. for a construction permit and/or operating license for a testing facility; any application under section 104 a. or c. specifically referred to it by the Commission; any application for a site permit under section 193; any proposed approval for a facility design under section 194; any proposed authorization to commence operation under section 185 b.; and any application for an amendment to a construction permit or to an operating license under section 103 or 104 a., b., c. or an amendment or renewal of a site permit under section 193 or an amendment or renewal of an approval for a facility design under section 194 specifically referred to it by the Commission, and shall submit a report thereon which shall be made a part of the record of the application and available to the public except to the extent that security classification prevents disclosure.

REVOCATION

SEC. 304. Section 186 a. of the Atomic Energy Act of 1954, as amended, is amended by inserting the words "sections 182, 185, 193 and 194" after the words "required under."

TABLE OF CONTENTS

SEC. 305. The Table of Contents for the Atomic Energy Act of 1954, as amended, is amended by changing the title of section 185 to read "Construction Permits and Operating Licenses" and by adding the following after section 192:

Sec. 193. Early Site Review.

Sec. 194. Approval of Designs.

TITLE IV—EFFECTIVE DATE

SEC. 401. All sections of this Act shall take effect as of the date of enactment, and shall apply to all proceedings pending as of the date of enactment or commenced on or after the date of enactment, in accordance with the terms of this Act.

SECTION-BY-SECTION ANALYSIS

SECTION 2. FINDING AND PURPOSES

This section supplements sections 1, 2, and 3 of the Atomic Energy Act which set forth the declaration, findings and purpose of the Act. This section highlights the major provisions of this bill which are being enacted for the general purpose of improving the quality, effectiveness, and efficiency of the licensing process for siting, construction and operation of nuclear facilities.

SECTION 101. CONSTRUCTION PERMITS AND OPERATING LICENSES

This amends section 185 of the Atomic Energy Act, a section which establishes the procedures to be followed by the Commission in authorizing construction permits and operating licenses for nuclear facilities.

Subsection a. of section 185 as it would be amended authorizes the Commission to grant a construction permit for a production or utilization facility and, upon the completion of construction to grant an operating license. This subsection restates existing authority with one exception. This legislation would delete the requirement for specification of the earliest and latest completion dates for construction permits. The existing provision has produced unnecessary paperwork and expenditure of resources without assuring that construction is diligently persued. Moreover, the provision in current section 185 for earliest and latest completion dates made sense when it was included in the Act in 1954 because the Federal Government would be owning the fuel and would need to allocate special nuclear material between the civilian nuclear power and defense programs. It was important to AEC to predict completion dates (and hence operation commencement dates) with accuracy so that civilian requirements for special nuclear material could be predicted accurately and planned for properly. The Federal Government no longer allocates fuel and has a much lesser need to predict completion dates accurately. Thus, the provision is no longer needed to serve the purpose for which it was adopted.

Although the requirement for the specification of the earliest and latest construction completion dates is deleted, the Commission will still issue a construction permit or a combined construction permit/operating license for a fixed period not to exceed forty years pursuant to sections 103(c) and 183 of this Act. The legislation would also provide

specifically for an opportunity for a public hearing.

In addition, consistent with present regulatory practice, an application to modify a production or utilization facility will require a construction permit only if the modification is defined as a material alteration of that facility pursuant to 10 CFR § 50.91.

Subsection b. of section 185 as it would be amended permits issuance of what would be called a combined construction permit and operating license (CP/OL) for a thermal neutron power generation facility. This definition would include all currently licensed U.S. commercial nuclear power reactors (including all currently licensed U.S. gas-cooled reactors), but exclude facilities such as breeder reactors and fuel reprocessing plants. A combined CP/OL could be issued for thermal neutron power generation facilities only if the Commission determines that there is reasonable assurance that the facility will be constructed and will operate in conformity with the application, the provisions of the Atomic Energy Act, and the rules and regulations of the Commission. Pursuant to subsection b., the combined construction permit and operating license would identify and incorporate by reference the inspections, tests and analyses that would be required to be performed and the acceptance criteria therefor.

Under the current two-step licensing process, the inspections, tests and analyses which need to be performed to assure the adequacy of construction with respect to NRC regulatory requirements are not fully or finally defined until the operating license review is complete. Thus, the Commission and the license applicant are unable to identify and reach agreement at an early stage with respect to the detailed implementation of NRC requirements and the public's participation in this process is delayed until the plant is nearly complete. Under the current regime, therefore, extensive additional tests and analyses are sometimes required late in the construction process. This may lead to plant modifications which could have been avoided by identifying the inspections, tests, analyses, and acceptance criteria at the time the plant was licensed for construction.

Before nuclear power reached its current level of development, it was appropriate to establish general criteria at the construction permit stage and review the adequacy of the design at the operating license stage. Thus, it was appropriate to delay identifications, tests, and analyses, and acceptance criteria therefor, against which design and construction adequacy were to be measured, until near the time when the design was essentially complete. With the current level of development it is possible to establish the design in sufficient detail before construction commences, and hence to identify the inspections, tests and analyses which need to be performed in order for the Commission to make the required findings of reasonable assurance of the public health and safety with respect to plant operation.

Specification of the required inspections, tests and analyses in the combined construction permit and operating license, i.e., before facility construction commences, would establish a clearly defined set of requirements governing the licensee and the Commission in discharging their complementary responsibilities as respects facility construction and operation. The Commission will be in a better position to assure that the plant has in fact been constructed and can be expected to operate in accordance with the license authorization. At the same time, license specifications of those requirements would enhance regulatory certainty for the facility licensee by prescribing what will be expected of the licensee in the construction and early operational phases of the plant and the bases for determining the adequacy of the licensee's performance. Importantly, this will also facilitate and make more effective public participation by providing information, prior to authorization of facility construction, of how the applicant's compliance with specified construction and operation requirements will be demonstrated following license issuance.

Moreover, specification of inspections, tests, analyses and acceptance criteria as an integral part of the combined construction permit and operating license cannot be accomplished without appropriate completeness of the applicant's facility design. The level of design detail needed to establish such specifications would define the essentially compete design which the Commission anticipates will be required for the combined construction permit application. The elements specified would necessarily address all important safety features of a plant, and the Commission would determine the level of detail necessary in the inspections, tests and analyses, and the acceptance criteria therefor. Thus, in order to qualify for license issuance, the applicant would be obliged to describe those features of the proposed facility with a matching completeness.

In summary, inclusion in the license of prescribed inspections, tests, analyses and acceptance criteria should enhance the quality of construction of nuclear power plants, add stability to the construction process, and facilitate public participation in the resolution of safety issues prior to commencement of facility construction.

After issuance of the CP/OL and prior to commencement of operation (fuel loading), the Commission must assure that the facility has been constructed and will operate in conformity with the CP/OL, and the requirements of the Commission implementing this Act. An opportunity for a second public hearing would be provided prior to commencement of operation of the facility if good cause exists therefor. The Commission would determine the issues to be heard and timing for such hearing—whether the hearing must precede commencement of operation of the facility in order to provide reasonable assurance of the protection of the public health and safety and common defense and security or whether the hearing could be deferred until after facility operation commences. Under the proposed statutory provision, good cause for hearing is defined to exist only where an issue consists of a substantial dispute of fact necessary for the Commission's decision that cannot be resolved with sufficient accuracy except at a hearing and either (1) the issue was not and could not have been raised and resolved in any proceeding for the issuance, modification or amendment of a license, permit or approval of that facility, its site or design; or (2) a showing has been made that (i) there has been nonconformance with the license; (ii) such nonconformance has not been corrected; and (iii) such nonconformance could materially and adversely affect the safe operation of the facility. The Commission under this provision could find good cause for a hearing but determine that the hearing need not precede commencement of operation of the facility where, for example, the resolution of the issue to be heard could only affect safe operation of the facility after the facility already has been in operation for some period of time. Another example would be the situation where the Commission determines that interim measures will allow the facility to operate with reasonable assurance of the protection of the public health and safety during the period necessary for resolution of the dispute of fact in the hearing process.

Section 185b. also provides that operations of the facility shall commence, based on the combined construction permit and operating license, unless the Commission determines that good cause exists for delaying such operation. Such good cause would exists where the Commission determines that operation cannot commence without undue risk to the health and safety of the public or the common defense and security. This provision is designed to provide the Commission with flexibility to make certain that a facility could not commence operation if the Commission has good cause for believing such operation should be delayed.

The purpose of subsection c. is to give greater certainty to the process by ensuring that the Commission not modify a final determination made in any prior proceeding involving a particular facility, facility site, or design approval for that facility, unless there is a substantial reason to do so. Pursuant to this subsection, the Commission may not modify any final determination on an issue that has been considered and decided in a prior proceeding unless it determines, based on significant new information, that such modification is required to substantially enhance the public health and safety or the common defense and security as a result of improved overall safety or security of facility operation. Subsection c. would require the Commission to evaluate the effects of a proposed modification in terms of the overall safety of a proposed modification in terms of the overall safety of facility operation, rather than in terms of the individual system or component on which the proposed modification would be made. The reason for this requirement is simple. Although a particular modification may improve a system or component in isolation, it may have no effect—or, indeed, an adverse effect—on the overall safety of the plant as a result of the interaction of the modified system or component with other systems or components of the facility. A proposed modification may increase the reliability of one pump, for example, but the modification may not be justified if the pump itself plays no role in assuring the safety of the plant, or if making the modification could defeat the reliability of another more important safety system. Plainly, then, the Commission should evaluate the modification as it affects the overall safety of the facility rather than in isolation.

SECTION 103. EARLY SITE APPROVAL

This is a new section 193 to the Atomic Energy Act which authorizes the NRC to approve one or more sites for the location of production or utilization facilities prior to the filing of any application to construct and/or operate a facility on that site. The purpose of this provision is to permit the resolution of site-specific questions at an early stage in the licensing process. Public participation on this crucial aspect of the overall facility planning and construction process would also occur at an early point in time where such participation can be most effective. This provision is an integral part of the effort to promote the early, effective

and efficient resolution of issues in the licensing process.

Subsection a. of section 193 provides that an application for early site approval may be filed by any person or entity and that the Commission is authorized to issue a site permit for a period of ten years even though no application for a construction permit or a combined CP/OL has been filed. It would also authorize limited aspects of the site (e.g., seismicity) to be considered and resolved prior to the filing of any application for a construction permit or combined CP/OL. This subsection permits an early and specific focus on the suitability of a site for production or utilization facility construction without requiring the development of a facility design. A site permit issued under this section would be a final Commission order subject to judicial review.

Subsection b. of section 193 provides that notwithstanding section 161w. of this Act or the Independent Offices Appropriation Act of 1952, no application filing or issuance fees shall be required for an application for approval or for an amendment or renewal of a site permit. The Commission is authorized to allocate the costs ordinarily defrayed by fees collected among future applicants for permits or licenses which propose to use the site permit. This provision is added as an incentive to applicants to seek approval for site permits. However, if fees cannot be defrayed because a site is not used during the initial ten year approval, the holder of the site permit must pay the full amount notwithstanding the granting of a renewal.

Subsection c. of section 193 authorizes the Commission to approve an application and issue a site permit with appropriate conditions if, after considering all the information in the application and providing an opportunity for a public hearing, the Commission determines that such approval will not be inimical to the common defense and security or to the health and safety of the public. An opportunity for a prior public hearing on the application will be afforded under Section 189 of the Act. It is currently envisioned that for full site permits the application would set forth an envelope of parameters such as: (1) the number, type or types and thermal power level of the facilities with respect to which the application for site approval is made; (2) the site description and location, including site boundaries and exclusion area; (3) description of nearby industrial, military, and transportation facilities, including usage and routes; (4) the proposed maximum levels of radiological and thermal effluents that each such facility will produce; (5) the type or types of cooling systems, intake and outflow, that may be employed by each facility; (6) the physical characteristics of the site, including seismic, meteorological, hydrologic, and geologic characteristics as well as population density and use characteristics of the surrounding area; and (7) such other information as the Commission may by rule or order require. By describing the site in such a way, the Commission could determine the site suitability for one or several generic designs that may be developed pursuant to section 194, the provision for standardized facility designs. However, nothing in this section would preclude the Commission from promulgating regulations which set forth standards and criteria for site approval consistent with section 161(i) of this Act and section 553 of title 5 of the United States Code.

Subsection d.(1) of section 193 provides that site permit can be referenced in an application for a facility to be constructed on the site if the application has been filed within the period during which the site permit remains valid. The effect of this provision is that matters resolved in a site permit review or licensing action will not be modified or reexamined as part of the review of a construction permit or a combined CP/OL application which references the site permit, unless a strong evidentiary showing is made. After a site permit has been referenced, a request for renewal would be unnecessary to continue the effectiveness of the site permit for the application referencing the approved site.

Subsection d.(2) of section 193 authorizes the Commission to renew a site permit for not less than five or more than an additional ten years from the date of renewal. Renewal would be based only upon the application of a permit holder. The minimum period of five years is set to assure that the resources used to review a renewal request are directed toward meaningful results. For example, allowing repeated renewals for only six months or a year could cumulatively tax the resources of the agency and industry alike. Moreover, it is contemplated that information necessary to form a sound basis for the decision to renew for periods of five to ten years will be readily available and within the state of the art. Renewals would be based on regulations in effect at the time the renewal is requested providing a means to update the earlier approval. Subsequent renewals of the site permit will not be entertained, although the permit holder may submit a new application for the same site.

Subsection d.(2) of section 193 also sets out the criteria the Commission shall apply in deciding whether to renew a site permit. The Commission shall renew the site permit if it finds that the site will comply with this Act or NRC regulations in effect at the time of site permit renewal. Any licensing fees resulting from the granting of a renewal may be defrayed and allocated among future applicants using the renewed site permit. Defrayed renewal fees must be collected at the end of the renewal period.

Subsection e. of section 193 assures that a site approved under this section may be used for an alternative type of energy facility or any other purpose. However, the validity of the site permit for production or utilization facility siting may be affected by use of the site for a purpose not considered in its approval. The Commission intends to promulgate regulations which would require proper notice be given to the Commission regarding a nonconforming use.

Subsection f. of section 193 specifies that the Commission shall not modify any previous final determination involving a site permit unless it determines, based on significant new information, that such modification is required to substantially enhance the public health and safety or the common defense and security. This provision is intended to have the same effect as the counterpart provisions in subsection 185c. and the discussion in the section-by-section analysis of that subsection is applicable here as well.

This provision would not preclude a holder of a site permit from seeking an amendment to that permit. The Commission shall approve an amendment to a site permit issued under this section if, after providing an opportunity for hearing pursuant to section 189 of this Act, the Commission determines that the amendment will comply with this Act and the Commission's regulation. Any amendment approved would apply to any construction permit or combined CP/OL utilizing the site permit after the amendment becomes effective.

SECTION 104. APPROVAL OF DESIGNS

This is a new section 194 to the Atomic Energy Act of 1954, which provides for approval of thermal neutron power generation facility designs. As with early site approvals, this section is intended to facilitate early resolution of issues with full opportunity for participation by interested persons. Although the Commission currently has procedures for approving designs, this section gives explicit statutory support to the concept and establishes requirements for Commission approval of facility designs. This section will encourage the development and use of standardized designs, will enhance safety, and will contribute to a better utilization of NRC resources.

The facility design should be described in such a way as to provide an envelope of parameters for sites selected pursuant to section 193 to assure that the plant could be constructed on a site of given general characteristics. Typically, a facility design should be described in such a manner that it could be used at more than one site with a minimum of adaptations because of specific characteristics. The Commission contemplates and encourages development and use of substantially complete standardized designs as an effective means of increasing agency efficiency and augmenting the public health and safety.

The application requirements for approval of a facility design will be set out in the Commission's rules. If, after Commission review of the information in the application, and after providing the opportunity for a public hearing under Section 189 of the Act, the Commission determines that the design is suitable for construction and operation, it will issue an approval and the design may be banked for future use. An approval issued under this section will be considered a final Commission order subject to judicial review.

When a pre-approved design is combined with a pre-approved site, it is contemplated that there may be a hearing with respect to the relevant construction permit or CP/OL if there are outstanding issues, i.e., issues raised by the matching of the site with the design. However, issues which were or could have been decided would not trigger new opportunities for hearing at the time the site and design are matched unless a strong evidentiary showing is made that reconsideration of site or design issues is necessary to ensure compliance with this Act, other provisions of Federal law, or the Commission's regulations.

Subsection a. of section 194 authorizes the Commission to approve facility designs or the design of any major sub-system for a period of ten years even though no application for a construction permit or combined construction permit and operating license has been filed by an applicant. This provision permits design applications and approvals to be made before initiation of construction of thermal neutron power generation facilities.

Subsection b. of section 194 provides that notwithstanding section 161w. of this Act or the Independent Offices Appropriation Act of 1952, no application filing or issuance fees shall be required for an application for approval or for an amendment or renewal of an approval of a standardized facility. The Commission is authorized to allocate the costs ordinarily defrayed by fees collected

among future applicants for permits or licenses which propose to use the approved design. This provision is added as an incentive to vendors and architect-engineer firms to develop and seek approval for standardized designs. However, if fees cannot be defrayed because a design is not used during the initial ten year approval, the applicant must pay the full amount notwithstanding the granting of a renewal.

Subsection c. of section 194 authorizes the Commission to approve an application and issue a design approval with appropriate conditions if, after considering all the information in the application and providing an opportunity for a public hearing, the Commission determines that such approval will not be inimical to the common defense and security or to the health and safety of the public. The opportunity for hearing and the hearing, if held, would be in accordance with section 189 of the Act.

Subsection d.(1) of section 194 provides that a design approval can be referenced for a facility if an application has been filed within the period during which the design approval remains valid. The effect of this provision is that all matters resolved in a design approval review or a licensing action, including amendments to that approval, can be transferred without a need to re-review those matters in all applications for a construction permit, combining CP/OL, or operating license which reference that design approval, unless a strong evidentiary showing is made pursuant to subection e. A request for renewal would not be necessary to continue the effectiveness of the design approval in these referenced applications.

Subsection d.(2) of section 194 authorizes the Commission to renew a design approval for not less than five or more than ten years from the date of renewal. Renewal would be based upon the application of a permit holder. The minimum period of five years is set to assure that the resources used to review renewal requests are directed toward meaningful results. For example, allowing renewals for only six months or a year could cumulatively tax the resources of the agency and industry alike. Moreover, it is contemplated that information necessary to form a sound basis for the decision to renew for periods of five to ten years will be readily available and well within the state-of-the-art. Subsection d.(2) also sets out the criteria the Commission shall apply in deciding whether to renew a design approval. Renewal shall be granted unless it can be demonstrated that the design will not comply with the Atomic Energy Act or the Commission's applicable regulations in existence at the time that renewal is requested. This provision allows for updating designs at the time a request for renewal of an approval is made. Subsequent renewals of the design approval will not be entertained, although the design approval holder may submit a new application for the same design. Any licensing fees resulting from the granting of a renewal may be defrayed and allocated among future applicants using the renewed design approval. Defrayed fees must be collected at the end of the renewal period.

Subsection e. of section 194 specifies that the Commission shall not commence a proceeding to modify a final determination made in a design approval proceeding unless it determines, based on significant new information, that such modification is required to substantially enhance the public health and safety or the common defense and security as a result of improved overall safety or security of facility operation. This subsection is intended to have the same effect as the counterpart provision in subsections 185c. and 193f. and the section-by-section analysis of these subsections is applicable here as well.

Subsection f. of section 194 sets forth the criteria by which the Commission will approve an amendment to a design approval under the Atomic Energy Act and how that amendment shall be applied to facilities which reference the design. These provisions ensure that approved amendments will apply to applications for a construction permit or a combined CP/OL referencing the design approval that are filed after the effective date of the amendment. The amendment, however, will not apply to those applications referencing the design which are filed before the effective date of the amendment unless (1) the applicant requests that the amendment be applicable, or (2) the reopening standards of subsection 194e. are satisfied.

A new subsection g. authorizes and directs the Commission to establish procedures and standards for approving variances from construction permits, operating licenses, and combined construction permits and operating licenses. Variances refer to all changes which involve a change in the technical specifications incorporated in the license or an unreviewed safety question. Variances may require a license amendment.

TITLE II—MISCELLANEOUS PROVISIONS

The provisions contained in section 201 of the bill would add new subsection bb. to section 11 of the Act. Section 11bb., as amended, would define "thermal neutron generation facility" as used in sections 185 and 194 of the Act.

The provisions contained in section 203a. of the bill requires the Commission to propose regulations to implement the provisions of section 185c., 193f., and 194e. applicable to thermal neutron power generation facilities within 180 days following the effective date of this section.

The provisions of section 203b. of the bill would prohibit the modification of any thermal neutron power generation facility except pursuant to the regulations promulgated under subsection a., once these regulations are promulgated.

TITLE III—CONFORMING AMENDMENTS

These provisions would be necessary to conform other sections of the Atomic Energy Act of 1954 with the provisions contained in this bill. Section 182b. of the Act would also be changed to provide for Advisory Committee on Reactor Safeguards review prior to commencement of operation in the case of a combined construction permit and operating license.

TITLE IV—EFFECTIVE DATE

This provision ensures that all sections of the Atomic Energy Act, including those sections amended by this bill, shall take effect as of the date of enactment and shall apply to all pending and new proceedings. The last phrase requires each proceeding to meet the terms of the Act in order to come under this Act. For example, for an application for a design approval already under review by the Commission to be treated under section 194, such an application will have to meet the requirements of both subsections 194a. and 194c.

U.S. NUCLEAR
REGULATORY COMMISSION,
Washington, DC, February 15, 1985.

Hon. GEORGE H. BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Enclosed is a Nuclear Regulatory Commission legislative proposal in the form of a draft bill to amend the Atomic Energy Act of 1954. The draft bill is entitled the "Nuclear Power Plant Licensing and Standardization Act of 1985." Its goals are to provide an accurate, efficient, and more effective licensing for the design, siting, construction, and operation of nuclear power plants and other nuclear facilities consistent with public health and safety. A draft bill is in Enclosure 1. A section-by-section analysis is in Enclosure 2. A comparative text is in Enclosure 3.

The current NRC licensing process has not changed substantially since it was originally enacted 31 years ago in the Atomic Energy Act. That licensing process was a prudent course to follow when the nuclear power industry was in its early conceptual and development years. In the early years there were many first-time nuclear plant applicants, designers and constructors, and many novel design concepts. Accordingly, the process was structured to allow licensing decisions to be made while design work was still in progress and to focus on case-specific reviews of individual plant-site considerations. With the maturation of the industry, it is now possible to describe and evaluate standardized plant designs on a generic basis, essentially complete designs prior to plant construction, and proposed plant sites without plant design details. At the same time, since the early 1950's and 1960's the NRC's safety reviews have become increasingly time consuming and complex, and NRC review obligations have been expanded to cover a wide range of non-safety issues under the National Environmental Policy Act of 1969. Accordingly, the Commission decided that the licensing process must be reformed to reflect these and other developments concerning the licensing review of nuclear facilities.

In November 1981, the Nuclear Regulatory Commission established a Regulatory Reform Task Force to review the NRC's licensing process. I set forth four objectives for the task force:

to create a more effective efficient vehicle for raising and resolving legitimate public safety and environmental issues regarding the applications under review,

to develop means for more effective future use of NRC resources in the licensing of new plants,

to avoid regulatory uncertainty and placing unjustifiable economic burdens on utilities that may wish to build a nuclear plant (and their ratepayers),

to accomplish the above without impairing public health and safety.

The task force was requested to make its recommendations to the Commission in four forms: (1) legislative proposals, (2) regulation changes, (3) policy papers, and (4) administrative remedies.

A Senior Advisory Group consisting of the General Counsel, the Director of the Office of Policy Evaluation, the Chairman of the Atomic Safety and Licensing Appeal Board, and Executive Director for Operations, and the Chairman of the Regulatory Reform Task Force, was formed to assist the Chairman of the Commission in the review of the Task Force proposals. In addition, in March 1982, the Ad Hoc Committee for Review of

Nuclear Reactor Licensing Reform Proposals was formed. This committee was made up of representatives from industry, public interest groups, and state governments. It provided the Commission with two reports on the legislative proposals developed by the Task Force. A comprehensive legislative proposal was placed in the Federal Register for public comment in June 1982. After a review of the public comments and the reports of the Ad Hoc Committee, the Commission developed a final draft bill, entitled the "Nuclear Power Plant Licensing Reform Act of 1983."

The NRC's draft bill was introduced in the House as H.R. 2512 and in the Senate as S. 893. In addition, a similar nuclear licensing reform bill drafted by the Department of Energy was introduced in the House as H.R. 2511 and in the Senate as S. 894. The House Energy and the Environment Subcommittee, the House Energy Conservation and Power Subcommittee, and the Senate Nuclear Regulation Subcommittee each held hearings on the two bills, at which representatives of the Commission, the Administration, the nuclear industry, and various public interest groups testified. A third bill, H.R. 5053, was drafted by Representatives Broyhill and Moorhead and was introduced in the House in March 1984. None of the three bills was, however, reported from committee before the 98th Congress adjourned.

The hearings on those three bills revealed that certain proposals—namely those encouraging facility design standardization and related supportive revisions to the licensing process—commanded the strongest support. Accordingly, following the adjournment of the 98th Congress, the Commission revised its earlier draft bill to focus on reforms to the licensing process which facilitate design standardization, early site approval and single stage licensing for nuclear power plants.

As a result of these revisions, the Commission believes that the enclosed draft bill is a more focused measure than its predecessor, the "Nuclear Power Plant Licensing Reform Act of 1983."

The proposed legislation, if adopted, would amend existing section 185 of the Atomic Energy Act, and add new sections 193 and 194. The most important changes to Section 185, Construction Permits and Operating Licenses, would permit the issuance of what would be called a combined construction permit and operating license (CP/OL) and thereby facilitate NRC review of essentially complete designs prior to construction.

Section 193, Early Site Review, and section 194, Approval of Designs, are new sections which authorize the Commission to issue a site permit or a facility design approval even though no application for a construction permit or a combined CP/OL has been filed. These sections have been proposed to facilitate early identification and resolution of site and design issues after giving an opportunity for public participation. These sections would also allow subsequent facility applications to reference a site permit or design approval and have those final determinations be made binding unless there is a substantial reason not to do so. Nothing in the legislation would require the Commission to alter its present provisions for instituting proceedings to modify, suspend or revoke a license or to take such other action as may be proper upon request filed with the Commission for such action.

The provisions of the draft bill do provide a vehicle by which the Commission can improve the quality, effectiveness, and efficiency of the licensing process without impairing public health and safety or detracting from the public's ability to participate in that process on disputed issues. Accordingly, the Commission believes that the provisions in this draft will accomplish our above-stated objectives. Therefore, the Commission majority urges Congressional approval of this proposed legislation.

Commissioner Asselstine adds: I cannot recommend that the Congress enact the bill proposed by the Commission. The combined construction permit and operating license provision would allow a plant to go into operation without a Commission review of the adequacy of its construction, its readiness for operation, or of the emergency planning arrangements. Moreover, the bill sets such a high threshold for obtaining a hearing on these issues that the public will be effectively denied an opportunity to be heard on the matters which are of greatest concern to the population in the vicinity of the plant. As I have not had an opportunity to prepare more detailed comments, I will be providing the interested Committees with my views on this legislation at a later date.

Commissioners approving the legislation believe that the legislation provides for Commission review of the adequacy of construction, readiness for operation and for matters such as emergency planning arrangements at the appropriate times. They also believe that the threshold for obtaining a hearing is proper since it is based upon a general standard of good cause and protection of the public health and safety, consistent with the overall responsibilities of the Commission under the Atomic Energy Act.

The approving Commissioners will provide interested Committees with additional views on this legislation at a later date.

Sincerely,

NUNZIO J. PALLADINO.

By Mr. HEINZ (for himself, Mr. GLENN, Mr. CHILES, Mr. PRESSLER, Mr. MELCHER, Mr. WILSON, Mr. BURDICK, and Mr. NICKLES):

S. 837. A bill to amend the Social Security Act to protect beneficiaries under the health care programs of that act from unfit health care practitioners, and otherwise to improve the antifraud provisions of that act; to the Committee on Finance.

PATIENT AND PROGRAM PROTECTION ACT FOR MEDICARE AND MEDICAID

Mr. HEINZ. Mr. President, 20 years ago Congress established the Medicare and Medicaid Programs—guaranteeing, for the first time, that needed health care services would be available to the elderly and poor. Since that time, the Senate Special Committee on Aging has worked to assure that the services provided under these programs are cost effective and of good quality. Today I am introducing a bill entitled the "Patient and Program Protection Act for Medicare and Medicaid" which will strengthen our ability to protect the fiscal integrity of these programs and to safeguard the quality of care provided thereunder.

A General Accounting Office study released to the committee at a May 1984, investigative hearing, revealed shocking evidence of loopholes in the HHS Secretary's authority which allow providers barred from practice in one Federal program or in one State to switch to another program or to pack their bags and set up practice in another State. The GAO report identified 328 doctors, osteopaths, dentists, chiropractors, podiatrists, and pharmacists who had their licenses suspended or revoked for a year or more by authorities in Michigan, Pennsylvania, and Ohio for such serious offenses as fraudulent billing, sexual abuse of patients, incompetence, and negligence. Even more disturbing than the initial occurrence of these offenses is the fact that well over one-third of these practitioners held licenses in other States and many continued to treat Federal patients after having been sanctioned.

The loopholes which allow this State hopping and program switching threaten the health and safety of 50 million Americans who trust Medicare and Medicaid to finance their health care needs. And, because many of these practitioners also treat privately insured patients, this problem is of vital concern to all Americans.

Some estimate that the number of these unethical, carpetbagging doctors is small. In the May 1984 Aging Committee hearing, we heard testimony estimating that as many as 36 million Americans may receive treatment from unfit doctors each year. But whether the number is small or large is not the point. The point is that the Secretary of HHS has insufficient authority to prevent incompetent practitioners from risking the health of beneficiaries in Medicare, Medicaid, and other Federal health programs.

Let me illustrate how serious and shocking a problem we face with a few case studies that the committee's investigative staff uncovered:

Dr. S is a surgeon who performed a series of extensive and dangerous back surgeries on a number of patients. As a direct result of his gross negligence and gross incompetence in the operating room, one woman died. When he lost his license in California, he took up practice in Michigan and continued to receive Federal reimbursement under Medicare and Medicaid. It took Michigan 6 years to finally revoke his license. That was 5 years ago. Today, Dr. S practices medicine in New York State and is still eligible to treat federally sponsored patients and to bill the taxpayer under Medicare and Medicaid.

An equally appalling case is that of Dr. T. He was initially charged with misrepresenting his medical education. He said he had graduated from a school in Saigon, Vietnam. Later he changed his story and said he had graduated from a school in Hanoi. In March 1981, he admitted to California

authorities that the diploma he had submitted was false. He surrendered his California license. Later, in October 1981 he was convicted in a Federal court of having submitted false new drug studies to the FDA. In March 1982, he admitted to Arizona authorities that he had falsified his school diploma. He then failed a State-ordered medical incompetence examination and Arizona revoked his license. In November 1982 he surrendered his Ohio license because he received two board citations alleging falsified documents. Finally in 1982 Nevada revoked his license but stayed the revocation and ordered 5 years probation. Incredibly, Dr. T, a convicted felon, who never graduated from medical school, continues to practice medicine in Nevada and is entitled to treat Medicare and Medicaid patients.

If either of these practitioners had lost his driver's license for drunk driving, his name would have gone into a national registry and he probably would not be given a driver's license in another State. Yet we have no nationwide system to identify doctors who threaten lives in their day-to-day medical practices. This current lack of coordination among States allows these dangerous, criminal doctors to hop from Pennsylvania, to California, to Michigan—to any one of the 50 States. And the current restrictions on HHS' authority means a doctor can be banned in 49 States and the Federal Government will still pay him for treating Medicare and Medicaid patients.

This is neither an appropriate expenditure of the taxpayers' money, nor a responsible way for the Federal Government to provide quality health care for its beneficiaries. It is a dereliction of duty on our part that we in Congress have not given the Secretary of HHS the authority needed to prevent these unfit doctors from continuing to treat federally sponsored patients.

Mr. President, allow me to provide a little background on the Secretary's existing authority. Since passage of the Social Security Act Amendments of 1971, the Secretary of HHS—then HEW—has had the ability to exclude from participation in the Medicare Program practitioners or other individuals, first, who knowingly submit false claims, second, who charge Medicare substantially more than their customary charges, or third, who provide services substantially in excess of patients' needs or provide services of a quality which fails to meet professionally recognized standards of health care.

Subsequent amendments to the act have, first, created the authority for the Secretary to exclude from Medicare individuals who are found by a Professional Standards Review Organization—now Peer Review Organization—to be providing unnecessary or substandard care to program beneficiaries, and second, mandated the Secretary to suspend from participation in both Medicare and Medicaid individuals who have been convicted of criminal offenses related to their participation in those programs.

In the last quarter of fiscal year 1983, HHS Secretary Margaret Heckler delegated the authority to sanction practitioners under these statutory provisions to the inspector general of HHS. Since that time, some 480 sanctions have been imposed by the inspector general, a number 1½ times the total number imposed in the previous 11 years. With this marked increase in the amount of sanction activity has come an increased awareness of certain loopholes which exist in the sanction statutes. One example of such a loophole is that the Department is currently powerless to bar physicians or other practitioners from program participation based upon disciplinary action imposed upon them by State licensing boards. Other examples were noted in the inspector general's testimony before the Aging Committee during the May 1984 hearing and in the GAO report.

The bill I am introducing today will close such loopholes and thereby increase the ability of the Department to protect both the fiscal integrity of the Medicare and Medicaid Programs and the health and safety of the beneficiaries of those programs. The bill closes such loopholes by expanding the grounds upon which the Secretary can exclude health care providers from participation in federally funded programs:

It mandates exclusion of first, those providers who have been convicted of crimes relating to the delivery of health care under Government programs, such as fraud or neglect or abuse of patients, obstructing an investigation into such crimes or dispensing of controlled substances, second, those who submit fraudulent claims for payment, and third, those who violate the antikickback provision of the Social Security Act. These providers are to be excluded from participation in Federal programs for a minimum of 5 years.

The bill also gives the Secretary discretion to exclude first, those practitioners who are sanctioned by a State licensing authority, or who surrendered their license while a formal proceeding was pending before such authority, second, those sanctioned under any Federal program involving the provision of health care, third, those who submit claims substantially in excess of their customary charges without good cause, fourth, those who fail to supply the Secretary with access to information needed to determine whether reimbursement is appropriate, and fifth, facilities that are owned or managed by a practitioner who has been convicted of one of these offenses, assessed a civil monetary penalty, or excluded from a federally funded health care program.

The bill also creates a new information-sharing network by requiring as a condition of participation in Medicaid that States provide the Secretary with information about formal sanction proceedings conducted by State licensing authorities against health practitioners. It empowers the Secretary to collect such information and share it with other States to assist them in determining the fitness of practitioners seeking licenses to practice in their States. This network will put an end to the current ease with which unfit practitioners avoid sanctions simply by crossing State lines.

In addition to giving the Secretary of HHS the much needed authority to protect Medicare and Medicaid patients from unfit medical practitioners, a number of improvements are needed in the Secretary's civil monetary penalties authority to protect the Medicare and Medicaid Programs from financial fraud and abuse.

In 1981, in an effort to further protect Medicare and Medicaid from financial fraud and abuse, Congress enacted the civil monetary penalty [CMP] statute—title 42 United States Code section 1320a-7a—which provides an administrative mechanism to obtain money assessments and penalties against dishonest health care practitioners and other providers. Where such entities have failed to render services as claimed, they can be liable for up to twice the amount claimed as an assessment and a penalty of up to $2,000 per item or service improperly claimed.

Since promulgation of the regulations establishing the procedures for administering the statute in 1983, approximately $5 million has been recovered from unscrupulous health care providers. However, it has become clear that several technical amendments are needed to plug loopholes in the CMP statute. The HHS inspector general's office is seeking authority, first, to correct apparent oversights in the drafting of the original statute, and second, to give the Department authority similar to that of the Security and Exchange Commission and other Federal agencies which administer civil antifraud statutes.

In short, this bill will:

First, permit unified judicial review of the imposition of monetary penalties, and Medicare and Medicaid suspensions;

Second, provide for subpoena power in all CMP hearings—not just those involving Medicare;

Third, provide monetary penalties for claims submitted after the date of exclusion from Medicare and Medicaid

pursuant to a peer review organization determination;

Fourth, increase the State's share of CMP recoveries in order to encourage State investigation and referral of Medicaid fraud cases;

Fifth, clarify that the scope of the CMP statute includes double billing and false medical credentials;

Sixth, provide a 6-year statute of limitations for CMP actions; and

Seventh, provide authority to seek an injunction in U.S. district court to preserve the assets of a CMP respondent, where that respondent may dissipate or conceal those assets.

Mr. President, this legislation will give the Secretary authority that is desperately needed to protect the fiscal integrity of federally funded health care programs and to safeguard the quality of care provided thereunder. I urge my colleagues to join me and other members of the Aging Committee in sponsoring this important reform legislation. Our poor and aged constituents deserve nothing less than prompt passage of this legislation. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 837

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; REFERENCES IN ACT.

(a) SHORT TITLE.—This Act may be cited as the "Patient and Program Protection Act for Medicare and Medicaid".

(b) AMENDMENTS TO THE SOCIAL SECURITY ACT.—Whenever in this Act an amendment is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Social Security Act.

TABLE OF CONTENTS

Sec. 1. Short title, references in Act.
Sec. 2. Exclusion from medicare and State health care programs.
Sec. 3. Civil monetary penalties.
Sec. 4. Criminal penalties for acts involving medicare and State health care programs.
Sec. 5. Information concerning sanctions taken by State licensing authorities against health care practitioners and providers.
Sec. 6. Obligation of health care practitioners and providers.
Sec. 7. Exclusion under the medicaid program.
Sec. 8. Miscellaneous and conforming amendments.
Sec. 9. Effective dates.
Sec. 10. Denial, revocation, or suspension of registration to manufacture, distribute, or dispense a controlled substance for entities excluded from the medicare program.

SEC. 2. EXCLUSION FROM MEDICARE AND STATE HEALTH CARE PROGRAMS.

Section 1128 (42 U.S.C. 1320a-7) is amended to read as follows:

"EXCLUSION OF CERTAIN INDIVIDUALS AND ENTITIES FROM PARTICIPATION IN MEDICARE AND STATE HEALTH CARE PROGRAMS

"SEC. 1128. (a) MANDATORY EXCLUSION.—The Secretary shall exclude from participation in the programs under title XVIII the following individuals or entities:

"(1) CONVICTION RELATING TO MEDICARE OR STATE HEALTH CARE PROGRAM.—Any individual or entity that has been convicted of a criminal offense related to such individual's or entity's participation in the delivery of items or services under title XVIII or under any State health care program (as defined in subsection (g)).

"(2) CONVICTION RELATING TO FRAUD OR PATIENT ABUSE.—Any individual or entity that has been convicted, under Federal or State law, in connection with the delivery of health care items or services or with respect to any act or omission in a program operated by or financed in whole or in part by any Federal, State, or local government agency, of a criminal offense relating to—

"(A) fraud, theft, embezzlement, breach of fiduciary responsibility, or financial abuse, or

"(B) neglect or abuse of patients.

"(3) CONVICTION RELATING TO OBSTRUCTION OF AN INVESTIGATION.—Any individual or entity that has been convicted, under Federal or State law, in connection with the interference or obstruction of any investigation into any criminal offense described in paragraph (1) or (2).

"(4) CONVICTION RELATING TO CONTROLLED SUBSTANCE.—Any individual or entity that has been convicted, under Federal or State law, of unlawful manufacture, distribution, prescription, or dispensing of a controlled substance or other criminal offense relating to a controlled substance.

"(5) SUBMISSION OF FALSE CLAIMS.—Any individual or entity that the Secretary determines has knowingly and willfully made, or caused to be made, any false statement or representation of a material fact for use in an application for payment under title XVIII or a State health care program, or for use in determining the right to a payment under such title or program.

"(6) FRAUD, KICKBACKS, AND OTHER PROHIBITED ACTIVITIES.—Any individual or entity that the Secretary determines has committed an act which is described in section 1128B.

"(b) PERMISSIVE EXCLUSION.—The Secretary may exclude from participation in the programs under title XVIII the following individuals and entities:

"(1) LICENSE REVOCATION OR SUSPENSION.—Any individual or entity—

"(A) whose license to provide health care has been revoked or suspended by a State licensing authority or who otherwise lost such a license for reasons bearing on the individual's or entity's professional competence, professional conduct, or financial integrity, or

"(B) who surrendered such a license while a formal disciplinary proceeding was pending before such an authority and the proceeding concerned the individual's or entity's professional competence, professional conduct, or financial integrity.

"(2) SUSPENSION FROM FEDERAL HEALTH CARE PROGRAM.—Any individual or entity which has been suspended or excluded from participation, or otherwise sanctioned, under any Federal program, including programs of the Department of Defense or the Veterans' Administration, involving the provision of health care, or under a State health care program (as defined in subsection (g)).

"(3) SUBMISSION OF FALSE CLAIMS.—Any individual or entity that the Secretary determines—

"(A) has submitted or caused to be submitted bills or requests for payment under title XVIII or a State health care program containing charges (or, in applicable cases, requests for payment of costs) for items or services furnished substantially in excess of such individual's or entity's customary charges (or, in applicable cases, substantially in excess of such individual's or entity's costs) for such items or services, unless the Secretary finds there is good cause for such bills or requests containing such charges or costs;

"(B) has furnished items or services to patients (whether or not eligible for benefits under title XVIII or a State health care program) substantially in excess of the needs of such patients or of a quality which fails to meet professionally recognized standards of health care;

"(C) is—

"(i) a health maintenance organization (as defined in section 1903(m)) providing items and services under a State plan approved under title XIX or

"(ii) an entity furnishing services under a waiver approved under section 1915(b)(1),

and has failed in a substantial number of cases to provide medically necessary items and services that are required under law or the contract with the State under that title; or

"(D) is an entity providing items and services as an eligible organization under a contract under section 1876 and has failed in a substantial number of cases to provide medically necessary items and services that are required under law or such contract.

"(4) EXCLUSION OF ENTITIES.—Any entity with respect to which the Secretary determines that a person—

"(A)(i) with an ownership or control interest (as defined in section 1124(a)(3)) in that entity or

"(ii) who is an officer, director, agent, or managing employee (as defined in section 1126(b)) of that entity—

is a person—

"(B)(i) who has been convicted of any offense described in paragraph (1), (2), (3), or (4) of subsection (a);

"(ii) against whom a civil monetary penalty has been assessed under section 1128A; or

"(iii) who has been excluded from participation under a program under title XVIII or under a State health care program.

"(5) FAILURE TO DISCLOSE REQUIRED INFORMATION.—Any entity that did not fully and accurately make any disclosure required of it by section 1124 or section 1126.

"(6) FAILURE TO SUPPLY REQUESTED INFORMATION.—Any disclosing entity (as defined in section 1124(a)(2)) that fails to supply (within such period as may be specified by the Secretary in regulations) upon request specifically addressed to such entity by the Secretary—

"(A) full and complete information as to the ownership of a subcontractor (as defined by the Secretary in regulations) with whom such entity has had, during the previous 12 months, business transactions in an aggregate amount in excess of $25,000, or

"(B) full and complete information as to any significant business transactions (as defined by the Secretary in regulations), occurring during the five-year period ending on the date of such request, between such entity and any wholly owned supplier or between such entity and any subcontractor.

"(7) FAILURE TO SUPPLY PAYMENT INFORMATION.—Any individual or entity furnishing items or services for which payment may be made under title XVIII or a State health care program that fails to provide such information as the Secretary finds necessary to determine whether such payments are or were due and the amounts thereof, or has refused to permit such examination of its records by or on behalf of the Secretary as may be necessary to verify such information.

"(8) FAILURE TO PROVIDE IMMEDIATE ACCESS TO NECESSARY INFORMATION.—Any individual or entity that fails to grant immediate access, upon reasonable request (as defined by the Secretary in regulations), to any of the following:

"(A) To the Secretary, or to the agency used by the Secretary, for the purpose specified in the first sentence of section 1864(a) (relating to compliance with conditions of participation or payment).

"(B) To the Secretary or the State agency in order to perform the reviews and surveys required under State plans under paragraphs (26), (31), and (33) of section 1902(a) and under section 1903(g).

"(C) To the Inspector General of the Department of Health and Human Services for the purpose of review of records, documents, and other data necessary to the performance of the statutory functions of the Inspector General.

"(D) To a State medicaid fraud control unit (as defined in section 1903(q)) for the purpose of conducting activities described in that section.

"(c) NOTICE OF EXCLUSION.—(1) An exclusion under this section or under section 1128A shall only be effective at such time and upon such reasonable notice to the public and to the individual or entity excluded as may be specified in regulations consistent with paragraph (2).

"(2) Such an exclusion shall be effective with respect to services furnished to an individual on or after the effective date of the exclusion; except that such exclusion shall not apply to payments made under title XVIII or under a State health care program for—

"(A) inpatient institutional services furnished to an individual who was admitted to such institution before the date of the exclusion, or

"(B) home health services and hospice care furnished to an individual under a plan of care established before the date of the exclusion,

until the passage of 30 days after the effective date of the exclusion.

"(d) HEARING AND JUDICIAL REVIEW ON EXCLUSIONS UNDER THIS SECTION.—Any individual or entity that is excluded from participation under this section is entitled to reasonable notice and opportunity for a hearing thereon by the Secretary to the same extent as is provided in section 205(b), and to judicial review of the Secretary's final decision after such hearing as is provided in section 205(g).

"(e) NOTICE TO STATES AND EXCLUSION UNDER STATE HEALTH CARE PROGRAMS.—(1) The Secretary shall promptly notify each appropriate State agency administering or supervising the administration of each State health care program of the fact and circumstances of each exclusion effected under this section or section 1128A.

"(2) Each State health care program shall provide for the exclusion from participation in that program of each individual and entity during any period in which the individual or entity is excluded from participation in the programs under title XVIII pursuant to this section or section 1128A, except that the Secretary may waive such required exclusion with respect to an individual or entity if the Secretary receives and approves a request for such waiver with respect to the individual or entity from the State agency administering or supervising the administration of the program.

"(3) The Secretary shall—

"(A) promptly notify the appropriate State or local agency or authority having responsibility for the licensing or certification of an individual or entity excluded from participation under this section or section 1128A of the fact and circumstances of such exclusion,

"(B) request that appropriate investigations be made and sanctions invoked in accordance with applicable State law and policy, and

"(C) request that such State or local agency or authority keep the Secretary and the Inspector General in the Department of Health and Human Services fully and currently informed with respect to any actions taken in response to such request.

"(f) PERIOD OF EXCLUSION.—(1)(A) Except in the case of an exclusion effected under subsection (b)(8), the notice of exclusion under subsection (c) and the written notice under section 1128A shall state the earliest date (which, in the case of an exclusion effected pursuant to subsection (a), may not be less than five years after the date of the exclusion) on which the individual or entity may be reinstated under this subsection.

"(B) In the case of an exclusion effected under subsection (b)(8), the notice of exclusion under subsection (c) shall state the period of the exclusion, which shall be equal to the sum of—

"(i) the length of the period in which the individual or entity failed to grant immediate access described in subsection (b)(8), and

"(ii) an additional period, not to exceed 90 days, set by the Secretary.

"(2) An individual or entity excluded from participation under this section (other than under subsection (b)(8)) or section 1128A may apply to the Secretary, in the manner specified by the Secretary in regulations and at the end of the initial period of exclusion and at such other times as the Secretary may provide, for reinstatement as a participant in the programs under title XVIII and under State health care programs.

"(3) The Secretary shall provide for such reinstatement if the Secretary determines, on the basis of the conduct of the applicant which occurred after the date of the notice of exclusion or which was unknown to the Secretary at the time of the exclusion, that—

"(A) there is no basis under subsection (a) or (b) or section 1128A(a) for a continuation of the exclusion, and

"(B) there are reasonable assurances that the types of actions which formed the basis for the original exclusion have not recurred and will not recur.

"(4) The Secretary shall promptly notify each appropriate State agency administering or supervising the administration of each State health care program of the fact and circumstances of each reinstatement made under this subsection.

"(g) DEFINITION OF STATE HEALTH CARE PROGRAM.—For purposes of this section and sections 1128A and 1128B, the term 'State health care program' means—

"(1) a State plan approved under title XIX,

"(2) any program receiving funds under title V or from an allotment to a State under such title, or

"(3) any program receiving funds under title XX or from an allotment to a State under such title.".

SEC. 3. CIVIL MONETARY PENALTIES.

(a) GROUNDS FOR IMPOSITION.—(1) Subsection (a)(1) of section 1128A (42 U.S.C. 1320a-7a) is amended—

(A) by striking out "is for a medical or other item or service" in the matter before subparagraph (A),

(B) by inserting "is for a medical or other item or service" in subparagraph (A) after "(A)",

(C) by striking out "or" at the end of subparagraph (A),

(D) by striking out "(B)" in subparagraph (B) and inserting in lieu thereof "(C) is for a medical or other item or services",

(E) in subparagraph (C) (as so redesignated), by striking out "section 1128" and all that follows through "proceedings;" and inserting in lieu thereof "this section or sections 1128, 1156, 1160(b) (as in effect on September 2, 1982), 1862(d) (as in effect on the date of the enactment of the Patient and Program Protection Act for Medicare and Medicaid), or 1866(b);", and

(F) by inserting after subparagraph (A) the following new subparagraph:

"(B) the person knows or has reason to know is false or fraudulent, or", and

(2) Subsection (a)(2)(B) of such section is amended by inserting "(or other requirement of a State plan under title XIX)" after "State agency".

(3) Subsection (a) of such section is further amended by adding at the end thereof the following new sentence: "In addition the Secretary may make a determination in the same proceeding to exclude the person from participation in the programs under title XVIII and in any State health care program.".

(4) No civil penalty or assessment may be imposed under section 1128A(a) of the Social Security Act in the case of a claim filed before August 13, 1981, if liability for the amount of the penalty or assessment could not have been imposed with respect to the claim under section 3729 of title 31, United States Code (relating to false claims).

(b) STATUTE OF LIMITATION ON ACTIONS.—Subsection (b)(1) of such section is amended by adding at the end the following new sentences: "The Secretary may not initiate an action under this section with respect to any claim later than six years after the date the claim was presented. The Secretary may initiate an action under this section by personal service or by mailing by registered or certified mail the notice required by paragraph (2).".

(c) CONFORMING AMENDMENT.—Subsections (b), (c), (f), and (g) of such section are each amended by striking out "penalty or assessment" and inserting in lieu thereof "penalty, assessment, or exclusion" each place it appears.

(d) PRO-RATED PAYMENT OF RECOVERIES TO STATE AGENCIES.—Subsection (e)(1)(A) of such section is amended by striking out "equal to the State's share of the amount paid by the State agency" and inserting in lieu thereof "bearing the same proportion to the total amount recovered as the State's share of the amount paid by the State agency for such claim bears to the total amount paid".

(e) NOTICE TO STATE AGENCIES.—Subsection (g) of such section is further amended by inserting "the appropriate State agency or agencies administering or supervising the administration of State health care programs (as defined in section 1128(g))," after "professional organization,".

(f) APPLICATION OF SUBPOENA POWER AND INJUNCTIVE POWERS.—Such section is further amended by adding at the end the following new subsections:

"(i) The provisions of subsections (d) and (e) of section 205 shall apply with respect to this section to the same extent as they are applicable with respect to title II.

"(j) Whenever the Secretary has reason to believe that any person has engaged, is engaging, or is about to engage in any activity which makes the person subject to a civil monetary penalty under this section, the Secretary may bring an action in an appropriate district court of the United States (or, if applicable, a United States court of any territory) to enjoin such activity, or to enjoin the person from concealing, removing, or encumbering assets which may be required in order to pay a civil monetary penalty if any such penalty were to be imposed or to seek other appropriate relief.".

SEC. 4. CRIMINAL PENALTIES FOR ACTS INVOLVING MEDICARE AND STATE HEALTH CARE PROGRAMS.

(a) TECHNICAL AMENDMENTS.—Section 1909 is amended—

(1) by amending the heading to read as follows:

"CRIMINAL PENALTIES FOR ACTS INVOLVING MEDICARE OF STATE HEALTH CARE PROGRAMS";

(2) in subsection (a)(1), by striking out "a State plan approved under this title" and inserting in lieu thereof "a program under title XVIII or a State health care program (as defined in section 1128(g))";

(3) in the matter in subsection (a) following paragraph (4), by striking out "this title" the first place it appears and inserting in lieu thereof "the program";

(4) in the last sentence of subsection (a), by striking out "this title" the first place it appears and inserting in lieu thereof "title XIX", and by striking out "this title" the second place it appears and inserting in lieu thereof "that title";

(5) in paragraphs (1)(A), (1)(B), (2)(A), (2)(B), and (3)(A) of subsection (b), by striking out "this title" and inserting in lieu thereof "title XVIII or a State health care program" each place it appears;

(6) in subsection (c), by striking out "or home health agency (as those terms are employed in this title)" and inserting in lieu thereof "home health agency, or other entity for which certification is required under title XVIII or a State health care program"; and

(7) in subsection (d), by striking out "this title" and inserting in lieu thereof "title XIX" each place it appears.

(b) REDESIGNATION OF SECTION 1877(d) AS SECTION 1128B(e).—Subsection (d) of section 1877 is redesignated as subsection (e) and is transferred and inserted in section 1909 at the end thereof.

(c) REDESIGNATION OF SECTION 1909 AS SECTION 1128B.—Section 1909, as amended by subsections (a) and (b) of this section, is redesignated as section 1128B and is transferred to title XI and inserted immediately after section 1128A.

(d) REPEAL.—Section 1877 (other than subsection (d) thereof which was transferred under subsection (b) of this section) is repealed.

SEC. 5. INFORMATION CONCERNING SANCTIONS TAKEN BY STATE LICENSING AUTHORITIES AGAINST HEALTH CARE PRACTITIONERS AND PROVIDERS.

(a) MEDICAID PLAN REQUIREMENT.—Section 1902(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (45),

(2) by striking out the period at the end of paragraph (46) and inserting in lieu thereof "; and", and

(3) by inserting after paragraph (46) the following new paragraph:

"(47) provide that the State will provide information and access to certain information respecting sanctions taken against health care practitioners and providers by State licensing authorities in accordance with section 1919.".

(b) INFORMATION REQUIRED.—Title XIX is amended by adding at the end the following new section:

"INFORMATION CONCERNING SANCTIONS TAKEN BY STATE LICENSING AUTHORITIES AGAINST HEALTH CARE PRACTITIONERS AND PROVIDERS

"SEC. 1919. (a) INFORMATION REPORTING REQUIREMENT.—The requirement referred to in section 1902(a)(47) is that the State must provide for the following:

"(1) INFORMATION REPORTING SYSTEM.—The State must have in effect a system of reporting the following information with respect to formal proceedings (as defined by the Secretary in regulations) concluded against a health care practitioner or entity by any authority of the State (or of a political subdivision thereof) responsible for the licensing of health care practitioners or entities:

"(A) Any adverse action taken by such licensing authority as a result of the proceeding, including any revocation or suspension of a license (and the length of any such suspension), reprimand, censure, or probation.

"(B) Any dismissal or closure of the proceedings by reason of the practitioner or entity surrendering the license or leaving the State or jurisdiction.

"(C) Any other loss of the license of the practitioner or entity, whether by operation of law, voluntary surrender, or otherwise.

"(2) ACCESS TO DOCUMENTS.—The State must provide the Secretary (or an entity designated by the Secretary) with access to such documents of the authority described in paragraph (1) as may be necessary for the Secretary to determine the facts and circumstances concerning the actions and determinations described in such paragraph for the purpose of carrying out this Act.

"(b) FORM OF INFORMATION.—The information described in subsection (a)(1) shall be provided to the Secretary (or, under suitable arrangements made by the Secretary, to another entity) in such a form and manner as the Secretary determines to be appropriate in order to provide for activities of the Secretary under this Act and in order to provide, directly or through suitable arrangements made by the Secretary, information—

"(1) to licensing authorities described in subsection (a)(1),

"(2) to State agencies administering or supervising the administration of State health care programs (as defined in section 1128(g)),

"(3) to utilization and quality control peer review organizations described in part B of title XI, and

"(4) to State medicaid fraud control units (as defined in section 1903(q)),

in order for such authorities to determine the fitness of individuals to provide health care services, to protect the health and safety of individuals receiving health care through such programs, and to protect the fiscal integrity of such programs.

"(c) CONFIDENTIALITY OF INFORMATION PROVIDED.—The Secretary shall provide for suitable safeguards for the confidentiality of such of the information furnished under subsection (a) as is not otherwise available to the public.".

SEC. 6. OBLIGATION OF HEALTH CARE PRACTITIONERS AND PROVIDERS.

Section 1156 (42 U.S.C. 1320c-5) is amended—

(1) by striking out "title XVIII" and "such title" in subsection (a) and inserting in lieu thereof "this Act" in each instance, and

(2) by striking out "title XVIII" each place it appears in subsection (b) and inserting in lieu thereof "this Act".

SEC. 7. EXCLUSION UNDER THE MEDICAID PROGRAM.

Section 1902 (42 U.S.C. 1396b) is amended by inserting after subsection (f) the following new subsection:

"(g)(1) In addition to any other authority provided under State law, a State may exclude any individual or entity from participation in the State plan under this title for any reason for which the Secretary could exclude the individual or entity from participation in the programs under title XVIII under section 1128 or 1128A.

"(2) In order for a State to receive payments for medical assistance under section 1903(a), with respect to payments the State makes to a health maintenance organizations (as defined in section 1903(m)) or to an entity furnishing services under a waiver approved under section 1915(b)(1), the State must provide that it will exclude from participation, as such an organization or entity, any organization or entity that—

"(A) could be excluded under section 1128(b)(4) (relating to owners and managing employees who have been convicted of certain crimes or received other sanctions), or

"(B) has, directly or indirectly, a substantial contractual relationship (as defined by the Secretary) with an individual or entity that is described in section 1128(b)(4)(B).

"(3) As used in this subsection, the term 'exclude' includes the refusal to enter into a participation agreement or the termination of such an agreement.".

SEC. 8. MISCELLANEOUS AND CONFORMING AMENDMENTS.

(a) MATERNAL AND CHILD HEALTH PROGRAM.—Section 504(b) (42 U.S.C. 704(b)) is amended—

(1) by striking out "or" at the end of paragraph (4),

(2) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; or", and

(3) by adding at the end thereof the following new paragraph:

"(6) payment for any item or service furnished by an individual or entity excluded from participation in the program under this title pursuant to section 1128 or section 1128A.".

(b) DISCLOSURE REQUIREMENTS.—(1) Subsection (a) of section 1126 (42 U.S.C. 1320a-5) is amended—

(A) in the first sentence, by striking out "or other institution" and all that follows through the period at the end and inserting in lieu thereof "or other entity (other than an individual practitioner or group of practitioners) shall be required to disclose to the Secretary or to the appropriate State agency the name of any person who has an

ownership or control interest (as defined in section 1124(a)(3)) in such entity, or is a managing employee (as defined in subsection (b)) of such entity, and who is or has been excluded or suspended from participation in a program under title XVIII or in a State health care program described in section 1128(g) or has been convicted of any criminal offense on the basis of which the individual or entity may be excluded from a program under section 1128.", and

(B) in the second sentence, by striking out "institution, organization, or agency" and inserting in lieu thereof "entity".

(2) Subsection (b) of such section is amended by striking out "institution, organization, or agency" and inserting in lieu thereof "entity" each place it appears.

(c) MEDICARE PAYMENTS.—(1) Section 1862 (42 U.S.C. 1395y) is amended—

(A) by striking out subsection (d), and

(B) by amending subsection (e) to read as follows:

"(e) No payment may be made under this title with respect to any item or service furnished by an individual or entity during any period when the individual or entity is excluded from participation in a program under this title pursuant to section 1128 or section 1128A.".

(2) Sections 1842(j)(2)(A) and 1862(h)(4) (42 U.S.C. 1395u(j)(2)(A), 1395y(h)(4)) are each amended by striking out "paragraphs (2) and (3) of section 1862(d)" and inserting in lieu thereof "subsections (c), (d), and (f) of section 1128".

(3) Paragraph (3) of section 1886(f) (42 U.S.C. 1395ww(f)) is amended to read as follows:

"(3) The provisions of subsections (c) through (f) of section 1128 shall to apply to determinations made under paragraph (2) in the same manner as they apply to exclusions effected under section 1128(b)(2).".

(d) TERMINATION OF PROVIDER AGREEMENTS UNDER MEDICARE.—Section 1866 (42 U.S.C. 1395cc) is amended—

(1) by striking out paragraph (3) of subsection (a);

(2) by amending subsection (b) to read as follows:

"(b)(1) A provider of services may terminate an agreement with the Secretary under this section at such time and upon such notice to the Secretary and the public as may be provided in regulations, except that notice of more than six months shall not be required.

"(2) The Secretary may refuse to enter into an agreement under this section or, upon such reasonable notice to the provider and the public as may be specified in regulations, may refuse to renew or may terminate such an agreement after the Secretary—

"(A) has determined that the provider fails to comply substantially with the provisions of the agreement, with the provisions of this title and regulations thereunder, or with a corrective action required under section 1886(f)(2)(B),

"(B) has determined that the provider fails substantially to meet the applicable provisions of section 1861, or

"(C) has excluded the provider from participation in a program under this title pursuant to section 1128 or section 1128A.

"(3) A termination of an agreement or a refusal to renew an agreement under this subsection (and a termination of approval of a supplier under this title) shall be effective on the same date, and with respect to the same items and services, as an exclusion from participation under the programs under this title would become effective under section 1128(c)(1).";

(3) by inserting "or has not been renewed" in paragraphs (1) and (3) of subsection (c) after "terminated"; and

(4) by inserting "or nonrenewal" in subsection (c) after "termination".

(e) OVERLAP WITH MEDICARE SANCTIONS.—Section 1869(c) (42 U.S.C. 1395ff(c)) is amended by inserting before the period at the end thereof the following: ", except that an institution or agency is not entitled to separate notice and opportunity for a hearing under both section 1128 and this section with respect to a determination or determinations based on the same underlying facts and issues".

(f) MEDICAID PLAN REVISIONS.—Section 1902(a) (42 U.S.C. 1396b(a)) is amended—

(1) in paragraph (38), by striking out "respectively, (A)" and all that follows up to the semicolon at the end and inserting in lieu thereof "the information described in section 1128(b)(5)", and

(2) in paragraph (39)—

(A) by striking out "bar" and inserting in lieu thereof "exclude",

(B) by striking out "person" and inserting in lieu thereof "individual or entity" each place it appears, and

(C) by inserting "or section 1128A" after "section 1128".

(g) DENIAL OF FEDERAL FINANCIAL PARTICIPATION UNDER MEDICAID.—Paragraph (2) of section 1903(i) (42 U.S.C. 1396b(i)) is amended to read as follows:

"(2) with respect to any amount expended for items or services furnished under the plan by any individual or entity during any period when the individual or entity is excluded from participation in the State plan under this title pursuant to section 1128 or section 1128A; or".

(h) MEDICAID DISCLOSURE REQUIREMENTS.—Section 1903(n) (42 U.S.C. 1396b(n)) is amended by striking out "has a direct or indirect ownership or control interest of 5 percent of more" and inserting in lieu thereof "is a person with an ownership or control interest (as defined in section 1124(a)(3))".

(i) TITLE XX.—Section 2005(a) (42 U.S.C. 1397d(a)) is amended—

(1) by striking out "or" at the end of paragraph (7),

(2) by striking out the period at the end of paragraph (8) and inserting in lieu thereof "; or", and

(3) by adding at the end thereof the following new paragraph:

"(9) for payment for any item or service furnished by a person excluded from participation in the program under this title pursuant to section 1128 or section 1128A.".

SEC. 9. EFFECTIVE DATES.

(a) IN GENERAL.—Except as provided in subsections (b) and (c), the amendments made by this Act shall become effective at the end of the 14-day period beginning on the date of the enactment of this Act and shall not apply to administrative proceedings commenced before the end of such period.

(b) MANDATORY MINIMUM EXCLUSIONS APPLY PROSPECTIVELY.—Subparagraph (A) of section 1128(f)(1) of the Social Security Act (as amended by this Act), insofar as it requires an exclusion of not less than five years in the case described in section 1128(a) of that Act, shall not apply to exclusions based on convictions occurring before the date of the enactment of this Act.

(c) EFFECTIVE DATE FOR CHANGES IN MEDICAID LAW.—(1) The amendments made by sections 5 and 8(f) apply (except as provided under paragraph (2)) to payments under title XIX of the Social Security Act for calendar quarters beginning more than 30 days after the date of the enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by this Act, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.

(3) Subsection (j) of section 1128A of the Social Security Act (as added by section 3(f) of this Act) takes effect on the date of the enactment of this Act.

(d) REGULATIONS.—Any regulations required to be promulgated by the Secretary of Health and Human Services pursuant to this Act shall be promulgated as final regulations by not later than six months after the date of the enactment of this Act.

SECTION 10. DENIAL, REVOCATION, OR SUSPENSION OF REGISTRATION TO MANUFACTURE, DISTRIBUTE, OR DISPENSE A CONTROLLED SUBSTANCE FOR ENTITIES EXCLUDED FROM THE MEDICARE PROGRAM.

(a) IN GENERAL.—Section 304(a) of the Controlled Substances Act (21 U.S.C. 824(a)) is amended—

(1) by striking out "or" at the end of paragraph (2),

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or", and

(3) by inserting after paragraph (3) the following new paragraph:

"(4) has been excluded from participation in a program under title XVIII of the Social Security Act pursuant to section 1128(a) of that Act.".

(b) CONFORMING AMENDMENTS TO SOCIAL SECURITY ACT.—Subsections (e)(1) and (f)(4) of section 1128 of the Social Security Act, as amended by section 2 of this Act, are each amended by inserting "(and, in the case of an exclusion effected pursuant to subsection (a) and to which section 304(a)(4) of the Controlled Substances Act may apply, the Attorney General)" after "each State health care program".

By Mr. CHAFEE (for himself, Mr. MATHIAS, Mr. WEICKER, and Mr. METZENBAUM):

S. 838. A bill to repeal title VIII of the Education for Economic Security Act, relating to equal access to public secondary schools; to the Committee on Labor and Human Resources.

REPEAL OF EQUAL ACCESS ACT

Mr. CHAFEE. Mr. President, in June of 1984 Congress approved the Equal Access Act, establishing for the first time a Federal standard for the use of public school facilities in the United States. This law was unnecessary then, it is unnecessary now, and it will create more problems than it solves for American schools. Today I join with Senators MATHIAS, WEICKER, and METZENBAUM, in introducing legislation to repeal this measure.

In voting against the equal access bill last year, my primary concern was

that Congress should not further compound the problems faced by educators by diverting their attention from efforts to improve public schools. Congress and the administration have expressed a great deal of concern about the need to improve American education. We have also recognized that most educational reforms should originate at the local level.

The Equal Access Act was not a school improvement initiative. In the wake of the Senate's rejection of a constitutional amendment permitting organized school prayer, the Equal Access Act provided an opportunity for Congress to express support for limited religious activity in public schools. However, it raises many of the same constitutional questions posed by the school prayer amendment and imposes new Federal standards over local policies governing the use of school facilities.

The act holds that whenever a public school permits noncurriculum-related student groups to meet on school premises during noninstructional time, it must provide access to school facilities regardless of the "religious, political, philosophical or other content of the speech at such meetings." Thus, if groups such as the chess club, the drama society, or the ski club are allowed to meet in the school building, equal accommodation must be made for religious, political, and other gatherings.

As if there were not already enough requirements imposed on local schools by the Federal Government, now we are defining the extracurricular rights of students. This is a significant new Federal intrusion into the local decisionmaking process. Supporters of the measure argued that it would protect the rights of all students to free speech and remove government hostility toward religion in the schools. But the act weakens the authority of local school officials to exercise discretion in these matters and can lead to a quagmire of confusion and discord where none previously existed.

Although the equal access law does not expressly sanction organized religious activity during instructional hours, it clearly is designed to insure that religious activity has a place in the public schools. In many communities this is deeply troubling to parents, students, teachers, and others who believe religion should be observed in the home and the place of worship, not in public schools. As a result, disputes can erupt dividing students, school administrators, parents, school board members, and others in the community whose cooperation is essential.

The equal access law raises difficult questions concerning the constitutional separation between church and state. Court rulings on this question have been inconclusive thus far, and the U.S. Supreme Court is expected to provide guidance in the matter later this year. But whether or not the law is found strictly constitutional is, I believe, beside the point. This law is bad public policy. It threatens to divide our schools and communities over matters that have nothing to do with educational improvement, and it can only impede the improvement efforts of local schools leaders.

One of the reasons we lack a definitive judicial ruling on the equal access question is that it has been tested only rarely. The principal argument made in favor of this proposal last year was that voluntary student religious organizations were being widely and unfairly precluded from using school facilities. Yet the lack of a uniform national requirement has apparently not prevented local school leaders from resolving questions about the use of school facilities. Out of 24,000 secondary schools in the United States serving about 20 million students, very few—perhaps fewer than 50—equal access cases have been brought to litigation. School administrators, students, parents, and school boards have resolved these questions according to local preferences and concerns.

A nationwide survey conducted by the American Association of School Administrators last year indicates that the equal access law "fixes" an area of public policy that wasn't broken. Of 479 school districts responding to the survey, only 8 instances were cited in which student religious groups appealed to local school boards over the denial of their requests to use school facilities, and only 1 district reported that litigation resulted.

Local school administrators make decisions every day about what is taught and discussed in our schools and what types of activities contribute to the overall enrichment of students. They work closely with local school board members, faculty, and parents in developing programs to suit community needs, and in resolving problems when they arise. There is scant evidence of problems requiring this Federal law which weakens the discretion of local educators and distracts their attention from providing instructional leadership.

There is increasing evidence, however, that the equal access law will have the unintended effect of creating new problems for American schools. In school districts throughout the country, the equal access law is creating confusion and conflict over which organizations should be permitted to meet in school facilities. Should all groups calling themselves religious or political be accommodated? Should teachers be required to supervise the meetings? How should "noninstructional" be defined? Is it possible to grant access to some groups but not others? Do parents really feel it is the responsibility of the public schools to expose their children to the full range of religious, political, and philosophical thought?

These are not the questions which should demand the attention of school administrators. These are not the issues which should dominate the agenda of school board meetings. These are not the problems to which students and teachers and parents should devote their energies. The equal access law is doing nothing to improve academic achievement. It is doing nothing to improve the quality of teaching. It is doing nothing to improve community support for public education. All it can do is make a tough job tougher for American educators and divert local tax dollars away from schools into costly legal disputes. At a time when we are struggling to maintain a decent level of spending for public education, this is the last thing we need.

I hope my colleagues will join in supporting this legislation to repeal the equal access law before it further disrupts efforts to improve the learning environment in American schools. I ask unanimous consent that several recent news articles on the equal access issue and the text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 838

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title VIII of the Education for Economic Security Act, relating to equal access to public secondary schools, is repealed.

[From the New York Times, Mar. 23, 1985]

SCHOOLS STRUGGLE WITH NEW LAW GIVING ACCESS TO RELIGIOUS CLUBS

(By Ron Suskind)

A new Federal law that permits students to set up Bible-study clubs in public schools is creating disputes in many towns on Long Island and in several other communities in the New York metropolitan region.

While some school systems have approved the clubs, many others have banned them or are still debating the issue.

Those opposed argue that such clubs would interject religion into their schools. Those who support the clubs say they are merely using a public building for a voluntary gathering.

And both opponents and supporters agree that the law, the Equal Access Act, passed by Congress last July, is imprecise and confusing.

"It's a back-door attempt to get prayer into the classroom," said Ira Singer, Superintendent of the Herricks, L.I., schools. "It is turning our school board meetings into debating societies. And however a school board decides on one of these clubs, for or against, they'll face litigation."

The law permits religious, political or philosophical student groups to use public school property if the school system has allowed other noncurricular student clubs, such as chess, drama or service clubs, to meet in the school.

In Hicksville, L.I., for example, as in other parts of the nation, school officials put the law into effect smoothly and now a Bible-study club meets once every other week in a classroom after the school day.

At a recent meeting, the students said a prayer, sang hymms and, later with a local church leader, they wrote about what it means to be a Christian.

"If the power of Jesus is with us," said Laurie Velez, a 16-year-old junior who is a leader of the Bible-study club at Hicksville High School, "who could be against us?"

But school officials expressed concern that the club may not be operating within the strictures of the Equal Access Act, which specifically bans adult religious leaders from regularly participating in club activities.

In Commack, L.I., last November a high school student asked school officials to allow her to create a Bible-study club. That set off a lengthy dispute between school administrators and leaders of various Jewish organizations and a local church.

This week the school board tabled the student's request and filed a lawsuit naming all the parties to the dispute in an effort to have the state courts decide whether the Equal Access Law is constitutional.

The law's language is open to interpretation, both sides say. Barry Lynn, legislative counsel to the American Civil Liberties Union in Washington—which supported the legislation—recently said, "It is a messy combination of the good, the bad and the ugly. Just not a well-drafted document."

CONFUSION AND CONFLICT

The result so far has been uneven. "As these cases begin to unravel around the country, we are hoping to see patterns in how school officials are handling it," said Norma Rollins, assistant director of the New York Civil Liberties Union. "Mostly we are just seeing confusion and conflict."

Requests to form clubs by high school students in Lynbrook, L.I., and in the upstate New York towns of Mahopac and Kenmore have recently been denied.

Last week the school board in North Salem, in Westchester County, denied a student's request to form a Bible-study club and, to remain consistent, abolished a large service club at North Salem High School that had helped the elderly and the handicapped in the area.

It is a question, said Robert D. Stone, counsel to the State Education Department, of "Congress contradicting the courts." He cited Judge Irving R. Kaufman's 1980 decision in the United States Court of Appeals for the Second Circuit, a ruling that was affirmed in three other Federal courts.

DANGEROUS LINK CITED

Ruling against a group of students who had applied to use a classroom before school hours for Bible study, Judge Kaufman held:

"Our nation's elementary and secondary schools play a unique role in transmitting basic and fundamental values to our youth. To an impressionable student, even the mere appearance of secular involvement in the religious activities might indicate that the state has placed its imprimatur on a particular religious creed. This symbolic inference is too dangerous to permit."

The Mahopac School Superintendent, Jerry Cicchelli, described the refusal by his school system to deny the Bible-study group's request. "We felt that if we gave permission to this group," he said, "then any student-initiated club, from the Hare Krishnas to the New York Nazi Party, could make a good case for getting in. None of it belongs in the school."

The situation is so muddled that activists on both sides are hoping for guidance from the United States Supreme Court. The court is considering a case, which it is not expected to decide until next year, involving a Williamsport, Pa., high school.

The Hicksville club, founded by Miss Velez, and Lisa Stuppiello, 18, was approved last November by the Hicksville Superintendent, Dr. Catherine Fenton. According to school administrators, it was all fairly routine.

The students asked Nicholas Muratore, a social-studies teacher at the school, to be the club's "chaperone," since the law prohibits such clubs from having a "faculty adviser" but allows the school to have someone monitor meetings.

"I can't participate," Mr. Muratore said, "but it is very difficult when people are praying not to pray along and get involved. For the record, I sit and listen. But let's just say that teachers, by nature, like to talk."

In January, the club began including its meetings on the school's morning announcements and its ranks grew from 3 members to 15.

Many of those students also belonged to a youth group at the nearby Bethpage Assembly of God church. The youth director of the church, Frank Summers, said he became integrally involved in the Bible-study club.

CHURCH ROLE DISPUTED

At the most recent meeting, for instance, Mr. Summers provided a guest speaker, Angeleina Mauro of Youth for Christ, an international Christian organization. She and Mr. Summers led the students in an exercise that involved writing letters to an imaginary friend about what it means to be a Christian.

"It is a blatant incident of the entanglement of church and state," said Rabbi Arthur Seltzer, Long Island director of the Anti-Defamation League of B'nai B'rith, which is preparing legal action against the school.

"I believe, because the issue is really legal, it belongs in the courts," said Dr. Joseph Del Rosso, the Commack Superintendent. "To do otherwise would have been divisive to the community, pitting family against family and friend against friend.

"At one level, the board is concerned about the effect on other student groups," Dr. Del Rosso said. "If we decide not to accept the Bible-study club, then other noncurricular clubs will have to go as well."

But the main reason for turning to the state courts, he said, was that however the board decided the issue, the school system would face litigation.

"This is not a school board issue," he said. "It's a constitutional issue."

Miss Rossi, who withdrew her request to form a club the day the suit was filed, said that she had been ridiculed by some classmates. "It's tough," she said, "but if you believe in something, you can do it. I believe in spreading the Gospel."

[From the Washington Post, Dec. 19, 1984]

AMERICAN JOURNAL—BOULDER'S EQUAL-ACCESS SPLIT

(By T.R. Reid)

BOULDER, Co., Dec. 18.—In Washington, where it breezed through Congress last summer with minimal debate and muted opposition, Public Law 98-377 seemed so reasonable, so harmless, so easy to implement.

It was called the Equal Access Act, and backers described its requirement as simplicity itself. The law said any public high school receiving federal funds—in other words, every public high school—had to give student religious groups the same right to meet in classrooms that such secular groups as the Chess Club enjoy.

But, unlike so many laws and regulations that look pure as mother's milk to official Washington, the Equal Access Act turned sour this month when applied to real students in a real school in a real American town.

When a student leader at Boulder High School asked the principal to provide an after-school classroom for a Bible study club, the request split school and city along religious lines, prompting a torrent of anguished speeches, sermons, petitions and counter-petitions.

The Boulder Valley School Board finally swept this hornet's nest aside Monday night by passing a new rule precisely opposite what the congressional majority had in mind: the board banned all student religious and political clubs from school grounds.

This university town at the foot of the Rockies became one of the nation's first communities to face up to Public Law 98-377 and evidently is first to respond by banning all religious meetings. School board lawyer Gerald Caplan said other districts have called for advice.

He preached that Boulder's new "closed policy" will become the common way to deal with what Washington has wrought.

The federal law that split Boulder and led to Monday's action was passed last July by a Congress eager to do something about school prayer in the wake of the Senate's rejection of a constitutional amendment on school prayer.

The Equal Access Act was to provide relief to student religious groups, often fundamentalist Christians, that have been denied the right by many states to meet in school rooms before or after classes.

The law says no school that provides classroom space for other student groups can refuse to provide such a "limited open forum" because of "religious, political, philosophical or other content of the speech at such meetings."

That seemed made to order to Greg Ballou, a popular Boulder High senior and member of a Presbyterian prayer group that meets after school.

Ballou took a copy of the new federal statute to the principal's office and formally requested classroom space for his student religious group.

While the principal was pondering, Josh Friedman, another popular Boulder High student, who is Jewish, protested the idea. Friedman and others, Christian and Jewish, complained about evangelizing by born-again Christians that could stigmatize some students.

Ballou and fellow prayer-group members launched a petition drive to have the federal law enforced. Friedman and fellow opponents launched a counter-petition asking that religion be kept out of the pluralistic school community.

The board began a series of public forums on the question. Speakers were sharply divided; feelings were passionate on both sides.

"Let's call the opposition what it is," parent Stephen Getman, a prayer backer, declared angrily. "It's religious discrimination, humanist bigotry. Why is it so evil that these children want to pray?"

Joan Russell, a Jew, replied, "It's distressing enough to send my daughter to school now, with Christmas trees and all the other Christian symbols."

At last, the school board bit the bullet. Concluding that "the district does not intend * * * to create or permit an open forum for student-initiated organizations in the secondary schools," the school board and its lawyer found a way around Public Law 98-377.

The board unanimously adopted a policy that classrooms will not be available for any student group unless it is "curriculum-related, school-sponsored."

The key phrase, "curriculum-related," was left undefined. But lawyer Caplan said it probably would mean that the Spanish Club gets a classroom and the Ski Club does not. No religious or political student group will be curriculum-related, he said, so all will be banned.

In essence, Boulder turned the equal access law into an equal non-access, policy. Caplan said there was really not much choice.

"It is a very, very broad law," he told board members. "You either let everybody in, or you keep everybody out."

[From the Education Week, Nov. 21, 1984]

GROUP'S SURVEY FINDS RATIONALE FOR EQUAL ACCESS ACT "OVERSTATED"

(By Lynn Olson)

Student religious groups are frequently granted permission to meet on school grounds, and most school districts have written policies regarding the use of school facilities for such purposes, according to a survey of 479 school districts by the American Association of School Administrators.

The survey results "clearly show that the major rhetorical points" made by proponents of the Equal Access Act, passed by the Congress this summer, "were overstated," according to the A.A.S.A. Supporters of the act had argued that schools unfairly banned student religious groups from meeting on school grounds while opening their doors to other student-initiated organizations.

The Equal Access Act, P.L. 98-377, states that if a public secondary school permits student groups to meet for student-initiated activities that are not directly related to the curriculum, then it must treat all such groups equally. This means that the school cannot discriminate against any student group on the basis of religious, political, or philosophical beliefs.

The A.A.S.A. has published results of the survey—along with a set of guidelines for implementing equal access and model policy statements for local school boards that are considering whether or not to establish a limited open forum—in "Equal Access: Interpretation and Implementation Guidelines."

GUIDELINES AND MODELS

According to the A.S.S.A., the guidelines, which are in question-and-answer form, "represent the combined thinking of the major opponents and proponents of equal access." These include, the group states, the American Civil Liberties Union, the National Education Association, Americans for Democratic Action, the American Jewish Congress, the Joint Baptist Committee, the Christian Legal Society, and the National Association of Evangelicals. (See Education Week, Oct. 3, 1984.)

The guidelines, the association writes, "present ways that school districts can implement P.L. 98-377 and avoid litigation or recognize the potential sources of litigation while making a good-faith attempt to comply with the Equal Access Act."

OVERSTATED PROBLEM

The A.A.S.A., which opposed the act as an unnecessary federal intrusion into local decisionmaking, conducted its survey this summer to ascertain how frequently students requested meetings for religious purposes and how often those requests were granted or denied. The survey also asked about school policies concerning student-initiated religious meetings.

From the results of its survey, the A.A.S.A. concluded that "equal-access legislation represents a case of the federal government solving a problem that did not generally exist by removing from local school boards the choice of deciding who may use school facilities."

"We did the survey while the issue was hot so we'd understand how administrators felt about the Equal Access Act," said Bruce Hunter, legislative specialist for the A.A.S.A. The association used the survey, he said, to try to convince members of Congress not to pass the act.

"Unfortunately," he added, "about half of the data came in after the bill had already passed, so it was too late." But even the early results, he said, indicated that schools "were in fact dealing with church-state questions and questions of access to school facilities."

The association decided to publish the results this month, according to Mr. Hunter, "just in case someone felt there was some overwhelming need for the statute."

The survey found that 341 of the 479 responding school districts, or 71 percent, had written policies concerning the use of school facilities by noncurricular student groups. Of these, 257 districts reported that their policy covered religious meetings. In most instances, noncurricular student groups were required to meet either before of after school.

The majority of responding districts, 340, reported receiving no requests from students to use school facilities for religious meetings. Some 132 districts reported receiving requests from students to use school facilities for meetings with a religious purpose. Thirty-seven of these districts denied the requests.

BARRING STUDENT GROUPS

Only 161 districts responded to a question asking them to name the organizations that were denied free use of school facilities. Most commonly barred were "violent/hate or extremist groups," which were barred in 83 districts, and "subversive groups (advocating the violent overthrow of the government)," which were barred in 37 districts. Religious groups were barred by 25 districts and religious "cults" by 23 districts.

One district responding to the survey reported litigation resulting from its denial of a student religious group's request to meet on school grounds. And eight reported that student religious groups had appealed the denial of their request to the local school board.

TEACHERS' INVOLVEMENT

The association cautioned, however, that "there could be a great deal of litigation" over teachers' involvement in student meetings of a religious nature.

In particular, the A.A.S.A. noted that paying teachers to supervise student religious meetings may constitute state support of religion. This issue was not addressed conclusively by the Equal Access Act, according to the association.

About 91 percent of the responding school districts said they require that teachers supervise student meetings. In most cases, these policies would extend to supervision of student religious meetings, officials reported. Of the responding school districts, 59 percent pay school employees for supervising student meetings.

CONFLICTING MANDATES

The A.A.S.A. also noted that although the Equal Access Act is now law, 12 states are covered by federal circuit-court decisions that have found student religious meetings on school grounds to be unconstitutional.

The association cautioned that all 12 states could be out of compliance with the court rulings if they act to implement the law.

"How schools in those 12 states should proceed is an open question that will doubtlessly be the cause of further litigation," the association stated.

Copies of the publication are available for $10 from A.A.S.A.'s Office of Governmental Relations, 1801 North Moore St., Arlington, Va. 22209.

By Mr. DOLE (for himself, Mrs. KASSEBAUM, Mr. ROTH, Mr. DURENBERGER, and Mr. SYMMS):

S. 839. A bill to amend the Internal Revenue Code of 1954 to provide a method for determining the value of certain air transportation provided to employees; to the Committee on Finance.

VALUATION OF FLIGHTS ON EMPLOYER-PROVIDED AIRCRAFT

Mr. DOLE. Mr. President, today I am introducing legislation on behalf of myself and Senators KASSEBAUM, ROTH, DURENBERGER, and SYMMS to assure a reasonable valuation for Federal income tax purposes of the benefit of personal flights on an employer-provided aircraft. While few people would argue that employees who can use their company's plane for personal travel are not receiving a valuable benefit compared with other individuals, it seems clear that the values set forth in the temporary Treasury regulations published last January do not accurately reflect the real value of these flights.

This legislation would specify how these benefits should be valued. It would be my hope that Treasury will follow the guidelines contained in this legislation, as it could under present law without further congressional action. I might add that the Finance Committee today agreed that the guidelines set forth in this legislation conform to the congressional intent of how these benefits should be valued. However, if the Treasury Department does not feel that the statute is specific enough to indicate that this approach is the best interpretation of present law, it would be my intent to help provide sufficient guidance by means of this legislation.

The temporary Treasury regulations for determining the value of a personal flight on a business aircraft have two principal defects: First, the values

are too high as a general matter. Second, the regulations do not distinguish between the larger, faster and more luxurious planes and the slower and less comfortable smaller planes.

VALUE IN GENERAL

Congress decided last year that the fair market value of fringe benefits such as personal travel on a business plane should be included in the income of employees who receive the benefits.

The temporary regulations, however, define fair market value to be as much as three times first-class airline fare or even charter rate in certain circumstances. This view conflicts with long-established case law that flatly states that value must be discounted when there are restrictions on use such as not being able to cash in the trip or transfer the benefit to someone else.

DISTINCTION BETWEEN DIFFERENT AIRCRAFT

The Treasury regulations also fail to distinguish between a 4-seat, single engine plane with a maximum speed of barely 100 miles an hour and the most luxurious corporate jet.

Anyone who has ever flown in a small plane will tell you that, while it may be the best way to get from one place to another, it is not as comfortable as flying first class in a commercial airliner. But an employee could still find himself charged with income equal to three times first-class fare. That just does not make sense.

This legislation would take account of the differences among the luxurious corporate jets and largest turbo-props, the remaining turbo-props and other complex twin-engined planes, and the smaller twins and single-engined planes.

KEY EMPLOYEES

The maximum amount of income that could be imputed to an employee who controls the use of the aircraft would be equal to a comparable first-class commercial flight. The amount imputed for the middle category would be coach fare. For the smaller planes the amount imputed would be half commercial coach free.

OTHER EMPLOYEES

For employees who do not control the use of a plane, the amount imputed will be based upon the amount imputed to the parent of an airline employee. The temporary regulations now value trips by parents of commercial airline employees at half the value of an unrestricted coach seat.

It is difficult to argue that an employee who flies on a company plane on a space available basis should have imputed income greater than the parent of an airline employee who flies standby on a commercial flight. Thus, the proposal would tax employees who exercise no control over the flight of a corporate jet the same as the commercial airline employee's parent.

Flights on other turbo-props and complex twin-engined aircraft would be taxed at three quarters of that amount and flights on smaller aircraft would be imputed at half the rate imputed to airline employee parents.

CONCLUSION

The categories are based on aircraft weight because that was the simplest way to account for comfort, convenience, and speed, factors which should enter into valuation of the benefit.

The proposal has the benefit of avoiding the compliance problem of deciding whether the flight was primarily for business, only partly for business, or solely for pleasure. The only issues are what weight category the plane is in and whether or not the employee who is flying for pleasure controlled the use of the plane.

I am hopeful that, if necessary, this legislation will be favorably considered and enacted to provide certainty to this area of the tax law.

By Mr. BUMPERS:

S. 841. A bill to amend section 144 of title 23, United States Code, to give States the discretion of using a portion of their bridge replacement funds to replace certain bridges or ferryboat operations: to the Committee on Environment and Public Works.

PERMITTING USE OF BRIDGE REPLACEMENT FUNDS FOR FERRYBOAT REPLACEMENT

Mr. BUMPERS. Mr. President, today I am introducing a bill that would not cost an extra dime in Federal dollars, but would give States the option of using a portion of their Federal bridge replacement funds to replace ferryboat operations. My bill would also permit the use of section 144 funds to replace bridges that were destroyed prior to 1960, and therefore do not meet the technical requirements to qualify for funding under present law. Finally, this legislation will allow States to use part of their Federal bridge replacement allotment to build highway bridges to replace low-water crossing which are periodically inundated with flood waters.

Let me say, first, that I was pleased that the Senate Environment and Public Works Committee adopted and incorporated in S. 391 language which I proposed permitting the use of section 144 money for ferryboat replacement. Unhappily, the House of Representatives' version of the interstate cost estimate legislation did not contain the ferryboat replacement language, and the House refused to go to conference with the Senate. Therefore, in order to release the highway trust fund money to the States, the Senate acquiesced to the House position and passed the House bill on March 5. As a result, the Senate's amendment to section 144 was dropped.

Mr. President, this situation leaves my State and others in the same position they were in before. The States need to replace ferries because, in most cases, they are structurally deficient, they are functionally obsolescent, and only expensive continual maintenance keeps them from physically deteriorating. The section 144 program was created to replace or rehabilitate highway bridges that meet one of those three criteria, and the Senate recognized in passing S. 391 that ferryboats, as well as bridges, should qualify for replacement under the terms of section 144. Therefore, Mr. President, I am introducing legislation today that includes the changes in the section 144 program that were included in the highway legislation passed by the Senate earlier this month.

Passage of this amendment will allow Arkansas to replace its four remaining ferries with bridges. The cost of operating and maintaining the four ferries is approximately $3 million per year. I have a table which uses statistics on the four Arkansas ferries to illustrate the unreliability of ferries and the resulting inefficient travel that is required when they are not in operation. I ask unanimous consent that the table be printed at this point in the RECORD.

There being no objection, the table was printed in the Record, as follows:

Name of ferry	Vehicle capacity [1]	Size of barge	Load limit (ton)	Hours of operations	Round trip (minutes)	Accidents (1978–82)	Days closed (1978–82)	Indirection (miles)
Guion	6	60′×18′	15	6:30 am to 6:30 pm	15	0	473	36
Moro Bay	6	60′×20′	32	5:00 am to 10:00 pm	15	12	210	15–24
Peel	6	(2)60′×20′	25	Daylight hours, Hon-Oper./high winds	45	3	39	15–56
Spring Bank	6	60′×20′	36	5:30 am to 9:30 pm	15	4	151	53–69

[1] Autos only; trucks carrying flammable cargo, or other hazardous materials must be ferried individually while other vehicles wait.

Mr. BUMPERS. Mr. President, this bill also makes two other minor changes in the section 144 program. It allows States to use a portion of their section 144 allotment to construct bridges to replace structures that were destroyed prior to 1960, and have not been replaced. This is obviously a very small category of bridges, but an important one for the State of Arkansas. In the 1950's, a bridge on what is now County Road No. 19 in Northeast Arkansas, was destroyed by fire. The former bridge spanned the spring river, and served as an important link connecting U.S. Highways 62 and 63 between Lawrence and Randolph Counties. When the bridge was destroyed, the Federal bridge replacement program had not yet been enacted, and the State of Arkansas and the counties in which the Spring River Bridge was located, simply did not have the resources to replace the bridge.

The Federal Highway Administration has denied Arkansas' request that the Spring River Bridge be added to the special bridge replacement list. As a result, the only funds available for reconstruction are from the Federal-aid secondary program. The cost of the bridge is estimated to be $1.5 million. The approach roadway in Randolph County is estimated to cost $580,000. Without, assistance from the section 144 program, Lawrence and Randolph Counties would have to pay the entire cost of the bridge out of their Federal-secondary fund allotments, and that would create an unexceptable hardship for the counties. Lawrence and Randolph Counties only receive approximately $69,000 each from the Federal-aid secondary fund, annually. The two counties would have to spend all of these funds for 15 years, and during that time, no funds would be available for other roadway repair work. The use of section 144 funds is absolutely necessary if the Spring River Bridge is ever going to be replaced.

The State of Arkansas operates and manages several State parks in the immediate area of the proposed bridge, including Old Davidsonville, Powhatan Courthouse, Lake Charles, Mammoth Spring, and the Ozark Folk Center. Tourism is a major industry in Arkansas, and in the Spring River area, tourists would ideally travel between the several attractions. However the many water obstacles in the area create a situation that can best be described as "you can't get there from here." The proposed bridge would alleviate a great deal of unnecessary driving and, in the process, greatly help commerce and tourism.

The site of the Spring River Bridge is also the only interruption of a proposed continuous scenic highway project between St. Louis, MO, and Tulsa, OK. Replacement of the bridge could bring more out-of-State travelers through the area. This would increase revenue from tourism and related businesses in Missouri, Arkansas, and Oklahoma.

Construction of a bridge over the Spring River and the improvement of the connecting facilities would have an important local impact by providing a highway route between the cities of Black Rock and Pocahontas. Traffic is expected to exceed 300 vehicles per day when the bridge is completed. Because Arkansas is primarily a rural State, the ability of our people to commute to jobs 20 or 30 miles away has become the key to economic development in towns such as Pocahontas. The Spring River Bridge would cut over 10 miles off the commuting route of workers and would increase the geographic area from which businesses in Pocahontas and Black Rock could expect to recruit workers. The savings in gasoline would have the added benefit of increasing the spendable income of these workers, whose wages are generally very low.

Finally, this bill would allow States to use section 144 funds to replace low-water crossing with bridges. A low-water crossing is usually a concrete slab with a drainage pipe, located in a creek bed and designed to withstand periodic flooding. They are often built in rural areas, and are usually designed to serve relatively few vehicles. However, when development occurs, the flooded low-water crossings seriously impede traffic because motorists are often prevented from using routes for days at a time until the flood waters recede. Many low-water crossings exist in Arkansas, and the State would like to replace some of them with permanent bridges.

Under present interpretation of section 144 of title 23, the Federal Highway Administration will review on a case-by-case basis the elgibility of low-water crossing over 20 feet long for bridge replacement funding. However, the FHWA will not even consider low-water crossings under 20 feet long for replacement under the section 144 program. This bill would make all low-water crossings eligible for the Federal Bridge Replacement Program, regardless of length. Most low-water crossings meet at least one of section 144's criteria for funding, and it's time that the Federal Highway Administration began allowing more of these crossings to be replaced with bridges.

Let me emphasize that none of these amendments to section 144 would create a new category of Federal funding, nor would they have a budget impact. They would simply give States greater latitude to decide how their Federal bridge replacement apportionment would be spent. States know best what their highway needs are, and these amendments to section 144 will give them the opportunity to meet them with greater flexibility, while, at the same time, following Congress intent when it enacted the Bridge Replacement Program.

ADDITIONAL COSPONSORS

S. 210

At the requested of Mr. D'AMATO, the name of the Senator from Georgia [Mr. MATTINGLY] was added as a cosponsor of S. 210, a bill to repeal the inclusion of tax-exempt interest from the calculation determining the taxation of Social Security benefits.

S. 245

At the request of Mr. ABDNOR, the names of the Senator from Nebraska [Mr. ZORINSKY], the Senator from Texas [Mr. GRAMM], the Senator from Oklahoma [Mr. BOREN], and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of S. 245, a bill to amend the Internal Revenue Code of 1954 to repeal the requirement that contemporaneous records be kept to substantiate certain deductions and credits.

S. 260

At the request of Mr. HEINZ, the names of the Senator from Virginia [Mr. WARNER] and the Senator from Colorado [Mr. ARMSTRONG] were added as cosponsors of S. 260, a bill to amend the Internal Revenue Code of 1954 to provide that the substantiation requirements of section 274(d) of such code may be met, in the case of passenger automobiles and other transportation property, if the taxpayer provides substantial evidence other than contemporaneous records.

S. 281

At the requested of Mr. PRYOR, the names of the Senator from Nevada [Mr. HECHT], the Senator from Rhode Island [Mr. PELL], and the Senator from Colorado [Mr. ARMSTRONG] were added as cosponsors of S. 281, a bill to amend the Internal Revenue Code of 1954 to add a section dealing with public safety vehicles.

S. 300

At the request of Mr. GRASSLEY, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 300, a bill to amend section 1951 of title 18 of the United States Code, and for other purposes.

S. 408

At the request of Mr. WEICKER, the names of the Senator from Tennessee [Mr. GORE], and the Senator from Maine [Mr. COHEN] were added as cosponsors of S. 408, a bill to amend the Small Business Act to provide program levels, salary and expense levels, and authorizations for the Small Business Administration's programs for fiscal years 1986, 1987, and 1988, and for other purposes.

S. 554

At the request of Mr. ROTH, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 554, a bill to amend title 18, United States Code, to include the transportation of males under the Mann Act, to eliminate the lewd and commercial requirements in the prosecution of child pornography cases, and for other purposes.

S. 633

At the request of Mr. D'AMATO, the names of the Senator from New Jersey [Mr. BRADLEY] and the Senator from Colorado [Mr. HART] were added as cosponsors of S. 633, a bill to continue the authorization for Federal Crime Insurance under the National Housing Act.

S. 664

At the request of Mr. NICKLES, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of S. 664, a bill to facilitate the competitiveness of exports of United States agricultural commodities.

S. 680

At the request of Mr. THURMOND, the name of the Senator from Kentucky [Mr. FORD] was added as a cosponsor of S. 680, a bill to achieve the objectives of the multifiber arrangement and to promote the economic recovery of the U.S. textile and apparel industry and its workers.

S. 725

At the request of Mr. CHAFEE, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 725, a bill to authorize appropriations to carry out the Endangered Species Act of 1973 during fiscal year 1986, 1987, 1988, 1989, and 1990.

S. 736

At the request of Mr. BUMPERS, the names of the Senator from Arizona [Mr. DECONCINI] and the Senator from Montana [Mr. MELCHER] were added as cosponsors of S. 736, a bill to amend the Bank Holding Company Act of 1956 to provide for the safe and sound operation of depository institutions.

S. 744

At the request of Mr. COCHRAN, the names of the Senator from Oklahoma [Mr. NICKLES] and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of S. 744, a bill to amend the Agriculture and Food Act of 1981 to provide protection for agricultural purchasers of farm products.

S. 746

At the request of Mr. CHILES, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 746, a bill to require the National Drug Enforcement Policy Board to provide a comprehensive assessment of the designer drug problem and make recommendations to Congress for necessary legislation.

S. 776

At the request of Mr. DIXON, the names of the Senator from Missouri [Mr. EAGLETON] and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 776, a bill to advance a portion of Commodity Credit Corporation loans to eligible producers, to support the 1985 planting season operation, and for other purposes.

SENATE JOINT RESOLUTION 28

At the request of Mr. HOLLINGS, the name of the Senator from Colorado [Mr. ARMSTRONG] was added as a cosponsor of Senate Joint Resolution 28, a joint resolution to designate the week of September 8-14, 1985, as "National Independent Retail Grocer Week."

SENATE JOINT RESOLUTION 34

At the request of Mr. QUAYLE, the names of the Senator from Pennsylvania [Mr. HEINZ] and the Senator from Utah [Mr. HATCH] were added as cosponsors of Senate Joint Resolution 34, a joint resolution to designate the week of October 6, 1985, through October 12, 1985, as "National Children's Week."

SENATE JOINT RESOLUTION 63

At the request of Mr. RIEGLE, the names of the Senator from Minnesota [Mr. DURENBERGER], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Arkansas [Mr. BUMPERS], the Senator from Massachusetts [Mr. KERRY], and the Senator from Hawaii [Mr. MATSUNAGA] were added as cosponsors of Senate Joint Resolution 63, a joint resolution to designate the week of April 21, 1985, through April 27, 1985, as "National DES Awareness Week."

SENATE JOINT RESOLUTION 64

At the request of Mr. RIEGLE, the names of the Senator from Connecticut [Mr. DODD], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Maine [Mr. MITCHELL], and the Senator from Alabama [Mr. DENTON] were added as cosponsors of Senate Joint Resolution 64, a joint resolution to designate the week beginning May 5, 1985, as "National Correctional Officers Week."

SENATE JOINT RESOLUTION 67

At the request of Mr. QUAYLE, the names of the Senator from Massachusetts [Mr. KENNEDY], the Senator from Kentucky [Mr. FORD], the Senator from Maine [Mr. MITCHELL], the Senator from Tennessee [Mr. SASSER], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from Texas [Mr. BENTSEN], the Senator from Tennessee [Mr. GORE], the Senator from Hawaii [Mr. INOUYE], the Senator from Arizona [Mr. GOLDWATER], the Senator from North Dakota [Mr. ANDREWS], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of Senate Joint Resolution 67, a joint resolution to designate the week of October 6, 1985, through October 12, 1985, as "Mental Illness Awareness Week."

SENATE JOINT RESOLUTION 83

At the request of Mr. DOLE, the names of the Senator from North Dakota [Mr. ANDREWS], and the Senator from Ohio [Mr. METZENBAUM] were added as cosponsors of Senate Joint Resolution 83, a joint resolution designating the week beginning on May 5, 1985, as "National Asthma and Allergy Awareness Week."

SENATE JOINT RESOLUTION 87

At the request of Mr. MURKOWSKI, the names of the Senator from Maryland [Mr. SARBANES], the Senator from New Mexico [Mr. DOMENICI], the Senator from Oklahoma [Mr. NICKLES], the Senator from South Carolina [Mr. HOLLINGS], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Nebraska [Mr. EXON], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Rhode Island [Mr. PELL], the Senator from California [Mr. WILSON], the Senator from Kansas [Mr. DOLE], the Senator from New York [Mr. MOYNIHAN], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Oklahoma [Mr. BOREN], the Senator from Indiana [Mr. LUGAR], the Senator from South Dakota [Mr. PRESSLER], the Senator from Utah [Mr. HATCH], the Senator from Virginia [Mr. WARNER], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Florida [Mrs. HAWKINS], the Senator from Mississippi [Mr. COCHRAN], the Senator from North Dakota [Mr. ANDREWS], the Senator from Ohio [Mr. METZENBAUM], and the Senator from Georgia [Mr. NUNN] were added as cosponsors of Senate Joint Resolution 87, a joint resolution to provide for the designation of July 19, 1985, as "National P.O.W./M.I.A. Recognition Day."

SENATE JOINT RESOLUTION 90

At the request of Mr. NUNN, the names of the Senator from New Mexico [Mr. DOMENICI] and the Senator from Oregon [Mr. HATFIELD] were added as cosponsors of Senate Joint Resolution 90, a joint resolution commemorating the 75th Anniversary of the Boy Scouts of America.

SENATE JOINT RESOLUTION 98

At the request of Mr. D'AMATO, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of Senate Joint Resolution 98, a joint resolution condemning the passage of Resolution 3379, in the United Nations General Assembly on November 10, 1975, and urging the U.S. Ambassador and U.S. Delegation to take all appropriate actions necessary to erase this shameful resolution from the record of the United Nations.

SENATE CONCURRENT RESOLUTION 23

At the request of Mr. BAUCUS, the names of the Senator from Oregon [Mr. HATFIELD], the Senator from Mississippi [Mr. COCHRAN], the Senator from Georgia [Mr. MATTINGLY], the Senator from Washington [Mr. GORTON], and the Senator from Idaho [Mr. MCCLURE] were added as cosponsors of Senate Concurrent Resolution 23, a concurrent resolution to express the sense of the Congress concerning the reduction of trade barriers by Japan.

SENATE CONCURRENT RESOLUTION 37—PROVIDING FOR ACCEPTANCE OF A STATUE OF JEANNETTE RANKIN FROM THE STATE OF MONTANA FOR PLACEMENT IN STATUARY HALL

Mr. MELCHER (for himself and Mr. BAUCUS) submitted the following concurrent resolution; which was referred to the Committee on Rules and Administration:

S. CON. RES. 37

Resolved by the Senate (the House of Representatives concurring), That the statue of Jeannette Rankin, presented by the State of Montana for the National Statuary Hall collection in accordance with the provisions of section 1814 of the Revised Statutes (40 U.S.C. 187), is accepted in the name of the United States, and the thanks of the Congress are tendered to the State of Montana for the contribution of the statue of one of its most eminent personages, the first woman elected to the U.S. Congress, known for her courage and convictions regarding equality and peace.

SEC. 2. The State of Montana is authorized to place temporarily in the rotunda of the Capitol the statue of Jeannette Rankin referred to in the first section of this concurrent resolution, and to hold ceremonies on May 1, 1985, in the rotunda on that occasion. The Aechitect of the Capitol is authorized to make the necessary arrangements therefor.

SEC. 3. (a) The proceedings in the rotunda of the Capitol at the presentation by the State of Montana of the statue of Jeannette Rankin for the National Statuary Hall collection, together with appropriate illustrations and other pertinent matter, shall be printed as a Senate document. The copy for such document shall be prepared under the direction of the Joint Committee on the Library.

(b) There shall be printed five thousand additional copies of such document which shall be bound in such style as the Joint Committee on the Library shall direct, of which one hundred and three copies shall be for the use of the Senate and eighteen hundred and ninety-seven copies shall be for the use of the Members of the Senate from the State of Montana, and four hunderd and sixty-three copies shall be for the use of the House of Representatives, and two thousand five hundred and thirty-seven copies shall be for the use of the Members of the House of Representatives from the State of Montana.

SEC. 4. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the Governor of Montana.

Mr. MELCHER. Mr. President, since 1864, the States have been invited to contribute for national commemoration "statutes * * *, not exceeding two in number for each State, of deceased persons who have been citizens thereof, and illustrations for their historic renown or for distinguished civic or military services."

On May 1, the State of Montana will place and dedicate the Treasure State's second statue in Statuary Hall in our Nation's Capitol.

The statue will be that of a woman.

A woman who was born on a western Montana ranch when the land was still a territory, born of uncommon settlers—a hot-headed, "silver" Republican and a shy, New Hampshire schoolteacher—whose five daughters all became university graduates and whose son became the State's attorney general and an associate justice of its supreme court.

A woman who at an early age developed a penetrating sense of compassion and justice, who at 9 directed ranch hands to throw a horse and hold it so she could sew up the flesh hanging from a cut on its shoulder.

A woman who taught university-level economics for a while, then studied further in social work and, while working to find homes for homeless children, determined that many poor conditions were the result of bad laws.

A woman who in 1909, at the age of 29, quit her work and volunteered her services to the women's suffrage movement, which took her from the windswept prairies of North Dakota to the swamplands of Florida, to the prim cottages of Delaware, to the Pacific Northwest forests of Washington, to the sidewalks of New York.

A woman who replied to charges that a woman's place is in the home by explaining, "It is beautiful and right that a mother should nurse her child through typhoid fever, but it is also beautiful and right that she should have a voice in regulating the milk supply from which the typhoid resulted."

A woman who then came home to Montana and led the movement that got its women the vote in 1914, 6 years before the ratification of the 19th amendment gave the vote to all women of this country.

A woman who agreed to run for Congress 2 years later, explaining that she "never ran for Congress" but "for women's suffrage and against war."

A woman who had to run at-large in her first congressional campaign, which meant canvassing throughout more than 145,000 square miles, by rail where the trains ran, and where they didn't on rutted, unpaved roads.

A woman who became the first of her gender elected to the U.S. Congress, at a time when only 12 of the 48 States allowed women to vote.

A woman who, as a Member of Congress, voted her conviction and said "no" to war, first in 1917 and again in 1941. In 1917 she was one of 56. In 1941 she stood alone.

A woman who used her first term in Congress to work for passage of a constitutional amendment for women's suffrage, pushed for effective use of woman power during wartime, exposed poor and unfair working conditions at the Bureau of Printing and Engraving and supported the founding of a union there, and revealed the use of the "rustling card," a black list method, as the cause of labor problems in Montana's copper mines, to name a few.

A woman who left her first term to continue working for social causes, first for a 9-year period with the National Consumers League, and then concentrating on peace advocacy for 10 years with the National Council for the Prevention of War from 1929 to 1939.

A woman whose name through the three decades became synonymous with efforts to end war and who in 1968 at the age of 86 led 5,000 women in a march against the Vietnam War.

A woman who through her eighties was building a cooperative homestead on her farm, where unemployed, homeless homemakers could live on a cooperative, financially secure basis.

This woman is Jeannette Rankin.

Jeannette Rankin—independent, strong, determined, dedicated, assertive, frank.

Jeannette Rankin—a daughter of Montana, a daughter of the West, a daughter of the ideals of democracy.

Jeannette Rankin—who gave a new definition to courage.

Thank you, Jeannette.

● Mr. BAUCUS. Mr. President, I join my colleague from Montana in submitting a concurrent resolution today urging the Senate to accept the statue of Jeannette Rankin from the State of Montana for placement in the National Statuary Hall in the Capitol.

Miss Rankin is one of the most outstanding representatives the State of Montana has sent to the U.S. Congress.

For this reason, the people of Montana have chosen Miss Rankin to join Western artist Charles M. Russell to represent our State in Statuary Hall.

Miss Rankin was the only woman to represent Montana in the Nation's Capitol and was the first female Member of that traditionally all-male club, the House of Representatives.

A committed and lifelong pacifist, Miss Rankin was elected to Congress from Montana in 1916. She served two terms, in 1917 and 1940, arriving in both eras in time to cast votes against both World Wars.

Nearly 30 years later, in 1968, she marched at the head of the Jeannette Rankin Brigade, leading 3,000 women

to the Capitol to protest the war in Vietnam.

Miss Rankin was born on June 11, 1880 on Grant Creek Ranch, 6 miles from Missoula.

She attended public schools in Missoula, graduating from the University of Montana in 1902 with a B.S. in biology.

In 1908, Miss Rankin left Missoula to study at the New York School of Philanthropy. She subsequently practiced for a brief time as a social worker in Montana and Washington.

Dissatisifed with her newly chosen profession, Miss Rankin entered the University of Washington in 1909. While a student there, she joined the successful Washington State campaign for women's suffrage in 1910.

Miss Rankin first received recognition as a political activist in Montana in 1911. That year, she addressed the Montana Legislature and urged the State to grant women the right to vote.

This speech served as the springboard for a life of political activity that spanned more than 60 years.

Miss Rankin's public service outside of her terms in Congress included:

Delegate to the Second International Congress of Women in 1919;

Field secretary of the National Consumers' League;

Field secretary and board member of the Women's International League for Peace and Freedom;

Founder of the Georgia Peace Society in 1928;

Washington lobbyist and field organizer for the National Council for the Prevention of War.

Miss Rankin's unpopular antiwar votes and introduction of legislation supporting women's rights distinguish her two terms as a Republican Member of Congress.

In 1917, having been advised by Republican leader "Uncle Joe" Cannon to "vote as your conscience dictates," Miss Rankin declared, "I want to stand by my country, but I cannot vote for war. I vote no."

In 1941, responding to the rollcall which followed a 40-minute debate on the declaration of war against Japan, Miss Rankin said, "As a woman, I can't go to war and I refuse to send anyone else."

In her legislative work, Miss Rankin helped pave the way for more equal rights for women.

During her first term in Congress, she introduced bills to give women the vote and also to give them U.S. citizenship rights independent of their husbands.

She authored the first bill for Government-sponsored instruction in maternity and infant hygiene. This bill was reintroduced in a later Congress and enacted.

She also offered measures to provide "equal pay for equal work" for U.S. employees, regardless of sex.

Whether or not she was in office, Miss Rankin worked continually until her death in 1973 for the causes of peace and women's rights.

She displayed intense interest in Gandhi's work in India and visited that country seven times between 1946 and 1971.

"I traveled around the world," she declared in 1972, "and stayed long enough to know how the Americans were dominating underdeveloped countries."

Perhaps the best way to know Miss Rankin is to listen to what she had to say on some of the issues important to her:

On war:

1. War is a vicious, stupid way of settling a dispute. It has nothing to do with what the dispute is.

2. The people really aren't for war. They just go along. But war is evil and there is always an alternative.

3. The first thing in changing a habit is making up your mind. War is a habit and when an emergency comes, they fall back on it.

On achieving peace:

1. We must have absolutely unilateral disarmament. If we disarmed, we would be the safest country in the world. After all, you have to have a worthy adversary to fight. Would Cassius Clay fight a Boy Scout?

On women in politics:

1. The men have taught them (women) not to trust their emotions, but women have an emotional ideal to contribute.

2. Half the people are women and half the people aren't expressing themselves, because they've been told for so long to keep quiet and to be good.

3. Women must devote all their energies today to gaining enough elected political offices to influence the direction of government away from the military-industrial complex and toward solving the major social disgraces that exist in our country.

4. They (women) don't know who they are voting for or why. For 50 years, they've been reading books, but they haven't learned how to vote. It is time they woke up.

On women and peace:

1. We could have peace in one year if women were organized.

2. (Women have) been worms. They let their sons go off to war because they're afraid their husbands will lose their jobs in industry if they protest.

On the suffrage movement:

1. The men ridiculed us. The men thought that suffrage was the funniest thing in the world and they made jokes and said everything in the world about us. We just paid no attention or we made fun right back. They'd whisper, If you vote, all the bad women will be able to vote, too, and we said, All the bad men vote, don't they?

On the women's movement:

1. Women lib is very encouraging. The way we know it's growing is that the men make fun of it. They make fun of it because they want it to stop.

On the Vietnam War:

1. I think we ought to get out as soon and as gracefully as we can. We should announce we're going to get out and then make plans for doing it.

On Presidential elections:

1. Miss Rankin advocated a direct election for President. Let everyone run who wants to run and let everyone vote. This way the people could make a second and third choice.

On Congressional elections:

1. Miss Rankin wanted to see fewer Congressional districts with more representatives from each.

If you have 10 districts in a state, you could divide the state into two districts with five representatives each. Instead of a person needing 51 percent of the vote, he might win with 18 percent. This way, minorities and women could get the representation they can't get now.

Whether or not one agrees with all of Miss Rankin's views, we must applaud her courage, integrity and dedication to the things in which she believed.

She was a public servant who worked conscientiously and independently.

Montanans are deeply proud of Miss Rankin's contributions to women's suffrage and her commitment to world-side peace.

Therefore, we have chosen Miss Rankin as the second Montanan to represent our State in Statuary Hall.

I urge the Senate to accept this concurrent resolution that will permit Miss Rankin's statue to be placed in Statuary Hall.●

SENATE RESOLUTION 116—AN ORIGINAL RESOLUTION REPORTED AUTHORIZING EXPENDITURES BY THE COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. HATCH, from the Committee on Labor and Human Resources, reported the following original resolution; which was referred to the Committee on Rules and Administration.

S. RES. 116

Resolved, That, in carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Labor and Human Resources is authorized from March 1, 1985, through February 28, 1986, in its decretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $4,996,000, of which amount (1) not to exceed $56,600 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1986.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate, agency contribution related to the compensation of staff members, and long distance telephone calls.

AMENDMENTS SUBMITTED

CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS

PACKWOOD AMENDMENT NO. 23

(Ordered to lie on the table.)

Mr. PACKWOOD submitted an amendment intended to be proposed by him to the bill (H.R. 1869) relating to the repeal of contemporaneous recordkeeping and related requirements; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. REPEAL OF CONTEMPONANEOUS RECORDKEEPING AND RELATED REQUIREMENTS.

(a) CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS.—Section 274(d) of the Internal Revenue Code of 1954 (relating to substantiation requirements for certain deductions and credits) is amended by striking out "adequate contemporaneous records" and inserting in lieu thereof "adequate records or by sufficient evidence corroborating the taxpayer's own statement", and the Internal Revenue Code of 1954 shall be applied and administered as if the phrase which was stricken had not been added to such subsection (d).

(d) PROVISIONS RELATING TO RETURN PREPARERS AND NEGLIGENCE PENALTY.—Paragraphs (2) and (3) of section 179(b) of the Tax Reform Act of 1984 are hereby repealed, and the Internal Revenue Code of 1954 shall be applied and administered as if such paragraphs (and the amendments made by such paragraphs) had not been enacted.

(c) REPEAL OF REGULATIONS.—Regulations issued before the date of the enactment of this Act to carry out the amendments made by paragraphs (1)(C), (2), and (3) of section 179(b) of the Tax Reform Act of 1984 shall have no force and effect.

SEC. 2. EFFECTIVE DATE.

The amendment and repeals made by subsections (a) and (b) of section 1 shall take effect as if included in the amendments made by section 179(b) of the Tax Reform Act of 1984.

Amend the title to read as follows: "A bill to amend the Internal Revenue Code of 1954 to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.".

CONCURRENT RESOLUTION ON THE BUDGET

CRANSTON (AND OTHERS) AMENDMENT NO. 24

(Ordered to lie on the table.)

Mr. CRANSTON (for himself, Mr. MATSUNAGA, Mr. DECONCINI, Mr. MITCHELL, and Mr. ROCKEFELLER) submitted an amendment intended to be proposed by them to the concurrent resolution (S. Con. Res. 32) setting forth the congressional budget for the U.S. Government for the fiscal years 1986, 1987, and 1988 and revising the congressional budget for the U.S. Government for the fiscal year 1985, and for other purposes; as follows:

On page 27, lines 4 and 5, strike out "$26,800,000,000" and "$26,000,000,000" and insert in lieu thereof "$27,600,000,000" and "$27,100,000,000", respectively.

On page 27, lines 13 and 14, strike out "$27,000,000,000" and "$26,300,000,000" and insert in lieu thereof "$28,100,000,000" and "$27,700,000,000", respectively.

On page 27, lines 22 and 23, strike out "$27,400,000,000" and "$26,800,000,000" and insert in lieu thereof "$28,700,000,000" and "$28,300,000,000", respectively.

On page 3, strike out all on lines 7 through 11 and insert in lieu thereof "combination thereof, as follows: $328,000,000 in budget authority and $160,000,000 in outlays in fiscal year 1986, $239,000,000 in budget authority and $239,000,000 in outlays in fiscal year 1987, and $220,000,000 in budget authority and $294,000,000 in outlays in fiscal year 1988.".

On page 50, strike out all on lines 18 through 22 and insert in lieu thereof "combination thereof, as follows: $328,000,000 in budget authority and $160,000,000 in outlays in fiscal year 1986, $239,000,000 in budget authority and $239,000,000 in outlays in fiscal year 1987, and $220,000,000 in budget authority and $294,000,000 in outlays in fiscal year 1988.".

Mr. CRANSTON. Mr. President, as the ranking minority member of the Veterans' Affairs Committee, I have today submitted an amendment to the first concurrent resolution on the budget for fiscal year 1986, Senate Concurrent Resolution 32, as reported from the Budget Committee. The purpose of the amendment is to provide for fair, prudent treatment of veterans' programs. I am pleased to be joined in submitting this amendment by the other Democratic members of the Veterans' Affairs Committee, the Senators from Arizona (Mr. DECONCINI), from Hawaii (Mr. MATSUNAGA), from Maine (Mr. MITCHELL), and from West Virginia (Mr. ROCKEFELLER).

Mr. President, I ask unanimous consent that a memorandum providing a detailed description of it be printed in the RECORD at the conclusion of my remarks.

Mr. President, the fiscal year 1986 budget resolution as reported by the Budget Committee is unfair to our Nation's veterans. When the resolution as reported is before the Senate, we intend to propose this amendment in order to correct the inequity while still providing for a freeze on VA programs at President Reagan's fiscal year 1985 level, plus funding for a cost-of-living adjustment for veterans with service-connected disabilities.

With the compelling need to deal with projected Federal deficits in mind, we will propose budget levels at the minimum necessary to carry out our Nation's commitment to those who served, and to remedy major deficiencies in the reported resolution.

Overall, our amendment would establish the levels for Function 700, "Veterans' benefits and services," at $27.6 billion in budget authority and $27.1 billion in outlays. For the outyears, we propose Function 700 totals of $28.1 billion in BA and $27.7 billion in outlays in fiscal year 1987 and $28.7 billion in BA and $28.3 billion in outlays in fiscal year 1988.

These totals represent a "Freeze-Plus-COLA" budget for the VA. They include the fiscal year 1985 Function 700 totals in the President's budget—$27.259 billion in BA and $26.774 billion in outlays—with the only addition being the cost of a 3.7-percent COLA in service-connected disability compensation benefits in fiscal year 1986, which is $311 million in BA and $280 million in outlays.

Mr. President, our amendment is based on the following changes in the assumptions underlying the Budget Committee reported figures:

First, we provide for a COLA in compensation benefits paid to service-connected-disabled veterans and the survivors of veterans who die from service-connected causes. The Budget Committee inexplicably recommended against such increases while granting COLA's in supplemental security income, food stamp benefits, and pensions to veterans with non-service-connected disabilities. If all COLA's were to be given up in fiscal year 1986, that would be one thing. But to grant them in three other deserving categories and to deny them to veterans suffering from service-connected disabilities is incomprehensible.

Second, our amendment rejects the discriminatory tax that the Budget Committee has recommended be imposed on certain veterans. Last year, to help the VA's Loan Guaranty Revolving Fund remain solvent, Congress doubled the fee charged veterans who use their home-loan guaranty entitlement. Now, although the Congressional Budget Office estimates that the fund will remain solvent at least through fiscal year 1990 without any new appropriations or fee increase, the Budget Committee proposes nearly to quadruple the fee, to 3.8 percent. CBO says such an increase will result in 40,000 fewer veterans using their VA home loan guaranties each year, increase the number of defaults and

foreclosures, and increase the cost of those foreclosure to the VA.

The burden of this new tax—$353 million in fiscal year 1986 and approximately $1 billion through fiscal year 1988—would fall most heavily on Vietnam-era veterans seeking to acquire their first homes. In the face of the CBO analysis, how does the Budget Committee justify imposing this new tax given its steadfast adherence to a no new tax approach?

Third, our amendment restores $391 million in BA and $351 million in outlays in fiscal year 1986 to maintain VA medical services at the program level for which Congress specifically appropriated funds for fiscal year 1985. The deep cuts in VA medical care which the Budget Committee proposes would deny care to many tens of thousands of eligible veterans—nearly 70,000 impatient episodes of care and over 300,000 outpatient visits would be eliminated—and would require the VA to lay off more than 8,000 health-care employees. In order to make these reductions, the VA would have to shut down many existing wards and other units. Some facilities might have to be closed entirely.

Fourth, our amendment rejects—as Congress has consistently done for over a decade—a proposal that health insurance carriers be required to delete contract clauses precluding payment for VA-provided care and that the VA pursue insurance claims for nonservice-connected care. The estimated savings—$162 million in both BA and outlays in fiscal year 1986 and a total of $864 million more in fiscal year 1987 and 1988—from this initiative are illusory. Insurance companies adamantly oppose a mandate to pay for VA care, which is not subject to the same utilization controls or billing procedures applied to private sector facilities. During hearings before our committee in 1979, insurance companies suggested that they would have to be ordered to do so by judicial authority. This would likely involve lengthy legal proceedings until all appellate remedies are exhausted. The insurance companies may well ultimately prevail in the courts.

In the meantime, this proposal would produce paper savings only and make no real reduction in the deficit.

Fifth, our amendment provides for enactment of cost-savings legislation to achieve real savings of $50 million in BA and $90 million in outlays in each of fiscal years 1986, 1987, and 1988—a 3-year total of $150 million in BA and $270 million in outlays.

Finally, Mr. President, in keeping with the foregoing changes in the function 700 totals and underlying assumptions, our amendment would alter the Veterans' Affairs Committees' reconciliation instructions so as to require cost-savings legislation producing $328 million in BA and $160 million in outlays in fiscal year 1986—and 3 year savings totals of $787 million in BA and $693 million in outlays.

We are not proposing to treat veterans programs as sacred cows. Such an approach has never characterized our activities on the Veterans' Affairs Committee. With the active participation of its Democratic members, the committee over the past 4 years has produced new cost-saving laws that will reduce the deficit $1.6 billion by the end of the current fiscal year and will save over $500 million more in fiscal year 1986.

Mr. President, I strongly urge the support of all Senators for this amendment.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

DESCRIPTION OF VETERANS' PROGRAMS AMENDMENT TO S. CON. RES. 32, THE FIRST CONCURRENT RESOLUTION ON THE BUDGET, FY 1986

I. OUTLINE

A. Function 700 (Veterans' Benefits and Services) Totals.

The amendment would provide for Function 700 totals in FY 86 at a "Freeze plus COLA" level ($27.6 billion in BA and $27.1 billion in outlays)—the President's Function 700 totals for FY 85 ($27.259 billion in BA and $26.774 billion in outlays) plus the cost of a 3.7-percent VA compensation COLA ($311 million in BA and $280 million in outlays). The proposed FY 86 Function 700 totals would be based on the following changes in assumptions underlying the Budget Committee-reported resolution:

	Increase over SBC levels
[In millions of dollars]	
(1) Allow for a 3.7 percent COLA in VA compensation:	
BA	311
Outlays	280
(2) Maintain VA health care at the fiscal year 1985 program level (with FTEE's maintained at fiscal year 1985 level specified in the appropriations process):	
BA	391
Outlays	351
(3) Maintain current law by rejecting the new tax on veterans (VA home-loan-guaranty fee increase) and illusory cost-savings for health-insurance reimbursement proposal:	
BA	162
Outlays	515
(4) Make unspecified legislative savings:	
BA	−50
Outlays	−90
Totals of increases in function 700 over SBC levels for fiscal year 1986:	
BA	814
Outlays	1,056

Three-Year Totals

[In billions of dollars]

	1986	1987	1988
SBC:			
BA	26.8	27.0	27.4
Outlays	26.0	26.3	26.8
Amendment:			
BA	27.6	28.1	28.7
Outlays	27.1	27.7	28.3

Three-Year Totals—Continued

[In billions of dollars]

B. Reconciliation Instructions to Veterans' Affairs Committees.

The amendment reduces the FY 86 reconciliation instruction totals based on the following changes in the underlying assumptions:

	New savings amount assumed
[In millions of dollars]	
(1) Instead of compensation COLA freeze, limit COLA to 3.7 percent (SBC savings assumption is based on 4.1 percent):	
BA	34
Outlays	30
(2) Substitute reductions (from baseline) only in VA medical construction, administration, and research accounts for reductions in VA health-care generally:	
BA	224
Outlays	26
(3) Substitute unspecified legislative savings for the housing loan fee increase and the health-insurance-reimbursement proposal:	
BA	50
Outlays	90
(4) Make no change in the savings for other discretionary VA programs:	
BA	20

Total of savings for fiscal year 1986 through reconciliation:	
BA	328
Outlays	160
Total of 3-year savings (fiscal year 1986–88):	
BA	787
Outlays	693

II. DESCRIPTION

A. Function 700 Totals.

1. Compensation and Dependency and Indemnity Compensation (DIC) COLA

The amendment would add $311 million in BA and $280 million in outlays in FY 86 in order to provide for a 3.7 percent COLA in VA compensation benefits paid to veterans with service-connected disabililties and paid to survivors of those who died from service-connected causes. (This is the same percentage that CBO estimates for the FY 86 COLA that Social Security beneficiaries are scheduled to receive under current law.)

The Budget Committee inexplicably recommended against such increases while granting COLA's in Supplemental Security Income, food stamp benefits, and pensions to veterans with non-service-connected disabilities. If all COLA's were to be given up in FY 86, that would be one thing. But to grant them in three other deserving categories and to deny them to veterans suffering from service-connected disabilities is incomprehensible.

Although compensation benefits are not means tested, the basic amount of this individual veteran's monthly payment is based on the average impairment of earnings resulting from his or her disability. Since that

average earnings impairment will increase by inflation over the prior year, denial of a compensation COLA would be inconsistent with the philosophical underpinnings of this program.

Nevertheless, veterans' organizations have stated clearly that if all COLA's are foregone in FY 86 so should be the compensation COLA. The Budget Committee, however, rejected such an across-the-board approach.

The six Republican members who joined in a March 7, 1985, letter to the Chairman of the Budget Committee unanimously supported a COLA for compensation in FY 86.

2. VA Loan Guaranty Fee Increase: A New Tax on Veterans

Last year, in response to the need to shore up the VA's Loan Guaranty Revolving Fund, which supports the VA home-loan guaranty program and was facing a shortfall, the Veterans' Affairs Committee reported and the Senate passed a measure, S. 2391, providing for the deposit of loan-guaranty-user-fee receipts into the Revolving Fund (instead of the General Treasury) and increasing the fee from one-half to one percent. Such provisions ultimately were enacted in section 2511 of the Deficit Reduction Act of 1984. Also, a supplemental FY 85 appropriation of $100 million was made to the Fund and another $160 million was transferred to the Fund from other VA accounts.

According to CBO, the Fund will be in no need of an appropriation or receipts from an increased fee at any time during the five-year period covered in CBO's current projections.

It should also be noted that the VA's Direct Loan Revolving Fund (DLRF) will, according to the VA's budget documents, have an unobligated balance of $77.7 million at the beginning of FY 86, rising to $122.3 million by the close of that fiscal year. (CBO estimates a $50 million increase in the DLRF balance in each of FY's 86 through 90.) Under a provision included each year in the HUD-Independent Agencies Appropriations Act, unobligated DLRF balances are available for transfer to the loan guaranty fund, and the DLRF thus provides an additional cushion to ensure the solvency of the loan guaranty program.

Under these circumstances, nearly quadrupling the fee, from one to 3.8 percent as the Budget Committee proposes in order to collect a billion dollars in receipts over a 3-year period, is nothing other than imposing a new, special tax on certain veterans in order to help with deficit reduction. The statement on page 129 of its report (S. Rept. No. 99-15) that the fee increase "will contribute to the solvency of the VA housing loan fund" fails to acknowledge that no increase is needed for that purpose. And, the Budget Committee's statement that "[v]eterans will still receive the substantial benefit of homeownership" ignores CBO's estimate that the fee increase will result in about 42,400 fewer veterans using the VA loan-guaranty entitlement in fiscal year 1986 alone, a total of 115,200 fewer during the 3-year period fiscal year 1986-88.

In the cases of those fortunate enough to be able to afford the increased fee, the monthly cost (if financed) would be about $22 and the total cost over the life of a 30-year mortgage (at current interest rates (13.0%)) would be $7,920. To some people, $22 more a month—$264 more per year—may not seem like much, but to many veterans with young families that amount could make a significant difference in what they are able to do or provide for their children.

In addition, according to CBO, since the increased fee would in most cases be financed as part of the mortgage loan, the VA fee increase would also produce a rise in the VA-loan foreclosure rate since the length of time during which mortgagors would have no equity in the properties would increase. It would also mean that the average cost to the VA of a defaulted loan would increase.

The cost of the fee increase—in terms of both the new, billion-dollar tax burden and the loss of the opportunity to acquire a home—would fall especially heavily on Vietnam-era veterans who are in the market for their first homes and in need of exactly the type of assistance that the VA guaranty program is intended to provide. Thus, it is extremely difficult to understand how the Budget Committee, in the face of the CBO analysis and that Committee's steadfast adherence to a "no new taxes" approach, can justify imposing this new tax.

The amendment restores the $353-million reductions in FY 86 outlays (and $357-million and $255-million outlay reductions in FY 87 and FY 88, respectively) that the Budget Committee claims would be achieved as a result of this tax. In their March 7 letter to the Budget Committee Chairman, the six Republican members of the Veterans' Affairs Committee also stated that they could not at that time support a fee increase.

3. Medical Care

The amendment would provide for the VA medical care account funding necessary to maintain the VA health-care system at the programmatic/staffing level for which Congress specifically appropriated funds in FY 85. To accomplish this requires $391 million in BA and $351 million in outlays more than was recommended by the Budget Committee.

The Budget Committee's recommended levels for the medical care account would be a devastating blow to the VA health-care system. According to the VA, those FY 86 levels would force the agency to deny care to tens of thousands of eligible veterans—approximately 69,000 inpatient episodes of care and 310,000 outpatient visits would have to be eliminated—and would require the VA to lay off 8,100 health-care personnel. In order to make these reductions, the VA would have to close many existing wards or other units or even some entire facilities.

The FY 86 medical care account levels provided for in the amendment—$9.353 billion in BA and $9.106 billion in outlays—are only $60 million in BA and outlays above the level of the President's very stringent FY 86 budget for the medical care account increased by restoration of the 5-percent civilian pay cut.

That $60 million addition—which the six Republican members of the Veterans' Affairs Committee also supported in their March 7, 1985, letter to the Chairman of the Budget Committee—is the bare minimum needed, in our view, to enable the VA to maintain in FY 86 the health-care staffing level that the Congress specifically intended be maintained in FY 85 when it enacted the FY 85 HUD-Independent Agencies Appropriations Act.

4. Health-Insurance Reimbursement

The Budget Committee endorsed a proposal mentioned in the VA's budget documents but not yet submitted to the Congress—legislation to require private health insurance carriers to delete from their policies clauses precluding payment for VA-furnished care and provide for the VA to obtain reimbursement from these carriers for VA care provided to non-service-connected veterans. We do not support this proposal because, by increasing administrative costs for both the VA and the insurers, it would contribute to health care inflation and because, if no additional VA administrative personnel were added to shuffle the necessary papers, it would require the diversion of VA staff from activities relating to health care furnished veterans to the red tape involved in billing the insurance carriers. Moreover, there remain numerous unanswered questions about this proposal. The unknowns include, among others, the extent to which non-service-connected veterans receiving VA care have health insurance that would yield any significant payments under such a law, the ability or willingness of the VA to generate billings and to submit to cost-containment reviews which accord with requirements in existing insurance contracts, and increases in health insurance premiums to cover the cost of any claims paid.

In addition, the possibility of realizing any of the receipts that the Budget Committee claims for this initiative in the first few years after its enactment are extremely remote. Insurance companies are adamantly opposed to a mandate to pay for VA care, which is not subject to the same utilization control applied to private sector facilities. Serious questions have been raised about the constitutionality of this provision, and insurance companies suggested during hearings before our Committee in 1979 that they would not pay these claims unless and until finally ordered to do so by judicial authority. This would likely entail protracted legal proceedings until all appellate remedies are exhausted.

Thus, the proposal would produce paper savings only and make no real reduction in the deficit. Our amendment would restore in FY 86 the $162 million in BA and outlays (and in FYs 87 and 88 the $392 million and $472 million, respectively) by which the Budget Committee reduced the Function 700 totals based on assuming the enactment of such legislation.

5. Unspecified Cost-Saving Legislation

The amendment assumes the enactment of legislation that would achieve cost savings of $50 million in BA and $90 million in outlays in each of FYs 86, 87, and 88. This level of legislative cost-savings would both reduce the Function 700 totals and be assumed in the reconciliation instructions. This is $40 million more in savings in outlays than the maximum that the Veterans' Affairs Committee Domocrats had committed themselves to achieving contingent upon their original budget recommendations being achieved. The greater proposed legislative savings reflects a revised estimate of what could fairly and equitably be achieved in non-service-connected programs if the other features of this amendment were adopted.

III. RECONCILIATION INSTRUCTIONS

The amendment would modify the cost-savings totals in the reconciliation instructions to the Veterans' Affairs Committees to reflect the policy assumptions discussed above. Thus, the FY 86 savings required by the instructions would be reduced from $977 million in BA and $1.059 billion in outlays to $328 million in BA and $160 million in outlays in FY 86, with the new amount based on the following changes in the

Budget Committee's underlying assumptions: First, instead of precluding a COLA for compensation/DIC benefits in FY 86, limit the COLA to 3.7 percent—which is four-tenths of a percentage point lower than the COLA that is assumed in the baseline and formed the basis of the Budget Committee's savings assumption in this regard. The new savings amount assumed would be $34 million in BA and $30 million in outlays (instead of the Budget Committee's assumption of $345 million in BA and $310 million in outlays).

Second, in lieu of the Budget Committee's assumption that all VA health-care accounts would be capped at sub-baseline levels—at the lower of either a freeze level or the President's request for FY 86—the amendment assumes that the VA's medical care account would be removed from this cap and assumes that the VA construction, medical administration, and research accounts would be limited in FY 86 to the levels requested by the President; it assumes that the medical care account would be funded at $60 million more than the President's request (with funding restored for the proposed 5-percent pay cut) in order to maintain the staffing level (approximately 194,000) specified by Congress last July in enacting the VA's FY 1985 appropriations. Measured against the baseline figures for these accounts, the new assumptions would achieve savings of $224 million in BA and $26 million in outlays in FY 86 (instead of the Budget Committee's assumption of $446 million in BA and $220 million in outlays).

Third, in lieu of the assumptions of total savings of $162 million in BA and $515 million in outlays in FY 86 through the enactment of health-insurance reimbursement legislation and an increase from one to 3.8 percent in the VA home-loan fee, the amendment assumes savings of $50 million in BA and $90 million in outlays through the enactment of as yet unspecified cost-savings legislation.

Fourth, no change is proposed in the assumption of FY 86 savings of $20 million in BA and $14 million in outlays in VA discretionary programs other than health programs.

NOTICES OF HEARINGS

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, the Committee on Agriculture, Nutrition, and Forestry has scheduled a hearing to receive testimony on S. 721, a bill to amend the Commodity Credit Corporation Charter Act regarding the export of agricultural commodities.

The hearing will be chaired by Senator RUDY BOSCHWITZ and will begin at 2 p.m. on Thursday, April 4, 1985, in room 328-A Russell Senate Office Building.

For further information please contact the committee staff at 224-2035.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Tuesday, April 2, hold a hearing on sugar, wool, and honey issues relating to 1985 farm legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, April 2, in closed session, to mark up S. 674, DOD authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, April 2, to hold a markup of the authorization for appropriations for fiscal years 1986 and 1987, U.S. Information Agency; and S. 659, to authorize appropriations for the Department of State.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, April 2, to hold a hearing on the nomination of Donald Devine, to be Director of the Office of Personnel Management.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. HELMS. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations, of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, April 2, 1985, to conduct a hearing on S. 483, The Intergovernmental Regulatory Relief Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, April 2, in order to receive testimony concerning the sale of Conrail.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON LABOR AND HUMAN RESOURCES

Mr. HELMS. Mr. President, I ask unanimous consent that the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, April 2, at 2 p.m., to hold a hearing on S. 484, to extend the Saccharin Study and Labeling Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE STOCKHOLM CONFERENCE

● Mr. LUGAR. Mr. President, while negotiations to eliminate nuclear weapons naturally dominate public concern, efforts must also be made to ensure that no weapons of any kind are ever used. That is the essential objective of the Conference on Confidence- and Security-Building Measures and Disarmament in Europe, which for the past 14 months has been meeting in Stockholm, Sweden. The purpose of the Stockholm Conference, unlike traditional arms control negotiations, is not to reduce the means of waging war—numbers of troops and weapons—but to prevent the most likely proximate causes of war and to build in the security field cooperative arrangements across the barriers which divide Europe today.

I have had the occasion to visit Stockholm in connection with this Conference and to visit with the U.S. Delegation to the Conference, headed by Ambassador James Goodby. The Stockholm Conference has its own unique task, one which has been neglected for far too long.

I would, therefore, ask to insert in the RECORD a recent speech by Ambassador Goodby entitled "The Stockholm Conference: A New Approach to Security for Europe." I think this speech will assist other Members in understanding the present status of these negotiations.

THE STOCKHOLM CONFERENCE—A NEW APPROACH TO SECURITY FOR EUROPE

Last January, Secretary Shultz and Minister Gromyko formally agreed that the United States and the Soviet Union would work together to try eventually to eliminate nuclear weapons from the face of the earth. Though ambitious, even radical, when compared to the results of disarmament negotiations since World War II, that goal is a moral and practical necessity. The moral necessity of seeking to eliminate nuclear weapons is so obvious it requires no discussion. The practical necessity of such a goal can best be understood when one realizes that no previous effort to curb the competition in strategic offensive forces has led to any reductions in nuclear warheads. Rather, numbers of nuclear warheads have steadily increased. The direction charted by Secretary Shultz and Minister Gromyko fits the existing situation. In fact, as Secretary Shultz said recently: "This may be the last time to really address some of these issues with any prospect of success."

Nuclear weapons involve issues of survival for us all; negotiations to eliminate nuclear weapons naturally dominate public consciousness. But while we seek to reduce nuclear arsenals we must also seek to find ways to ensure that no weapons of any kind are ever used. That is an even more fundamental imperative; one that cannot be postponed. And that is the essential objective of the Conference on Confidence- and Security-Building Measures and Disarmament in Europe, which for the past fourteen months has been meeting here in Stockholm. The

purpose of the Stockholm Conference, unlike traditional arms control negotiations, is not to reduce the means of waging war—numbers of troops and weapons—but to prevent the most likely proximate causes of war and to build in the security field cooperative arrangements across the barriers which divide Europe today. The Stockholm Conference thus has its own unique task, one which has been neglected for far too long.

Conventional wisdom holds that the probability of a "brush-fire" conflict involving limited numbers of forces is considerably greater than the probability of conflict at the strategic nuclear level. But as the Book of Common Prayer puts it: "we have left undone those things which we ought to have done." Not nearly enough has ever been done to negotiate preventive measures against the relatively minor crisis which could erupt into armed combat, and even escalate into major war. The chance of armed conflict in Europe fortunately is remote. But the stakes are so high that failure to do those things which would make an unlikely event still more improbable would be unforgivable. Compounding the problem, Europe currently is a continent artificially divided, and that division itself impedes the kind of cooperation in security affairs which would make it easier to deal with miscalculation, defuse crises, and prevent incipient conflict.

The dangers inherent in the current situation suggest the need for procedures through which nations could work together to enhance mutual stability or, should stability be disturbed, to restore it rapidly. In fact, over the years procedures have been devised to serve this purpose—for example, advance notification of certain types of military activities. Such cooperative stabilizing measures have collectively come to be known as "confidence-building measures"; hence, the cumbersome, and not very revealing title of the Stockholm Conference. By unanimous agreement of the thirty-five nations participating in the Conference—the United States, Canada, and all the European countries except Albania—its goal is to enact "a set of mutually complementary confidence- and security-building measures designed to reduce the risk of military confrontation in Europe." More simply, the goal is to prevent military crises from arising on the continent or, should they arise, to defuse them before they can get out of hand and lead to war.

Some of the essential features of the confidence-building measures comprising a program of cooperation designed to enhance stability are:

First, in normal times, they should oblige nations to act habitually, customarily, in a way which would eliminate causes of tension and reduce the dangers of misunderstanding or miscalculation, thus reducing the dangers of armed conflict, including the danger of sudden, surprise attack.

Second, a set of militarily significant confidence-building measures should install operational barriers against the use of force, particularly by requiring tangible proofs of the peaceful intent of those military activities which could be perceived by others to be threatening, and imminently so, at that.

Third, confidence-building measures should help decisionmakers to avoid misjudgments which could lead to unwanted crisis and conflict; they should also help, or at least not hinder, efforts to restore equilibrium rapidly in the event of a threat to the stability of the military situation.

And fourth, they should be verifiable.

The Helsinki Final Act of 1975, which began the process of European cooperation to which Stockholm belongs, produced the first modern multinational experiment in confidence-building measures by asking participating countries to give advance notice of certain military activities and to invite observers to them. The measures were rudimentary and the military effects of the agreement slight, partly because the Warsaw Pact countries were not very forthcoming in carrying out even the rudimentary cooperative actions requested. The agreement did, however, begin to set standards of expected behavior—definitely a step in the right direction.

Eight years after the signing of the Helsinki Final Act, the countries of the Atlantic Alliance used the opportunity afforded by the Stockholm Conference to propose major improvements in the cooperative program agreed upon in Helsinki.

In comparison with the notification procedures of the Helsinki Final Act, the effect of the new Allied proposals would be to increase the range and number of military activities to be notified, thus giving all participants a better picture of the extent and nature of military activities in Europe. For example, these proposals would require notification of additional types of military activities, such as mobilizations and amphibious activities. And they would lower the threshold for notification significantly below that required in the Helsinki Final Act.

The sixteen Allies also seek to improve the verifiability of notification procedures, to rationalize them, and to focus them on the specific military units that would carry out actual combat operations, that is, on army divisions, not just manpower levels, as at present. And instead of describing all of the possible manifestations of military activities, we simply speak of activities which are "out-of-garrison."

Furthermore, the Sixteen recommended an exchange of annual forecasts of notifiable activities. This would provide all participants with a clear picture at the beginning of the year of all the militarily significant activities expected to take place on the continent during that year, as opposed to learning about such activities one at a time just shortly before they occur, as at present. This would reveal trends and patterns before, rather than after, the fact and raise the political costs of the sudden, surprise announcement of a maneuver designed to intimidate a neighbor.

In contrast to the current Helsinki Final Act provisions for inviting observers to military activities, the Sixteen want to ensure that participants in a new accord are guaranteed the right to have observers at all notifiable military activities. These observers should also be allowed that freedom to operate which is necessary to determine clearly the non-threatening nature of each notified military activity.

The Helsinki Final Act did not contain provisions for verification of the accord, but all the participants in the Stockholm Conference agree that verification is essential in any new agreement and that each confidence-building measure must be provided with the means of verifying that it is being faithfully carried out. In the opinion of the Sixteen, an annual exchange of military information is particularly necessary for effective verification: the information so exchanged would form the basis for judging what was normal and routine and would thus be the necessary means for undergirding the operation of all other measures. The Allies also have called for independent, on-site inspection to enable participating states to satisfy themselves that all military activities are being properly notified. On-site inspection would provide all the nations with what should be a welcome opportunity to obtain, and to give, reassurance as to the non-threatening nature of military activities, especially in times of tension.

Under the plan proposed by the countries of the Atlantic Alliance, any country, by breaking with the announced pattern, would be sounding an alarm, warning others that a threat to the security of Europe might be in the offing, and permitting steps to be taken to cope with the situation. This early, clear warning of a potential threat could be especially important for democracies, which need time for the political decisions necessary to initiate a military defense against a threat.

In comparison with their potential impact, the proposals of the Sixteen demand little of the governments which would implement them. In most cases, and especially for the larger countries, the cooperative act of "demystifying" routine military activities would be more important than the specific information exchanged. A state which has no intention of attacking another should not shrink from offering this type of cooperation since it could only serve to prove that state's peaceful intent; a state which fears attack could only benefit from accepting this type of cooperation since it would provide more accurate perceptions of a potential adversary's intentions.

The neutral and non-aligned participants in the Stockholm Conference, as well as the Atlantic Allies, have taken a very hardheaded, rational, and practical approach to the task of negotiating confidence-building measures. Sweden and Finland were instrumental in enabling the Conference to move from generalities to specifics. Detailed discussion of specific issues is proceeding in working groups which were established as the result of very skillful diplomacy by the Finnish and Swedish delegations; these working groups have been functioning well since last December.

During most of 1984, however, the Soviet Union seemed to be content to use the new Stockholm negotiations mainly to influence public opinion rather than the course of events around the negotiating table and ultimately in the real world of military affairs. There was very little in most of their proposals which seemed oriented towards the kind of negotiations that the Stockholm Conference was designed to be. The exception to this lies in the fact that the Soviet Union has proposed to expand and develop the Helsinki confidence-building measures. From this fact stems the guarded hope for a successful outcome.

The Soviets have also laid particular stress on a proposal for a treaty committing states to renounce the use of force in their mutual relations—a non-aggression pact which would enter into force when all members of NATO and the Warsaw Treaty had acceded to it. The United States has always supported that fundamental principle of international law which requires states to refrain from using force or the threat of force, any kind of force, in their mutual relations. The United States is bound by the principle of non-use of force by various international agreements, including the United Nations Charter and the Helsinki Final Act. Therefore, to make a meaningful additional contribution to security for

51-059 O-86-3 (Pt. 6)

Europe, the governments meeting in Stockholm must go beyond existing promises of benign intent. The way they can do this is clear: they can agree to demonstrate—not assert but demonstrate—that their military activities are peaceful, routine, and nonthreatening. A mere declaration, however well-intentioned, remains a passive commitment, unless reinforced by agreements which require positive and visible actions habitually, consistently, unfailingly applied. And this is precisely the purpose of the proposals advanced by the Allies.

Despite some fundamental disagreements between the Soviet approach and the approach of most other participants, a consensus appears to be building in Stockholm. It is leading towards the kind of accord that President Reagan suggested on June 4, 1984, in a speech before the Irish Parliament in which he said that, although the United States believed deeply in the principle of refraining from the threat or use of force, merely repeating that pledge was not enough. But he also said that, in view of the importance the Soviet Union seemed to attach to an accord which would contain a commitment to the non-use of force, the United States would discuss that principle if this would lead the Soviets to negotiate concrete confidence-building measures.

If the Stockholm Conference produces meaningful results, they will probably take the form the President outlined in Dublin, a combination of the passive obligation not to use force and the dynamic obligations required by confidence-building measures which effectively raise barriers against the use of force.

Will the Soviets accept this kind of compromise? Unfortunately, the case for confidence-building measures has never been fully embraced by the Soviet Union, despite Soviet agreement to a number of rather modest measures of this type in the past. The obvious reason for their reluctance is that confidence-building measures involve varying degrees of openness and even cooperation in military matters—tender plants that do not find fertile soil for vigorous growth in the context of centuries of Russian tradition. The factors which argue ever more pressingly for cooperative arrangements to reduce the risk of the war, however, should finally be persuasive in the Soviet Union as elsewhere. The kind of cooperative regime the Atlantic Alliance is proposing would work to the mutual benefit of everyone involved, including the Soviet Union.

At the heart of the Helsinki process, to which the Stockholm Conference belongs, is the idea that Europe and North America are a single community, consisting not merely of thirty-five states with their sovereign attributes, but also of people with their common needs, aspirations, and rights. A commitment to the objectives of the Helsinki process means a commitment to encouraging the healthy development of the whole community of nations through cooperation in economic, cultural, and humanitarian affairs, as well as in security matters.

The implementation of confidence-building measures would represent an important cooperative effort to lessen common risks. Cooperation is security matters would contribute to the building of more open, less confrontational relationships in all areas among all the nations participating in the Helsinki process. Progress in this direction will be limited, incomplete and ultimately futile, however, if it is not part of the larger program of cooperation to which the thirty-five participants committed themselves in the Helsinki Final Act.

Just as accords dealing with security issues cannot alone fulfill the promise of the Helsinki Final Act, so also confidence-building measures are not a subsititute for much needed arms reductions. But by eliminating the proximate causes of war, confidence-building measures would complement negotiations aimed at arms reductions and, perhaps, facilitate their work. In fact, it would be incongruous to work towards the elimination of nuclear weapons and not to eliminate the most probable proximate origins of a conventional conflict.

The United States hopes for an accord which would have the practical consequence of reinforcing the obligation of states to refrain from the threat or use of force by requiring positive acts of cooperation to demonstrate that military activities in Europe are not intended to threaten other states. The application of such measures to military activities over a period of time should substantially improve confidence among participating states which, itself, should improve stability and security. Good faith implementation of such an accord should pave the way for even more meaningful security arrangements.

The Stockholm Conference thus holds the potential, at least, for making a unique contribution to world peace and security. Arms reductions to significantly lower levels will be a long process. The United States recognizes that even while we work with others to reduce forces, we must also work with others to create conditions which, as President Reagan put it, ". . . build effective barries against the use of force in Europe."●

SKIP JASON COMMUNITY SERVICE AWARD TO JAMES D. WILCOX

● Mr. MITCHELL. Mr. President, I rise today in honor of James D. Wilcox of Rockport, ME, who has been named by the housing assistance council to receive the Skip Jason Community Service Award. This national award is given by the housing assistance council board of directors to a person whose contributions in a local area have helped low-income people with their housing problems. I know of no individual more deserving of the Skip Jason Award and wish to add my congratulations and thanks on behalf of all the individuals he has so willingly helped during the past 7 years.

In May of 1984 at the age of 68, Jim Wilcox retired after 7 years of extraordinary public service as midcoast human resources council's "rehabilitation technician." The term "rehab tech" came to use in my State as the result of the joint efforts in 1977 of Gov. James B. Longley and Seth H. Bradstreet, then State of Maine director of the U.S. Farmers Home Administration [FmHA], and their staffs, to establish a statewide program whereby elderly and low-income people would be assisted in utilizing housing rehabilitation loans and grants—502 and 504 programs—available to qualified homeowners from FmHA. There are originally 13 "rehab techs" spread throughout the State, and many dedicated individuals filled these positions over the years. As available State and foundation funding for these positions dwindled, competition increased among the community action agencies seeking to maintain them, and it is one tribute to Jim Wilcox's productivity that he held the last remaining of the 13 full-time positions.

This was not Jim's first retirement. A native of Winthrop, MA, Jim worked 34 years for the Mobil Oil Co. In his early years he was instrumental in the formation of the first union of Mobil employees. He first came to know the mid-coast region of Maine when he was sent by Mobil to manage its transport and storage facility in Rockland in 1954. The company closed its Rockland facility in 1968 and brought Jim back to the Boston area. In the early seventies, after a severe stroke caused his retirement from Mobil, Jim and his wife Laura returned to the Rockland area. The Wilcoxes raised 6 children and are the proud grandparents of 11.

Jim Wilcox's new work with MCHRC closely fit the objectives of a Maine antipoverty agency. Data from the 1980 census show that Maine's housing stock is the oldest in the Nation, 47 percent having been constructed prior to 1940. Maine's harsh weather adds to the burden of home-maintenance costs. Jim's primary task was to employ FmHA programs to minimize this burden for as many low-income individuals and families as possible. I will defer to the words of his boss Charlie Newton in describing his success:

> During his years here Jim wrote over 290 home rehabilitation applications for eligible low-income clients living in Knox County. As a result of his efforts, the people he served received $1,053,900 in loans and grants. In addition to the obvious benefit to the applicants, this has proved to be a significant infusion of dollars into the locally depressed housing industry (all construction work was given to private contractors) and has had a real impact on the upgrading and maintaining of existing housing stock.
>
> However, what is more important than the statistics is the personal dedication of the man. He worked whenever necessary to meet the needs of his clients and he stayed with each client through the entire construction project, making sure the application was correct, eliminating bureaucratic barriers, helping to review contractors' bids and assessing the completed work. Along the way he would try to identify resources which might help any other needs the client might have. He really made a difference.

Jim Wilcox has appeared at my door many times during my 5 years as a Senator. Although he had established a good working relationship with FmHA's Knox County superviser, Jim contacted my office on a few occasions when he had decided the agency was holding back justified rehabilitation on technical grounds he considered unfair or trivial. He was always armed with proper documentation and good

reason, and we were often able to be of some assistance.

Jim correctly estimated the high importance of his work on behalf of poor people, and the high benefits of Farmers Home rehabilitation programs to Knox County and other regions of the State and Nation. When he felt that State and local FmHA officials were not fighting hard enough for the additional funds he and others needed to do their jobs, or that Congress was not being properly impressed with the virtues of these programs, he did not hesitate to let me know. Jim kept careful records of his work, and once brought a collection of before and after photographs to my Washington office to demonstrate that 502 and 504 money was being well spent. He is able to speak with intimacy and detail about the housing needs of persons in our society with low and fixed incomes, and I have come to respect his determination and value his counsel.

I look forward to seeing Jim again on May 16 when he will be in Washington to receive the Skip Jason Community Services Award.●

NEW SOVIET MISSILE POSES THREAT TO DETERRENCE, VERIFICATION

● Mr. McCLURE. Mr. President, the recent debate over funding for 21 new MX-Peacekeeper missiles has brought to light an alarming development in Soviet military capability—the rail-mobile SS-24 missile, which may be deployed as early as the end of this year.

Soviet deployment of this system raises serious strategic concerns. First of all, when the Soviets complete deployment of this new missile, they will have in effect the equivalent of the "racetrack" basing mode proposed for the MX under the Carter administration. The SS-24 also has reload and refire capabilities, meaning that additional missiles can be loaded and fired from the same launcher within a short period of time. Furthermore, the fact that the SS-24 is stored in and launched from camouflaged Soviet railroad cars poses significant questions of verification for arms control.

While our support for continued funding for the MX-Peacekeeper was a necessary response to this development, the deployment of the SS-24 will unquestionably affect decisions that Congress will address in the months ahead.

I ask that four recent newspaper articles on the SS-24 be printed in the RECORD. They are: an article by Alan McConagha in the March 21 issue of the Washington Times; an article by Walter Pincus in the March 22 issue of the Washington Post; an article by Alan McConagha in the March 22 issue of the Washington Times, and a column by syndicated columnist Rowland Evans and Robert Novak that appears in the March 27 issue of the Washington Post.

The articles follow:

MX's SOVIET COUSIN, THE SS-24, UNVEILED

(By Alan McConagha)

Sen. James McClure of Idaho yesterday offered the first public view of the new Soviet SS-24 missile, which is comparable to the MX missile and which could become operational later this year.

The color illustration, an artist's rendering of the train-mounted missile, was declassified by the Defense Department.

In a speech to the Senate, Mr. McClure, a Republican, said the Soviet development of the SS-24 presents an additional reason to go forward with the U.S. missile program.

The Senate Tuesday voted 55-45 for the missile in a surprising show of support. The Senate voted again by that margin yesterday to release $1.5 billion to make 21 more of the 10-warhead, land-based missiles.

The House Appropriations Committee voted 28-26 yesterday against funding production of this next missile batch. The full House will take up the issue on Tuesday and Thursday of next week.

In releasing the photograph, Mr. McClure said it was made available by Defense Secretary Caspar Weinberger at the request of the Idaho Republican and Sen. Paul Laxalt, R-Nev.

Mr. McClure also released a chart declassified by the Defense Department that shows the growing superiority the Soviet Union possesses over the United States in the number of ICBM warheads in its arsenal.

The SS-24 is a 10-warhead missile. Its transporter-erector-launcher could be placed at the end of a special Soviet missile train that would appear identical externally to standard Soviet freight trains, Mr. McClure said.

The Soviet SS-24 rail-mobile will be "fully concealed and camouflaged, partially protected by railroad tunnels, and therefore much more survivable than a race-track MX" of the sort proposed by former President Carter, he said.

The danger exists that the United States will have no good method of estimating how many SS-24 rail-mobile launchers or refire missiles are deployed because of this effective concealment, Mr. McClure added.

The MX was designed as a mobile missile but the Reagan administration dropped the idea of basing the weapon on mobile carriers moving across the western desert in favor of placing 100 of them in existing missile silos.

Secretary of State George Shultz has said that deployment of the SS-24 would raise "very considerable questions" about Soviet violations of the SALT II arms control pact.

The SS-24 as well as the new single warhead SS-25 are expected to come up in the Geneva arms talks between the United States and the Soviet Union. Deployment of the SS-25 may already be under way, according to U.S. officials.

[From the Washington Post, Mar. 22, 1985]

SOVIET MISSILE CITED TO BOLSTER CASE FOR MX

(By Walter Pincus)

The administration has given Congress pictures and additional information about the Soviet Union's new mobile 10-warhead SS-24 intercontinental missile as part of its effort to gain votes for additional funding for the 10-warhead MX that President Reagan wants to build.

Sen. James A. McClure (R-Idaho) used newly released data and a Pentagon illustration of the SS-24 during a speech on the Senate floor in support of the MX missile earlier this week.

The drawing was done from intelligence photographs of the missile, which will not be operational until next year.

McClure said that railroad cars attached to the missile launcher will house additional missiles, support equipment, security forces and command and control facilities.

"These trains are deceptively concealed," McClure said, "so as to appear externally identical to standard Soviet freight trains."

The Soviets also have developed and are deploying a second new mobile missile, the SS-25, which has a single warhead and is transported on trucks.

Some arms control experts say that the SS-25 is more "potentially unsettling" than the SS-s24.

John D. Steinbruner, director of the Brookings Institution's national security program and a former Pentagon consultant, said the Soviets so far have "made it easy for us" to keep track of SS-25s by constructing unique garages for them.

But, he said, the deployment of the SS-25 is disturbing because the Reagan administration "does not appear to be making any efforts to control it by arms control arrangements."

"If they decide to go to concealment," he added, "it would begin a very unfavorable competition because we don't have the land and the population control they have to permit those activities."

The SS-25 "is nearing operational capability" in two missile fields, according to the new version of "Soviet Military Power," the Pentagon's annual survey of Moscow's military forces. The volume is scheduled to be released next month.

Steinbruner said yesterday that administration officials have yet to reach agreement on what negotiating position to take on the two new Soviet mobile missiles at the Geneva talks.

The Soviets have informed the United States that the SS-24 is the one new missile permitted under terms of the unratified SALT II treaty.

They have also said the SS-25 is a permitted modification of their older SS-13 missile.

Up to now, the administration has described the SS-25 as a violation of SALT II provisions because it is significantly different from the SS-13.

A Pentagon official said yesterday that beyond protesting the SS-25, "there is no consensus within the government about what the Soviets should do with it."

Steinbruner and other intelligence experts said yesterday that it would be easier to keep track of the larger SS-24 on its railroad launcher once it became operational than it would to follow the smaller roadmobile SS-25.

Last Sunday, Secretary of State George P. Shultz said, "The mobility of missiles increasingly raises problems about verification, whether you can really count them and know how many there are and where they are."

Steinbruner echoed that view but added that the administration did "not want to acknowledge this major Soviet weapons initiative that could be troublesome in the future."

[From the Washington Times, Mar. 22, 1985]

SOVIET WARHEADS UNDERESTIMATED, WEINBERGER HINTS IN LETTER TO HILL

(By Alan McConagha)

Defense Secretary Caspar W. Weinberger said publicly for the first time that the Soviets may have more than the official figure of 6,300 land-based strategic missile warheads, congressional sources said yesterday.

Sen. James A. McClure, R-Idaho, yesterday released portions of a letter in which Mr. Weinberger acknowledged a "range of uncertainty" in the U.S. assessment of the number of ICBM warheads deployed in the Soviet Union.

Mr. McClure, a proponent of the MX missile and a critic of past Soviet-American arms-control agreements, made public the information at a time when it could influence next week's House votes on the MX.

Observers also asserted that the information contained in Mr. Weinberger's letter to Mr. McClure may have an effect on the arms talks begun this month in Geneva between the United States and the Soviet Union.

In the letter dated Tuesday, as disclosed by Mr. McClure's staff, the defense secretary did not attempt to define the "range of uncertainty" that he said the U.S. experienced in counting the Soviet ICBM warheads.

Previously published unofficial figures have set the number of Soviet ICBM warheads as high as 8,500, or 2,200 more than the official total. The official number for ICBM warheads in the American arsenal is given as 2,130.

A senior administration official said last night that the 8,500 estimate was too high. He added, however, it is within 1,000 of the number of ICBM warheads the United States believes are deployed in the Soviet Union.

According to Mr. McClure's staff, Mr. Weinberger's letter said, "Additional warheads could possibly be deployable on SS-18s and estimates beyond the known number deployed enter a range of uncertainty."

"The Defense Intelligence Agency is producing some classified materials that will explain more fully this range of uncertainty," the letter said in the excerpts released by the Idaho Republican.

"The Soviets maintain about 40 percent more ICBM launchers than the U.S., giving them a 3-1 superiority in ICBM warheads, a most significant advantage," Mr. Weinberger added in the released excerpts.

"Equally significant is that some of the Soviet cold-launched SS-17 and SS-18 silo launchers could be reconstituted, reloaded, and refired in a short period of time under war-time conditions."

This is the first official charge that Soviets could be violating the SALT II prohibition on rapid reload and refire ICBM capability, according to one congressional expert on Soviet-American arms.

Richard Perle, assistant secretary of defense, told Defense Week on Monday, "The Soviets have tested their largest missile, the SS-18, with 14 warheads aboard as compared to the maximum of 10 allowed under arms control treaties."

Mr. Perle said the Soviets could have their force of 308 SS-18s deployed with 14 warheads each. If so, this would give them 1,232 more nuclear warheads than previously reported, he added.

According to Senate critics of arms control, these statements contradict testimony to that body during the Carter period, in which the White House assured senators that deployed warheads could be precisely verified.

The 100 MX missiles being sought by the Reagan administration would provide a net addition of 700 deployed ICBM warheads to the American total. The Senate this week approved funds for the production of 21 of the missiles.

In a letter sent to President Reagan on March 1, Sen. Steve Symms, R-Idaho, and Sen. John East, R-NC, asserted the United States has a total of 9,400 nuclear bombs and sea-, air- and land-based warheads.

Similar sources put the Soviet warhead aggregate at 13,200.

[From the Washington Post, Mar. 27, 1985]

ON THE TRACK OF THE SS-24

(By Rowland Evans and Robert Novak)

While Congress prepares to cut defense spending and deals with the MX missile, a dangerous development has been obscured by disagreements within the U.S. intelligence community: the Soviet Union has reached the threshold of the first-ever mobile longrange missile system considered invulerable to attack.

Until last week those disagreements kept the wraps on some aspects of the new mobile system, the SS24. Similarly, key analysts in the Defense Intelligence Agency were kept from sounding the alarm over the number of warheads on the giant SS18 by CIA counterparts who count a smaller number.

The gag was partially lifted March 18. President Reagan's friend, Sen. Paul Laxalt, that day joined Sen. James McClure, a key member of the defense Appropriations subcommittee, in writing the president that a Soviet equivalent of a "highly survivable" U.S. system abandoned here because of political difficulties could become operational "as early as this year." Reagan sent the letter to the Pentagon the same day. That evening, a White House aide telephoned Defense Secretary Casper Weinberger: the president agreed with Laxalt and McClure that the facts should be made public to help Congress decide the right way on the MX.

Moving a bureaucracy locked in disagreement is not easy. The facts sent Laxalt and McClure the next day—in time for use in the Senate MX debate—were spare. But they were given an artist's depiction of the 10-warhead SS24, mounted on a railroad car and a large-scale map of the vast Soviet rail system with its thousands of hiding places in tunnels.

This rendition of the present state of a Soviet mobile ICBM system comes remarkably close to the "racetrack" deployment system President Carter vainly tried to sell Congress. When he took office, Reagan ditched it because politicians—including ironically, Paul Laxalt—did not like it. The upshot is chilling. While two presidents could not sell any survivable basing mode to Congress and the long-term future of the MX itself remains dubious, a potentially invulnerable mobile system appears certain to be deployed in the Soviet Union by 1986.

The Laxalt-McClure letter prodded out of the administration one significant relaxation of the U.S. gag on Soviet missile development, raising this question: How many warheads do the Soviets have in their SS18s? The answer, under dispute between the DIA and CIA, could prove more important than the onrushing Soviet mobile ICBM. Each additional warhead targeted against long-range U.S. missiles increases American vulnerability by reducing the chance for survival of the U.S. nuclear deterrent in the event of a Soviet first strike.

DIA experts are convinced that the Soviet Union has tested its giant SS18 with 14 warheads. But the United States has always given the SS18 a "book value" of only 10 warheads. The difference for the total force of 308 SS18s is 1,232 warheads—far more than the total contemplated force of MX warheads.●

THE RIGHT OF FREE EMIC TION FOR SOVIET JEWRY

● Mr. DODD. Mr. President, I rise to add my voice to those of my colleagues in support of the right of the Jews in the Soviet Union to emigrate freely.

There are at least three prime reasons why I speak out on this subject today.

First, the right of Jews, or anyone else, to leave the Soviet Union is guaranteed by several international agreements to which the Soviet Union is a signatory. Among these agreements are the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights.

Second, the right of Jews to emigrate from the Soviet Union is a primary concern of the American people, who continue to support the inclusion of this issue in our bilateral relations with the Soviets.

But finally, however, I support the right of Jews to emigrate from the Soviet Union because it is the right thing to do.

There is a wealth of frightening evidence, Mr. President, of state-organized and supported anti-Semitism in the Soviet Union. The teaching of the Hebrew language and Jewish traditions is suppressed. Those who seek the right to emigrate are fired from their jobs, arrested, and imprisoned for long periods of time in brutal conditions.

And we all know too well the fate of those like Anatoly Shcharansky, who have the courage to oppose such oppression.

So it is right for us to speak out against such oppression, to let those who practice it know that we shall oppose their cruelty by word and deed, and to let those who suffer know that they are not alone.

Mr. President, 2 weeks ago, a man I am proud to know as a friend, Elie Wiesel, testified before the Senate Foreign Relations Committee in support of Senate approval of the Genocide Convention. I told him on that occasion that I have frequently quoted him on "the sin of silence." Mr. Wiesel has often spoken with force and eloquence on the moral necessity to speak out against oppression, to call it by its proper name when it arises, because to know, and to be silent, is to share in the sin of those who perpetrate oppression.

So I am here to speak out today.

Many books and essays have been written about the need of communism as an ideology to have a nemesis, to identify enemies, extrnal and internal, to prop up its manifest and manifold failures.

There are disturbing signs that is what is happening to the Jews in the Soviet Union. Those who teach Jewish traditions are branded "enemies of the state." Those who uphold Israel, the dream of the Jewish people for untold generations, are branded "Zionist agents," a crime. The Soviet press is full of references to the "Zionist Mafia of death," and so on. There can be no doubt that, as has happened so many times in history, the Jews of the Soviet Union are being used as a scapegoat by the regime.

The numbers of Jews who have been allowed to emigrate have fallen dramatically. In 1979, 51,320 were able to escape. In 1980, 21,471. In 1981, 9,447. Then in 1982, the number of the fortunate few who could get out, a number that had diminished and dwindled, was cut again: only 2,688 were allowed to leave. In 1983, that trickle was cut in half again, to 1,314. Last year, only 896 Jews were able to emigrate from the Soviet Union. And in January of this year, just 61 were able to leave.

Truly, the situation for the more than 2½ million Jews in the Soviet Union is approaching a crisis level.

There is now a new leader in the Soviet Union, Mikhail Gorbachev. I am not one who believes that Mr. Gorbachev got to his current position with a mandate to improve the human rights record of the Soviet Union.

But he has expressed his interest in better relations with the United States.

I am sure Mr. Gorbachev has gotten a lot of free advice in the past couple of weeks as to how to go about that task. But I can add a few suggestions of my own.

Free Anatoly Shcharansky. Free Josef Begun. Free Ida Nudel. Let the thousands and tens of thousands of refuseniks emigrate, as is their right. Cease persecuting those who teach Hebrew, who teach the Torah, who want to tell Jewish children in the Soviet Union the truth about Israel. Stop the official Soviet anti-Semitism.

Mr. President, we are not asking for anything to which the Soviet Union has not already pledged to adhere. Let us demand that the Soviet live up to these commitments.●

TERMINATING AID TO BOLIVIA FOR ITS FAILURE TO ERADICATE COCA

● Mr D'AMATO. Mr. President, I am pleased to be part of a bipartisan group of Senators cosponsoring Senator HAWKINS' bill (S. 790) to terminate aid to Bolivia unless that nation eradicates at least 10 percent of its coca crop. Last year, we provided Bolivia with $37 million in direct assistance. Bolivia has repaid our generosity by failing to eradicate even a single coca bush.

This bill makes clear our unwillingness to accept continued Bolivian inaction. After cutting off aid to Bolivia in 1980, we resumed direct assistance in 1983 because we were given the strongest assurances that the new government of President Siles would move aggressively to implement an eradication program. Clearly, no such action has been forthcoming.

Mr. President, we are not asking very much in this bill. We seek only a 10-percent reduction of a crop that exceeds 40,000 metric tons per year. At the same time, we are making it clear that we will no longer give aid to a country that continues to produce the coca that is the source of up to 50 percent of the cocaine being abused in this country. S. 790 gives teeth to the Diplomacy Against Drugs Act, originally sponsored by Senator HAWKINS in the Senate and Congressmen RANGEL and GILMAN in the House, to make that very same point. Although Congress overwhelmingly approved this legislation, which calls for the termination of aid to any country that does not make a serious effort to reduce its drug production, and which became law in 1983, it has never been invoked.

On January 10 of this year, the chairman of the Senate Foreign Operations Subcommittee, Senator KASTEN, and I held a hearing in New York City to examine our international narcotics control efforts. What we heard about Bolivia was very discouraging.

When I asked our Assistant Secretary of State about plans in Bolivia to deploy the various narcotics strike forces they have promised, he replied that the Government of Bolivia has committed to deploy these forces, but that "experience in Bolivia suggests that deployments are always subject to delay."

When I asked whether corruption was still endemic in Bolivia and a hindrance to his efforts, Mr. Thomas replied:

> Bolivia tends to be on the higher end of the scale of corruption that accompanies narcotics trafficking. A limiting factor in Bolivia which is largely attributable to corruption is the lack of capacity to convict traffickers who have the means to bribe their way out of apprehension.

A few weeks later, the State Department issued its 1985 International Narcotics Control Strategy Report. Intentionally or not, this report provides a very strong justification for the action that S. 790 requires. I would like to call my colleagues' attention to a few of the report's more telling observations:

> Cultivation of coca and refining and trafficking of illicit coca products have been increasing in Bolivia for nearly a decade . . .
>
> Projects to reduce coca cultivation, control marketing of legitimate coca and prevent diversion to traffickers are still in the organizational stage . . . Thus far, not enough progress has been made in this activity.
>
> Corruption, insufficient resources and inadequate laws have hampered GOB efforts to suppress coca production, refining and trafficking . . .
>
> . . . The coalition government which governed in 1984 has found it difficult to maintain a sustained commitment against narcotics or other issues suggesting that additional resources for law enforcement or coca control purposes should await concrete indications of increased GOB capability to combat narcotics production and trafficking.

Mr. President, we have tolerated the most meager and inconsequential results for too long. One million Americans are so dependent on cocaine that they cannot stop, and 5,000 Americans try cocaine for the first time every day. Up to 10 million Americans are regular abusers of this drug.

Every cosponsor of this bill supports strong prevention, treatment, law enforcement, and interdiction efforts. We recognize our responsibility to reduce the demand for drugs at home as we ask other nations to reduce their drug production abroad. By passing the Comprehensive Crime Control Act and strengthening our drug law enforcement agencies, we have begun to show that we mean to wage the war on drugs with more than rhetoric. But we have only begun.

We have the right to demand the cooperation of those who call themselves our friends. When we do not get that cooperation, we have the right to respond accordingly. Mr. President, I urge my colleagues to cosponsor this important legislation and to give it their full support. It is time to show Bolivia and the other drug-producing countries of the world that we meant what we said when we passed the Diplomacy Against Drugs Act. It is time to demonstrate that we intend to back our words with action, and that we expect those who accept American aid to do the same.●

THE 16TH INTERNATIONAL CONGRESS OF RADIOLOGY

● Mr. INOUYE. Mr. President, for the first time in nearly half a century, our Nation this year will be host to the world gathering of leaders in the medical discipline of radiology. I am pleased that the city of Honolulu will host the 16th International Congress of Radiology during the week of July 8-12.

This meeting will bring radiologists, physicists, biologists and other scientists together for 5 days of discussion about developments in the diagnosis of disease by medical imaging techniques

and the treatment of cancer by using ionizing radiation.

We in Hawaii consider it entirely appropriate that our beautiful State was chosen as the site of this international gathering. Our State is a place of modern scientific advancement and healthy living conditions for a diverse ethnic population.

The President of this Congress and the International Society of Radiologists is Dr. Robert D. Mosely, Jr., of Albuquerque, NM. Dr. Mosely is a past president and chairman of the board of the American College of Radiology. He holds gold medals bestowed by the American College of Radiology, the XIII International Congress of Radiology, and the Association of University Radiologists of England and an honorary member of the Swedish Society of Medical Radiology. He is the U.S. chief of delegation to the United Nations Scientific Committee on Effects of Atomic Radiation, a consultant to the Department of Energy, the U.S. Public Health Service, the National Institutes of Health and many other public agencies. Dr. Mosely is the chairman and professor of radiology at the University of New Mexico and previously held the same positions at the University of Chicago.

Among the members of the executive group is one of my constituents, Dr. Maurice Reeder of Honolulu.

Mr. President, we can all be proud of the world leadership of American radiologists in this demanding and important specialty. The use of x rays, nuclear scans, ultrasound, computed tomography, magnetic resonance generators, linear accelerators and other products of technological advances have had a vital role in the effective health care system of today.

I am certain that the Senate would wish to extend our hopes for the future efforts of American radiologists to share their scientific advances with the international medical community, and convey our best wishes for an informative and productive conference in Honolulu.●

EFFECTS OF THE STRONG DOLLAR

● Mr. GORTON. Mr. President, I ask to have printed in the RECORD an article by Larry Olsen, a realtor from the State of Washington, as an example of how our constituents view the effects the strong dollar has on industry and investment. Although I do not agree with all of Mr. Olsen's arguments, I believe it is important to remain aware of the deep concerns our constituents have in regard to this issue.

The article follows:

NO PERFECT INVESTMENT NOW

(By Larry Olsen)

A financial change of major proportions is affecting how we invest and do business in this current decade.

The value of our "floating dollar" is now determined by the price of gold on the foreign exchange markets. The daily outcome is a stronger or weaker dollar. Consequently, the Federal Reserve Bank is finding the dollar, monetary-wise, more difficult to manage.

Since the dollar first floated on Aug. 15, 1971, in that same year, we encountered our first annual trade deficit since 1893. The trade deficit for 1984 came to about $130 billion, and continues upward.

Foreign interests are controlling an estimated one trillion U.S. dollars, compared to only $55 billion in 1971, before the dollar floated. This imbalance, or loss of wealth, is increasing with the addition of the interest income and the deficit balance of payment differential that is going to foreigners. This situation has contributed to the international banking instability, and is causing a buffeting and uncertainty in our economy, felt worldwide, that transcends any previous predicted outcome in normal business cycles.

The United States, in countering this buffeting, is continuing to borrow heavily (domestically and internationally) to finance a standard of living, we, as a country, can no longer afford. The $200 billion annual projected deficits will continue to put pressure on keeping interest rates high.

The Federal Reserve Board chairman, Paul Volcker, since October 1979, has kept domestic interest rates relatively high in order to keep surplus dollars off the foreign exchange markets and to assist the treasury in selling U.S. government securities.

The good effect has been in lowering inflation from over 12 percent to around 4 percent. But the price has been high: A double recession, high interest rates, a strong dollar, an adverse export trade situation and a continuing large deficit balance of payments. Although the accompanying disinflation was painful to many, it put the Federal Reserve Bank back in better control of our monetary system.

However, since the dollar floated, it is now possible to have a recession and inflation at the same time. While the Federal Reserve Bank and the administration are imposing disinflationary pressures on the economy, the floating dollar can come under attack, beyond our control, in the foreign exchange markets and inflict external inflationary pressures on domestic prices in the United States.

Foreign importers simply purchase "cheap or weak" dollars and spend them quickly in the United States. This would be for commodities, corporations, etc. This could happen if foreigners pulled their dollars out of the United States and created a weak dollar in a downwards trend on the foreign markets.

On March 9, 1933, we devalued our currency by marking up the price of gold from $20.67 per troy ounce to $32. The net effect was to devalue our currency by 54 percent. Now this function occurs daily on the foreign exchange markets. The relative strength of the dollar will generally move in opposite direction to the price of gold.

The par value of the U.S. dollar was removed by Congress in PL94-564 (90 Stat 2660) on October 19, 1976, which became effective on April 1, 1978. This act officially eliminated any future dollar devaluation reporting by Congress.

Now we have only fiat currency of par value "zero." When we disinflate, value must come out of hard assets such as lower prices for gold, silver, real estate, etc., (barring any unusual demand), and results in a stronger dollar.

Currently the United States is in a deflationary mode. When the mode reverses to a definite inflationary trend, the domestic and world financial markets will bet on gold vs. the dollar. Timing will be the most important aspect.

The private sector as well as government at all levels must plan accordingly for more financial buffeting. An awareness to prevent being crunched by inflation or disinflation, as farmers, financial institutions, and others are now experiencing, will be paramount to financing survival.

Opportunities will be there for those who understand the effect of inflation and disinflation depending upon their assets as well as their liabilities.

There is no longer a perfectly safe investment that cannot be severely affected or damaged by inflation or disinflation under our present weakened monetary system.

Congress, the administration and the Federal Reserve have no easy choices left. Financial buffeting will continue and possibly get worse as we go along.

Financially, we will adapt . . . but the standard of living for most will be gradually dropping. People will be affected more severely at all levels of the financial spectrum, as the United States becomes a net debtor country in 1985 and beyond.●

VISIT BY PRIME MINISTER OF TURKEY

● Mr. LUGAR. Mr. President, as chairman of the Committee on Foreign Relations, I should like to call to the attention of my colleagues the visit this week to Washington of the Prime Minister of the Republic of Turkey, Turgut Ozal. The Prime Minister will be a guest of the Committee on Foreign Relations at a working coffee.

We extend a hearty welcome to the Prime Minister and wish him well in the economic, social, and political programs he has initiated to bring further prosperity to the citizens of the Republic of Turkey.

In 1985, Turkey continues as a bulwark of Western interests in a volatile region where autocracy and totalitarian forces are constantly on the move. Since its creation, the Republic of Turkey has sought close friendship with the people of the United States. That friendship has been proven time and again, even under trying circumstances. Citizens of the Republic of Turkey fought shoulder to shoulder with American forces in Korea, inspiring Dwight David Eisenhower to note: "No doubt the strongest and most reliable protector of European civilization is the Turkish army."

Just this past week U.S. News & World Report highlighted the course on which the Prime Minister has put his country in an article entitled "Turkey Bounces Back from the Brink." I ask that a portion of this article be printed in the RECORD.

The material follows:

"WE REQUIRE MORE MONEY THAN WE NOW GET FROM U.S."

(The Prime Minister who masterminded Turkey's return to economic stability warns that his country needs some extra aid if it is to pull its weight in the Western Alliance.)—ANKARA

Q. Mr. Prime Minister, what help will you seek for Turkey in talks with President Reagan and other U.S. officials?

A. Turkey is a developing country. Per capita income is only about $1,000. But despite economic difficulties we devote a large portion of our budget to our military, in part so it can fulfill its role as the defender of the southeastern flank of NATO. We have the second-largest Army in NATO, but it lacks modern equipment. Most of our equipment—our M48 tanks, for instance—dates from Korean War times. Our armor does not match that of some of our neighbors.

If NATO is sincere about wanting to strengthen its southern flank and to help us defend our long borders with Russia and Bulgaria, then we require large sums of money—more than we are now getting from the United States. And we need better aid terms as well. Until recently, our aid was mostly in loans at commercial rates.

Q. But doesn't the 1986 American military-aid proposal for Turkey include almost a third in outright grants?

A. Yes, and that is good. But still it is very little when compared with grants and forgiveness clauses the United States gives Israel and Egypt.

Q. Are you suggesting that Turkey's participation in NATO depends on the amount of aid you receive from the U.S.?

A. No, it does not depend on the amount of aid. We have to be a member of NATO because of the threat posed by our northern neighbors.

But our friends must understand that an economically weak Turkey is not a good member of NATO. A strong economy is essential for strengthening democracy. If some of Turkey's military-spending burden could be lifted from its shoulders, our economy could grow more productively.

Q. Are Turkey's relations with the Soviet Union improving?

A. On the economic front, yes. We will buy some of their natural gas, and they will purchase Turkish goods. And other tentative plans include possible Soviet industrial investments in Turkey. We hope that in five years trade with the U.S.S.R. will grow to a billion dollars a year, compared to 300 million dollars a year now.

Q. Do you share U.S. concern over Soviet expansionism in the Mideast and southwest Asia?

A. We are face to face with the heavy armor of the Warsaw Pact every day. We remain solid NATO supporters, and our views on security have not been affected by our improving economic relations with the U.S.S.R.

Q. Why does Athens call Turkey—not the Communist Warsaw Pact—the main threat to Greek security?

A. How can we be a threat to Greece when we are members of the same security pact—NATO? All this nonsense about a Turkish threat, I think, makes [Greek Premier Andreas] Papandreou's true motives clear: It is an election year in Greece, and he is using this propaganda in order to bring the Greek people around to his way of thinking.

One of my government's first foreign-policy steps was to extend an olive branch—several in fact—to Greece. We were rebuffed at every turn. I removed visa requirements for Greeks visiting Turkey as a good-will gesture; Papandreou did not respond. I offered to supply the Greek islands which are close to Turkey with water and electricity, which they need; again, no response.

True, we have serious differences with Greece, especially concerning the Aegean, which Greece wants to make into its own private lake. But we should sit down together and discuss this and other differences—something we have offered to do many times.

Q. Now that United Nations mediation has failed to settle the Cyprus dispute, what are prospects for an agreement?

A. The Turkish Cypriots have accepted the U.N. Secretary General's proposals. Failure is due to the Creek Cypriot leader, [President Spyros] Kyprianou, who is backed by Papandreou. Kyprianou rejected virtually every article in the U.N. Secretary General's draft agreement. I hope eventually, under the auspices of the U.N. Secretary General, a solution will be worked out. We do not want to create or prolong problems with our neighbors.

Q. Turkey has been successful in cracking down on terrorism. Do you have any advice for other nations?

A. First, the entire world must be firm in dealing with terrorism, as we were. In almost 10 years of anarchy, we lost more than 5,000 people in terrorist violence, and 25,000 were injured.

We cannot rest in the fight against terrorism worldwide. Since 1973, 42 Turkish diplomats have been killed by Armenian terrorists. These terrorists have links with the Red Brigades [in Italy], the Red Army in Japan and others. It can be stopped only by a united effort. There is a saying in Turkish: "A snake that doesn't bite me—let it live a thousand years." This seems to be the attitude of some countries toward terrorism. But I say that sooner or later the terrorist snake will bite every country if we do not work together to stop it.

Q. Yet, in quelling terrorism, Turkey has been accused of human-rights abuses, such as delays in bringing an accused to trial. How do you account for that?

A. Legal delays are due to the fact that we have dealt with the accused under Turkish law, which protects the rights of the defendant through a long trial process. If special martial-law courts had been set up to finish everything in one month, the world would have denounced them as puppet courts. Instead, the world denounces us for taking time to prosecute all cases carefully under our law.

Turkey is on the right course. It is a spirit we try to capture in the symbol of our political party, the Motherland Party—a bee hovering over a honeycomb. The honeycomb, shaped like Turkey, is the efficient engineering achievement, using the minimum amount of wax to get the maximum amount of honey. And we in Turkey are busy building the country—as busy as honeybees.●

A STUDY ON THE TERRORIST UNDERGROUND IN THE UNITED STATES

● Mr. DENTON. Mr. President, as chairman of the Subcommittee on Security and Terrorism of the Senate Judiciary Committee, I have an obvious interest in information concerning the activities and inclinations of terrorist groups, especially terrorist groups within the United States. Moreover, terrorism is a problem about which every Senator and Congressman must be cognizant because it directly affects us and our constituents every day.

Compared to many countries around the world, the United States has been fortunate in the limited amount of terrorist violence which has been perpetrated within its borders. However, we cannot allow this fact to allay our concern over the potential for terrorist violence in our country. In an effort to increase public awareness of this threat, the Nathan Hale Institute has recently published an article entitled, "The Terrorist Underground in the United States." The author of this work is Dr. Samuel T. Francis, formerly a policy analyst for the Heritage Foundation and currently a legislative aide for our distinguished colleague from North Carolina, Senator JOHN EAST.

Mr. President, in this work, Dr. Francis gives a very insightful report on the genesis of the terrorist threat in the United States. He concludes that we need to develop a system of proactive intelligence in order to improve our capability to respond to and prevent domestic terrorist activity. The necessary improvements in our intelligence system will be realized only if the Members of this body and of the House of Representatives are made aware of the nature and extent of the domestic terrorist threat.

To this end, Mr. President, I submit Dr. Francis' article for publication in the RECORD, following my remarks, and I encourage my colleagues and their staffs to read this informative study.

The article follows:

THE TERRORIST UNDERGROUND IN THE UNITED STATES

(By Samuel T. Francis)

A nationwide terrorist underground network is operating in the United States. The remnants of the Weather Underground, the Black Liberation Army, the Armed Forces of National Liberation (FALN) and other terrorist groups of the 1960s and 1970s have linked up in a "movement of independent but cooperating groups that believes in and practices the use of violence for political purposes." This movement was involved in the 1981 Brinks robbery, in which three murders were committed, and is responsible for a series of bombings since 1982, including the bombing of the U.S. Capitol in November 1983.

This terrorist underground may also be connected to foreign terrorist organizations. "There is an increasing body of facts to suggest at least a continuing liaison between the underground terrorist movement . . . and various foreign based movements."

Although the United States has experienced the violence of terrorist groups in the past, most Americans until recently probably have perceived terrorism to be a problem for foreign countries and their citizens rather than as a threat to themselves. In late 1983, however, a series of events com-

bined to stimulate public interest in the possibility and likelihood of major terrorism in the United States or directed at American targets abroad. These events included the mass murder of 241 American military personnel of the U.S. contingent of the Multinational Force in Beirut on October 23, 1983 by local terrorists; the bombing of the U.S. Capitol Building on November 7, 1983 by domestic terrorists; the deployment of special security measures at the White House and other federal buildings in December 1983 following a report of a possible terrorist attack; and increased security measures for the 1984 Olympic Games in Los Angeles, the World's Fair in New Orleans, and the National Conventions of the Democratic and Republican Parties against terrorist attacks.

The Federal Bureau of Investigation (FBI), the principal agency for the investigation of terrorism in the United States, reports a decline of domestic terrorist incidents in the last year. According to the FBI count, there were 31 terrorist incidents in the United States in 1983, compared to 51 in 1982. In previous years, the FBI counted 52 incidents in 1979, 29 in 1980, and 42 in 1981. On December 18, 1983 Judge William H. Webster, Director of the FBI, stated publicly that two-thirds of the terrorist incidents in the United States were related to Latin American or Caribbean political issues, and in testimony before the Subcommittee on Security and Terrorism of the Senate Committee on the Judiciary on March 14, 1984, Judge Webster stated that "it is important that the public not come to the conclusion that we are being overrun with people who support the overthrow of the United States. This country is very infertile ground for terrorism to thrive and succeed in its purpose."

Judge Webster's remarks and the recent FBI statistics may be taken as a commendable effort to avoid alarmist exaggeration of the terrorist threat in America. Nevertheless, some law enforcement authorities have questioned either the accuracy or the significance of the FBI's statistics on terrorism. Under the FBI definition of terrorism—"the unlawful use of force or violence against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of political or social objectives"—some criminal acts that are terrorist in nature may not be counted as such. In order to show "political or social objectives" as motivations, it is ordinarily necessary to have a communique or statement from the terrorist group acknowledging its responsibility and motivations for a violent act. Although such statements are common, they are not obligatory, and some terrorists do not acknowledge responsibility for all of the violent acts for which they are responsible. In many cases, moreover, terrorists will rely on comparatively minor crimes, such as assaults or threats, to intimidate or coerce a group, and in some cases even to specify a particular act as terrorist is difficult or impossible.

Nor does the apparent decline in terrorist incidents necessarily mean that terrorism is declining in importance in the United States. This decline may be due to recent disruptions of terrorist groups by law enforcement or it may be due to conscious decisions on the part of the terrorists to restrict their violence or to use violence more selectively. In general, terrorism becomes "important" in a society when the population or government feels that terrorism is a threat—when they experience intimidation or terror. The subjective nature of this feeling makes it very difficult to measure, and the number of terrorist incidents by itself does not necessarily reflect this subjective state. In the United States today, there is increased concern about terrorism due to the Beirut and U.S. Capitol bombings and similar incidents and perhaps a growing sense that the United States is vulnerable to terrorist attacks. This increased concern is due to the significance of the targets and the results of the attacks on them and not to the number of incidents or the size and skills of the terrorist groups involved.

These events and concerns therefore raise the problem of the extent and nature of terrorism in the United States—the degree to which there are terrorist groups extant in the United States at the present time; their goals, methods, and interconnections; and the likely targets and future prospects of such groups or of new groups or coalitions of terrorists. While there is no large terrorist movement in the United States today such as existed in Italy, Turkey or Uruguay in the recent past or such as exists in El Salvador or Lebanon today, there is a movement of independent but cooperating groups that believes in and practices the use of violence for political ends. This movement or its component groups has been responsible for a series of violent incidents in the last several years—incidents that have cost several lives and resulted in considerable property damage. The terrorist movement in the United States expresses support for a number of foreign terrorist groups and may have received support from them. The American terrorist movement appears to have undergone extensive reorganization in recent years and, although disrupted by the arrest of some of its key members and the disruption of some of its "safehouses" and organizations, may be escalating its level of violence (both in terms of the frequency of its attacks and of the nature of its targets), and it may become a much more serious threat to the internal security of the United States in the near future.

THE WEATHER UNDERGROUND NUCLEUS

The Weather Underground Organization (WUO), formed in 1969-70 from members of the "Weatherman faction" of the Students for a Democratic Society [SDS], is the parent group and probably the principal component of the most important underground terrorist network in the United States today. This network consists of three main components: (1) the WUO and its aboveground support apparatuses; (2) black terrorist groups (the Black Liberation Army or BLA and the Republic of New Afrika or RNA) to some extent descended from the violent "Cleaver faction" of the Black Panther Party (BPP) and similar groups of the 1960s; and (3) the Puerto Rican terrorist organization FALN and associated groups.

The most notable act of terrorism perpetrated by this network to date has been the so-called "Brinks robbery" of October 20, 1981—the armed robbery of a Brinks armored car of $1,589,000 in Clarkstown, N.Y., and the murders of two Nyack, N.Y., police officers and one Brinks Company guard. This incident is significant not because it was a success (in fact, it was a failure) but because the apprehension, trial, and conviction of its perpetrators and the subsequent investigation revealed for the first time a highly organized, clandestine, and nationwide terrorist network.

The Weatherman faction of SDS took its name from a line of singer Bob Dylan's song "Subterranean Homesick Blues"—"You don't need a weatherman to know which way the wind blows"—which served as the motto for a 16,000 word manifesto of the faction. The Weatherman took control of SDS in the summer of 1969 and a number of its members traveled to Cuba in August, where they met with Cuban and North Vietnamese officials who encouraged them to make use of violence to oppose U.S. participation in the Vietnam war. Thereafter, the Weatherman planned and led its first violent action, the "Days of Rage" rioting in Chicago on October 8-11, 1969, and carried out its first bombing (of the Haymarket police memorial statute in Chicago) on October 7, 1969. In December 1969, the Weatherman held a "national war council" in Flint, Michigan, at which an ideological line and tactical plans for terrorism were formulated. Thereafter, in February 1970, the Weatherman faction closed the national office of SDS and went underground. At this time the WUO was believed to consist of some 400 members.

From October 1969 to September 1975, the WUO claimed responsibility for approximately 40 bombings, including the bombing of the U.S. Capitol Building on March 1, 1971, of the Pentagon Building on May 19, 1972, and of the U.S. Department of State on January 28, 1975. From the mid 1970s, however, the WUO appeared to become less active as a terrorist organization. In 1977 several members and associates of the WUO were arrested in connection with a conspiracy to bomb the Offices of California State Senator John Briggs, and this action was the last known terrorist effort of the WUO. Several of its better known members surfaced in the late 1970s: Mark Rudd in 1977, Bernardine Dohrne, William Ayers, and Cathlyn P. Wilkerson in 1980. In 1979 the FBI closed its investigation of the WUO, and on December 28, 1981, Judge Webster stated publicly that "The Weather Underground Organization is not a viable organization. There is no evidence that such an organization is functioning."

In fact, since the early 1970s the WUO had undergone an extensive internal schism, over its organization, ideology, and tactics. In 1974, a new tactical line emerged in a manfesto of the WUO entitled *Prairie Fire: The Politics of Revolutionary Anti-Imperialism.* The new line consisted principally of an effort to build a mass party using all means of revolutionary struggle rather than to operate exclusively as a terrorist group. This change, which was called the "weather inversion" or "strategy of inversion," corresponded to a move closer to orthodox Leninist tactics and away from the "New Left" or "revisionist" tactic of Che Guevara and Regis Debray of reliance on a revolutionary "foco" that engages exlusively in "armed struggle" or terrorism. The latter tactic had originally been the basis of WUO strategy.

To implement the new strategy an aboveground support group, the Prairie Fire Organizing Committee (PFOC), was founded. Internal disputes over the new strategy continued, however, and in 1978 the New York chapter of the PFOC became the May 19th Communist Organization, while the West Coast PFOC retained its old name. Despite the internal disagreements among the factions and personalities of the WUO, public demonstrations in recent years suggest that all elements of the organization continue to cooperate.

It is the May 19th Communist Organization that serves as the principal support group and propaganda arm of the terrorist network that was responsible for the Brinks

robbery and murders as well as for the bombing of the U.S. Capitol Building on November 7, 1983 and for other bombings in the New York City and Washington, D.C., areas. The May 19th Communist Organization (MCO) takes its name from the common birthdates of Ho Chi Minh (May 29, 1890) and of Malcom X (or Malcolm Little, May 19, 1925). Its principal manifesto, written early in 1979, is *Principles of Unity of the May 19th Communist Organization.* This manifesto defines the MCO as essentially a support apparatus for "national liberation movements" engaged in "armed struggle" against "imperialism."

"We have seen the collective strength of national liberation forever alter the balance of forces against imperialism. Revolution is the main trend in the world, and revolution is being led, ideologically and on the battlefield, by the national liberation struggles for proletarian power.

"We have changed our name to the May 19th Communist Organization out of a commitment to follow that leadership."

While acknowledging that "the highest point of world revolutionary struggle has shifted to Southern Africa," the MCO declares itself to be "committed to the principle of Third World leadership" and it expresses support for a wide range of Marxist national liberation movements. In addition to its support for foreign terrorism, the MCO specifically endorses the use of terrorism within the United States:

"Armed struggle is the fundamental tool of oppressed people to win their liberation. We fully support, both politically and materially, the waging of national liberation war against imperialism. Around the world and in the U.S. vanguard forces will emerge and have done so through the building of armed clandestine movements and the waging of people's war. A central aspect of our support is the active defense of all political prisoners and prisoners of war captured by the imperialist state."

The MCO manifesto also expresses support for a number of far-left causes and groups within American society: womens' liberation (defined principally as "the struggle against lesbian oppression"), the "struggle against white supremacy," and solidarity with Puerto Rican, black, Chicano, and American Indian terrorists and violent activists in the United States. The themes expressed in the manifesto are of central importance in understanding recent American terrorist activity and its likely direction in the future.

THE BRINKS ROBBERY AND ITS CONNECTIONS

On October 20, 1981, a Brinks Company armored car was robbed of $1,589,000 in cash that it was preparing to transfer from the Nanuet National Bank in Clarkstown, N.Y. One of the guards of the Brinks truck was killed in the robbery attempt and two other guards were severely wounded when the perpetrators opened fire with shotguns. In an attempted escape from the scene of the robbery and murder, one of the vehicles bearing the perpetrators was stopped in a collision, and a second was stopped at a police roadblock. A third was successful in escaping. The occupants of the first vehicle were arrested. The occupants of the second vehicle opened fire on Nyack, N.Y., police at the roadblock and killed two policemen. The suspects then fled, although one occupant was arrested. The stolen funds were recovered by police the same day from the vehicles.

Those arrested on the day of the Brinks robbery were—

(1) Katherine Boudin, a member of the WUO and a fugitive since 1970;

(2) Samuel Brown, with no known political background but a record of arrests in New York City dating to 1958;

(3) Judith Alice Clark, a former member of the WUO and a current member of the MCO; and

(4) David Joseph Gilbert, also a member of the WUO and a fugitive.

In addition to these arrests, a number of suspects were apprehended in the following days. One of the vehicles used in the escape attempt was found to be registerd to Eve S. Rosahn, a member of the MCO as well as of the "Springbok Five", involved in violent demonstrations at Kennedy Airport in September, 1981. Rosahn was charged with criminal facilitation, but this charge was dropped on January 28, 1982 since her ownership of the vehicle by itself was not sufficient to sustain an indictment. Upon her release Rosahn made a public statement expressing "strongest greetings of solidarity to the captured combatants."

Tracing the license plates and descriptions involved in robbery, murders, and escape attempts led police to a series of apartments evidently used as "safehouses" by the gang. Two of these safehouses had been used by Marilyn Jean Buck, described as "quartermaster" of the BLA. These apartments were found to contain weapons, ammunition, communications equipment, false documents and disguises, lists of police officers and floor plans of area police stations, and radical political literature. The safehouses had been abandoned shortly before the police search, but evidence contained in them contributed to subsequent arrests.

On October 27, 1981, Cynthia Boston (aka Fulani Sunni-Ali), "minister of information" of the RNA, was arrested at RNA headquarters in Gallman, Mississippi. Boston and her common law husband, William Johnson (aka Bilal Sunni-Ali) has been identified from photographs by witnesses as having visited the safehouses, and a vehicle found at RNA headquarters had been identified as having been present at one of the safehouses shortly after the Brinks robbery. Despite this evidence, charges against Boston were dropped when a witness in New Orleans, Louisiana, affirmed that she had been in that city on the day after the robbery. Her husband, William Johnson, was arrested in the Central American country of Belize in November, 1982; he was extradited to the United States and indicted for his alleged role in the Brinks crime. Two former members of the WUO, Jeffrey C. Jones and Eleanor Stein Raskin, were also arrested on suspicion since their names had been found in one of the safehouses, but these charges were also later dropped. Jones pled guilty to a charge of bomb construction and received a light sentence on December 16, 1981.

In the course of 1982 and 1983 a total of eleven suspects were arrested and indicted on federal or state charges growing out of the Brinks robbery and triple murders. After lengthy and expensive trials in the spring and summer of 1983, several convictions were obtained.

On September 3, 1983, Sekou Odinga (t/n Nathaniel Burns), a member of the Black Panther Party and the Black Liberation Army, and Silvia Baraldini, "national treasurer" of the MCO, were convicted on federal charges of conspiracy and racketeering that included the Brinks robbery and murders, a robbery and murder in the Bronx in 1981, and the escape of BLA leader Joanne Chesimard from prison in 1979. Two other defendants, Cecil Ferguson and Edward L. Joseph (a former member of the Black Panther Party and the BLA), were convicted on the same day as accessories, and defendants Iliana Robinson and Bilal Sunni-Ali (t/n William R. Johnson), were acquitted. On February 15, 1984, Odinga and Baraldini received sentences of 40 years imprisonment and a fine of $50,000; Ferguson and Joseph were sentenced to twelve and a half years.

On September 14, 1983, Judith A. Clark, David J. Gilbert, and Kuwasi Balagoon (t/n Donald Weems, a former member of the Black Panther Party and the BLA) were convicted on state charges of two counts of first degree armed robbery and three counts of second degree murder. On October 6, 1983, the three convicted defendants were each sentenced to three consecutive terms of 25 years imprisonment and concurrent terms of twelve and a half to 25 years imprisonment for armed robbery. Two other defendants, Katherine Boudin and Samuel Brown, were scheduled to be tried separately on state charges of murder and armed robbery. On April 26, 1984, Boudin entered a plea of guilty to the charges and on May 3 was sentenced to 20 years imprisonoment. On June 14, 1984, Brown was convicted of state charges of murder and armed robbery and on June 26 was sentenced to three consecutive prison terms of 25 years to life. Another suspect in the Brinks robbery, Samuel Smith (aka Mtayari Shabaka Sundiata, a member of the BLA) was killed by police in New York City on October 23, 1981 after he had fired on police officers seeking to arrest him. A .38 caliber bullet found in Smith's pocket after his death was later shown to have come from the gun of one of the police officers killed in the Brinks escape attempt.

Despite these conviction, the failure of the Brinks robbery, and the disruption of the network that the arrests and investigations caused, the Brinks incident was not an isolated crime, and some of its principal alleged perpetrators remain at large. Law enforcement authorities pointed to at least five earlier successful or attempted armed robberies in the same area as the one in Clarkstown with a modus operandi similar to that of the Brinks robbery. These robberies included: (1) an attempted robbery of an armored truck in Scarsdale, N.Y., on February 20, 1980; (2) an armed robbery of $52,000 from an armored car in the Bronx on February 25, 1980 and the murder of a guard during the robbery; (3) the armed robbery of $529,000 from an armored truck in Inwood, Long Island, on April 22, 1980; (4) an attempted robbery of an armored truck in Danbury, Connecticut, and the wounding of its driver on March 23, 1981; and (5) the armed robbery of $292,000 from a Brinks truck in the Bronx, the killing of one guard, and the wounding of another on June 2, 1981. In each of these robberies, as in the Clarkstown case, escape vehicles had been rented by a white male or female using the identification of a legitimate citizen. The actual robbery or robbery attempt was perpetrated by black males using shotguns, automatic rifles, and (in some cases) 9 mm. handguns. A total of $873,000 was stolen in these robberies; to date none of these funds has been recovered. At least three major suspects in the Brinks-related cases remain at large: Joanne Chesimard (aka Assata Shakur, a leader of the BLA); Jeral Wayne Williams (aka Mutulu Shakur, also a member of the BLA and RNA); and Marilyn Jean Buck of the BLA.

The terrorist, as opposed to the criminal or mercenary, nature of the Brinks robbery

and related crimes became apparent from the political affiliations and associations of several of the leading suspects as well as from the materials discovered in the safehouses. Aside from linkages among the WUO, the BLA, and the RNA, an additional connection to West coast terrorist activity was also revealed. One of the safehouses contained a picture of Betty Jean Abramson, a member of a group in California known as "Tribal Thumb" and its affiliate, the Wells Spring Communion (WSC); and a radio transmitter found in one of the abandoned safehouses in New Jersey was traced to this group through the Federal Communications Commission. The WSC and Tribal Thumb have been associated with the Symbionese Liberation Army and with the Charles Manson Family. Abramson and another member of the WSC, Wendy Sue Heaton, were wanted in the murder of Roseanne Goustin, a member of the Communion who tried to defect from it. Abramson was arrested in New York on December 19, 1981, and Heaton was arrested in New Orleans on June 4, 1982.

Tribal Thumb was founded by Earl Satcher, a former convict and member of the Black Panther Party who was killed in a gunfight on the group's property in 1977. Another founder, Benjamin Sargis, is the former husband of Heaton and worked as an organizer for "People In Need," a food distribution program organized by the Hearst family as a part of the ransom demanded by the SLA for the release of Patricia Hearst in 1974. Another individual who worked in this program at that time was Sara Jane Moore, who used the Tribal Thumb commune in California for target practice in August 1975, one month before she was arrested for an assassination atempt on President Gerald R. Ford. In the summer of 1982, the FBI was investigating the possible connections between Tribal Thumb and the Brinks robbery, including the possibility that Marilyn Jean Buck and other accomplices were hidden by the group after the robbery.

Despite these terrorist characteristics, the FBI was reluctant to categorize the Brinks robbery as a terrorist incident. There had been no communique from a group claiming the robbery or similar crimes for a political cause and as late as March 1982 the Terrorist Research and Analytical Center of the FBI included the Brinks robbery as only a "suspected terrorist incident." By early 1983, however, the FBI acknowledged that the Brinks robbery was indeed "a terrorist incident" "because of the politically motivated statements made by the subjects and because they have been linked to known terrorist groups dedicated to the overthrow of the United States Government".

The organizational support for the Brinks robbery as well as its political and terrorist character became clear on November 2, 1981 when the MCO and the RNA held a press conference "to extend our full solidarity to the captured combatants, the Black Liberation movement and in particular the Provisional Government of the Republic of New Afrika" (in the words of the MCO statement). The RNA expressed its solidarity with and support for the BLA and for "armed struggle." although it denied any connection between the Brinks robbery and the RNA. On November 5, 1981, the BLA itself issued a communique that began:

"On October 20th 1981, under the leadership of the Black Liberation Army, Black Freedom Fighters, and North American Anti-Imperialists, all members of the Revolutionary Armed Task Force, attempted an act of expropriation of 1.6 million dollars from an armored Brinks truck."

The John Brown Anti-Klan Committee [JBAKC], a WUO aboveground support group founded in 1977, issued a special edition of its newsletter, Death to the Klan!, in which it also expressed support for the perpetrators of the Brinks robbery, which it termed an "attempted expropriation" and noted that "We made an error . . . by referring to the attempted expropriation as the Brinks 'robbery'. We know that the use of this term contributes to the state's strategy of criminalizing a revolutionary act." (It may be noted that the term "expropriation" was used by both Lenin and the Brazilian terrorist Carlos Marighella to describe armed robberies committed to obtain funds for the financing of terrorist and underground activities).

Details of the background, organization, and purposes of the "Revolutionary Armed Task Force" were revealed during the trial of the Brinks defendants in the testimony of Tyrone Rison, a 36 year old convict currently serving a 12 year prison term for bank robbery in Georgia. Rison agreed to testify after pleading guilty to the armed robbery of an armored car in the Bronx on June 2, 1981 and to cooperate with federal authorities in the Brinks case.

Rison testified on May 2, 1983 that he had been recruited into a group called "The Family" at meetings of the RNA by Mutulu Shakur in 1976. Rison identified defendants Nathaniel Burns, Silvia Baraldini, William R. Johnson, Cecil Ferguson, and Edward L. Joseph as members of The Family. In later statements Rison described the leadership of this group as "The Action Five," consisting of himself, Shakur, Burns, Donald Weems, and Samuel Smith. This group had supervised or participated in armed robberies or attempted robberies as early as 1976 in Pittsburgh as well as robberies of a credit union in Arlington, Virginia, the Brinks robbery, and others. Rison also provided a detailed account of the escape of Joanne Chesimard from the Clinton, NJ, Correctional Facility on November 2, 1979. Rison, Burns, and Shakur, as well as Baraldini, assisted Chesimard's escape from prison, where she was serving a life term for the murder of a state trooper in 1973. On November 2, 1979, Burns, using false identification, was able to smuggle a revolver to Chesimard inside the prison. Following her escape, she was taken to a safehouse in New Jersey that was raided by police after the Brinks robbery two years later, given money from earlier robberies, and provided a plane ticket to the Bahamas.

Rison also described in his testimony an organization established in 1979 by Shakur as a front for the robberies and for illegal narcotics traffic. This organization, known as the Black Acupuncture Advisory Association of North America [BAAANA] was located in Harlem, and according to the FBI it served as a planning center for the robberies as well as a distribution center for cocaine and other drugs. According to Rison, the funds from the robberies were turned over to Shakur. As much as $100,000 from stolen funds may have been used for drugs and for living expenses by the group. It was from BAAANA that the perpetrators of the Brinks robbery itself allegedly left before carrying out the robbery and murders. It was also Shakur who served as the principal link between the blacks and the white radicals in the network, according to Rison.

Rison also was specific on the political motivations of the crimes. Shakur had originally recruited him, he testified, by asking him, "will I be willing to commit robberies to give money to the black people?" Although the Brinks robbery itself was originally intended to benefit the members of the group, according to Rison, Nathaniel Burns objected to this, saying, "We're not just going out robbing to put money in our pocket. Our purpose is to rob for black people, as a mass of people, to channel the money back into the neighborhoods." As a result of Burn's argument, it was decided by the group that the money from the Brinks robbery would "go to the political struggle, just like any other robbery."

Additional evidence of a link between the series of armed robberies in the New York area and the Weather Underground and its remnants was derived from false identifications used to rent vehicles that were involved in these robberies. It was discovered, for example, that the identifications of two legitimate citizens were used to obtain driver's licenses by persons who later rented vans used in two of these robberies (an attempted robbery in Greenburgh, N.Y., on February 20, 1980, and a successful robbery of $500,000 in Inwood, Long Island, on March 22, 1980). The legitimate citizens whose identifications were used had, in December 1979, purchased items at a boutique in Manhattan known as "Broadway Baby." Their identifications were used shortly after shopping at the boutique by other unknown persons to obtain false driver's licenses, and these licenses were used later to rent vehicles involved in the robberies. From September 1979 until February 1980 the manager of Broadway Baby was Bernardine Dohrn, a founding member and leader of the Weather Underground until her surfacing on December 3, 1980 in Illinois.

A fingerprint found on the application for a duplicate driver's license used to rent a van involved in a June 2, 1981 armed robbery and murder in the Bronx was established as being that of David Gilbert, and the handwriting on this application is identical to that on another application for rental of a van used in the escape of Joanne Chesimard. A copy of a rental agreement in the false name of "Judith Schneider," an alias used to rent a vehicle involved in the Brinks robbery of October 20, was found in the apartment of Katharine Boudin after her arrest.

WASHINGTON-NEW YORK BOMBING CAMPAIGN

Between December 16, 1982 and April 20, 1984 a series of 14 bomb explosions in the New York City and Washington, DC, areas has been claimed by three previously unknown terrorist groups. Analysis of the bombing techniques, rhetoric, and modus operandi of these bombings indicates that they were all committed by the same terrorist organization and that those responsible for the bombings are closely connected to groups involved in the Brinks and related "expropriations" discussed above. The three groups that have acknowledged responsibility for these bombings call themselves the Armed Resistance Unit [ARU], which claims most of the bombings in the Washington area; the United Freedom Front [UFF], which claims most of the bombings in the New York area; and a group that is probably part of the same terrorist complex, the Revolutionary Fighting Group [RFG], which has acknowledged responsibility for one bombing in the New York area. To date, there have been no casualties or injuries in these bombings, although considerable property damage has been sustained by the

governmental and corporate institutions attacked. No one has to date been arrested or charged in connection with these bombings; and there is no reason to believe that this series of attacks has ceased or that it will not continue in the future. The chronology, place, targets, and claimants of each of these bombings is given in the table below:

Bombing Series, 1982-84 (Sources: FBI, Risks International, News Sources)

Date, place, target, claimant.

(1) 12/16/82 Elmont, NY, South African Purchasing Company, UFF.

(2) 12/28/82 Harrison, NY, IBM Building, UFF.

(3) 1/28/83 New York City, FBI Office, Staten Island, RFG.

(4) 4/12/83 Washington, DC, Fort McNair, ARU.

(5) 5/12/83 Uniondale, NY, Army Reserve Center, UFF.

(6) 5/13/83 New York City, Naval Reserve Center, UFF.

(7) 8/18/83 Washington, DC, U.S. Navy Yard, ARU/FMLN.[1]

(8) 8/21/83 New York City, National Guard Armory, UFF.

(9) 11/7/83 Washington DC, U.S. Capitol Building, ARU.

(10) 12/13/83 East Meadow, NY, Navy District Recruiting Center, UFF.[2]

(11) 1/29/84 New York City, Honeywell Corporation, UFF.[3]

(12) 1/29/84 New York City, Motorola Corporation, UFF.

(13) 3/19/84 Harrison, NY, IBM Office, UFF.

(14) 4/20/84 Washington, DC, Officers, Club, Fort McNair, ARU(?).[4]

The modus operandi of these bombings has tended to be the same in almost all of them. The M.O. consists of timing the explosive device to detonate at a late hour of the night (often 11:00 P.M.-12:00 Midnight) and of placing a warning call, usually to a news media outlet, shortly prior to the explosion. This call is often accompanied by a tape-recorded message that warns of the impending explosion, claims it for the particular group, and gives a reason for the bombing (usually on behalf of a South African, Central American, or Puerto Rican terrorist group and in opposition to U.S. policy in these countries). A typed communique is distributed by the group or its above-ground support units after the bombing.

The construction of the bombs in this series has also tended to be similar—sticks of dynamite with similar caps and often placed in attache cases. In the Washington area at least, the bombs have had dual firing mechanisms to avert a possible failure of a single mechanism. The bombing material of the more recent UFF bombings in the New York area has been dynamite stolen from the New England Explosives Company in New Hampshire in November 1983.

In an oversight hearing before the Subcommittee on Security and Terrorism on March 14, 1984, Judge Webster testified:

"We do know that the Armed Resistance Unit and the United Freedom Front . . . tend to supply the same rhetoric with respect to U.S. policies, the same kind of words that we experienced among some of the other dissident groups that became dormant and which have, in a way, metamorphosized through other organizations that we have been watching closely, particularly as a result of the Nanuet robbery, the Brinks robbery which I referred to earlier in my testimony. . . . The inferences we are drawing result not only from the rhetoric of the claims, but also from the nature of the explosives that were used in all of these cases and the manner in which they were put together."

Further indications of a connection between the UFF/ARU bombings and the Brinks case arise from a publication of the MCO entitled Armed Propaganda Against the U.S. War Machine: Communiques from the Armed Resistance Unit and the United Freedom Front 1982-1983, Compiled with an introduction by the May 19th Communist Organization, published in the spring of 1984. This compilation consists of ten communiques from the UFF and ARU expressing their responsibility for the various explosions in the bombing series, and it also includes a communique from the Puerto Rican terrorist group FALN expressing responsibility for bombings in New York City on December 31, 1982. The whole compilation and especially the introduction by the MCO may be taken as an expression of solidarity of the MCO with both FALN and the UFF and ARU.

The terrorist strategy of the bombings is explained in the "Introduction"; the bombings expose the vulnerability of a system in extreme contradiction with the people it rules—it has to beef up its security because it doesn't know when it will be attacked. "Democratic rights" in a "free and open" system clearly become expendable, and the real nature of the system as an empire thriving on colonial oppression is exposed.

Thus, the purpose of the terrorist activity is to intensify the security and counter-terrorist measures of the government and the established authorities so that its truly "repressive" nature will become clear and resistance to it will be increased. This concept is closely related to the idea of Carlos Marighella, the Brazilian terrorist of the 1960's, who wrote in his Minimanual of the Urban Guerrilla (published in Havana in 1970)

"The government has no alternative except to intensify repression. The police networks, house searches, arrests of innocent people and of suspects, closing off streets, make life in the city unbearable. The military dictatorship embarks on massive political persecution. Political assassinations and police terror become routine.

"In spite of all this, the police systematically fail. . . . The people refuse to collaborate with the authorities, and the general sentiment is that the government is unjust, incapable of solving problems, and resorts purely and simply and simply to the physical liquidation of its opponents."

It is unlikely, however, that this strategy ever works very well. It did not work in Brazil, nor in Uruguay, where the Tupamaros followed a similar plan. Two reasons why it does not work are that (a) governments do not necessarily meet increased terrorism with genuine repression and (b) even if they do resort to repression, this may be effective in suppressing the terrorists (e.g., Uruguay).

The "Introduction" continues:

"These actions [bombings] have begun to provide revolutionary leadership for those American people also who are truly disturbed by the u.s. [sic] invasion of Grenada, and for the growing solidarity movements with the peoples of Central America. . . . For revolutionaries in the oppressor nation, solidarity with national liberation struggles provides the political basis upon which we will polarize the white proletariat to organize significant sectors of it to fight for socialist revolution. Recognizing the leadership the oppressed nations struggling for independence and socialism offer in the dismemberment of the imperialist system calls for a strategy in the oppressor nation that makes war on the warmakers."

Among the forces that the MCO recognizes as fighting imperialism and engaging in "revolutionary resistance inside the u.s.—to fight the world's enemy on its own turf" are the Black Liberation Army, FALN, and "captured freedom fighters inside u.s. prisons." The MCO therefore sees itself and its terrorist allies in the United States as complementing the terrorism and guerrilla warfare of the "national librations movements" in the "imperial system" (e.g., southern Africa, Central America, and the Middle East) as well as leading terrorists and urban guerrilla campaigns within the United States.

FALN

The Fuerzas Armadas de Liberacion Nacional [FALN or "Armed Forces of National Liberation"] is an underground terrorist organization that has operated in the continental United States (principally in the New York and Chicago areas) since late 1973. Between 1973 and 1983 FALN has been responsible for some 100 terrorist bombings and the deaths of five persons (four of whom were killed January 24, 1975 in the FALN-claimed bombing of Fraunces Tavern in New York City). FALN has also been involved in armed robberies and has planned at least one kidnapping. The organization collaborates with and often coordinates its terrorist activities with terrorist groups that operate on the island of Puerto Rico. The ostensible goal of FALN and its sister terrorist organizations is national independence for Puerto Rico from the United States.

In 1982 FALN claimed 11 bombings in which three persons were injured. In 1981 and 1983 FALN claimed no bombings, but a related group, the Puerto Rican Armed Resistance [PRAR], claimed responsibility for five bombings in 1981 in which one person was killed. Most authorities believe that the PRAR was either a faction of FALN or FALN itself operating under another name.

FALN and the Puerto Rican terrorist groups with which it collaborates are Marxist-Leninist in ideology, and FALN is closely related to the Puerto Rican Socialist Party (PSP), which is in fact the Communist Party of Puerto Rico and maintains close links to Havana. FALN is also traditionally close to the WUO and currently may be considered a branch of the underground terrorist movement in the United States responsible for the Brinks and other armed robberies and the bombing series discussed above.

On February 28, 1982, FALN claimed responsibility in a typed communique for the bombing of four American financial institutions in New York City. The communique expressed solidarity with the three northamericans captured in the Brinks exprpriation [sic]. By linking up with your Black comrades and making their struggle your own you have put into practice the Leninist principle which states that the duty of the working class and the advanced sectors in the imperialist countries is to actively assist and fight for the liberation of the colonies.

The May 19th Communist Organization distributed the FALN communique for five

[1] FMLN: Faribundo Marti National Liberation Front.

[2] Two bombs were detonated.

[3] Attempted bombing.

[4] The Puerto Rican terrorist group FALN alleged claimed the bombing, but it is probable that the same persons composing the ARU were actually responsible.

bombings in New York City on December 31, 1982 and stated that "Terms for this period of armed activity were defined when the . . . FALN bombed" these targets in New York on that date. The above-ground support groups of both FALN and the terrorists in the Brinks case often express support for each other.

The communique for the bombing of the U.S. Capitol Building on November 7, 1983, also distributed by the MCO, stated in its last paragraph:

33 years ago almost to the day, Oscar Collazo and Griselio Torresola, two Puerto Rican Nationalists fighting for Independence for Puerto Rico, attacked another part of imperialist power—the Commander-in-Chief, the President of the U.S. Their action was one of the first in which the oppressed brought the war back to the doorsteps of the oppressor. We salute them and all those Puerto Rican, Mexican, New Afrikan, Native American and North American freedom fighters who have been killed or cpatured in the struggle. To them also, our action carries a message—our commitment to carry on the struggle.

The action to which the ARU refers in this communique is the assassination attempt against President Harry Truman on November 1, 1950 by Collazo and Torresola, two members of the Puerto Rican Nationalist Party which in many respects was a predecessor of the PSP. Although President Truman was not harmed in the assassination attempt, Torresola and a White House police officer were killed. Collazo was sentenced to death; this sentence was commuted to life imprisonment by President Truman, and Collazo was released from prison by a further commutation of his sentence by President Jimmy Carter in September 1979.

One reason for the recent comparatively inactive state of FALN terrorism is that since 1980 some of its principal members have been apprehended. On April 4, 1980 police arrested eleven members of FALN in a raid on a safehouse in Evanston, Illinois. One of those arrested at that time was Carlos Alberto Torres, at that time the top-ranking name on the FBI's "most wanted" list. Torres and seven other FALN members were subsequently sentenced to eight years in prison for possession of a sawed-off shotgun and conspiracy to commit armed robbery. Two others received 30 year sentences, and Torres's wife, Maria Haydee Torres, was extradited to New York, where she had earlier been sentenced to a life term for a bombing on August 3, 1977 that took the life of one person.

On May 26, 1983 Mexican federal police arrested another FALN member, William Morales, in Puebla, Mexico. Morales, reportedly the principal bombmaker for FALN, escaped from a Bellevue Hospital prison ward in 1979 after being sentenced to a ten year term for conviction of federal weapons and explosive charges. Morales lost most of both his hands in the explosion of a bomb he was constructing at the time of his arrest in 1978. Documents found in Morales's possession at the time of his arrest in Mexico as well as his own subsequent confession revealed that he was planning an attack on a meeting of Mexican and United States Congressmen scheduled for May 26.

A subsequent blow to FALN occurred on June 29, 1983 when four of its members were arrested and two of its safehouses were raided in Chicago. According to the U.S. Attorney in Chicago, FALN planned several bombings for the July 4 holiday in the area as well as attacks on Illinois jails where FALN members were being held.

BLACK LIBERATION ARMY AND REPUBLIC OF NEW AFRIKA

The third component of the underground terrorist movement in the United States consists of the remnants of revolutionary or nationalist black groups that originated in the 1960s. The two groups that are most prominent in this connection are the Black Liberation Army and the Republic of New Afrika.

The BLA developed from the violent "Cleaver faction" of the Black Panther Party in 1971. Supporters of Cleaver organized an "urban guerrilla" organization that was called the "Afro-American Liberation Army" [AALA] or the "Black Liberation Army." The former name was used by Cleaver's adherent, Elmer "Geronimo" Pratt, who had reportedly written a pamphlet in 1972 that explained and justified the AALA. Pratt stated in an interview in 1971 that he preferred the name AALA over BLA "because it recognizes our connectedness to Africa." At about that time the FBI reported that the Cleaver faction numbered approximately 150 members.

The first act of terrorism carried out under the name BLA occurred on May 19, 1971 when two New York City policemen were wounded by machinegun fire from a car traveling the wrong way on a one way street which they had attempted to stop. On May 21, two other NYPD police officers were shot in the back and killed after being called to a site in Harlem. A communique from the BLA to the New York Times delivered on May 21 claimed responsibility for the first attack. The latent fingerprints of Richard "Dharuba" Moore, a member of the "Panther 21" (a group of Black Panther Party members indicted in 1969 for planning to bomb public buildings) and an adherent of Eldridge Cleaver, were found on the envelope. Moore and others linked to the Black Panthers were later arrested during an attempted robbery on June 2, 1971 and a .45 caliber machinegun used in the robbery attempt as well as in the attack of May 19 was found on them. Moore was sentenced to life imprisonment in 1973.

The New York Times on February 19, 1972 reported that members of the BLA were wanted in connection with the murder of four NYPD policemen and for assaults on policemen in Atlanta, St. Louis, Kansas City, and Raleigh. On August 1, 1972 a group of five persons with three young children hijacked a Delta Airlines jet to Algiers, receiving $1 million in ransom for the release of the 87 passengers. The hijackers were met in Algiers by the Cleaver group (which was then residing in Algiers) and identified as members of the BLA. On February 15, 1973 an arms cache of the BLA was seized in Brooklyn. Two .45 caliber machineguns, one antitank 3.5 inch bazooka, six rifles, five shotguns, two .9 mm. pistols, and 200 rounds of ammunition were impounded. On May 2, 1973 Joanne Chesimard, Clark Squire (aka Sundiata Acoli) and James Costan (aka Zayd Malik Shakur), a former official of the New York Black Panther Party, were involved in a gunfight with police on the New Jersey turnpike. Costan and a New Jersey state trooper were killed and another trooper and Chesimard wounded. Chesimard and Squire were later captured and sentenced to prison, from which Chesimard escaped on November 2, 1979 with the aid of the BLA and a member of the May 19th Communist Organization. Squire attempted but failed to escape from prison in 1976.

On November 14, 1973 BLA leader Twyman Meyers was killed in New York, and the New York Police Commissioner stated that his death "broke the back" of the BLA, noting that five of its leaders had been killed and 18 were in custody. However, the BLA robbed banks in Berkeley, California, and New Haven, Connecticut, in the spring of 1974, critically wounding a police officer in the latter city. In April 1974 and in May 1975 the BLA was discovered to be involved in efforts to free its leaders from New York City jails. On April 16, 1981, New York City policemen John G. Scarangella was killed and his partner Richard Rainey was wounded after they had stopped a van for a routine check in Queens. Anthony LaBorde and James Dixon York, both former members of the Black Panther Party and the BLA were sought in this shooting, and they were arrested in January 1982 in Philadelphia and in August 1981 in South Carolina respectively. On August 9, 1982 a New York jury convicted LaBorde and York of attempted second degree murder in the shooting of Officer Rainey but was unable to reach a verdict in the death of Officer Scarangella. LaBorde and York were sentenced to terms of 8-25 and 12.5-25 years respectively. The inability of the jury to reach a verdict on the murder charge was due, according to some jurors, to racial feeling on the part of the largely non-white jury. A second trial of LaBorde and York on the murder charge also ended in a deadlock, and a mistrial was declared in October 1983.

Although LaBorde had been identified by witnesses to the Brinks robbery as having been involved in that crime, some witnesses were unable to identify him in a line-up after his arrest. Charges against LaBorde in the Brinks robbery were dropped in September 1982.

During the tour of the United States by the Springboks, the South African rugby team, in the summer of 1981, the offices of the Eastern Rugby Union in Schenectady, NY were bombed on September 22, 1981. The BLA took responsibility for this bombing in a communique and telephone call to a local radio station. Although the FBI later stated that "information obtained through investigation suggests that members of the CWP [Communist Workers Party] were probably responsible for this bombing," the John Brown Anti-Klan Committee, a group close to the BLA and MCO infrastructure, praised the bombing and acknowledged BLA responsibility. In the October-November 1981 issue of its Newsletter, Death to the Klan!, the JBAKC noted:

"This act of proletarian internationalism showed the unity and leadership of Afrikan and New Afrikan liberation struggles and set the terms for white anti-imperialists in the fight against white supremacy [sic]. In a separate action the 'All Whites' Rugby League of Indiana was bombed."

In a separate article in the same issue, the JBAKC noted:

"On August 20, 1981, the BLA launched an offensive against the police. They attacked a New York City policeman, stealing his gun and walkie-talkie, and leaving him in bad shape. The Red Unit of the Black Liberation Army took credit for the attack, which they said was in retaliation for the capture of James York, who had been the target of a vicious manhunt for months."

The Republic of New Afrika, a violent group advocating the independence under black control of five southern states, has

been closely related to the Black Panthers and the BLA. The RNA was founded in Detroit, MI, in 1968 by Milton and Richard (aka Imari Abubakari Aobadele) Henry, and its first president was Robert F. Williams, who, after fleeing a kidnapping charge, lived in exile in Cuba, Tanzania, and the Peoples Republic of China. Williams resigned the presidency of the RNA after his return to the United States in 1969, and Richard Henry assumed control of it.

RNA headquarters near Jackson, MS was raided on August 18, 1971; one police officer was killed and another officer and an FBI agent were wounded in the raid by gunfire from RNA members. Richard Henry and six others were convicted for their participation in a separate gun battle, and four persons were convicted of murder for their involvement in the fight at the Jackson headquarters.

In October 1971 a publication of the Cleaver faction of the Black Panther Party, Voice of the Lumpen, contained a communique from the BLA expressing its support for the RNA in its gun battle with the police in Mississippi. Another article on the same page praised the BLA shooting of two NYPD officers on May 19, 1971 and stated, "what could have been more fitting than to kick it off on Malcolm's birthday [May 19]." Although Cynthia Boston and her husband, William Johnson, were not convicted for their alleged role in the Brinks robbery, the RNA has expressed support for terrorism, and several members of the RNA were convicted for their involvement in the Brinks robbery. In 1981 Chokwe Lumumba, a member of the RNA and its minister of justice," claimed that as of 1977 the RNA had rebuilt its structure and was active in twenty states.

PRISON ORGANIZING

One of the most likely sources for new recruits to the BLA and other components of the terrorist underground in the United States is the prison population, especially those of black or Hispanic background. A number of BLA members have been convicts, and some have been recruited while in prison and have escaped from prison due to efforts by the BLA. Since at least the early 1970s radical and extremist groups have consciously sought to politicize and recruit convicts under the guise of "prisoners' aid" or "prison reform."

The National Lawyers Guild [NLG] is an organization of leftist orientation that was described in 1950 by the House Committee on Un-American Activities as "the foremost legal bulwark of the Communist Party." Today, it remains the principal U.S. affiliate of the International Association of Democratic Lawyers [IADL], described by the Central Intelligence Agency in 1978 as "one of the most useful Communist front organizations at the service of the Soviet Communist Party." In 1971 components of the NLG began publication of a prisoners' newsletter entitled Midnight Special. The editor of this newsletter was Russell Neufeld, indicted or arrested several times for violent activities in association with the Weathermen in 1969-70; another editor of the Midnight Special was Judith A. Clark, later convicted of murder and bank robbery for her role in the Brinks robbery. Susan Tipograph, a member of the NLG and a lawyer who defended Silvia Baraldini of th May 19th Communist Organization during her trial for complicity in the the Brinks robbery, visited both Marilyn Jean Buck of the BLA and William Morales (also her client) shortly before their escape from prison. It will be recalled that Baraldini was convicted for her alleged role in the escape of Joanne Chesimard from prison. Baraldini had been legal assistant to Tipograph prior to her arrest. In a number of cases, NLG members have been indicted or subpoenaed for alleged roles in the escape of attempted escape of terrorists from police custody or prison.

Prison gangs, increasingly considered a serious problem by penal authorities, offer an organizational base by which convicts can be politicized or ideologized. One of the four largest such gangs is the black Guerrilla Family, described by Detective Arleigh McCree of the Los Angeles Police Department in testimony before the Subcommittee on Security and Terrorism on August 12, 1982 as "essentially the inprison component of the Black Liberation Army," and he added,

"I know many of them and have known many of them for years. They are a revolutionary group inside the prison walls. Their philosophy is entirely compatible, if not identical, as I say, to the Black Liberation Army's. They seek revolution, and they are a very violent group. Many of them are very proficient with weapons and explosives, and Mr. Pratt [Elmer "Geronimo" Pratt, a founder of the BLA and leader of the Black Guerrilla Family, now in prison], of course, being supreme in that category, I might add."

Arm the Spirit, a "revolutionary prisoners newspaper" published in Berkeley, CA, has published communiques from BLA and MCO in support of the Brinks robbery as well as communiques from the RNA and other violent or extremist groups from prison chapters in Iowa, Washington state, Tennessee, Pennsylvania, and other states. It has also published a statement of "Coalition to Support Black August," a group associated with the Black August Organizing Committee, which defines itself as comprised of prisoners who define themselves as Afrikan revolutionaries dedicated to the national liberation of Afrikan people in this country and to the ongoing struggle against racism, exploitation and police brutality in prison and in the Afrikan community. . . . It has . . . built significant unity and solidarity between the prison movement and the struggles in El Salvador, Iran, the Native American struggle and other Third World and progressive movement.

Given the similarities between this "anti-imperialist" theme and the ideology of groups such as the MCO, RNA, BLA, ARU, UFF, JBAKC, etc., it is not surprising that, as the Information Digest noted, the Coalition to Support Black August "has been seeking national support from organizations associated with violence-oriented and terrorist groups including the Weather Underground Organization and the Communist Workers Party."

FOREIGN CONNECTIONS OF U.S. TERRORISM

The rise of transnational terrorism in the 1970's, with support from regimes such as those of Libya, Iraq, and Syria, as well as the Soviet Union, Cuba, and East European satellite countries, has led to speculation on the extent of foreign support for terrorist activity in the United States. The position of the FBI on this question has varied somewhat over the past few years. In a speech of July 6, 1978 Judge Webster expressed doubt that Cuba supported American terrorists, although he did suggest that "many of the propaganda manuals" of Puerto Rican terrorist groups had been printed in Cuba. On April 26, 1981, speaking on "Meet the Press," Judge Webster stated that "there is no real evidence of Soviet-sponsored terrorism within the United States." More recently, in the aftermath of the bombing of the U.S. Capitol Building, Judge Webster told reporters on November 10, 1983 that support from the Soviet Union and Cuba to American terrorists "cannot be ruled out," but reiterated that he did not have evidence of direct involvement.

It must be noted, however, that there is an increasing body of facts to suggest at least a continuing liaison between the underground terrorist movement described above and various foreign based movements—especially the so-called "national liberation movements" of the Third World which are themselves often closely connected to and supported by the Soviet Union and its satellites. In the late 1960s and early 1970s, the WUO, the Venceremos Brigade, and similar "New Left" groups in the United States had extensive contacts with and support from the governments and intelligence services of the Soviet Union, Cuba, North Vietnam, Communist China, and some East European Soviet satellites. Much of this support was documented in a 98-page summary of evidence presented by the defense in the 1980 trial of FBI officials Mark Felt and Edward Miller. To cite only one instance from this document—prepared with the assistance of the FBI—"the FBI learned from a reliable source that Weatherman Howard Machtinger was in Canada being instructed by a Russian advisor on how to make bombs." In 1973 the Annual Report of the FBI stated

"A current tabulation shows that approximately 135 leaders of subversive Puerto Rican independence groups have traveled to communist Cuba for indoctrination and/or training. Many of them received extensive instructions in guerrilla warfare tactics, preparation of explosive devices and sophisticated sabotage methods.

"A large majority of persons so trained have instructed others upon their return to Puerto Rico and have carried out acts of sabotage there. Dozens of these individuals are presently awaiting trial for violations of Puerto Rico's Explosives Law or are being sought as fugitives for such violations. It is commonly thought that vigorous police action against these terrorists is primarily responsible for the decline in the number of bombings during the past year."

As late as 1976 a California based terrorist group, the Emiliano Zapata Unit, had an adviser named Andres Gomez who was identified by American intelligence sources as an officer of the DGI, the Cuban intelligence service. Gomez disappeared after the group was apprehended by police. Extensive information on Cuban involvement in terrorist incidents in the United States was presented in hearings before the Subcommittee on Security and Terrorism in February and March 1982.

In September 1981, Judith Clark, arrested one month later for her role in the Brinks robbery, represented the May 19th Communist Organization at a conference in Lebanon sponsored by the Palestine Liberation Organization and the Lebanese National Movement. According to the newsletter of the John Brown Anti-Klan Committee of October-November 1981 "500 delegates attended, primarily from Western and Eastern Europe, and the socialist countries and National Liberation movements." According to Clark herself, "The conference was an inter-

national conference in solidarity with the Lebanese and Palestinian struggles."

As noted above, the MCO, UFF, and ARU have frequently expressed their solidarity with and support for the national liberation movements of the Third World. Their solidarity with such movements in southern Africa is especially significant. Several of the bombing targets of the UFF have been facilities associated with the Republic of South Africa or trade with South Africa. The bombings by the UFF of the South African Purchasing Office and an IBM office in Elmont and Harrison, N.Y., on December 16, 1982 were carried out "in the spirit of resistance with the African National Congress and Nelson Mandela and all African peoples on the motherland," according to the UFF communique. It is perhaps significant that the date December 16 is a special one for the African National Congress (ANC), a Communist Party-dominated terrorist group in South Africa. As Sechaba, the official organ of the ANC (printed in East Germany), expressed it in December 1981:

"On December 16, 1961, organised acts of sabotage against government installations took place, marking the emergence of Umkhonto We Sizwe (The Spear of the Nation) which was later to become the armed wing of the ANC. The date, December 16, which was chosen for the initial sabotage acts, was of historical significance. . . .

"To the Africans this day symbolises resistance and the indomitable quest for freedom. . . ."

The date December 16 is celebrated in South Africa as the anniversary of the Battle of Blood River on December 16, 1938 in which the Afrikaners defeated the Zulu warriers; to the ANC and its adherents, however, the date "is thus symbolic for the ascendancy of white power over the Blacks."

Two days after the UFF bombings in New York, the ANC itself carried out a bombing of the Koeberg nuclear power station under construction near Cape Town. Four bombs were exploded and claimed by the ANC on December 20. The ANC stated that "the explosions served as a warning to foreign investors in South Africa of what would become of their investments." The Koeberg plant was being constructed with the aid of a French consortium. The UFF in its communique on the bombing of IBM also emphasized that foreign investors have been significant in developing South African industry and (allegedly) apartheid and racism, quoting the ANC to this effect, and rationalized its bombing as a warning to other foreign contractors and investors in South Africa.

The relationship between the Brinks robbery-murders and the ANC and other southern African terrorist movements is suggested by reports of visits to radical states in that region and of guerilla training by these states or associated terrorist movements. According to a report of the International Association of Chiefs of Police, . . . component elements of RATF [Revolutionary Armed Task Force, the nom de guerre applied to the Brinks gang] have raised funds and maintained political connections with the ZANU Popular Front that is currently ruling the African country [Zimbabwe] undergoing revolutionary upheavals.

Silvia Baraldini of the MCO has visited Zimbabwe under its present government and has stated May 19th Communist Organization in 1977 began actively to work with the Zimbabwe African National Union [ZANU]. We supported the party in their struggle to lead the Zimbabwean people to independence, to overthrow the white settler regimes and to end the presence of British imperialism in their country.

Nathaniel Burns, also convicted for his role in the Brinks robbery and murders, has been reported to have received guerrilla training in Angola from Cuban advisers to the Marxist MPLA, which now rules Angola, and to have fought with the South West African Peoples Organization [SWAPO]. After her escape from prison in 1979, Joanne Chesimard reportedly expressed interest in seeking refuge in Libya, Angola, Cuba, or China according to witness Tyrone Rison. On March 8, 1982, an FBI listening device recorded a conversation between Mutulu Shakur, one of the leaders of the RATF and still at large, and Edward Joseph, later indicted and convicted as an accessory in the Brinks case, during a meeting in Greenwich Village. Joseph is reported to have stated, "We should be concentrating on lining up bankroll, making a flamboyant move, leave here for Zimbabwe."

Although no definite conclusions can be drawn at this time regarding material assistance from foreign states or terrorist groups to those involved in the Brinks crime and similar terrorist incidents, it is clear that the American terrorists feel and express strong sympathy for a number of Marxist terrorist movements and states in the Middle East, southern Africa, and Central America; that there is reliable information of some cooperation between these American terrorists and their foreign counterparts; and that the possibility of more extensive foreign support for American terrorist activities not only cannot be excluded but also should be aggessively investigated.

CONCLUSION

The core of the underground terrorist movement in the United States consists of elements that grew out of the Weather Underground Organization of the 1970s operating in alliance with violent organzations of black nationalists (the BLA and RNA) and with FALN. It is unlikely that this core is numerically large, although its periphery, the above-ground support groups, is larger. The Brinks robbery and the subsequent investigations and trials appear to have disrupted its organization and strategy. Nevertheless, this movement remains the most dangerous terrorist group in the United States. It has show itself capable of operating clandestinely for some years prior to its accidental failure and exposure in the Brinks incident. It was able to accumulate at least several hundred thousand dollars through "expropriations," to free incarcerated members and sympathizers from prisons and provide them security, to establish a network of safehouses, to create vitually a nationwide (and perhaps an international) network of supporters and sympathizers, and to maintain communications with and discipline over this network. Most of the $873,000 stolen in armed robberies prior to the Brinks incident remains unaccounted for, and a number of the principal suspects in these robberies remain at large—including the command nucleus of the Black Liberation Army, Joanne Chesimard, Mutulu Shakur, and Marilyn Jean Buck. As long as these three remain at large and as long as convict recruiting and organizing continues, it is likely that the BLA or similar groups will continue their terrorism.

Since the Brinks robbery the terrorist underground has shown itself capable of constructing, placing, and detonating over a dozen bombs, and not one of these bombings has yet been solved by law enforcement authorities. One of these bombings (of the U.S. Capitol Building in 1983) attracted international attention and has been a principal factor in increasing public awareness of and governmental concern about terrorism. Although most of these bombings were probably not intended to kill, it is a fair assumption that those responsible for them do not seriously object to killing. Certainly this is suggested by both their public rhetoric as well as their continuing defense of the murders in the Brinks robbery and escape. Had the United States Senate been in session on the evening of the Capitol bombing, a number of Senators and staff members could easily have been killed or seriously injured. The terrorist movement therefore has the capacity and the will to take life and use violence for its ideological purposes, and it may be merely a matter of time before it embarks on an intentionally murderous course to make its point.

The terrorist underground, however, is only one of a series of terrorist groups believed to be operating in the United States, although there is little evidence as yet of firm linkages among most of these other groups. In mid 1984, the FBI was reported to be actively investigating 19 U.S.-based groups suspected of terrorism and to be cooperating with foreign authorities in the investigation of 15 to 20 other groups believed to be involved in international terrorism. Oliver B. Revell, Assistant Director of the FBI, noted that 40 percent of all terrorist activities (including international terrorism) target U.S. individuals or assets. The widespread nature of the terrorist threat has led some authorities to warn of increased terrorism in the United States, despite the apparent decline in terrorist incidents as counted by the FBI. Brian Jenkins of the RAND Corporation, for example, stated in late 1983 that that year "is going to be probably the bloodiest year for which we have any statistics" and "In looking at incidents with 10 or more fatalities, we have had more already this year than in 1980-82 combined." The Department of State in November 1983 counted 300 deaths due to international terrorism in Beirut alone, as compared to 150 deaths from all international terrorism in 1982, and Jenkins estimated that the death toll from all international terrorism in 1983 would be about 500 and from "local terrorism" worldwide about 2000 to 5000. In December 1983 Senator Daniel P. Moynihan, Vice Chairman of the Select Committee on Intelligence of the U.S. Senate, stated, "I think the prospect of 1984 being the year the [terrorists] bring the war to our shores is real. We should assume it and not be surprised by it." W. Raymond Wannall, a former Assistant Director of the FBI and a well-known expert on terrorism and internal security matters, has also suggested that 1984 could be the "Year of the Terrorist" in a recent publication of the Nathan Hale Institute.

In preparation for anticipated terrorist attacks, several government institutions established new security precautions and procedures. Three days after the bombing of the U.S. Capitol Building, the Congress established special identification badges for staff members and mandatory use of metal detectors and searches for visitors to Congressional buildings, and access to certain parts of the Capitol Building was restricted for tourists and visitors. Other special precautions were implemented by the White House, the Pentagon, and other government buildings in November and December 1983,

after reports or threats of bombing attacks were received.

Further plans for offensive as well as defensive measures against terrorism were drafted or implemented in early 1984. The most impressive (in theory and actuality) were those for the Summer Olympics, although there were jurisdictional disputes between the FBI and the LAPD. Security provisions for the Summer Olympics cost more than $100 million (about ⅛ of the total budget for the Games), and the Congress appropriated an additional $50 million in the event of a major incident requiring military intervention. Military helicopters and special communications and surveillance equipment were also purchased with federal funds. Because of the diversity of jurisdictions involved in the Olympics, no single agency had comprehensive control of security procedures, although interagency agreements for cooperation were evolved. Over 16,000 personnel were employed for security purposes at the Games, and according to Edgar Best, in charge of security for the Olympics, "This Olympics will be the first in which we take full advantage of high technology in security." In addition, the FBI developed and sent to the Olympics a hostage rescue team of 50 FBI agents that was specially trained in sharpshooting and offered an alternative to the use of military force.

In addition to precautionary measures, the Department of Defense also developed anti-terrorist plans, training, and procedures in the aftermath of the Beirut bombing, and in early 1984 the White House issued a National Security Council Directive (NSDD-138) reportedly implementing more aggressive measures for combatting terrorism. This new policy toward terrorism was reflected in Secretary Shultz's public comments on the concept of regarding terrorism as a form of warfare, although it is still not clear if the full dimensions of this concept have been grasped. Finally, the Administration as well as members of Congress introduced new legislation intended to address international terrorist threats.

The most effective means of combatting terrorism does not consist in more legislation, executive orders, interdepartmental conferences, additional concrete barriers, or pamphlets such as this one. The most effective means of combatting terrorism consists of a domestic security and intelligence capacity adequate to investigate groups and individuals who are ideologically prone to violence and to anticipate and prevent their violence. Since at least the early or mid 1970s, the United States at the federal level (and increasingly at the state and local levels) has not possessed such a capacity, a defect examined in detail in W. Raymond Wannall's Who is Tracking the Terrorists, published by the Nathan Hale Institute. The imposition of the Attorney General's Guidelines for domestic security investigations (the "Levi Guidelines") in 1976 and the resultant erosion of domestic security investigations played an important role in allowing the formation of the underground terrorist movement in the late 1970s and early 1980s. Although groups such as the John Brown Anti-Klan Committee and the May 19th Communist Organization were formed in 1977 and 1978, due to the Levi Guidelines they could not be investigated by the FBI. The lack of investigation coupled with the evolution of a new identity and strategy of the Weather Underground Organization led the FBI to the erroneous conclusion that the WUO had ceased to function and to the termination of its investigation of the WUO and Prairie Fire Organizing Committee in 1979. Only in the wake of the Brinks robbery and its ramifications were similar or derivative groups placed under FBI investigation. The apprehension of FALN members in April, 1980 in Illinois and the subsequent apprehension and prosecution of other members of this terrorist group were due purely to an accident (the fortuitous suspicion by a neighbor of activities near what was a safehouse for the FALN) and not in the least to law enforcement intelligence efforts.

That intelligence investigation of extremist groups can be effective in preventing terrorism is shown by the example (to take one of many) of informants in the Prairie Fire Organizing Committee (emplaced prior to the Levi Guidelines) who in 1977 alerted police to the planned bombing of the office of a California state senator. Because of this information, the bombing was prevented and several key members of the PFOC and WUO were arrested. The value of anticipative (or "pro-active") intelligence in preventing terrorism and the lack of such intelligence in the U.S. intelligence community in recent years has been acknowledged by several authorities. In the wake of the attempted assassination of President Reagan on March 30, 1981, the General Counsel of the Department of the Treasury, in a review of the performance of the Department in connection with the attempt, noted:

"From the protection-oriented perspective of the [Secret] Service, therefore, the decline in FBI domestic intelligence activities has caused a critical overall decline in the useful information the Service receives from the FBI. In November 1979, Secret Service Director Stuart Knight testified before the Senate Judiciary Committee that the Service was, at that time, receiving only about 40 percent of what it had previously received from the FBI, and that this reduced intelligence product had deteriorated in quality. Explaining what he meant by quality, he referred to the loss of information concerning motives and plans.

"Knight repeated these statements in the aftermath of the March 30 assassination attempt, in testimony before other committees of the House and Senate, specifically attributing this loss of useful intelligence to the Attorney General's Domestic Security Guidelines."

More recently, a similar conclusion on the role of intelligence (albeit foreign, not domestic security, intelligence) was noted by the Department of Defense Commission (the "Long Commission") on the Beirut International Airport Terrorist Act:

"The Commission concludes that although the USMNF commander received a large volume of intelligence warnings concerning potential terrorist threats prior to 23 October 1983, he was not provided with the timely intelligence, tailored to his specific operational needs, that was necessary to defend against the broad spectrum of threats he faced.

"The Commission further concludes that the HUMINT [human intelligence] support to the USMNF commander was ineffective, being neither precise nor tailored to his needs. The Commission believes that the paucity of U.S. controlled HUMINT provided to the USMNF commander is in large part due to policy decisions which have resulted in a U.S. HUMINT capability commensurate with the resources and time that have been spent to acquire it."

In March 1983, the Department of Justice issued new guidelines for domestic security investigations to replace those issued by Attorney General Levi. These "Smith Guidelines" have been in effect for a little more than a year, and to date it is too early to make an imformed judgment on their effectiveness. There is some reason to believe, however, that many of the same problems persist.

The underground terrorist network in the United States offers several opportunities for effective intelligence that, until recently, have been missed and may still be missed. The terrorist groups in this network have generated a nation-wide series of above-ground support groups that regularly publicize their activities, ideology, membership, strategy, and interconnections as well as their self-proclaimed enemies and potential targets. Under the Levi Guidelines, the FBI was not permitted to read such publications (let alone to emplace informants in or utilize more intrusive techniques on such groups), and not until after the Brinks robbery was the FBI able to investigate these support groups or analyze their publicly available documents. The importance of investigating terrorist support groups has been emphasized by General Shlomo Gazit, former Director of Israeli Military Intelligence, and Michael Handel at a symposium in 1980:

"Very few organizations can operate in complete or full compartmentalization and do not depend on networks of local supporters. Such supporters help the terrorist organization, either because of ideological motivation or through fear and blackmail, without being directly involved in terrorist operations. The importance of penetrating the sympathizers' or supporters' system lies in the fact that it is easier to penetrate it than the more highly closed terrorist organization. By penetrating this supportive system it may be possible to penetrate the organization itself or obtain indirect information about it. Also, it is much easier to deter such supporters from continuing their assistance than to deter the members of the organization itself. By reducing or eliminating this supportive system, we can undermine the capacity for action of the terrorist organization."

The very need of terrorist organizations to propagandize, gain legitimacy, and support themselves logistically therefore represents a vulnerability of terrorist activity that can be (but has not yet been) exploited by law enforcement to anticipate and prevent terrorist violence.

The occurrence of several nationally or internationally conspicuous events in the summer of 1984 suggested the possibility of terrorist attacks on them, and attempts by terrorists on future mass public events should not be ruled out. Both the indigenous terrorist movement described in this report as well as other, largely foreign terrorist groups (consisting of Libyan, Iranian, Palestinian, Armenian, Cuban, or Central American terrorists or their American adherents) have reason to embarrass, disrupt, or destroy what national or international events represent and to gain the publicity that such attacks generate. Nevertheless, the Olympics and similar highly visible public events are not the main issue in thinking about and dealing with terrorism, and protective, organizational, and legislative measures are not the principal means by which terrorism can be prevented or deterred. After these events pass, the terrorist underground in the United States will persist, and it is this network that at the present time represents the most serious

threat of terrorist violence in the United States for the future.●

YOUTH SUICIDE

● Mr. DENTON. Mr. President, American children, adolescents, and young adults are killing themselves in ever-increasing numbers. The rate of suicide has increased more than three-fold in the last 20 years and is still continuing to rise. This year, more than 5,000 young Americans can be expected to take their own lives.

Suicide now trails only accidents and homicides as the leading cause of death for those between the age of 15 and 24. Even younger children experience problems which lead them to commit suicide. According to a report prepared by the National Center for Health Statistics, during a 13-year period ending in 1978, there were almost 2,000 documented cases of suicide among children under the age of 14.

The statistics represent only the tip of the iceberg. Some experts estimate that the actual number of suicides among young people is at least four times greater than is reported. Recent studies indicate that more than 2 million high school students attempted suicide last year.

Susan Sturman, in an article entitled "Stopping Child Suicide: Why Would One So Young Want To Die?" which appeared in the February 1985 edition of Kiwanis, forcefully calls attention to the phenomenon of youth suicide. I commend Ms. Sturman's scholarly approach to such a national tragedy.

I ask that the Sturman article be printed in its entirety in the RECORD at this point.

The article follows:

[From the Kiwanis Magazine, February 1985]

STOPPING CHILD SUICIDE: WHY WOULD ONE SO YOUNG WANT TO DIE?

(By Susan Sturman)

Six-year-old Sara adored her grandfather. His unwavering love made her feel secure amid a chaotic life ruled by drunk, and sometimes absent, parents.

When he suddenly died, part of Sara seemed to go with him. She became despondent and lost interest in playing with her girlfriends. At school, her teacher noticed that the once polite little girl had changed into a troublemaker who seemed to take delight in disrupting the class.

For months Sara talked about wanting "to be with Grandpa." Her mother ignored the child's "silly" talk and refused to take her seriously—until Sara took a pistol out of a drawer and killed herself.

Like many adults, Sara's parents never thought that such a young child was capable of committing suicide. Yet in 1981, the National Center for Health Statistics recorded 167 suicides among US children, who ranged in age from five to fourteen. Statistics Canada logged thirty-five deaths in the same age group.

Experts believe the actual numbers are much higher, as many suicides may be disguised among the thousands of accidents that occur with children each year.

Equally disturbing is the vast number of children who live in such misery, for whom death seems to offer the only solution to their unhappiness. Surveys of psychiatric hospitals in the US indicate that at least 12,000 preteen children are treated annually for suicidal tendencies. And many clinicians believe this number represents only a small portion of all suicidal children.

Research has disclosed that a number of factors relate to suicidal impulses among the very young. First is the question of whether suicidal children understand the finality of death.

Mature conceptions about dying generally develop around the age of nine, but suicidal children often have unusual ideas about death, even seeing it as a reversible state of pleasantness.

Sometimes the very young want to die. Perihan Aral Rosenthal, a psychiatrist and pediatrician at Rutgers University Medical School in New Brunswick, New Jersey, has examined suicidal children as young as two-and-a-half years old. Some have tried to end their lives by running into traffic or jumping from heights. Others have used more "adult" methods—slashing themselves with knives or razor blades, swallowing pills, or hanging by a rope.

These self-destructive preschoolers are usually lacking love and tend to be unwanted, abused, or neglected.

In 1982, Rosenthal told the members of the American Psychiatric Association about David, an unhappy four-year-old who curled up in his blanket and then set it on fire. David, who survived, explained later: "Because David is a bad boy—there will be no more David."

Second, many suicidal children are viewed by their families as "special" and receive an unusual amount of attention. They may be accustomed to hearing themselves described as "just like a grown-up" or "the smartest person in the family."

The risk begins when they can't live up to these expectations or lose their exceptional position, as in the example of Sara. When Sara lost her grandfather, she also lost her "special" status.

And third, suicidal youngsters tend to experience a number of losses in their lives. Stressful events, such as the death of a family member, birth of a sibling, illness of a parent, divorce, or school failure, often precede a young child's death wish.

Although many families are exposed to these stresses, Alan Berman, a psychology professor at the American University in Washington, DC, explains that suicidal children may not be receiving the parental training and support to help them cope with their problems.

"You have less-nurturing families who may be posing greater stress to these kids, and so they are more vulnerable," says Berman.

Mike, age eleven, is an example of a child whose father set rigid rules and expected nothing less than outstanding accomplishments from his children.

After failing a test one day, Mike came home from school and told his mother he was going to kill himself. He went straight to his room, tied a rope around his neck, and tried to hang himself. Fortunately, he was discovered by his younger brother—only a moment from death.

Sometimes parents are struggling with their own problems and may not notice a child's crisis. Such was the case with nine-year-old Kathy who listened night after night as her parents' arguments exploded into physical battles. On those occasions, she repeatedly heard her mother threaten to leave, and Kathy felt that she was to blame for their problems.

Believing that her parents might get along better if she were not around, Kathy swallowed a handful of her mother's sleeping pills in an unsuccessful suicide attempt.

Kathy and Mike sought death as an alternative to coping with the tension in their families. But many children use a suicide attempt as a tool for seeking attention or avoiding punishment. They do not intend to succeed.

There is a distinction between a suicidal gesture and an attempt, according to Steven Auster, director of the child psychiatric in patient unit at the University of Massachusetts Medical Center.

"An attempt is a true trial," says Auster. "Someone who takes a gun, points it at his chest, and pulls the trigger—that has to be considered a suicide attempt."

A gesture is less life-threatening and often thought to be primarily an attention-seeking action on the part of the child.

"Someone who slashes his wrist superficially, knowing he won't hurt himself—that's more of a gesture," says Auster. "And he's certainly going to get some attention paid to him."

But unfortunately, an immature cry for help can backfire and become another tragic statistic, as in the case of a ten-year-old boy in New York.

The child came home from school with unsatisfactory grades on his report card. Fearing his parents' disapproval and likely punishment, he devised a plan. He dialed the local paramedics and said, "Come quickly, there's been an accident!" He then found his father's gun, made sure it was loaded, and shot himself. By the time the ambulance arrived, he was dead.

The boy is typical of many young children who use this strategy as a ploy for gaining attention or sympathy, according to Milton Levine, professor of pediatrics at New York Hospital-Cornell Medical College.

"He didn't expect to die," Levine says. "He thought they (paramedics) would come and save his life, and his parents would feel sorry for him and forgive him for doing so badly in school."

How can these tragedies be averted? Are there indicators that parents should watch for in young children?

"A child under the age of puberty will almost always give some kind of a warning that he is contemplating suicide," says Levine.

One of the most common, yet frequently ignored, clues is a direct threat. In moments of frustration, parents might hear their child utter, "I'm going to kill myself!" Responding to such an ominous statement can be confusing.

"It helps to determine the emotional climate of the child, and in what context the statements are being made," says Auster.

He recommends a warm, caring response to a child who is usually in good spirits and doing well in school. "You should sit down and say, 'Things like that happen,'" he says. "You might relate a similar anecdote about yourself and try to lessen some of the pain he feels about the particular situation. Tell him it's OK to feel bad."

But Auster warns. "The same threat made by a child who has recently lost a parent, has been despondent, has poor eating and sleeping habits, has a noticeable drop in grades or a lack of interest in friends certainly warrants more concern."

Although it may not be a predominant factor, depression is the most consistent emotion found in suicidal children. Parents may spot the traditional "adult" symptoms, such as changes in eating and sleeping patterns, withdrawal, or sadness, and, certainly, they should not be ignored.

As Alan Berman of American University notes: "The child who is not communicating is sending a strong clue that something is going on."

But sometimes depression is more difficult to recognize in a child: It may be manifested through hyperactivity, temper tantrums, somatic complaints, or other deviant conduct.

"There are many kids who suddenly exhibit a change in behavior," says Dennis Cantwell, a professor of child psychiatry at University of California, Los Angeles. "All of a sudden they are not doing well in school, they withdraw from friends, or become aggressive when they were not that way in the past. Or they suddenly have difficulty getting along with peers because they're irritable.

"It's not a longstanding thing, and they don't look depressed. But if you sit down and talk with them, they'll tell you they are."

Some experts believe that accident-prone behavior is the result of depression.

"The child who is continually in accidents, continually hurting himself, continually ignoring danger, is sometimes self-destructive. The ultimate in self-destruction is when the child does kill himself," says Billie Corder, a child psychiatrist at Dorothea Dix Hospital in Raleigh, North Carolina.

This kind of behavior was apparent in a nine-year-old boy, who within a few months broke two bones, singed his hair, and acquired two head wounds. He was finally hospitalized after putting a belt around his neck in an attempt to hang himself.

"I'm trying to kill myself. One more accident, and that ought to do it," the boy admitted.

Parents need to be aware that a child who is overly interested in death may actually be planning his own. Questions such as "I wonder what it feels like to die?" or "How many pills does it take?" should be obvious warnings to adults.

More difficult to detect, though, are the unspoken, morbid thoughts that a child may harbor, particularly over the death of a loved one.

"A loss—even the loss of a pet—makes kids think of reunion," says Brian Tanney, an associate professor of psychiatry at the University of Calgary in Alberta, "and it is an opportunity to introduce the subject of death to a young child."

Questions such as "Do you miss grandpa?" or "Have you wanted to be with grandpa?" may bring suicidal thoughts to the surface.

One of the final hints a child may leave before taking his life is to distribute his most cherished possessions. Young children have been known to write crude wills or give away favorite toys before attempting suicide.

The handwritten will of a lonely, overweight thirteen-year-old boy was found too late. A portion read, "Last will: To whole family. I leave my stereo to Steve, I leave my Atari games to Jeff and Cindy, and I leave everything to my parents . . . I love you."

If parents suspect that a child may be depressed and considering suicide, what should they do? The critical first step is to take the child's warning seriously. It can be dangerously frustrating for a suicidal person to be ignored, or to hear simple answers to problems that seem overwhelming to him.

The belief that talking about suicide will encourage a child to do it is a myth. In reality, an honest, open discussion can be the beginning of a successful intervention. Parents should sit down and talk with the child, assuring him that they are concerned about his troubles.

"Tell him that you understand he's hurting and that you want to help solve his problems," says Charlotte Ross, cochairperson of the National Committee for Youth Suicide Prevention. She advises parents against letting a child think there is something wrong with him for having suicidal feelings.

Once a parent has established that a serious risk of suicide exists, professional help should be sought immediately, even if it appears that the crisis has passed. Many suicides are preceded by at least one attempt.

There are a variety of resources available in most communities. Mental-health centers are staffed with competent therapists who are trained in suicide intervention. Hospitals with more than 200 beds, as well as hospitals connected with medical schools, usually have psychiatric departments.

If private therapy is preferred, the child's pediatrician is an excellent source for locating a professional who specializes in working with children.

Successful therapy is usually family-oriented. While the suicidal child is taught self-esteem skills and positive coping strategies, the patents' needs are also assessed.

The previously mentioned example of the ten-year-old boy who attempted to hang himself involved a rigid, authoritarian father. In therapy, the child was taught that failure was not the end of the world, while his father learned to set more realistic rules and to provide the attention and support that his son needed.

Statistics indicate an urgency to identify and rescue children at risk. In 1981, 1,770 adolescents, ages fifteen to nineteen, committed suicide in the US alone. The figure jumps to 3,391 for the twenty to twenty-four age group.

Dennis Cantwell of UCLA explains why the suicidal preteen increases his risk as he becomes older: "It takes a number of things to complete suicide. One is the ability to plan."

He finds that younger children generally do not have the capacity for planning. For example, a child may take a bottle of aspirin, assuming it will be a lethal dose. A few years later, he will know which pills can kill him.

Cantwell also points out a developmental factor: "The child under twelve cannot handle an abstract concept like hopelessness. A toy or something like that will somehow make him temporarily better."

There is hope that child suicide may be prevented as more attention is focused on the problem. Several experts believe that pediatricians awareness of suicidal tendencies should be heightened.

"Too many pediatricians examine the child physically, but don't ask questions like they should," Levine says.

Billie Corder of Dorothea Dix Hospital and Thomas Haizlip, an associate clinical professor of psychiatry at the University of North Carolina, have responded to that need by developing a comprehensive list of questions for physicians to use when interviewing children who may be depressed.

The recently formed National Committee for Youth Suicide Prevention is dealing with the problem on a broader level.

"We're trying to get fifty states organized in support of increased public awareness and prevention programs in schools, and pushing for our federal commission to organize and coordinate all the ongoing research," says the committee's Chris Cameron.

The committee will focus on controlling teen-age suicide, but Cameron believes that "connecting societal problems that lead up to suicide at a later age would be reflected on younger children."

The issue of child suicide cannot be ignored. A child who sends suicidal danger signals is begging for help and probably wants to escape from his pain, rather than seek death. His concerns may seem small and unimportant to adults, but they are overpowering to him—and they must be resolved.

By focusing on the child's problems and involving the family, suicide can be prevented. But until the wounds are treated, they cannot begin to heal.

KIWANIANS AID IN SUICIDE PREVENTION

Saving lives is their business.

No, these rescue workers aren't firemen, policemen, or doctors. They are volunteers and staffers working at the Suicide Prevention and Crisis Center of San Mateo County, California. And they do save lives.

The center is internationally recognized for its efforts in suicide prevention among children and adults. And aiding the center's fight against child suicide are the Kiwanis clubs of San Mateo and San Mateo Downtown.

The clubs have been instrumental in starting the center's youth suicide prevention program, says Charlotte Ross, the center's director, and "we're very, very appreciative of what they've done."

Through the clubs' contributions, the center is able to print pamphlets about suicide prevention geared to educators and students. The two pamphlets—"Suicide in Youth and What You Can Do About It, A Guide for School Personnel" and "Suicide in Youth and What You Can Do About It, A Guide for Students"—have been in high demand. The first printing of 5,000 copies of each pamphlet was depleted within a year. The second run will be doubled to 10,000.

The pamphlets, which have the Kiwanis emblem printed on the back, were distributed not only to schools and other local organizations, but also to crisis centers throughout North America.

Because of the increased awareness of suicide among young children, the center is updating its pamphlets to include a section that refers to children ages five to fourteen. Ross says educators are also becoming more aware of suicide among children because more teen-agers are admitting that they attempted suicide when they were younger, even though at the time the incidents were not recognized as suicide attempts.

The center receives about 2,000 calls a month on its crisis hotline. A few years ago, 7 percent of those calls were from young people; today, the figure has risen to 25 percent, according to Ross.

Although the Kiwanis clubs have been involved with the center for only two years, Kiwanians have served on the center's board of directors for almost ten years, according to David Thomas, a member of the Kiwanis Club of San Mateo who currently is a center board member.

Howard Samuel, a San Mateo Downtown club membrer, has volunteered at the center for eight years. "It's tremendous to be involved with such a fine center that helps so many people," he says.

For more information about the center's youth suicide prevention program, write to: Suicide Prevention and Crisis Center, 1811 Trousdale Drive, Burlingame, California 94010.—Charity Cicardo●

5 YEARS OF SOVIET GENOCIDE IN AFGHANISTAN

● Mr. HUMPHREY. Mr. President, 5 years of brutal conflict and three dramatic changes in leadership have occurred since Soviet military forces burst into Afghanistan on Christmas Day, 1979. The Russian leadership continues relentlessly in the pursuit of transforming Afghanistan into a Communist satellite, if not in fact the next "republic" to be annexed by the Soviet empire.

For half a decade Soviet troops have been waging war of genocidal proportions in order to secure the annexation of this once independent, inoffensive and neutral country. And for half a decade they have been unsuccessful. At the cost of 1 million dead Afghans and many thousands of Soviet casualties, the Soviets can claim to control no more than 20 percent of the country; in the cities, Russian soldiers dare not venture out at night. Clearly, those who believe that the Afghan freedom fighters haven't the will to resist Soviet domination are mistaken.

At the same time, however, there are those who would "pooh-pooh" the murderous Soviet occupation of Afghanistan, those who would shrug off the barbaric atrocities committed there by Soviet troops, and they too are mistaken. Mr. President, all too often are we entertained with various geopolitical excuses for the Soviet invasion—that the Russians were simply paranoid, that the invasion was defensive in nature, that Afghanistan would be Russia's Vietnam. In the March 28 edition of the Washington Times, nationally syndicated columnist Joseph Sobran argues forcefully that those rationales simple do not wash.

To the argument that the Soviet invasion was defensive or steeped in paranoia, Mr. Sobran counters with the precedent which was set for Afghanistan by the conquest of Turkic- and Persian-speaking Moslem domains such as Uzbekistan and Tadzhikistan in central Asia in the 1920's. As for the argument that Afghanistan will be Russia's Vietnam, Mr. Sobran argues, as I myself have pointed out recently, that the Soviet leadership does not intend to permit the various social and political forces which hastened the American departure from Vietnam do the same for the Russians.

Mr. President, Sobran's article, "What Afghanistan Taught Carter About the Soviets," concludes by noting that the lesson of the Afghan invasion may have been lost upon this administration. Indeed, it is difficult to escape this conclusion when one considers the relatively low priority which the administration has placed upon effecting a Soviet withdrawal. It is my hope, however, that the lesson about Soviet behavior which the Afghan invasion so blatantly teaches will not have been lost upon President Reagan, and that we can expect more aggressive support for the Afghan people.

I ask that Mr. Sobran's article be included in the RECORD following my remarks.

The article follows:

[From the Washington Times, Mar. 28, 1985]

WHAT AFGHANISTAN TAUGHT CARTER ABOUT THE SOVIETS

(By Joseph Sobran)

It was unedifying to see Jimmy Carter on "60 Minutes" trashing Ronald Reagan, in the most vindictive terms an American ex-president has used about a successor lately. Nobody ever called Mr. Carter classy.

But there is one respect in which Jimmy Carter did outshine Mr. Reagan: He took Afghanistan seriously. In fact he confessed at the time the Soviets invaded that pitiful country that he had lost any illusions he had entertained about the Soviet system.

You may fairly ask why a grown man should have had such illusions, but it was typical of Mr. Carter to admit the truth. The Soviets really shocked him in that peculiar moral core of his, and he reacted by imposing the grain embargo Mr. Reagan was later to lift. Let anyone who is tempted to call Jimmy Carter a "wimp" recall that episode.

More than five years later, after three changes of head of state, the Soviets are still pounding Afghanistan with colossal ruthlessness.

Within weeks of the invasion, the predictable batches of excuses were forthcoming. The Soviets were simply "paranoid," the invasion was from their point of view "essentially defensive," Afghanistan would prove to be "the Soviets' Vietnam."

The Vietnam analogy expressed an historical shallowness that passes belief. The Soviet regime doesn't have to cope with a free and critical press, an opposition party, or any of the other factors that made the U.S. effort in Vietnam so ultimately wasteful.

The Vietnam War was a typical Great Society program: An ill-defined problem was addressed by pouring resources into a specific pocket, with little thought for the larger picture. The Soviets always act with reference to that larger picture. So the real analogy is this: As Vietnam was the perfect emblem of American muddleheadedness, so Afghanistan is the perfect emblem of Soviet constancy of purpose.

One journalist who understands all this is Richard Bernstein of The New York Times. He writes: "To read the history of such Soviet Socialist Republics as Uzbekistan and Tadzhikistan is to see close parallels to what is happening in Afghanistan. Turkic- or Persian-speaking Moslem domains in Central Asia were conquered toward the end of the 19th century as Russia expanded inexorably southward and eastward. The czars were content to leave the local pattern of lives untouched, but after the triumph of Leninism in 1917, the new Communist rulers tried to install Communist parties in Central Asia. This provoked a bitter war. In Uzbekistan, one Soviet writer complained that the guerrillas were men on horseback who 'dissolved in the neighboring villages literally before the eyes of our troops.' In Tadzhikistan, it took the Soviet armies five years to crush the opposition and another five years to quell peasant resistance to such Stalinist initiatives as forced collectivization.

This war is even more bitter, Mr. Bernstein continues. The natives are resisting more furiously and the invaders are attacking more brutally than in the earlier wars. As many as a million Afghan "rebels," as it is now conventional to call these people who are fighting to keep their own country, have been killed. Two million have crowded into refugee camps in Pakistan. The Soviets are doing their best to make huge areas of Afghanistan simply uninhabited, whether by slaughtering the natives or by driving them out.

The point is not so much what the Soviets have already done as what they have continually proven themselves willing to do. In Shakespeare's phrase, there is no more mercy in them than there is milk in a male tiger.

The Afghan refugees don't snicker when someone calls the Soviet Union an "evil empire."

Yet the West persists in missing the point. A Time magazine blurb blandly informs us that Mikhail Gorbachev's "priority" will be to "reform" the "troubled" Soviet economy. The writer evidently assumes that the Soviet regime, like other governments, routinely divides its energies between a utilitarian domestic policy, aimed at producing the most refrigerators for the greatest number, and a trouble-free foreign policy aimed at avoiding nuclear war and holding onto its possessions.

The idea that a regime might actually seek new possessions—that this in fact might be its raison detre—doesn't occur to Time's writer.

The Soviets aren't interested in producing a high standard of living for their modern serfs. The idea that they are should be laughable by now. Jimmy Carter may have seemed risible for remaining ignorant for so long, but at least he was learning.

The Reagan administration should be insisting on the importance of Afghanistan, not only as a horrible reality but as a symbol of Soviet intentions. It is amazing that a professedly anti-Communist president should oblige the Soviets by treating one of the monstrosities of our time as a side issue. It belongs on center stage—at the United Nations, in Geneva, wherever American and Soviet diplomats face each other.●

FRINGE BENEFITS FOR SPECIALLY EQUIPPED VEHICLES

● Mr. PRYOR. Mr. President, I am pleased to report to the Senate today that this morning the Finance Committee ordered the Department of the Treasury to modify the pending regulations in the area of fringe benefits as they relate to certain specially-equipped vehicles. As most Members of the Senate are aware, earlier this year I introduced S. 281, a bill that would have provided that certain public safety vehicles qualified as a

working condition fringe, and were therefore, not taxable to the employee.

S. 281, Mr. President, was designed to carry out what I believe was our intent when we passed the fringe benefit statutes last year. In my opinion, we didn't intend for policemen, firemen, ambulance and schoolbus drivers to have income imputed to them on the use of those types of vehicles. However, under regulations issued by the Internal Revenue Service [IRS] these people were going to have to have an additional $3 per day included in their income for tax purposes. This was very simply the wrong result. The action taken by the committee today, which is in the nature of report language, will ensure that the intent of Congress, as expressed in S. 281, is carried out.

Under the report language, the Secretary of the Treasury is required to modify the regulations so that the following vehicles to be tax-free to the employee as a working condition fringe:

(a) Marked police and fire vehicles;
(b) Ambulances;
(c) School buses;
(d) Dump trucks;
(e) Tractors;
(f) Cement mixers;
(g) Refrigerated trucks; and
(h) Specialized utility repair trucks.

Mr. President, I am very pleased that this will be done by modifications to the pending regulations. I have maintained for quite some time that this was not intended. Our police officers, State troopers, deputies, and others involved in protection of public safety should not be taxed on any of the use of that vehicle, and they also should not be required to keep any records. These men and women work many, many hours and they risk their lives for the citizens of our communities. Allowing them to drive these vehicles protects the public safety, and more importantly, allows them to respond to emergencies in a very prompt fashion. This change is a good one, and one that will be very helpful to many thousands of law enforcement officials and others who were confronted by this matter.

I appreciate the action of the committee, and I thank all of my colleagues in the Senate who joined me in this effort.●

CORRECTION IN REPORT ACCOMPANYING S. 408, SMALL BUSINESS ADMINISTRATION PROGRAM AUTHORIZATIONS FOR FISCAL YEARS 1986, 1987, AND 1988

● Mr. WEICKER. Mr. President, during committee consideration of S. 408, the committee adopted two amendments making certain programmatic changes in SBA's Loan Guarantee Program. The proposals included an increase in the borrower's fee in the 7(a) Guaranteed Lending Program from 1 to 2 percent for loans which exceed 1 year, and a reduction from 90 percent to 80 percent of the maximum SBA guaranteed portion of these loans.

These changes resulted in budget authority and outlay savings in SBA's Business Loan and Investment Fund. S. 408, as reported, failed to reduce the authorization levels to reflect these savings. When the Senate considers S. 408, I intend to offer technical and conforming amendments to reflect the committee actions of March 26, 1985. Specifically, the amendment would reduce the budget authority in the business loan and investment fund as follows:

[In millions of dollars]

Fiscal year:	
1986	322
1987	343
1988	346

I have asked the Congressional Budget Office to reestimate S. 408 with the inclusion of these technical amendments. Furthermore, CBO has recalculated the savings derived from reducing the maximum guarantee fee and made a minor accounting error in their cost estimate printed in the committee's report. With the inclusion of these technical amendments and CBO's recalculations, the total savings achieved by S. 408 over a 3-year period would be $14 million lower in budget authority and $14 million lower in outlays, than previously reported. The total savings achieved by S. 408, with the technical amendment, is $1.1 billion in budget authority and $851 million in outlays over the next 3 fiscal years.

TOTAL SAVINGS FROM CBO'S CURRENT POLICY BASELINE

[In millions of dollars]

	1986	1987	1988	Total
Budget authority	256	246	598	1,100
Outlays	233	314	304	851

Mr. President, I ask that the revised charts that appear on pages 4 and 5 of the committee report be printed at this point in the RECORD, along with the revised CBO cost estimate letter which appears on pages 51 through 56.

The material follows:

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill Number: S. 408.

2. Bill Title: A bill to amend the Small Business Act to provide program levels, salary and expense levels, and authorizations for the Small Business Administration's programs for fiscal years 1986, 1987, and 1988, and for other purposes.

3. Bill Status: As reported by the Senate Committee on Small Business, March 26, 1985, and reflecting proposed technical amendments.

4. Bill Purpose: S. 408 would establish program levels for fiscal years 1986 through 1988 for the business programs administered by the Small Business Administration (SBA). It would also authorize appropriations for administering and funding these activities.

Beginning in 1986, this legislation would reduce from 90 percent to 80 percent the maximum amount of an SBA guarantee for general business loans. It would also increase the guarantee fee for these loans from 1 percent to 2 percent. Section 5 would require that SBA commit all available funds for guaranteed loans if sufficient qualified borrowers apply.

S. 408 would authorize the appropriation of such sums as may be necessary to operate the disaster loan program for fiscal years 1987 and 1988. It would also eliminate nonphysical disaster loans after fiscal year 1985. These loans are now capped at $100 million in new annual obligations through fiscal year 1986.

5. Estimated cost to the Federal Government: The following table summarizes the total on- and off-budget impact of S. 408, relative to spending levels if no legislation were enacted.

TOTAL ON- AND OFF-BUDGET

[By fiscal years, in millions of dollars]

	1986	1987	1988	1989	1990
Authorization level:					
Specified	544	572	579		
Estimated	282	476	553	394	190
Total authorization	826	1,048	1,132	394	190
Estimated outlays	552	1,458	1,684	129	−108

The basis of estimate provides further detail on the budget impact of this bill, and compares spending levels under S. 408 with the CBO baseline projections.

This bill would authorize SBA loan guarantees of $3.4 billion in 1986, $3.6 billion in 1987, and $3.7 billion in 1988. These guarantees represent contingent liabilities of the federal government.

For many government activities, the costs and outlays are identical. For loan programs, however, the costs differ from outlays, and include administrative expenses and loan defaults, offset by fees and interest income. The costs of S. 408 are summarized separately below:

[By fiscal years, in millions of dollars]

	1986	1987	1988	1989	1990
Estimated costs	309	355	469	605	659

Basis of estimate: S. 408 would authorize the following program levels for the loan programs administered by the SBA:

PROGRAM LEVELS

[By fiscal years, in millions of dollars]

Programs	Direct loans			Guaranteed loans		
	1986	1987	1988	1986	1987	1988
7(a) general business				2,650	2,766	2,882
Handicapped	20	21	22	5	5	6
Economic opportunity				60	63	65
Energy				15	16	16
Development company				450	470	489
Investment company	41	43	45	250	261	272
Veterans	25	26	27			
Total	86	90	94	3,430	3,580	3,730
Surety bond				1,115	1,164	1,213
Pollution control				150	157	163
Disaster	[1] 500	[2] 960	[2] 1,001			

[1] The disaster loan program is already authorized for 1986 for 1986 at a level of $600 million. This bill would eliminate non-physical-disaster loans, which account for $100 million of the authorization.

[2] Estimate based on historical data.

The authorization levels shown in this estimate include amounts specifically authorized in the bill, estimated payments for loan guarantee defaults, estimated disaster loan appropriations, and estimated Federal Financing Bank (FFB) loans made under investment and development loan guarantees. The specific authorizations are summarized in the following table.

AUTHORIZATION LEVELS

[By fiscal years, in millions of dollars]

	1986	1987	1988
Salaries and expenses[1]	210	214	218
Business loans and investments	322	343	346
Pollution control b[2]			
Surety bond guarantee	12	16	15
Total	544	572	579

[1] The bill also authorizes the transfer of unobligated funds from the disaster loan fund to the salary and expense account to administer the disaster loan program, and for other purposes. CBO estimates that $70 million, or the 1985 appropriated level, would also be transferred in 1986, and approximately $73 million in 1987 and $76 million in 1988 would be available for this purpose. The transfer of unobligated balances does not affect budget authority but does increase outlays in each of the fiscal years 1986 through 1990.

[2] No appropriations are authorized for this program; application fees and other income has historically been sufficient to meet the expenses of the program.

Note: Details may not add to the totals due to rounding.

For purposes of this estimate, it is assumed that the entire amounts authorized in S. 408 will be appropriated to the beginning of each fiscal year.

SBA makes an annual interest payment to the Treasury based on its outstanding disbursements for direct loans. The payment to the Treasury reflects disbursements from the business and disaster loan program in 1986, 1987, and 1988. Because the interest payment represents an outlay to SBA but a receipt to the Treasury, it has no net budget impact. In addition, interest is paid to the Treasury on the direct loans made by the FFB. The figures in the cost estimate tables for function 900 are the estimated Treasury receipts from SBA and the FFB related to loans authorized by S. 408.

Business programs: Outlays for SBA direct and immediate participation loans are calculated by assuming that these loans are disbursed over a two-year period based on SBA historical disbursement rates. The repayment schedule is derived from amortization tables. Because the bill would increase the guarantee fee charged on 7(a) loans from 1 percent to 2 percent, it is estimated that SBA revenue would increase by approximately $10 million in 1986, $19 million in 1987, $20 million in 1988, and $10 million in 1989, assuming the 7(a) guarantee levels authorized in the bill.

The estimated on-budget authorization level for function 370 in 1989 and 1990 ($339 million and $389 million, respectively) reflects estimated net additional resources required to fund remaining expenses, primarily defaults on loan guarantees, resulting from the authorizations provided in the bill. SBA purchase of guarantee loans that have defaulted is assumed to occur in the first through sixth years after disbursement by the bank, at rates consistent with historical experience. Beginning in 1986, the estimated gross repurchase rate for 7(a) guaranteed loans was adjusted downward to reflect a reduction (from 90 percent to 80 percent) in maximum SBA exposure for these loans.

Outlays for salaries and expenses and the surety bond program are assumed to follow historical patterns. Estimated outlays in the pollution control program are estimated at zero, assuming that fee collections will offset program expenses, primarily bond defaults.

The bill would authorize $700 million in 1986, increasing to $761 million in 1988, for investment and development company loan guarantees that are financed by the off-budget Federal Financing Bank (FFB). These FFB loans are made to small business investment and development companies to provide equity capital for small businesses. The off-budget authorization levels in the table below reflect gross disbursements of such loans, while the estimated outlays reflect estimated disbursements less repayments.

A summary of the budget impact of the business programs authorized by S. 408 is shown below.

BUSINESS PROGRAMS

[By fiscal years, in millions of dollars]

	1986	1987	1988	1989	1990
On-budget:					
Function 370:					
Authorization level:					
Specified	544	572	579		
Estimated				339	389
Total Authorization	544	572	579	339	389
Estimated outlays	329	442	588	404	369
Function 900: Treasury interest receipts	−30	−86	−148	−165	
Off-budget:					
Function 370:					
Estimated authorization level	282	506	527	221	
Estimated outlays	282	482	467	−98	−91
Total on-and off-budget:					
Authorization level:					
Specified	544	572	579		
Estimated	282	476	441	412	224
Total authorization	826	1,048	1,020	412	224
Estimated outlays	611	895	969	158	113

Disaster loans: The SBA disaster loan fund provides funding for physical and non-physical disasters. Under current law, new physical disaster loan obligations are capped at $500 million for 1986, while annual new non-physical disaster loan obligations are capped at $100 million. The baseline for this program in subsequent years is estimated using loan demand for an average disaster year, which is calculated using 15 years of historical data adjusted for inflation.

The table below shows the estimated budget impact of the disaster loan provisions of S. 408, including Treasury receipts. These figures have been estimated relative to a program level in which no new disaster loan obligations are authorized after fiscal year 1986. Under S. 408, only physical disaster lending would be authorized; the non-physical loan program would be discontinued. As a result, the 1986 loan level would be $500 million, $100 million less than previously authorized. Estimated loan levels in 1987 and 1988 are $960 million and $1,001 million, respectively. It is estimated that no appropriations would be required in 1986 and 1987 to meet these loan levels, because sufficient unobligated balances would be available to the fund.

[By fiscal years, in millions of dollars]

	1986	1987	1988	1989	1990
Disaster loans:					
Estimated authorization level			114		
Estimated outlays	−59	563	717	−11	−187
Treasury Interest Receipts			−2	−18	−34

Summary: The following table shows the total estimated budget authority and outlays for SBA programs under S. 408, including outlays resulting from prior years' obligations and Treasury receipts related to SBA loans and guarantees. These figures include both on-budget and off-budget accounts. A comparison with the CBO baseline is also provided.

[By fiscal years, in millions of dollars]

	1986	1987	1988
CBO baseline:			
Estimated budget authority	935	980	1,482
Estimated outlays	720	1,055	1,173
S. 408, as reported with proposed technical amendments:			
Estimated budget authority	679	734	884
Estimated outlays	487	741	869
Difference:			
Estimated budget authority	−256	−246	−598
Estimated outlays	−233	−314	−304

6. Estimated cost to State and local governments: S. 408 would authorize SBA to issue guarantees of $450 million in 1986, $470 million in 1987, and $489 million in 1988 on debentures issued by qualified state or local development companies. These SBA guaranteed debentures are then sold to the FFB for financing up to 50 percent of the total project cost.

7. Estimated comparison: None.

8. Previous CBO estimate: On March 29, 1985, CBO prepared a cost estimate for S. 408, as ordered reported by the Senate Committee on Small Business, March 26, 1985. This cost estimated differs from the earlier one in that it reflects proposed technical amendments that would reduce the authorization level for the SBA programs in 1986, 1987, and 1988.

9. Estimate prepared by: Mary Maginniss and Paul DiNardo.

10. Estimate approved by: James L. Blum, Assistant Director for Budget Analysis.●

ORDER OF BUSINESS

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call roll.

Mr. COCHRAN. Madam President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER [Mrs. KASSEBAUM]. Without objection, it is so ordered.

EMERGENCY AFRICAN FAMINE RELIEF SUPPLEMENTAL—CONFERENCE REPORT

Mr. COCHRAN. Madam President, I submit a report of the committee of conference on H.R. 1239 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1239) making urgent supplemental appropriations for the fiscal year ending September 30, 1985, for emergency relief and recovery in Africa, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of March 27, 1985.)

Mr. COCHRAN. Madam President, I am very pleased that we finally have before us the conference report on the urgent supplemental appropriations bill for emergency famine relief in Africa. The food and supplies that will be provided as a result of this legislation are very desperately needed in over 20 countries in Africa.

The conferees met last Wednesday, March 27, and agreed to appropriate an additional $625 million in food aid through title II of Public Law 480, which includes $16 million in unobligated Commodity Credit Corporation [CCC] balances, and $175 million for disaster and refugee assistance programs administered by the Agency for International Development [AID] and the Department of State. In addition, since the funding levels are somewhat higher than the amounts requested, the conferees agreed to allow additional time in which to obligate the funds and to deliver the commodities to Africa.

Madam President, of the amount provided under title II of Public Law 480, an emergency reserve of $225 million to remain available through fiscal year 1986 was created. The President will have the responsibility for release of these reserve funds.

The conference agreement also provides for the distribution of equal amounts of wheat and dairy products under the section 416 program. Under this program, the Secretary of Agriculture is authorized to use surplus dairy and wheat products which are stored in Government warehouses for donations to needy people overseas. It is expected that USDA will distribute some 200,000 metric tons of these commodities during calendar year 1985. Language was also added to the conference agreement which will require the rapid and effective distribution of these commodities without the intervention of the Government of Ethiopia.

This action taken by the conferees will ensure that the U.S. Government will be able to meet its commitment to the famine relief effort and that the maximum amount of funding which could be obligated will be available.

Madam President, I would like to commend the distinguished chairman of the Appropriations Committee, Senator HATFIELD, and my colleagues on the Appropriations Committee who contributed so much to the consideration of this vital legislation. I am referring specifically to Senators KASTEN, STENNIS, INOUYE, and BURDICK, who also provided needed assistance in the negotiation of the conference agreement. I urge the Senate to support the conference report so that this food and recovery assistance defined in the report can be provided to those countries in Africa without any further delay.

Mr. BURDICK. Madam President, I am extremely pleased that we are finally reaching the final passage of this most necessary aid to Africa. We all know and understand the urgency of this legislation and the important element is not so much the amount of aid that we are sending, but that we send the aid immediately.

I just returned from the Interparliamentary Union meeting in Togo, Africa. I had an opportunity to visit with delegates from many different countries, and I can tell you that the urgency of the plight of many Africa countries was foremost in everyone's mind. Millions of Africans have either died of starvation, or are facing immediate starvation. It is our moral obligation, without regard to any other consideration, to help these people who are in such desperate need.

We have all been made aware, Madam President, that there is a long-term food problem in Africa which we must address in the future. We can, and we will, tackle long-term approaches to this situation in the coming months. But our concern today is alleviated only by providing direct food and financial assistance. No amount of planning will bring back to life the children who are starving today and the children who will starve tomorrow.

We have a surplus of food in this country. This legislation contains authority for the Secretary of Agriculture to make available 200,000 metric tons of agricultural commodities which have been acquired by the Commodity Credit Corporation. Fifty percent of these commodities are to be in the form of wheat or wheat products. I believe there is no more appropriate use for these commodities at this time and it is my fervent hope that the Secretary of Agriculture will take advantage of this authority as soon as this legislation is passed into law.

Madam President, some Members of Congress have raised the concern—and it is a well-founded concern—that the aid we are sending to Africa, and specifically Ethiopia, is not reaching the people who are most in need. The language of this bill, and the legislative history accompanying it, ensures that the aid will reach those for whom it is intended. The bill furthermore provides that the food will be delivered in a timely and efficient manner.

Let us today follow the example set by the American people who have so generously contributed to famine relief organizations, by making a generous contribution from the Federal Government. I urge my colleagues to approve this legislation without delay.

Mr. KASTEN. Madam President, I would like to make just a few comments on the conference agreement as it affects those items under the jurisdiction of the Foreign Operations Subcommittee, which I chair.

As already has been stated, the conference was a very amicable one, and we were able to come to a compromise agreement in a very short period of time.

The conferees agreed that funding provided for international disaster assistance and migration and refugee assistance should be available for approximately 1 year; that is two quarters into the next fiscal year. The House agreed to this extended availability of funding in exchange for the Senate's willingness to drop the cap language included in the Senate bill. The result is that while we are providing the administration with more funding than it requested, we give them more flexibility which will thus result in the legislation securing a signature.

The conferees also modified the requirement for a 5-day notification on international disaster assistance so that that notification may be waived in life threatening circumstances which require immediate action. While we made this modification, the conferees included strong report language that it does not expect that the waiver will be utilized except where absolutely necessary, and if it is utilized, the administration must report immediately on the reasons why and also provide a detailed account of the use of the funds.

The conferees agreed with the Senate language which provides that the funds may be used only for Africa, language which is intended to prevent waivers available under the Foreign Assistance Act from being used to make these funds available for other purposes.

Madam President, I would once again like to thank a number of my Senate colleagues who played a constructive role in the development of this legislation, especially the senior Senator from Massachusetts [Mr. KENNEDY]. Also, I would like to thank my ranking member, Senator INOUYE, and the chairman of the full committee, Senator HATFIELD, for their leadership.

Mr. KENNEDY. Madam President, I am pleased to join my colleagues today in giving final congressional action in support of this bipartisan response to the urgent need for famine relief in Africa.

As one who has recently visited the field, I can say firsthand that this urgent supplemental appropriations is, in fact, urgently needed. Millions of men, women, and children across the African continent face one of this century's worst famines, caused by drought, conflict, and years of agricultural decline.

Again, I want to commend the chairman of the Appropriations Committee,

Senator HATFIELD, and Senator COCHRAN, for moving expeditiously on this conference report within hours of House action. He has been true to his commitment to move this legislation forward as rapidly as possible, so as to avoid any life-threatening interruption in the U.S. food assistance pipeline. I also want to commend him for giving the assurance that if more assistance for Africa is needed in the months ahead, he is prepared to respond once again—to make certain that the United States maintains its life-saving leadership in meeting 50 percent of the unmet food needs in Africa.

I also want to acknowledge the important contributions of the Senator from Wisconsin, Senator KASTEN, who is chairman of the Foreign Operations Subcommittee. Earlier, I had the privilege of joining him in introducing a bill that would have given extraordinary flexibility to the President in responding to the escalating food and relief needs in Africa.

But I agree with him today, that on the basis of the information presented at the special United Nations Conference on the Emergency Situation in Africa, which was convened last month in Geneva, the appropriations contained in this conference report will be adequate if they are fully utilized by the administration for the remainder of this year.

Madam President, I had the privilege to be the congressional member of the U.S. delegation to the U.N. Conference—which was headed by Vice President Bush—and which brought together more than 100 concerned governments, most represented by their foreign ministers or other high-level officials. During 2 days of general debate, and 3 days of working-level meetings on conditions in the hardest hit countries—such as Ethiopia and Sudan—this Conference served not only to focus the world's attention on the crisis in Africa, but it also provided detailed information on what more the international community needs to do to avert an even greater famine. It also served to strengthen the role of the Secretary-General's newly created Office for Emergency Operations in Africa, headed by Brad Morse, and to underscore the need for better coordination within the U.N. system in responding more effectively to the African crisis.

As outlined by the U.N., the unmet food and relief needs in the affected countries of Africa for the remainder of this year is approximately $1.5 billion. What we are appropriating in this conference report will clearly bring our total funding to the level we have committed ourselves—namely, to 50 percent of the unmet food and relief needs in Africa.

Madam President, in this connection, I was gratified to read a press account of Brad Morse's preliminary report on the results of last month's Conference in Geneva, in which he indicated that more than half, and perhaps two-thirds, of the outstanding needs in Africa have now been pledged by the international community. This is a fine tribute to the success of the Conference and the work of the United Nations.

The conference report we are moving forward this afternoon—following its adoption by the House earlier—will guarantee the success of this international effort, and I am pleased to join with my colleagues in clearing it for the President's signature.

Mr. DOMENICI. Madam President, I rise in support of the African famine relief supplemental appropriation conference agreement now before us.

I would like to commend my distinguished colleague, Chairman HATFIELD, and the Senate and House conferees for completing this bill to provide emergency food and disaster assistance to help the African people recover from devastating drought and famine.

H.R. 1239 provides $0.8 billion in budget authority and $0.3 billion in outlays for fiscal year 1985 famine relief and recovery assistance to Africa.

Madam President, I would note that this conference agreement provides resources substantially above current estimates of need. However, the administration indicates that, as required by title II of the bill, it will ensure that no funds will be obligated that cannot be effectively used.

We must ensure that food and recovery assistance are provided to the African people suffering from famine and drought in the most effective and efficient manner possible.

With congressional action to date and possible later requirements taken into account, the Senate Appropriations Committee is $4.6 billion in budget authority and $1.3 billion in outlays below its section 302(a) allocation under the budget resolution for fiscal year 1985.

Madam President, I ask unanimous consent that a table showing the relationship of the conference agreement, together with possible later requirements, to the congressional budget and the President's budget request be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FISCAL YEAR 1985 SUPPLEMENTAL APPROPRIATIONS—CONFERENCE AGREEMENT (SENATE APPROPRIATIONS COMMITTEE STATUS)

[In billions of dollars]

	Fiscal year 1985	
	Budget authority	Outlays
Action to date by Appropriations Committee [1]	553.3	542.3
H.R. 1239, emergency famine relief and recovery in Africa, conference agreement	.8	.3
Possible later requirements	3.6	2.7
Adjustment to conform mandatory programs to budget resolution assumptions	−2.3	−.3
Appropriations Committee total	555.4	544.9
Committee 302(a) allocation [2]	560.0	546.2
Committee total compared to committee 302(a) allocation	−4.6	−1.3
H.R. 1239, Senate-passed	.7	.3
H.R. 1239, House-passed	.9	.3
H.R. 1239, President's request	.2	.2

[1] Includes enacted regular appropriation bills, the continuing resolution, and other prior actions.
[2] Committee 302(a) allocation under budget resolution for fiscal year 1985 (H. Con. Res. 280).
Note: totals may not add due to rounding.

The PRESIDING OFFICER. Is there any further debate?

Mr. MELCHER. Madam President, when the bill was before the Senate I offered an amendment to the bill to provide that section 416 would be utilized as part of the African aid that we are going to provide during the balance of this fiscal year and into the next fiscal year. Up until the acceptance of the amendment, only Public Law 480 was being used in the bill for the food donations. By adding section 416 with my amendment, we assured the possibility of its use, and there are several reasons for doing that.

First, section 416 is more flexible than is Public Law 480. Briefly, the private voluntary organizations that apply through either Public Law 480 or section 416 for food donations from the United States have to have those applications considered by AID, which looks to three separate groups—a representative of AID, a representative of the Office of Management and Budget, and a representative of the Department of Agriculture—to review the specific applications and to grant their approval. Once that is done, the food aid then becomes available to that particular private voluntary organization.

Section 416 in many cases is preferred to Public Law 480. There are reasons for that. Section 416 permits donation, barter, or reduced prices for dairy and wheat commodities in the United States to be distributed by the private voluntary organizations in the particular countries for which they are applying. Section 416 also permits some monetization. What that means is that a portion of the commodity can be sold on the open market in that particular country to cover some or all of the cost of processing the particular commodity, the distribution of that commodity within the country, and the incidental costs that go with the

distribution of the commodity or running a food program such as is done in Africa. The monetization amount is looked at on a case-by-case basis by our people in Washington and then the decision is made on how much could be monetized. It is a practical means of allowing for the operation of the private voluntary organization to make sure that the food distribution is carried out and carried out in a timely manner.

Section 416 has been used for African aid over the past year. I am advised that $61 million in dairy products have been distributed in Africa utilizing the section 416 method. However, no wheat up until this time has been involved in section 416 applications for African relief. I am not sure why that is true because certainly, there is plenty of wheat available in CCC hands for utilization through section 416.

The March 1 CCC commodity inventory showed that there were 375 million bushels in CCC hands—that is, owned by the Federal Government and stored by the Federal Government—plus 675 million in farmer-owned reserve. Only the 375 million bushels would be available through section 416 for food aid programs, but that is a vast amount of wheat, and the amount that the CCC will have during the coming months will become even larger as we approach the next harvest season.

I hope that the amendment that we adopted here before and was slightly modified by the Congress will be adhered to by AID. And I repeat this triumvirate of OMB, AID, and Department of Agriculture must approve these applications.

I hope that the triumvirate complies with the amendment for the provision of section 416 aid. The amendment as modified by the conferees says that not more than 200,000 metric tons of agricultural commodities will be made available for the African nations on the basis of donations.

There is a couple of provisos, only the first of which I will mention, and that is this proviso: That 50 percent of the commodities made available under this sentence shall be in the form of wheat or wheat products. That means that of the commodities that are available under section 416, which are dairy and wheat, half of them will be wheat.

Now, that particular proviso is in there for a purpose, to make sure that private voluntary organizations are aware that they can apply for wheat or wheat products from the CCC under section 416.

I might point out that we carried the language in the sentence preceding that, that the CCC shall make available through these private voluntary organizations this donation for African nations requiring emergency food assistance throughout this calendar year.

I would ask the manager of the bill, my good friend from Mississippi, if he will respond to a question at this point.

Mr. COCHRAN. Mr. President, I am happy to try to respond to the Senator's question.

Mr. MELCHER. Madam President, I would ask that the distinguished Senator from Mississippi respond to this question: Is it his intention and the intention of the conferees that the provisions of section 416 be utilized in the manner that I have described for distribution of wheat and dairy products to needy African nations through section 416?

Mr. COCHRAN. Madam President, will the Senator yield to me?

Mr. MELCHER. I am happy to yield.

Mr. COCHRAN. I am happy to respond in the affirmative. I hope, as does the Senator from Montana, the Secretary of Agriculture will be permitted to use the authority which he has under section 416 to make donations of wheat as well as dairy products to needy nations. We approved the suggestion of the Senator from Montana some time ago that wheat be included along with dairy products in this section, and we think that it is a helpful alternative and an additional means by which we can make surplus commodities in this country available to those nations that are not as fortunate as are we to have such a productive agricultural sector.

The Senator offered this amendment when we had the legislation on the floor. It was approved by the Senate. We urged conferees to agree to it. We were happy they did permit this language to be carried forward in the conference report as suggested by the Senator from Montana, although it was revised. But nonetheless, even with the revision, I think it is clear that the intent of the conferees is that wheat and dairy products be donated under section 416 of this program that we have approved to provide famine relief in Africa.

I commend the Senator and thank him for his assistance in developing this legislation. I think it is going to provide some much-needed relief and will indirectly benefit the farmers in our country who have produced the surplus.

Mr. MELCHER. I thank my friend from Mississippi. I think the language is clear, and I am happy that the distinguished Senator from Mississippi interprets the language as I do.

Madam President, the amount of food that we have available for donation to the starving and malnourished in African nations is rather staggering in terms of both wheat and dairy products. I mentioned what wheat was available as of the March 1 inventory. I should also like to mention that as of the same date and the same CCC commodity inventory, we have available 1.152 billion pounds of nonfat dry milk, 699 million pounds of cheese, and 262 million pounds of butter.

Madam President, this is a staggering amount of dairy products and a very substantial amount of wheat in surplus condition in CCC ownership. It is my hope and prayer that we can expeditiously provide these commodities as well as other surplus commodities from the United States for the relief of the famine-stricken countries in Africa and other so inflicted countries throughout the world.

The PRESIDING OFFICER. Is there any further debate?

Mr. DOLE. Madam President, I rise in support of final passage of the conference report on H.R. 1239, the urgent supplemental for African famine relief. The route to this moment has been a long, circuitous one, around the obstacles of potential nongermane amendments. Many of my colleagues on both sides of the aisle would have preferred to have voted on final passage of this urgently needed emergency assistance for sub-Saharan Africa long before now. There are people who are suffering from extreme famine on another continent, who are awaiting the relief that this country has promised to send them. It is the hope of the Senator from Kansas that the President will sign this measure as soon as possible after the Congress has passed this conference report.

SUMMARY OF PROVISIONS

This urgent supplemental provides both food and nonfood aid to Ethiopia, Sudan and other sub-Saharan African countries, devastated by prolonged drought and famine conditions. The agreement reached by Senate and House conferees represents a viable compromise in the funding levels previously endorsed by both Houses of Congress.

This conference report includes $384 million for title II of Public Law 480, the Food-for-Peace Program, to be available through December 31, 1985. It also provides for the use of $16 million in unobligated Commodity Credit Corporation balances. The conferees further underlined their intent by specifying that these commodities be delivered to African nations no later than December 31, 1985. Further, the conference agreement incorporates the House-passed set-aside of up to $100 million that may be spent for inland transportation under certain terms and conditions. In addition, this supplemental contains $175 million for disaster and refugee assistance, which may be extended to March 31, 1986. Also, an emergency reserve of $225 million has been established to provide flexibility in case unforeseeable circumstances occur.

CONCLUDING REMARKS

Madam President, the distinguished chairman and ranking minority member of the Appropriations Committee, Mr. HATFIELD, and Mr. STENNIS, are to be commended for steering this urgently needed supplemental through a most difficult process in order to provide relief to famine victims in sub-Saharan African countries. In addition, I would like to congratulate the distinguished chairman of the Agriculture Appropriations Subcommittee, Mr. COCHRAN, for remaining sensitive to the needs of starving Africans while being responsible to the deficit reduction needs of our own country's economy.

The President has promised to sign this bill as soon as possible, so that the relief measures contained in it can be programmed expeditiously and sent overseas to help alleviate the ongoing famine tragedy afflicting so many African countries. Let's pass this measure today, so that help can be on its way.

Mr. COCHRAN. Madam President, before asking for adoption of the conference report, I might add that I recall one of the first experiences I had in becoming acquainted with the serious famine situation in Africa was a day when the present occupant of the Chair conducted hearings. We had the opportunity to review a report of the Senator from Missouri [Mr. DANFORTH] and look at photographs which he had taken on a recent trip he made to that sub-Sahara area in Africa. I recall at that time the interest expressed by the Senator from Kansas [Mrs. KASSEBAUM] in the situation and her support throughout the development of this legislation. This supplemental provides this needed food aid. I express the appreciation of the committee to the Chair for her important assistance in identifying this need, assessing the need, and arriving at the appropriate level of support to help solve this problem.

Madam President, if there is no further debate, I urge the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. COCHRAN. Madam President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BURDICK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 2 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *of which $384,000,000 is hereby appropriated to be available through December 31, 1985, and $16,000,000 shall be derived from unobligated balances in the Commodity Credit Corporation*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 6 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: , *to be available only for such purpose and to remain available until March 31, 1986: Provided, That the Committee on Appropriations of each House of Congress is notified five days in advance of the obligation of any funds made available under this paragraph, unless the emergency is life threatening and immediate action is necessary*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 8 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: *notwithstanding any other provision of law,*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 9 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: , *to be available only for such purpose and to remain available until March 31, 1986*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 14 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

Disposition of Additional Agricultural Commodities Under Section 416 of the Agricultural Act of 1949

To prevent the waste of commodities acquired by the Commodity Credit Corporation through price support operations, the Secretary of Agriculture shall make available, through Private Voluntary Organizations for donation to African nations requiring emergency food assistance, for calendar year 1985, not more than two hundred thousand metric tons of agricultural commodities: Provided, That 50 percentum of the commodities made available under this sentence shall be in the form of wheat or wheat products: Provided further, That none of the commodities made available for donation under this sentence shall be made available until the Secretary of Agriculture has certified to the appropriate committees of the Congress that the commodities shall not be distributed through or otherwise be allowed to come under the possession or control of the Government of Ethiopia. The Corporation shall pay, with respect to the commodities donated under the foregoing sentence, transporting, handling, and other charges, including the cost of overseas delivery. Such donations shall be in addition to the level of assistance programmed under any other authority.

Mr. COCHRAN. Madam President, I move that the Senate agree to the amendments of the House to the amendments of the Senate numbered 2, 6, 8, 9, and 14 and concur therein.

The motion was agreed to.

Mr. COCHRAN. Madam President, I move to reconsider the vote by which the amendments were agreed to.

Mr. BURDICK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. COCHRAN. Madam President, I ask that there now be a period for the transaction of routine morning business wherein Senators may speak for a period of not to exceed 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COCHRAN. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without ojection, it is so ordered.

ORDER TO VITIATE ACTION ON SENATE JOINT RESOLUTION 44

Mr. DOLE. Madam President, I ask unanimous consent that action taken on Thursday, March 28, on Calendar No. 5, Senate Joint Resolution 44, be vitiated and the joint resolution be placed back on the calendar.

Mr. BYRD. Madam President, reserving the right to object—Madam President, I remove my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR MEASURES TO BE HELD AT DESK

Mr. DOLE. Madam President, I ask unanimous consent that once the Senate receives from the House H.R. 730, Cocopah Indian Tribe, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I ask unanimous consent that once the Senate receives from the House H.R. 1847, a bill to amend Title 28, United States Code, with respect to the U.S. Sentencing Commission, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEQUENTIAL REFERRAL OF NOMINATION OF PAUL A. ADAMS

Mr. DOLE, Madam President, as in executive session, I ask unanimous consent that the nomination of Paul A. Adams, to be Inspector General, Department of Housing and Urban Development, be sequentially referred

to the Committee on Banking, Housing, and Urban Affairs; that if and when reported by the Banking Committee, the nomination be referred to the Governmental Affairs Committee for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. DOLE. Madam President, I ask unanimous consent that the Senate go into executive session to consider the following nominations on the Executive Calendar: Calendar No. 66, Marianne Mele Hall, Copyright Royalty Tribunal; Calendar No. 67, Frank H. Conway, Department of Justice; Calendar No. 68, James R. Laffoon, Department of Justice.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Madam President, I ask unanimous consent that the nominations be considered en bloc and confirmed en bloc.

Mr. BYRD. Madam President, there is no problem on this side with the request.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

The nominations confirmed en bloc are as follows:

COPYRIGHT ROYALTY TRIBUNAL

Marianne Mele Hall, of New Jersey, to be a Commissioner of the Copyright Royalty Tribunal for the unexpired term of seven years from September 27, 1982.

DEPARTMENT OF JUSTICE

Frank H. Conway, of Massachusetts, to be a Member of the Foreign Claims Settlement Commission of the United States for the term expiring September 30, 1987. (Reappointment)

James R. Laffoon, of California, to be United States Marshal for the Southern District of California for the term of four years. (Reappointment)

Mr. DOLE. Madam President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Madam President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Madam President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. DOLE. Madam President, I should like to inquire of the minority leader if he is prepared to turn to the Legislative Calendar and pass the following calendar items: Calendar No. 48, House Joint Resolution 188; Calendar No. 49, House Joint Resolution 74.

Mr. BYRD. Madam President, I am happy to inform the distinguished majority leader that those two items have been cleared on this side.

Mr. DOLE. I appreciate that. I ask unanimous consent that the two calendar items just identified be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

FAIR HOUSING MONTH

The joint resolution (H.J. Res. 188) to designate April 1985 as "Fair Housing Month," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

NATIONAL INDEPENDENT RETAIL GROCER WEEK

The joint resolution (H.J. Res. 74) to designate the week of September 8, 1985, as "National Independent Retail Grocer Week," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. DOLE. Madam President, I move to reconsider the vote by which that action was taken.

Mr. BYRD. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDERS FOR WEDNESDAY, APRIL 3, 1985

ORDER FOR RECESS UNTIL 11 A.M.

Mr. DOLE. Madam President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 11 a.m. on Wednesday, April 3, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Further, I ask unanimous consent that following the two leaders under the standing order there be special orders of not to exceed 15 minutes for the following Senators: COCHRAN, ZORINSKY, PROXMIRE, COHEN, and ROCKEFELLER.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Following the special orders just identified, I ask unanimous consent there be a period for the transaction of routine morning business not to extend beyond 12:30 p.m. with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Madam President, I would indicate to my colleagues that following routine morning business, it will be the intention of the majority leader to take up the following measures: The Export Administration Act extension, if an agreement can be reached that no floor amendments be in order; Calendar No. 15, S. 413, war risk insurance, also if an agreement can be reached that no floor amendments would be in order; the auto recordkeeping requirements bill reported out of the Senate Finance Committee today, the so-called Abdnor bill; and H.R 1866, Federal Supplemental Compensation Program which I understand the House is acting on at this very moment.

It is quite likely that there will be rollcall votes expected throughout Wednesday's session, possibly two, or three, or more. It had been my hope that we could complete action on all of these matters tomorrow, but it will depend on whether or not Members wish to pursue any particular measure with additional amendments.

It is my understanding there will be an amendment offered by the Senator from Pennsylvania [Mr. SPECTER] to H.R. 1866, which will be a 6-month extension of FSC benefits.

FEDERAL SUPPLEMENTAL UNEMPLOYMENT COMPENSATION

Mr. DOLE. Madam President, I am just advised that the House has passed on a voice vote H.R. 1866, the Federal supplemental unemployment compensation measure. I assume that we could dispose of that tomorrow and that might help dispose some of the other items that we would like to pass.

Mr. BYRD. Madam President, if the distinguished majority leader will yield, I share with the distinguished majority leader the hope and belief that once that matter involving Federal supplementary compensation is acted upon, the chances of taking up the war risk insurance measure and the extension of the Export Administration Act would be considerably improved. I hope that would be the case, that we could take this up and not have problems with amendments. I am in no position to assure the majority leader of that at this moment.

Mr. DOLE. As I have indicated, there probably will be at least one germane amendment to the Federal supplemental compensation bill, H.R. 1866. I assume the Senator from Pennsylvania and perhaps the Senator from Michigan may join in an amendment, and there may be others.

SOUTH AFRICA

Mr. KENNEDY. Madam President, as the majority leader knows, several

days ago, Senator WEICKER and I introduced a joint resolution, Senate Joint Resolution 96, to condemn the recent killings in South Africa and to request a report from the Secretary of State.

I have had a number of calls about other matters on the calendar. I want to reiterate to the majority leader that I wanted very much for the Senate to be able to go on record on this aspect of the South Africa issue in a timely way. I am quite prepared—and I know I speak for Senator WEICKER as well—to cooperate with the majority leader in a very brief time agreement for the consideration of that resolution.

I raise this issue with the majority leader again because of the problem of timeliness. I am aware of the actions which have been taken in the Foreign Relations Committee on legislative matters, which will come to the floor of the Senate in the future, and we will certainly have an opportunity to talk about those measures in a timely way. I think that this situation, with respect to the recent killings, calls for Senate action now.

Madam President, I ask unanimous consent that the text of my resolution may be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 96

Whereas apartheid is a system of institutionalized racism that oppresses 23 million black people in South Africa;

Whereas apartheid is a system that can only be maintained by the activities of the South African security forces;

Whereas on March 21, 1985, the South African police opened fire on a crowd of black people in the Eastern Cape area of South Africa, killing at least nineteen individuals and wounding many more;

Whereas these killings have brought the death toll in South Africa during the past year to a total of 244; and

Whereas the Congress desires a full and impartial report on the circumstances of the recent violence;

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. The Congress of the United States endorses the statements of the Secretary of State on March 21, 1985, that

(a) the system of apartheid in South Africa is "totally repugnant to the people of the United States;"

(b) these most recent killings "underline how evil and unacceptable apartheid is;" and

(c) this most recent act of violence by the South African police is "deplorable and the people of the United States have nothing except denunciation to say for it."

SEC. 2. The Congress requests the Secretary of State to conduct an independent investigation of the violence in the Eastern Cape during the period of March 21 through 24, 1985, and to submit a report to the Congress by April 30, 1985, on the circumstances relating to the violence, including, but not limited to, the number of people killed and wounded.

SEC. 3. The Congress requests that a copy of this resolution be transmitted by the Secretary of State to the Government of South Africa.

Mr. KENNEDY. Mr. President, the Senate had no hesitancy last week in adopting a resolution on the issue of trade with Japan. We ought to be able to act in a similarly expeditious way to condemn the recent massacre in South Africa. The resolution I have offered uses the language of the Secretary of State, who has condemned the killings on several occasions, and I would hope we could get prompt bipartisan action on the resolution by the Senate.

I reiterate for the record and to the majority leader that I want to see other legislation passed as well, and I would not hold it up, so long as I have a chance to offer my resolution as an amendment to another bill in a timely manner, if it is not possible to act on it as a free-standing resolution.

I am quite prepared to work with the majority leader and the administration, if this is their desire, over the course of the evening to discuss the specific language of the resolution and try to reach an agreement to condemn the killings of March 21.

I wonder whether the majority leader has any reaction to such a possibility.

Mr. DOLE. Madam President, if the Senator from Massachusetts will yield, I am just in the process of reviewing Senate Joint Resolution 96. I know of the Senator's strong feeling and sincere concern as well as that of the distinguished Senator from Connecticut, Senator WEICKER.

I have not discussed this matter personally with the distinguished chairman of the Foreign Relations Committee. I will be pleased to do that. I can do it yet this evening. He happens to be in a meeting in my office, and if there is some way to do it, I would be happy to make that announcement tomorrow morning.

Mr. KENNEDY. That would be entirely acceptable to me, and I appreciate the comments of the majority leader. I have been told by the sponsors of other measures that this may be the last hurdle prior to their consideration. I do not know whether that is so or not.

I would certainly work with the leader to seek expeditious action on other measures which are ready for action.

I thank the majority leader.

I know the chairman of the Foreign Relations Committee and the chairperson of the Subcommittee on Africa who now presides over the Senate are thoroughly familiar with this issue.

I welcome whatever response the majority leader might have.

Mr. DOLE. I thank the Senator from Massachusetts.

I will make inquiries of both my distinguished colleague from Kansas and the chairman of the Foreign Relations Committee.

I have not had the opportunity to discuss this matter with them as yet. It was my understanding that a hearing has been set, is that correct, on Senate Joint Resolution 96 for April 15 or the week of April 15?

Mr. KENNEDY. The hearing in April is for the purpose of considering separate legislation which has been introduced. This legislation, which a number of us offered, includes provisions relating to bank loans and new investment in South Africa, and the sale of South African Krugerrands in the United States.

The chairman of the committee indicated he would hold hearings and gave assurances that there would be an opportunity for a markup on that legislation. But that is a separate issue from the resolution I have offered to condemn the massacre which occurred on March 21, and I would hope the Senate could act on it before we adjourn for the Easter recess.

The report in the Rand Daily Mail of March 26, published in South Africa, is in conflict with the South African Government's explanation, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[From the Rand Daily Mail, March 26, 1985]

GOVERNMENT'S VERSION OF SHOOTINGS QUESTIONED—CROWD CAUGHT IN CROSSFIRE, SAYS PFP

(By Chris Freimond)

CAPE TOWN.—The Progressive Federal Party yesterday published a comprehensive dossier detailing a significantly different version of last Thursday's Uitenhage shootings to the one given in Parliament by the Minister of Law and Order, Mr. Louis le Grange.

Copies of the dossier were sent to the State President, Mr. P W Botha, Mr. Le Grange, and the Minister of Co-operation and Development, Dr. Gerrit Viljoen.

It will also be sent to the commission of inquiry which has been appointed to investigate the shooting in which Police killed 19 blacks who were marching in a funeral procession in the Langa township near Uitenhage.

The information will be used extensively during a debate in Parliament today and tomorrow.

The dossier was compiled after a visit to Uitenhage on Friday by six PFP MPs: Mrs. Helen Suzman, Dr. Alex Boraine, Mr. Ray Swart, Mr. Errol Moorcroft, Mr. John Malcomess and Mr. Andrew Savage.

It included nine affidavits by witnesses to the shooting, including a number of people who were wounded.

Arising out of the sworn statements which the PFP has received, they alleged the following:

The police prevented people from traveling in motor vehicles to the funeral on Thursday;

The crowd was peaceful and there was no evidence that they carried sticks, spears and petrol bombs;

There was at least one police Caspir armoured vehicle ahead of the crowd and one behind the crowd. Shots were fired from both Caspirs and the crowd was caught in the crossfire;

Evidence was that the first person to be shot and killed was a boy on a bicycle who was closest to the Caspir. This was followed by a fusillade of shots in which both rifles and shotguns were used;

There was no evidence that the crowd had "surrounded" the Caspir and that police were forced to fire in self-defence as claimed in the official version;

There was evidence that the police did not restrict their firing to a single volley, but that the firing continued after the people had begun fleeing;

Allegations were made of the police collecting stones and strewing them among the bodies;

Wounded people at the hospital were under police guard. It was not possible for the public to visit the hospital. Wounded people feared they would be arrested if they went to the hospital for treatment.

The PFP group asked why teargas had not been used, and suggested that the weather on the day of the shooting and the terrain was ideally suited for the use of gas.

The group said it ended its visit to Uitenhage "with feelings of the gravest disquiet over the discrepencies between the official report of the killings and what we ourselves had seen and heard".

At a Press conference in Cape Town shortly after the release of the dossier, Mrs. Suzman said a request for a special parliamentary debate on the shootings had been refused, but the party had been told it would be able to refer to the shootings during the debate today and tomorrow of the white "own affairs" budget.

She said the police at Uitenhage had been unco-operative and had hampered the group's investigations.

"We are all convinced that this was not a riotous situation," she said.

Dr. Boraine said he believed that if the police had not stopped the people from using vehicles to travel to the funeral—which many clearly did not know had been banned—the shooting could have been avoided.

In the official version of the shooting, Mr. Le Grange said police had been forced to open fire on the crowd in self-defense after it refused an order to disperse, had ignored warning shots, had surrounded the police and had started pelting the police with sticks, stones and petrol bombs.

Mr. KENNEDY. Madam President, because of the dispute over the facts, I would hope the Senate request the Secretary of State to inform us as much as possible about that tragedy. This information will be helpful to the Members of this body when we consider the substantive legislation on South Africa in the future.

I thank the majority leader.

Mr. DOLE. Madam President, I know the general concern of the chairman of the Foreign Relations Committee about resolutions being introduced over which his committee would have jurisdiction, being taken up on the floor without appropriate consideration or hearings.

But, in any event, I will consult both Senators and advise the distinguished Senator from Massachusetts sometime tomorrow morning.

RECESS UNTIL 11 A.M., WEDNESDAY, APRIL 3, 1985

Mr. DOLE. Madam President, there being no further business to come before the Senate, I move that the Senate stand in recess until 11 a.m. on Wednesday, April 3.

The motion was agreed to; and, at 6:29 p.m., the Senate recessed until Wednesday, April 3, 1985, at 11 a.m.

NOMINATIONS

Executive nominations received by the Secretary of the Senate April 1, 1985, under authority of the order of the Senate of January 3, 1985:

Department of State

Richard Thomas McCormack, of Pennsylvania, to be the permanent representative of the United States of America to the Organization of American States, with the rank of Ambassador.

In the Marine Corps

The following-named Marine Corps Enlisted Commissioning Education Program graduates for permanent appointment to the grade of second lieutenant in the U.S. Marine Corps, pursuant to title 10, United States Code, section 531:

CONFIRMATIONS

Executive nominations confirmed by the Senate April 2, 1985:

DEPARTMENT OF JUSTICE

Frank H. Conway, of Massachusetts, to be a member of the Foreign Claims Settlement Commission of the United States for the term expiring September 30, 1987.

COPYRIGHT ROYALTY TRIBUNAL

Marianne Mele Hall, of New Jersey, to be a Commissioner of the Copyright Royalty Tribunal for the unexpired term of 7 years from September 27, 1982.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF JUSTICE

James R. Laffoon, of California, to be U.S. Marshal for the Southern District of California for the term of 4 years.

HOUSE OF REPRESENTATIVES—*Tuesday, April 2, 1985*

The House met at 12 o'clock noon.

The Reverend Dr. Perry E. Gresham, president emeritus, Bethany College, Bethany, WV, offered the following prayer:

O God, we ask You to bless the leaders of our Parliament.

Time and space are in Your hands. Let those who fashion laws stand beside Elijah on the mountain. The hurricanes and tornadoes of ideology sweep the Earth. But You are not in the wind. As the mighty earthquake of change causes our moral habitations to tremble, let them behold Your changelessness. You are not in the earthquake.

When the fires of hatred destroy Your children through violence and terror, may they seek to quench the flames. But You are not in the fire.

Speak to the Congress in Your still small voice of reason, persuasion, civility, and responsibility. In quietude, without mandate, let each citizen become a living law.

O God of Peace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. KASICH. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. KASICH. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 243, nays 161, answered "present" 3, not voting 25, as follows:

Mr. HALL of Ohio changed his vote from "nay" to "yea."

Mr. MICA changed his vote from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed, without amendment, a joint resolution of the House of the following title:

H.J. Res. 186. Joint resolution designating April 2, 1985, as "Education Day, U.S.A."

□ 1220

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1714, NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT, 1986

Mr. WHEAT, from the Committee on Rules, submitted a privileged report (Rept. No. 99-33) on the resolution (H. Res. 119) providing for the consideration of the bill (H.R. 1714) to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications, construction of facilities, and research and program management, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REV. PERRY E. GRESHAM

(Mr. BENNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BENNETT. Mr. Speaker, it is great that Dr. Perry Gresham has been our chaplain today for our opening prayer. He has had a most distinguished career in the field of education and as a Disciples of Christ minister.

Dr. Gresham is now distinguished professor of humanities at Bethany College in West Virginia and was for two decades president of that renowned college, the primary and most prestigious among the Christian Church colleges and universities.

Having been educated at Texas Christian University, the University of Chicago, Columbia University, and the University of Glasgow, Dr. Gresham has taught philosophy at TCU, University of Washington, and the University of Michigan. For the last 15 years, he has taught economic philosophy.

In 1976, he conducted a seminar on Adam Smith at St. Andrew's University in Scotland. His career in education has paralleled his outstanding achievements in the world of business as well.

Dr. Gresham's hobbies include poetry and golf and he has lectured widely, both in the United States and abroad. He is the author of several books, including his latest, "With Wings as Eagles." To know him as I do is in fact to soar with him to new heights on the wings of eagles.

EMPLOYER SUPPORT INITIATIVE

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, I believe by now that most of the membership is aware of a series of initiatives which I have developed to enhance the readiness of the National Guard and Reserves. Today, I would like to speak on the employer support initiative.

In looking into the issue of employer support, it is obvious that this is an area which is critical to the readiness of our Reserve Forces. While substantial employer support is evident throughout the country, there are problem areas.

I intend to introduce a tax incentive which will reward those employers who contribute to the defense of this Nation by supporting their Guard and Reserve employees. While this action may not benefit all employers to the same degree, I believe it represents a significant cornerstone for building further recognition of the sacrifices made by loyal employers.

I have also introduced legislation (H.R. 1495) aimed at a serious problem being experienced by a significant number of guardsmen and reservists. That problem is discrimination in hiring. It was brought to my attention that men and women are being denied jobs, for which they are otherwise qualified, because of their membership in one of the Reserve components. One of the biggest violators is the Federal Government. I believe my legislation will remedy this situation.

Finally, Mr. Speaker, I will introduce a joint resolution calling upon the American people, and employers in particular, to support the patriotic men and women who willingly make the sacrifices necessarily associated with service in our Reserve Forces. I believe that the language of the resolution, which is drawn from the fiscal year 1983 DOD Authorization Act, reflects the feelings of a great majority of the Members of Congress. Hopefully, it will serve as a stepping stone toward establishing a true national awareness of the professionalism and dedication of the members of our Reserve Forces.

REGULATION OF GOVERNMENT SECURITIES DEALERS BY FEDERAL RESERVE BOARD

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, today I am introducing a bill which will give statutory authority to the Federal Reserve Board to regulate Government securities dealers.

Government securities dealers are those folks who buy and sell the bills and bonds and notes that are issued by the Federal Reserve System to fund our huge, humongous public debt. Government securities dealers are private corporations like ESM which recently got into trouble, and as a result triggered the problems with the savings and loan banks in Ohio and some municipalities.

Unfortunately, many of these Government securities dealers are not regulated at all. And those which are do not come under the purview of the authority of the Federal Reserve System to investigate, to audit, to examine and so forth. And yet it is the Federal Reserve System that is responsible for the selling of these bills, bonds, and notes, these Government securities.

In order to protect our citizens, in order to protect our cities and our school boards, and those financial institutions that buy and invest in our Government securities, it seems to me to be fundamentally necessary to give regulatory power to the Federal Reserve Board in order to make sure that dealers who are in the business of buying and selling Federal paper are as sound and as secure as we can possibly make them be, and that the transactions involving our Government securities are as risk free as possible.

I urge my colleagues to support this new legislation.

KEEPING AMERICAN JOBS AT HOME

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, General Electric has closed its Youngstown plant even though it was still profitable. Records show that GE has hired 30,000 people overseas in the last 10 years. Meanwhile Youngstown's unemployment is at a record 30 percent overall and 45 percent for minorities.

We've got to stop this.

Today, I am introducing a bill designed to discourage American corporations from packing up and moving overseas by closing loopholes in the current Tax Code.

Not only do these American corporations avoid paying Federal taxes by moving overseas, but they take American technology, profits, and jobs.

This country can no longer afford to sit idly by and be robbed by companies who pull up stakes, and take our jobs with them.

Revenue collected will be directed to reduce the national debt and aid areas of high unemployment.

Let's close these tax loopholes once and for all. By doing so, we will keep America's jobs in America, where they belong.

□ 1230

A DOUBLE SPECTACLE

(Mr. CONTE asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, last night the country was treated to a double spectacle: The magnificence of an inspirational athletic performance by the Wildcats of Villanova, and the dignity and grace my Georgetown Hoyas showed in defeat. Their performances truly showed college basketball at its very best—as was the case this year whenever two teams of the Big East met.

Coach Rollie Massimino deserves to stand tall today. He ignored the wisdom of all the experts and told his players that they were as good as the reigning champs were. His players believed him so much that they proved to be even a little better than that. Coach Mass' makes one proud to be an Italian. But, there is no shame on Coach John Thompson and his Hoyas. As Rollie Mass' said, Villanova will be remembered for beating one of the greatest teams of all times. You did nothing wrong Coach Thompson, it's just that Coach Mass' did nothing wrong a little bit better.

My congratulations go out to the Wildcats, but my heart still belongs to the Hoyas. And, as an old fan of the Boston Red Sox, I'm no stranger to those immortal words—wait'll next year. Still, I can't help but think what might have been if my ankles hadn't been aching in solidarity with Reggie Williams.

INTRODUCTION OF HOUSE CONCURRENT RESOLUTION ON TRADE PRACTICES OF JAPAN

(Mr. DINGELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DINGELL. Mr. Speaker, the sense-of-the-Congress resolution, which I am introducing today with Congressman BROOMFIELD and over 20 other Members of this House, is similar to Senate Concurrent Resolution 15, which the Senate approved on March 28 by a vote of 92 to 0.

The resolution calls upon the President to exercise his authority under existing laws to respond in kind to Japan's unfair and discriminatory trade practices. This is an opportunity for the House to go on record as objecting to the outrageous treatment by Japan of American goods and services.

There is no question that the President, the Congress, and this Nation must take decisive action to confront the international trade crisis between the United States and Japan which threatens our economic recovery, our industries, and hundreds of thousands of American jobs.

The situation is quite clear. For years, the United States has attempted to practice so-called free trade policies while Japan has played by a different set of rules. The result is in an overall trade deficit of $123 billion in 1984—a deficit which could very well exceed $170 billion by the end of 1985. In the case of Japan, the U.S. trade deficit has grown from $10 billion in 1980 to $37 billion in 1984.

The bottom line is that the United States opens its doors wide; the Japanese open its doors a mere crack, or not at all. The U.S. automotive trade deficit since 1981 has more than doubled—from $11 billion to $27 billion. The trade deficit in telecommunications equipment has grown from $516 million in 1979 to $1.9 billion in 1984. Japan's barriers to other U.S. exports such as pharmaceuticals, medical equipment, wood products, agriculture products and other goods and services have become intolerable.

Our trade problem is complicated by Japan's unfair and discriminatory treatment of products exported to Japan from developing countries. As a consequence, those Third World countries inundate the United States with their products. They do not have access to Japanese markets, so they flood our markets, because we are open. The United States takes 58 percent of the manufactured goods exported from lesser developed countries. The Japanese, by contrast, take only 8 percent of such exports.

In the area of telecommunications, the administration has engaged in another round of negotiations with Japan to open their market for U.S. equipment and services. The administration began with nine specific goals.

An internal administration evaluation of the negotiations as of March 17, 1985, showed that only two of those nine goals had been achieved.

Last Thursday, the chief U.S. neogtiator, Lionel Olmer, told the Energy and Commerce Committee's Subcommittee on Commerce that further progress had not been achieved.

Specifically, Japan has—

Refused to eliminate prior registration and approval requirements for type 2 business services:

Refused to eliminate arbitrary criteria and criteria that have no technical relevance;

Refused to adopt a regulatory basis for equipment approval focused on possible "harm to the network"—the same as in the United States;

Refused to put in writing an agreement to have impartial members on a single independent agency that would approve equipment and network services;

Refused to permit foreign suppliers an opportunity to comment on proposed administrative procedures, standards, and rules of certification; and

Refused to establish a legitimate appeal process external to the Ministry of Posts and Telecommunications.

In the area of automobiles, the administration threw away a voluntary restraint agreement with Japan in hopes of greater access to Japan's markets for U.S. goods and services. The Japanese have responded with a 25-percent increase in automobile shipments and a continuation of its closed door policy to U.S. exports. Our trade talks with the Japanese, according to a March 12, 1985, letter from Secretary Malcolm Baldrige, have been disappointing.

Today's newspapers indicate another expression of confidence in Prime Minister Nakasone's commitment to open Japan's markets. The President says he is assured that Mr. Nakasone "is going to continue doing his utmost to bring about changes." Thus, the President concludes:

So * * * we'll just have to wait and see what he can accomplish.

Mr. President, we have been waiting while the Japanese bureaucrats who are not influenced by Mr. Nakasone's assurance eat us alive at the negotiating table.

The time for tabletalk negotiations has ended. The President must take off the gloves. He must tell our Japanese trading partner that this Nation can no longer sit idly by while Japan's unfair and discriminatory trade practices protect Japanese industry at the expense of American firms and workers.

We do not advocate trade war. Instead, we seek bipartisan support for the President to take affirmative action to avoid a situation where this country could become a $1 trillion net debtor country over the next 5 years while Japan becomes a $500 billion creditor nation.

If we are ever to have free and fair trade between Japan and the United States, Japan must start playing by fair rules. For the sake of American firms and American workers, we must demand it.

For the benefit of my colleagues, I am inserting at the end of these remarks, House Concurrent Resolution 106:

H. CON. RES. 106

Concurrent resolution to express the sense of the Congress that the President respond to those trade practices of Japan that are adversely affecting the interstate commerce of the United States

Whereas the interstate commerce of the United States continues to be adversely affected by the trade deficits with Japan, which deficit, in 1984, reached the unprecedented level of $37,000,000,000 and thereby accounted for almost one-third of the entire United States trade deficit with the world;

Whereas this unprecedented bilateral deficit was accumulated in spite of significant growth in the Japanese economy;

Whereas the principles of free trade provide for trade flows between nations on the basis of each nation's comparative advantage;

Whereas although Japan has extensive and easy access for sale in interstate commerce in the United States of products in which Japan has a comparative advantage, United States exporters lack meaningful access to the Japanese market for manufactured goods, forest products, key agricultural commodities, and certain services in which the United States has a comparative advantage;

Whereas this imbalance is costing the United States hundreds of thousands of jobs every year and harming industries located in the United States;

Whereas negotiating with Japan over the years to secure meaningful improvements in market access for competitive United States exports has been largely unsuccessful;

Whereas the high value of the United States dollar relative to the Japanese yen effectively subsidizes Japanese exports to the United States and taxes United States exports to Japan;

Whereas an extension by Japan of the voluntary restraint agreement on Japanese-made automobiles with a 25 percent increase in the number of such automobiles sold in interstate commerce in the United States without a comparable improvement in access for competitive United States exports to the Japanese market, including automobiles and other products, will severely exacerbate the bilateral trade deficit and harm United States industry and workers;

Whereas the merchandise balance of trade deficit has the potential of undermining the entire range of bilateral relations between the United States and Japan; and

Whereas action by the United States is appropriate—

(1) to enforce United States rights under international agreements, to which Japan is a party, that affect interstate commerce in the United States and our foreign commerce, and

(2) to respond, through regulatory and other actions, to Japanese acts, policies, and practices which are—

(A) inconsistent with, and otherwise deny benefits to the United States, under such international agreements, and

(B) are unjustifiable, unreasonable, or discriminatory and burden or restrict interstate commerce in the United States: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President, in furtherance of United States interstate and foreign commerce, should take all appropriate and feasible action within the power of the President to—

(1) enforce the rights of the United States described in paragraph (1) of the last clause of the preamble to this resolution; and

(2) obtain the elimination, through regulatory and other actions, of the acts, policies, and practices described in paragraph (2) of that last clause.

SEC. 2. (a)(1) By no later than the date that is 45 days after the date on which this resolution is agreed to by the Congress, the President should report to the Congress and publish in the Federal Register notice of the actions that the President has determined to take to accomplish the objectives described in paragraphs (1) and (2) of the first section of this resolution.

(2) The President should implement all actions that the President has determined to take to accomplish the objectives described in paragraphs (1) and (2) of the first section of this resolution by no later than the date that is 90 days after the date on which this resolution is agreed to by the Congress.

(3) Any action taken by the President to accomplish the objectives described in paragraphs (1) and (2) of the first section of this resolution should be modified or revoked only if the President determines that the minimum objective described in subsection (b) has been achieved. The President should report to Congress and publish in the Federal Register notice of such determination.

(b) Action by the President to accomplish the objectives described in paragraphs (1) and (2) of the first section of this resolution should at least negate the cumulative impact that the relaxation of the voluntary restraints on Japanese automobiles entered into interstate commerce in the United States will have on the merchandise balance of trade between Japan and the United States. Action taken to accomplish this objective should be directed against competitive Japanese products entered into interstate commerce in the United States including, but not limited to, automobiles, telecommunication products, optical fibers, textiles, and electronic products.

JAPAN AND THE UNITED STATES ON A COLLISION COURSE OVER TRADE PRACTICES

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, America is down right mad with Japan's trade policy.

Unless there is a sudden about-face, we are headed on a collision course that will surely cause serious and permanent damage to our relationship as allies and friends.

My colleague, Mr. DINGELL, and I are introducing a bipartisan resolution today intended as a warning shot across the bow of Japan, incorporated.

We're tired of their liberal-sounding policies that turn out to be protectionist in practice. We're tired of Japanese bureaucrats nitpicking our products to death. We're tired of Japan acting like a greedy child unwilling to let anyone else sit at its table.

America is up in arms, Mr. Speaker, and it would be a mistake to underestimate our frustration. Unless this warning is heeded, retaliation and possibly full-blown trade warfare lie just around the corner.

CONGRATULATING THE 1985 VILLANOVA WILDCATS

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, I rise today to congratulate 12 of the finest college students in my congressional district and in the Nation—I'm speaking of the 1985 Villanova Wildcats—this year's NCAA basketball champions who last night beat the heavily favored, defending national champion Georgetown Hoyas in what is being called the greatest upset victory in college basketball history.

As you know, Mr. Speaker, my congressional district is known for close finishes and upset victories. Over my 10 years in Congress we've had some very close elections. During this year's college basketball season, the Villanova Wildcats had some very close basketball games. From the very beginning in the NCAA tournament, Villanova was cast as the underdog that nobody picked to win.

In fact, the skeptics said just a few short weeks ago that Villanova would not even make the NCAA's—they said that they didn't have the talent of St. John's, or the strength of Georgetown. But Rollie Massimino and his Villanova Wildcats proved all the skeptics wrong.

To those of us who have followed Villanova over the years, their upset victory comes as no great suprise. Rollie Massimino, my favorite constituent, says that his team is a family, and through their dedication together they beat teams that were thought to be unbeatable. He has been patient with his team, and taught them well. Their efforts are testimony to what hard work and dedication can bring.

As Gary McLain, Villanova's starting point guard who bewildered the Hoya's trapping defenses, said last night: "No one in America knows how hard we worked." Well, Mr. Speaker, today the entire Nation knows just how hard this team has worked.

The Villanova Wildcats beat the team heralded until last night by basketball experts as the greatest team of all time. But that's all changed now and the Villanova Wildcats are indisputably the No. 1 team in the Nation. I'm proud of them, Mr. Speaker, and am gratified that they are now getting all the recognition that they have worked so hard to earn.

Let me conclude my remarks with a heartfelt: Go Cats.

WILDCATS' VICTORY ONE OF THE GREATEST UPSETS IN HISTORY OF THE NATIONAL COLLEGIATE ATHLETIC ASSOCIATION

(Mr. COUGHLIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COUGHLIN. Mr. Speaker, the Villanova Wildcats stunning victory last night over the No. 1 ranked Georgetown Hoyas will long be remembered as one of the greatest upsets in the history of National Collegiate Athletic Association basketball competition.

Coach Rollie Massimino and his team surely deserve the NCAA title after defeating highly rated teams before facing the powerful George-

town squad coached by John Thompson. Always the underdog, Villanova proved the prophets wrong.

With a nod of honor to Coach Thompson and his tremendous team and an apology to Lord Byron, I offer this tribute to Villanova University's basketball organization:

The Hoyas came down like the wolf on the fold,
The Wildcats were doomed all people were told.
The coronation was set with John Thompson as king,
While Massimino's men were accorded nary a thing.
As the favorites of all when all had been seen,
Ewing and team played tough and played mean.
Like warriors of yore when sweet victory has flown,
The once-omnipotent stood together but fearfully alone.
For the skill of the Wildcats arose so supreme
And breathed life in the face of the impossible dream.
And the prophets of sportsdom so cynical and chill
Were astounded to find that their words were so nil.
And the Hoyas of Georgetown are loud in their wail,
The arrogance once mighty now was so frail.
And the courage of Wildcats so tried and so tested
Stood Number 1 in the land—the best had been bested.

PRESIDENT REAGAN'S CONSTRUCTIVE ENGAGEMENT POLICY IS NOT WORKING IN SOUTH AFRICA

(Mr. LELAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LELAND. Mr. Speaker, yesterday a South African police lieutenant admitted that he had ordered his men to fire into thousands of black marchers after one woman threw one stone. Nineteen people were killed because one woman threw a stone.

I do not interpret this mindless violence as a sign of progress made by the South African Government. Yet President Reagan is quoted by the Washington Post this morning as stating:

> We think that what we're doing (constructive engagement) is the best, has the best effect, the most effect of anything we could do * * *. We think some progress has been made.

Nineteen dead from police guns after one rock is thrown from a crowd.

President Reagan also once again tried to blame the violence in South Africa on the blacks. He stated that there are many factions in South Africa and that some of the violence comes from within these factions. How can President Reagan argue about factionalism in a country which has banned public meetings?

Constructive engagement is not working in South Africa. The only thing that seems to be working is the destructive duplicity practiced by the South African Government and endorsed through the destructive complacency of the Reagan administration.

SEAT RICK McINTYRE

(Mrs. MEYERS of Kansas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MEYERS of Kansas. Mr. Speaker, fairness is such an elusive quality. It's kind of like beauty—it's in the eyes of the beholder.

But, those taking an objective look at the outcome of the election in Indiana's Eighth Congressional District are having trouble distinguishing what is fair, and what is constitutionally right.

In letters to my colleagues from Kansas, the past president of the National Association of Secretaries of State, and our Kansas secretary of state, Jack Brier, goes right to the heart of the matter.

Secretary Brier says, first, that Mr. McIntyre is the duly elected representative. He won both the election and a subsequent recount and was certified the winner by the Indiana secretary of state. Mr. McIntyre's opponent has never filed an action to contest the election.

And second, never before has the House refused to recognize a valid election certificate issued by a sovereign State. If, on a whim, Congress may set aside the certification of a duly elected member, then what purpose will future certifications have? Indeed, what purpose will an election serve?

Mr. Speaker, I request this body to reaffirm the principle of fairness in our dealings with each other, and seat Rick McIntyre.

□ 1240

FINANCIAL SERVICES EQUITY ACT OF 1985

(Mr. LUNDINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNDINE. Mr. Speaker, today I am introducing legislation designed to improve the equity and effectiveness of our Nation's financial system. This bill, the Financial Services Equity Act of 1985, addresses several problems which currently plague various aspects of this country's financial services industries. It will enable banks and other financial institutions to compete in a more stable and equitable environment, and will require that these same institutions follow certain procedures which are designed to protect consumers.

This bill addresses some of the most pressing problems facing the financial services industry today: It closes the controversial nonbank bank loophole, which the chairmen of both the House and Senate Banking Committees have stated must be closed; it allows troubled agricultural banks to be eligible for the Net Worth Certificate Program and extends this program, which was originally designed to aid ailing thrifts, until 1988; it requires that a Federal policy on deposited funds availability be approved and enforced by the Federal Reserve; and requires that interest rate policies on savings accounts be prominently displayed in all savings and loans associations.

In addition to these provisions, which I believe will go a long way toward ensuring the safety and soundness of our system and protecting the consumer, my bill contains several measures to increase competiton and bring our laws up to the realities of the marketplace.

Since the enactment of the Banking Act of 1933 (Glass-Steagall), there have been changes in our domestic and international economies and advances in technology that would have been inconceivable to the lawmakers who drafted Glass-Steagall in the dark days of the depression. In the last few years, automated teller machines, split second transfers of funds, new money market instruments, and the participation of financial conglomerates have revolutionalized the banking world. Our Nation's financial industry must be able to adapt to and utilize these changes in a safe, reasonably regulated environment.

The banking structure that was established under Glass-Steagall has served this country well for 50 years, but changes in the marketplace have outstripped the present regulatory structure. It is becoming increasingly difficult for banks to continue to prosper, as sound businesses should, in the restricted environment that currently exists.

The legislation I am introducing today provides for a gradual phase in of interstate banking, enabling banks to invest in new localities and infuse depressed areas with new capital. One of the problems that a large number of troubled agricultural banks are facing is that of being restricted to doing business in States in which the economies are largely dependent upon agriculture. Interstate banking would bring much needed capital into many new areas and expand the range of services available to local consumers.

In addition to an interstate provision, the bill would allow banks and other financial institutions to establish separate subsidiaries through which they could deal in and underwrite mortgaged back securities, municipal revenue bonds, and commercial

paper. This measure will enable banks to compete on an equitable basis with other types of financial institutions. Under the provisions of this bill, these activities would be federally regulated and would in no way threaten the safety and soundness of the banking system. In fact, I believe that these provisions, by increasing competition and enabling banks to take advantage of different market opportunities, will enhance the safety and soundness of our system.

Mr. Speaker, the legislation I am introducing today is controversial and far reaching, but I believe it is also long overdue. If we in Congress do not act to regulate this rapidly changing industry, highly paid attorneys and corporate strategists of the large financial services conglomerates will continue to develop new ways of working around the existing, antiquated laws. Such practices constitute a grave threat to the safety and soundness of our banking system and do consumers a disservice. It is time that we address these issues.

NICARAGUAN REFUGEES FLOOD COSTA RICA

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. LIVINGSTON. Mr. Speaker, during the week of March 11, in one 3-day period, 3,000 Nicaraguan citizens voted with their feet against the Sandinista regime by leaving their homes in Nicaragua and fleeing to neighboring Costa Rica. At this very moment there are about 20,000 such refugees from Nicaragua, and Costa Rica's Minister of Public Security, Benjamin Piza, estimates that as many as another 80,000 Nicaraguans are living in Costa Rica without declaring themselves.

In short, people are fleeing Nicaragua in droves, joining the thousands of their fellow citizens who have fled before them. The impetus for the current flight appears to be the stepped-up military draft undertaken by the Sandinistas to bolster what has become the largest army in Central America. According to Medaro Antonio Lopez, a 22-year-old Nicaraguan now in Costa Rica.

No one wants to join the army. They don't give you adequate training. They give you 8 days training and then send you to the front as though you were a dog. Young kids have to go to the mountains to fight and die. Meanwhile, the internacionalistas (Soviet Bloc advisors) who are organizing the country stay in Managua and have a party.

Mr. Speaker, today these young men and their families are fleeing to neighboring Central American countries like Costa Rica and Honduras, placing a terrible burden on the resources and the people of those countries. Where will they run tomorrow?

Mr. Speaker, I urge my colleagues to recognize the very real implications for the United States, and I direct their attention to the March 21, 1985, article in the Washington Times outlining the refugee situation in greater detail.

[From the Washington Times, Mar. 21, 1985]

NICARAGUAN REFUGEES FLOOD COSTA RICA

(By Glenn Garvin)

SANTA ROSA, COSTA RICA.—Thousands of Nicaraguan refugees, fleeing a stepped-up military draft in their country, are sweeping into Costa Rica in a human tidal wave that threatens to swamp this little republic.

"To me, this is an invasion. That's how bad it is," said Benjamin Piza, Costa Rica's minister of public security. "We cannot cope with it ourselves. It has to be an international effort."

Mr. Piza said 3,000 Nicaraguans arrived in three days at the end of last week, and he expects the rate to increase as the Nicaraguan army searches for more young men to meet its draft calls.

The Costa Rican Red Cross is scrambling for food, medicine and tents to meet the needs of 20,000 refugees, most of whom are malnourished and sick after spending up to a month in the jungle evading the Nicaraguan Sandinista government's patrols. Mr. Piza estimates that as many as another 80,000 Nicaraguans may be living here on their own without formally declaring themselves.

"They're bringing in diseases that we wiped out long ago," said Mr. Piza. "We have malaria again in Costa Rica, for the first time in 15 years . . . but I don't know what we can do. We have to let them in. We can't just shoot the people at the border."

Refugees have been trickling out of Nicaragua into Costa Rica ever since resistance fighters under the command of one-time Sandinista war hero Eden Pastora went to war against the Nicaraguan government in early 1983. But Nicaragua's tough new draft laws have turned the trickle into a deluge.

"Before, the refugees were campesinos [peasant farmers]," said Mr. Piza. "You could organize them into a farm unit and put them to work supporting themselves. They were back-country people.

"But new we're getting younger people, people from the city, which is an entirely different problem. You have to give them a chance to continue their studies, or go to the university, or whatever they were doing."

Santa Rosa is an agricultural village of about 10,000, located 35 miles south of the Nicaraguan border. In the first six months the camp here was open, the number of refugees hovered around 70. But the new arrivals crowded in last week, and over the weekend Red Cross workers struggled in brutal 95-degree heat to pitch long lines of khaki tents to hold them.

The refugees themselves were dirty and exhausted, and some so malnourished that Red Cross workers were feeding them intravenously. But they were anxious to talk about what they said was a deteriorating situation inside Nicaragua.

Most of them agreed that Nicaragua's military draft, which scoops up boys as young as 13, has touched off massive resistance—even in the capital city of Managua, until now a stronghold of support for the Sandinistas.

And many of them confirmed the claim of counter-revolutionary Eden Pastora, who contends that he could easily double or triple his army of 7,000 if he had financial backing from the United States. A large number of the refugees said they would like to join Mr. Pastora's forces, but the counter-revolutionaries have no food, weapons, or uniforms for them.

"The majority hide out rather than join the military," said Medardo Antonio Lopez, a 22-year-old accountant from Managua. "No-one wants to join the army. They don't give you adequate training. They give you eight days training and then send you to the front as though you were a dog. Young kids have to go to the mountains to fight and die. Meanwhile, the *internacionalistas* [Soviet-bloc advisers] who are organizing the country stay in Managua and have a party."

Mr. Lopez led a group of young men, mostly teen-agers, who fled Managua and arrived in Costa Rica last Friday, 22 days later. He said they had been labeled *Contras*—counter-revolutionaries—and threatened with arrest because they were members of a Catholic pacifist group opposed to military service.

Like most of the other refugees, Mr. Lopez and his group are worried about what will happen to the families they left behind.

"I cannot tell what's going to become of them," he said. "The authorities, when they find out we're not in the country, they'll arrest our fathers. Some fathers have been sentenced to years of jail when they won't tell where their sons are."

Nonetheless, Mr. Lopez said he and his friends did not hesitate to leave when they heard they were going to be arrested. "Our fathers were willing to die beside us," he said. "But we told them we wanted to come here and try to have a few more years of life."

Even so, they almost did not make it. A campesino who was aiding their group detected an army ambush and had to lead them deeper into the jungle to evade it. "If they find you in the mountains in the area where the contras are, then you are a contra and you're a dead man."

Stories of ambushes—and summary executions of captured refugees—are common among the Nicarguans. Sandanista officials continue to insist that there is no death penalty in Nicaragua but the refugees scoff at that claim.

"Paper will take whatever you write upon it and the tongue will speak any words you choose," said Jose Maria Down, an agricultural worker from the farmlands along the Rio Coco in Nicaragua "but it's all lies."

Mr. Down showed reporters a broken finger and scars on his knees and arms that he said were made by Sandinista bayonets during a prolonged torture session last year.

Sandinistas executed his brother, he added. "They believed we were Contras," he said. "They were right, we were Contras, but they had no evidence. Still they tortured me. Still they shot my brother."

Mr. Down fled after an international human rights group won his release from prison.

Ronaldo Romero, a construction worker from the village of Juigualpa, said that Sandinista soldiers shot two members of his group who were captured. Still, Mr. Romero counted himself lucky; he said another group of 140 refugees was traveling behind him, but Sandinistas killed or captured 137 of them.

Mr. Romero and his wife carried three children—ages 1, 3 and 4—in their arms during the 22-day march out of Nicaragua. Often, he thought they wouldn't make it. "We couldn't find anything in the mountains to eat," he said. "Green bananas, sometimes. Other times, nothing at all."

How did the children survive with no food? He shrugged. "They suffered."

Their suffering would have been much worse if the family hadn't left Nicaragua, Mr. Romero added. The situation there: "No sugar. No soap. Get sick, no medicine. . . . I had a few horses and cows, but they made a census of the animals. And they said the animals would belong to the state. And I would have to go to work in a cooperative, for the state."

Despite all those conditions, Mr. Romero said he would have stayed at home. But four families in the nearby village of El Rama were forced to hand their children over to the Sandinistas so they could be sent to school in Cuba.

"The only thing I thought about was to rescue my children from the Sandinistas," he said. "Because I knew otherwise they would be sent to Cuba. And then they wouldn't be my children. They would be three more military machines."

Other refugees said parents were frequently pressured to let their children go to Cuba. Fifteen-year-old Dennis Castro, also from Juigalpa, said that he left when the Sandinistas told him they wanted him to go to school in Cuba.

"They said they were going to train me for six months there," he explained.

Train him to do what?

"To be a professor," he said, laughing. "That's what they said. To be a professor. . . . They were going to get politics in my mind."

A young men said that several groups left Juigalpa, a village of about 10,000, located in south central Nicaragua, recently.

"There's no young people left in Juigalpa," said one youngster of about 14. "Not in all of Zelaya [province]. Nicaragua is going to be a country of old men."

Most of the young men said they hoped to join Eden Pastora's guerrillas. Many of them have relatives—in some cases a half dozen or more—already serving with the Pastora forces. The guerrillas helped guide many of the refugees out of Nicaragua.

The young men are willing to fight for the counter-revolutionaries but not the government because, they say, the Sandinistas are communists.

"They confiscate the farms and the food. If you don't work for the state you don't eat," said one.

A FIRST AMENDMENT ISSUE

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, recent reports about the CBS takeover by extreme rightwing groups raise, in my judgment, a fundamental issue involving the first amendment: Is it proper for a raider takeover to occur over a news organization if the expressed stated purpose is to advance a particular ideological agenda, be it left or right?

My concern does not revolve around mergers, buyouts or takeovers. We operate in a free market economy, and as long as no Federal laws or antitrust actions are violated, this is perfectly proper.

I am not here, either, to specifically defend CBS or Dan Rather, both of whom have been unfairly maligned. CBS has a good reputation, and Dan Rather is one of the most trusted and respected men in America. I am here to urge this body to watch these developments closely, to ensure that the first amendment is not threatened.

Do we really someday want Reverend Falwell anchoring the CBS Evening News to lecture the Nation on morality someday?

STATEMENT OF OBSERVER DELEGATION OF UNITED STATES TO THE EL SALVADOR ELECTIONS

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. KOLBE. Mr. Speaker, yesterday afternoon, the official U.S. observer delegation for the recent elections in El Salvador returned to Washington. I was privileged to serve, along with my distinguished colleague from Oklahoma, JIM JONES, as one of the congressional Members of that delegation.

Our eight-member delegation scattered to the far corners of the country on Sunday and observed the election process in more than 30 municipalities. We were unanimous in our opinion that the elections were conducted fairly, openly, and with a minimum of confusion. There were attempts by the opponents of democracy to disrupt the elections, but in comparison to past efforts they were minimal and almost totally ineffective.

If a single word could be used to describe the elections we observed, I think one would have to choose "routine." That, in itself, is a great achievement for a nation that only 3 years ago was racked by violence and discord.

The United States made a commitment to El Salvador to help make its dream of political democracy come true. We can indeed be pleased that El Salvador has come so far toward achieving that objective.

Mr. Speaker, I include with my remarks a list of the official delegation and a copy of the statement that was agreed upon by all members of that delegation.

U.S. OBSERVER DELEGATION TO THE EL SALVADOR ELECTIONS, MARCH 1985

MEMBERS OF THE OFFICIAL OBSERVER DELEGATION

The Honorable James R. Jones, Representative (D-Oklahoma), The United States House of Representatives.

The Honorable James Kolbe, Representative (R-Arizona), The United States House of Representatives.

The Honorable Angier Biddle Duke, Former Ambassador to El Salvador and, United States Chief of Protocol.

Mr. Maurice Sonnenberg, Investment Consultant; Member, National Committee on American Foreign Policy; Member, Executive Committee, PRODEMCA.

Rabbi Morton M. Rosenthal, Director, Latin American Affairs Department, B'nai B'rith Anti-Defamation League.

Dr. Howard Penniman, Resident Scholar, American Enterprise Institute.

Mr. Howard K. Smith, News Commentator.

Mr. Max Singer, Consultant; President, The Potomac Organization; former President, The Hudson Institute.

STATEMENT OF THE OBSERVER DELEGATION OF THE UNITED STATES OF AMERICA TO THE EL SALVADOR ELECTIONS, APRIL 1, 1985

Yesterday we witnessed El Salvador's third national election in less than a year. The unanimous conclusion of this bi-partisan observer delegation of elected officials and private citizens is that the election was fair, that the election machinery was conducted efficiently, and that it represents a most encouraging symbol for the future of democratic institutions in El Salvador.

In all, this small delegation visited nearly thirty towns in most parts of the country. We spoke with election officials, candidates and most important, voters of all parties.

This election differed in several ways from those held last year. First, since this was not a vote for a nationwide candidate, voters were required to cast ballots in their home towns. Further, the penalty for not voting had been lifted. Other, mechanical changes were implemented as the country fine-tuned its voting procedures.

The delegation notes that the Salvadoran military took obvious pains to remain impartial in the contest. They were stationed well away from the polls, and refused to be drawn into political disputes.

Disagreements at the polls were, for the most part, inconsequential, and generally settled on the spot by representatives of the various parties. These disputes centered on mechanics and procedures of the elections, and we saw no evidence of intimidation or coercion that would raise a question of the fundamental fairness of the vote.

The mechanics of the election ran without serious incident. The Central Election Council deserves particular praise for its fine coordination of the process.

Guerrilla threats and attacks comprised the most serious challenge to voting. This delegation notes the inconsistency between the guerrillas' initial posture that the elections were meaningless, and their subsequent attempts to thwart the electoral process through violent intimidation. In spite of their attempts at intimidation, more municipalities were able to participate this year than last. Whereas 42 towns were unable to vote last time in the Presidential elections, only 19 municipalities were denied the voting privilege Sunday because of terrorist intimidation.

The election itself, then, must be hailed as a free, open, and fair contest, and we expect all parties to respect the results.

El Salvador now has in place its Presidential, legislative, and municipal leadership for the next three years. This delegation recognizes the need for continued American support for El Salvador as she addresses her continuing economic and military problems through her democratic institutions.

The delegation was struck by the rather consistent answer we got the frequently asked question, "Why are you voting?" The vast majority of voters' answers centered on the hope for peace, and the desire to live in tranquility.

In our meeting with President Duarate after the polls closed, he confirmed his commitment to peace by building confidence among his people, through judicial reform, agrarian reform, and economic development. In addition, he reaffirmed his commitment to make every effort to bring the guerrillas to the peace table, and to put an end to the random violence which has so torn this nation.

This delegation commends the great strides made in this nation. Nowhere are they more evident than in this election. We look forward to working with the people of El Salvador to build on this election, further nurturing her democratic institutions, and we call on all factions, regardless of ideology, to join in that process.

We would be remiss if we did not mention the outstanding job performed by outgoing Ambassador Tom Pickering. He clearly has performed his duties in El Salvador in the highest tradition of American diplomacy. We know that he will continue to make a positive contribution to U.S. foreign policy.

Our delegation unanimously agreed that this election could be described as routine even by the historical standards of elections in the United States. That speaks volumes of how successfully the recently planted democratic institutions in El Salvador have taken root.

DAIRY DIVERSION PROGRAM

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OBERSTAR. Mr. Speaker, yesterday was not April Fools Day for dairy farmers across this country. The Dairy Diversion Program ended, and the Secretary of Agriculture reduced price supports by 50 cents per hundredweight. On July 1, he will impose another 50 cent reduction.

Yesterday was no joke for dairy farmers in my district and throughout Minnesota.

The end of the Dairy Diversion Program raises an interesting question: Why would the administration and Congress allow the expiration of a self-financing program which cut Government expenditures by $1 billion? There really is no answer which makes sense to farmers or to consumers.

In November 1983, I offered an amendment on the House floor which would have provided that the Dairy Diversion Program run concurrently with the 4-year farm program which expires September 30, 1985. Misunderstanding of the realities of dairy farming and a failure to appreciate that the Diversion Program was to be financed through a $10 per hundredweight deduction from all dairy production caused the House to reject an amendment which would have increased the savings to the Treasury over a longer period of time.

The consequences of yesterday's price support cut will fall most heavily on medium sized dairy farmers in Wisconsin and Minnesota. The State of Minnesota may lose 1,500 dairy farms, with thousands more dairy farmers going out of business throughout the Nation.

The issue today is no longer the Diversion Program. Rather, it is the urgent need to write sensible, equitable dairy provisions in the 1985 farm bill and to prevent further erosion of farm income and the loss of even more American dairy farms in the next year.

SEAT MR. McINTYRE

(Mr. PACKARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PACKARD. Mr. Speaker, two centuries ago, the United States of America enacted a Constitution that ended a long battle. We fought against the tyrannical rule of British King George III, who had plenty of room in his treasury for American taxes, but no room in his Parliament for American representatives.

The Eighth District of Indiana, having duly elected Rick McIntyre, suffers the same undemocratic fate today. During the last 3 months we have voted on farm legislation, aid to starving millions abroad, and just last week the expensive but necessary MX missile.

We spend in Congress about $5 billion every day that we are in session. Several million of those dollars come from the Eighth District in Indiana, whose taxpayers have not had a say on how that money will be spent.

Why hasn't Rick McIntyre been seated? Congressional partisanship, that is why. Common Americans see things differently. One hundred percent of the mail from my constituents in California support Rick McIntyre on the issues. The newspapers support him, too, the New York Times, the Washington Post, the Atlanta Journal, the Detroit News and, just this morning, the Wall Street Journal. They looked at the facts and reached the same conclusion. Let us listen to the American people and seat Mr. McIntyre this afternoon.

AUTOMOBILE IMPORTS

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, when they say auto imports will not harm you, just say, "April fool."

I rise today in opposition to the President's decision, absent any alternative, to lift the auto import restraints on imported Japanese cars. That decision went into effect yesterday, April Fool's Day. I found ironic the subsequent announcement by Japan that it intends to increase by 25 percent the number of autos they export to the United States this year. Japan now holds a 25-percent market share of the U.S. auto market. How much more are they entitled to?

A bill I am introducing today aims at restoring fair trade. How can this administration lift the restraints when vital negotiations aimed at opening up the Japanese telecommunications market are stalled, and other markets remain closed to American producers?

What about opening Japanese markets to American telecommunications, steel, textiles, lumber, agriculture, finished wood, pharmaceuticals, medical equipment, and financial services?

The removal of the auto restraints will serve only to further open U.S. markets to unfair world competition and force more U.S. corporate investment abroad. Jobs are being lost every day in America. Mr. Speaker, when they say auto restraints will not harm you, just say: "April fool!"

VOTE TODAY TO SEAT RICK McINTYRE

(Mr. BARTON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTON of Texas. Mr. Speaker, today is the 90th day that the Eighth Congressional District of Indiana has not had a Representative in this body. Ninety days is enough. Later today, Mr. Speaker, each Member of this body will have an opportunity to end the lack of representation by voting to seat the certified winner, Rick McIntyre.

Congressman-elect McIntyre is still ahead in the most current recount with respect to maintaining his 34-vote election day margin.

□ 1250

Three counties have been recounted. I am told that Mr. McCloskey's people are now saying that they do not like this recount either. Where will it end? Are we to have a world series of recounts? The best four out of seven?

The Indiana Eighth District deserves a Representative. McIntyre won on election day; he won the State of Indiana recount; he is now winning, by all accounts, the U.S. congressional recount. Let us end the debate and begin to legislate. Let us vote today to seat Rick McIntyre.

A LETTER TO THE PRESIDENT

(Mr. RAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAY. Mr. Speaker, I and many of my colleagues have spoken in this Chamber over the last few months on the problems our textile industry is facing. We have tried to explain to the Members of this body the seriousness of this situation and we have urged them to cosponsor H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985. We are convinced that this legislation can help to ease the current textile crisis.

However, the publisher of the Tri-county Papers in my district has expressed, far more eloquently than I can, the need for this legislation. I am putting into the RECORD today an editorial Bob Tribble, of Manchester, GA, published in the March issue of his papers. When you read this editorial, Mr. Speaker, you will see that Mr. Tribble is a strong and firm supporter of the administration. But, he captures, from a firsthand perspective, why we must do something in this country to help textiles. I encourage all my colleagues to read and to think carefully about Mr. Tribble's editorial.

A LETTER TO THE PRESIDENT

(By Bob Tribble)

President RONALD REAGAN,
White House,
Washington, DC.

DEAR MR. PRESIDENT: There is probably not a newspaper editor or publisher in these United States who has been a more vocal supporter of you and what you stand for than I. Over the years personal columns have been full of echoes of agreement with your beliefs and policies.

For many years, this country was headed in the wrong directon. We had been taken over by the liberal minded politicians who felt that giveaways and bigger government was the answer to everything.

Over the past four years, you and your administration has changed that philosophy of government and now have our nation headed on a solid course that can bring us all nothing but good times and restored pride in being an American.

Your philosophy has been "let's make America strong again." "Let's restore pride to our people and make them proud once again to be an American." To a great degree, you have accomplished that, and I commend you for it.

Now, let me tell you a long story, in brief form, about our little Georgia town of Manchester, population 4,784. We are losing an industry here (textile) that is the very reason our town exist at all. Callaway Mills and the railroad are responsible for us being here since 1909.

In 1968 Milliken & Co. out of Spartanburg, S.C. purchased the mill and has run it since. In June they are closing down putting a total of 350 emplyees out of work.

This is a sad ending to a beautiful love story about a town, a cotton mill and a railroad. We have people here who have known nothing else but to labor daily, and proudly I must say, in that mill. Working in the mill has become a family tradition.

No matter what other type industry we might put there, if any, it will never replace "the mill."

Milliken & Co. has labored tirelessly to place these 350 workers in other plants in LaGrange (35 miles away) and Pine Mountain (25 miles away). To date they have been successful in over 50 percent of the cases.

Roger Milliken committed just this week to donate the plant and it's valued at one and one half million dollars, to our little town. He also sent a top executive and $25,000 to help us prepare a brochure on the plant and our town in hopes that we can locate another industry here right away.

Mr. President, the action taken by Milliken & Co. is the true American way. They have not asked for government funds to help them keep their plants open. In fact I am sure they would refuse government money even if it were offered.

But Mr. President, they and other textile manufacturers need your help to keep America strong. They tell me, and I believe them, that foreign textile imports caused this plant to close, as well as many other similar plants across this nation. Here in our area of Georgia alone there has been thousands of jobs lost, and I understand a half million or more nationwide.

I understand fully that our country must maintain a trade balance and good relations with our allies. We must help them for they rely heavily on us.

But, I understand also that first we must protect our own people if we are to remain strong. We owe it to them. There has to be a balance to be found.

The textile industry has not laid over and played dead. They have spent millions of dollars on machinery to allow themselves to better compete. But there is no way they can compete with the cheap labor from the far east. Mr. President, there must be some controls.

Congressman Ed Jenkins of our state will introduce legislation in the House this month that will greatly help this situation. I encourage you to fully support this measure so that we can keep America and our American worker strong.

Warm Regards,

BOB TRIBBLE.

P.S.—Thank you for being our President and may God lead you to lead our nation as we should go.

LET US PROVIDE A VOICE FOR INDIANA'S EIGHTH DISTRICT

(Mr. SCHUETTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUETTE. Mr. Speaker, the people of Indiana's Eighth District have spoken, but as yet, the House Administration Committee has not been heard from.

The committee's recount and decision are now 6 days overdue and the Eighth District of Indiana has been without representation for 3 months—90 days. I understand that the Administration Committee has counted disputed ballots, which would have been disqualified in any other Indiana congressional race, and still Rick McIntyre appears to be the winner.

I rise today to ask the House of Representatives to do what is right and fair and just and grant the Eighth District representation in the 99th Congress. The people of that district have spoken, let's seat Rick McIntyre, and provide a voice for Indiana's Eighth District.

THE AGRICULTURAL EFFICIENCY AND EQUITY ACT

(Mr. STENHOLM asked and was given permission to address the House for 1 minute and to revise and extended his remarks.)

Mr. STENHOLM. Mr. Speaker, an acreage base, or number of acres to be planted, is assigned to farmers who wish to take part in Federal farm programs, and a yield measures how many bushels per acre the farmer is assumed to produce, based on his past experience. Both bases and yields are important when farmers decide whether to participate in the programs.

Some system of bases and yields would be necessary under almost any conceivable farm program. That means that no matter what shape the 1985 farm bill takes, we'll need base and yield formulas in order to administer agricultural policies effectively. But there are many problems with the way those formulas are set up now.

For one thing, the formulas are contained in 4-year farm bills, not permanent law. So every time a new farm bill is written, the base and yield system comes under the political pressures of the day. In those years, farmers don't know what this year's planting decisions will mean for next year's acreage base, because they don't know what kind of legislation we in Congress will write. This uncertainty about farm programs is a major complaint of farmers, and a major reason many of them don't take part in Federal programs. As we all know, low participation can cause high surplus levels, and that means billions of dollars in taxpayers costs.

That's not the only problem with the current system. It's inconsistent between crops, it leaves too much discretion to USDA, and it doesn't adequately reward soil conservation practices.

The Agricultural Efficiency and Equity Act is an attempt to design a better system. It writes base and yield formulas into permanent law to give farmers a stable benchmark for planning. It assigns acreage bases by a moving average of acres actually planted, and yields by a moving average of bushels or pounds actually produced. It also gives farmers more flexibility than they now have in deciding for themselves how much of a given crop they will plant. The bill applies only to wheat, feed grains, cotton and rice.

I hope the Congress will choose to take quick action on this matter of importance to farmers across the Nation.

WALKING DOWN AN UNCERTAIN PATH

(Mr. GALLO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GALLO. Mr. Speaker, today, we are once again considering the case of the Eighth District of Indiana, nearly 5 months after the last congressional election and almost 4 months after the secretary of state in Indiana certified that Richard McIntyre was elected as a Member of Congress from the Eighth District of Indiana.

During that time, this body has been on a peculiar path which, if we continue in this direction, could set a precedent which would keep Members of Congress from being seated in spite of State certification.

We have always looked to the States to certify Members of Congress. We must continue to do so.

I can tell you that I have heard from the New Jersey secretary of state, Jane Burgio, and she is very concerned about the current situation.

She sees very clearly that this case could easily repeat itself in 2 years. Her concern is based on the fact that she is the person charged with the responsibility of certifying elections in New Jersey.

I share her concern today.

We can and should resolve this question in a peaceable fashion before we set a precedent that can return in the future to haunt us all.

Until now, the cornerstone of our democratic form of government has been that the individual who is duly certified is the election winner.

I strongly urge my colleagues to look beyond the current arguments in this case and realize that we are walking down an uncertain path toward chaos if we continue to pursue our current course of action.

WE MUST PROSECUTE NAZI WAR CRIMINALS

(Mr. TORRICELLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TORRICELLI. Mr. Speaker, last week, the President's announcement that he would not visit Dachau during his visit to Germany this year, and his comments which seemed to refer to the Holocaust as a "lost part of history" and not as a living remainder of the abuses of mankind, were unsettling.

Now, a new transcript has come to light with comments by the President's new Director of Communications, Mr. Patrick Buchanan, which have further unsettled many of us. In an interview, Mr. Buchanan called for the abolition of the Office of Special Investigations, an office charged with prosecuting Nazi war criminals. He termed it, "a fruitless exercise, and not a proper use of resources."

During the discussion. Mr. Buchanan insisted that there is "no singularity about the Holocaust that warrants investing Federal funds in going after people who are about 70 years old, and whose crimes occurred 35 and 40 years ago."

Mr. Speaker, Mr. Buchanan's comments are unbelievable, they are outrageous, they should be refuted, and I would hope the President would, to all of us who are concerned about continuing to prosecute these war criminals, give us some reassurance.

(Letter to President follows):

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES,
Washington, DC, April 2, 1985.

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: Your remarks last week in response to a reporter's question have prompted a great deal of confusion and concern over our nation's commitment to the memory of the Holocaust. A refusal to attend ceremonies next month at Dachau have raised questions throughout the world as to whether our nation's leaders believe that the Holocaust is to be forgotten in the pages of history or whether it shall remain as a living and constant reminder of the greatest of human tragedies.

Remarks in the past by your new Communications Director, Patrick Buchanan, have added to the doubts about your Administration's commitment to the memory of the victims of the Holocaust. On several occasions over the last few years, Mr. Buchanan has criticized the efforts of the Justice Department's Office of Special Investigations to pursue the trail of Nazi war criminals. During an interview in 1982 Mr. Buchanan called for the "abolition" of the Office of Special Investigations, which he termed a "fruitless exercise" and "not a proper use of resources". During the discussion Mr. Buchanan insisted that there is no "singularity" about the Holocaust that warrants investing federal funds in "going after people who are about 70 years old now" and whose crimes "occurred thirty-five, forty years ago". He later authored two syndicated columns in which he renewed his attacks on the Office.

Although in the past your Administration has supported activities of the Office of Special Investigations, these statements of Mr. Buchanan's appointment to the highest levels of the White House, now raise questions about the commitment of our nation's political leaders to the memory of the Holocaust.

The combination of these statements have left the wrong impression. I believe it is important that a visit be scheduled to the Dachau Holocaust site next month and that you reaffirm our efforts to pursue the trail of Dr. Joseph Mengele.

Two years ago in a speech to more than 15,000 Holocaust surviors you stated, "Our most sacred task now is insuring that the memory of this greatest of human tragedies, the Holocaust, never fades—that its lessons are not forgotten."

I hope that as the 30th Anniversary of this greatest of human tragedies approaches that you will do all that you can to ensure the memory of the Holocaust never fades nor is forgotten.

Sincerely,

ROBERT G. TORRICELLI,
Member of Congress.

ADDITIONAL COSPONSORS TO THE AGRICULTURAL EXPORT EXPANSION ACT OF 1985

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska. Mr. Speaker, nearly 1 month ago, I introduced legislation aimed at preserving the effectiveness of our agricultural export promotion programs by exempting them from costly cargo preference requirements. Today, I am adding the names of 27 fellow Members of the House of Representatives to H.R. 1517, the Agricultural Export Expansion Act of 1985. This brings to 42 the total number of cosponsors of this bill.

Mr. Speaker, I have observed with interest the growing number of supporters for this bill and similar legislation that would overturn the recent court decision that has effectively killed our blended Credit Export Enhancement Program. The Department of Agriculture informs me that the dangerous precedent set by this ruling may imperil as much as 20 percent of our commercial agricultural exports, if prompt legislative action is not taken.

I look forward to generating additional cosponsors and additional support for this essential legislation.

THANKS TO THE COSPONSORS OF H.R. 600

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, I wanted to thank the more than 220 Members of Congress on both sides of the aisle who have cosponsored a piece of legislation that I introduced 2 months ago, H.R. 600. H.R. 600 would repeal the onerous and burdensome auto log provisions of the IRS regulations; vehicle mileage.

We have more than half the number of the total membership of the House; victory is within sight. Today, as I speak, the Ways and Means Committee is marking up a bill that would do the very thing that H.R. 600 called for: Repeal section 179B of the 1984 act, make invalid all the regulations that followed from the passage of that act that relate to auto mileage.

I want to thank the chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI; I want to thank Congressman BERYL ANTHONY of Arkansas; Congressman HAL DAUB of Nebraska. These men and others, 222 others,

have joined together to right this wrong. I thank you very much.

H.R. 691

(Mrs. JOHNSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON. Mr. Speaker, I am an original cosponsor of Congresswoman LYNN MARTIN'S bill to get our House and Senate in order. This bill, H.R. 691, would finally extend to the employees of Congress and the Federal courts protection against discrimination in employment.

I think it is unconscionable that a body which passes laws to promote equality in hiring and pay practices throughout our Nation and which should be setting an example with respect to civil rights in America, excludes itself from meeting minimal standards of equality in the workplace. It is time to end this "Do as I say, not as I do" attitude.

Representative MARTIN'S bill, endorsed by over 50 Members of this body, would end this hypocritical situation by amending title VII of the Civil Rights Act of 1964 to give women, racial, and ethnic minorities, the handicapped, and older workers protection from employment discrimination. The bill would still allow Members of Congress to make personal staff hiring decisions that are based on political affiliation and residence, and would not interfere with Members' performance of their proper function.

I urge my colleagues who have not endorsed this legislation to do so in fairness.

□ 1300

REJECT SOCIAL SECURITY COLA FREEZE

(Mr. KOLTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLTER. Mr. Speaker, in late 1984, President Reagan, admonished the Members on this side of the aisle, saying that we were needlessly frightening the elderly with accusations, that, he would cut current or future Social Security payments. He told us he would never stand for cuts, in payments, to these beneficiaries. Now we are in the midst of a struggle, to fend off a freeze, in the cost-of-living adjustments, in Social Security payments, as approved by the other body's Budget Committee. More than this, our senior citizens are being hit, from all sides by the President's own budget proposal, which includes cuts in Medicare, housing and energy assistance, and legal services.

I ask my colleagues, on both sides of the aisle, to join me, in helping Mr. Reagan keep his campaign pledge. Let us demonstrate, that this great representative body is not one that turns a deaf ear toward the most deserving of those we represent. Let us put aside partisanship and rhetoric, and do what we promised to do, and do what is right. Let us reject the Social Security COLA freeze for fiscal year 1986.

STEPSON OF SAM

(Mr. GEKAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker and Members of the House: We have just passed another anniversary of the attempted assassination of President Reagan, and Hinckley still haunts us. Now we have reason to believe that he is profiting from various publications publishing interviews, et cetera.

I am introducing today legislation that would prohibit anyone who acknowledgedly committed felonies, crimes of the dimension that Hinckley did, but escaped only by reason of a quirk in the law, acquittal by reason of insanity.

When the Congress passed the "Son of Sam" laws pursuant to the New York killer David Berkowitz's profiting on the backs of his victims, that was a proper thing to do because he should not profit, not the criminal, but if any profit should be made, only the victims of his misdeed should profit.

Therefore, this "Stepson of Sam" which will cover the Hinckley type of misdeeds, is much needed. I urge passage by the Congress of the United States.

THINGS HAVE CHANGED SINCE JANUARY 3

(Mr. SWINDALL asked and was given permission to address the House for 1 minute.)

Mr. SWINDALL. Mr. Speaker, in talking with a number of my friends and distinguished colleagues on the Democratic side of the aisle, I have found that a number of them are very uncomfortable about the situation with regard to McIntyre. I have found, however, that since they voted not to seat Mr. McIntyre on January 3, they feel with some justification that they cannot afford to change that vote today and now say that they erred on the first occasion because nothing has changed since January 3.

I respectfully suggest to those Members that three things have changed since January 3.

First and foremost, 90 days has not passed; 90 days where the House has been without representation from the Eighth District of Indiana.

Second, the House Administration Committee has passed its first deadline.

And third, the House Administration Committee cannot tell us even today when they expect to go ahead and be able to tell us one way or the other their conclusions.

Therefore, I would state that the only thing that makes sense, if we are really concerned today about the Constitution and the fact that the Constitution guarantees representation, is to seat Mr. McIntyre and then let the House Administration Committee, at its own timetable, proceed.

SEAT MR. McINTYRE POSTHASTE

(Mr. MONSON asked and was given permission to address the House for 1 minute.)

Mr. MONSON. Mr. Speaker, the controversy over the real winner in Indiana's Eighth District has been extended far too long. The debate, which should never have been embraced by this body in the first place, has been one that has completely ignored the facts—facts which are very simple.

The people of Indiana's Eighth District went to the polls to cast their votes in November. They elected Rick McIntyre. The secretary of state in Indiana certified Mr. McIntyre the clear winner. There was some dispute as to the original count, but even after correcting it, Mr. McIntyre won by 34 votes. A later recount of all the ballots by special county commissions expanded his margin to 418. Mr. McIntyre was the decided winner, yet this fact has been ignored.

The voters of the Eighth District of Indiana have been held hostage to petty politics and have been denied a voice in our representative government. A half a million people in Indiana have no representation in the House of Representatives because we, as Members of this body, have refused to seat the declared and certified winner. We have been tied up with this controversy for the last 3 months, and we are wasting more valuable time with yet another unnecessary recount.

I recommend we stop squabbling, respect the facts and seat Mr. McIntyre posthaste.

The New York Times summed the situation up succinctly in a recent editorial by stating simply: "There's a decent, democratic solution available to the Democratic majority * * *. Seat Mr. McIntyre." The Washington Post, which can hardly be credited for championing Republican causes offered the same advice by editorializing that "Mr. McIntyre ought to be seated." To these words, I add that Congress should simply stick to the facts and seat Mr. McIntyre today.

NINETIETH DAY OF INDECISION ON SEATING OF RICK McINTYRE

(Mr. CALLAHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CALLAHAN. Mr. Speaker, as we gather here today, assembled for the third month of the 99th Congress, we are still plagued with the very same problem that faced us on January 3, our first day of this session.

The people of this country sent us here to help solve some of the greatest problems that have faced this country in a decade, problems such as a new farm policy, problems such as the national debt, simplification of our tax program, imbalance of trade, and on and on and on.

Yet today, the 90th day, we are still debating the very first issue that faced us when we came here, and that is whether or not to seat Rick McIntyre of Indiana. I submit to you today that we ought to consider one basic fact in this decisonmaking process, the fact of right or wrong. Every indication—every indication—that has come before this body indicates that the proper and right thing to do is to seat Congressman Rick McIntyre.

I urge my colleagues today to join with me in an affirmative vote on seating Rick McIntyre.

□ 1310

STOP WASTING TIME, GET ON WITH THE ISSUE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I would like to respond to the numerous speeches that have been made today by the gentlemen and gentlewomen on the other side of the aisle who wish to address the question of the seating or nonseating of Mr. McIntyre or Mr. McCloskey. I would urge that we get on with the business of the day. Is it not true that the resolution pending before the House today is to debate and ultimately to vote on that very question?

If the gentlemen and the gentlewomen on the other side of the aisle want to get down to the facts and get onto the business and stop wasting the time of this body I suggest to them that they discontinue this diatribe. Let us get down to work and get to the vote on this debate.

Mr. RICHARDSON. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from New Mexico.

The SPEAKER pro tempore (Mr. COOPER). The gentleman from New Mexico [Mr. RICHARDSON] is recognized.

Mr. RICHARDSON. I thank the Chair.

Mr. Speaker, I just want to report an extremely——

Mr. WALKER. Regular order, Mr. Speaker. The gentleman from Arkansas must remain on his feet if he yielded.

The SPEAKER pro tempore. The time of the gentleman from Arkansas [Mr. ALEXANDER] has expired.

McINTYRE SHOULD BE SEATED PENDING FURTHER INVESTIGATION

(Mr. SMITH of New Hampshire asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Hampshire. Mr. Speaker, I would point out to the gentleman that the wasted time began on January 3, when we refused to seat Mr. Rick McIntyre. We all could have saved a lot of time.

Mr. Speaker, last November Mr. Rick McIntyre of Indiana's Eighth District won an election. Then he won a recount. He is now being subjected to yet another recount.

Last week I testified before the House Administration Task Force and asked the question: "If Mr. McIntyre won the election for the third time by 1 vote, 10 votes, or 4,000 votes, will you seat him?" I got no answer.

The people of the Eighth District of Indiana should not have their constitutional rights violated any longer by being without representation. We are not challenging the right to investigate. We want to make it clear that the burden of proof should be on the House of Representatives, not on Rick McIntyre. While the investigation is taking place, Mr. McIntyre should be seated. Not a single shred of evidence has ever been produced to suggest that the certificate of election naming McIntyre the winner was not based upon a full and fair counting of the votes one election day. The secretary of state of Indiana certified McIntyre the winner based on corrected election day totals. The election was not even challenged by the loser within the prescribed time; it was challenged by the House leadership.

Mr. Speaker, as a former teacher of history and government, I am appalled by the unfairness demonstrated by the House in this matter. I urge my colleagues to seat Rick McIntyre this afternoon.

APOLOGY SOUGHT FROM INDIANA'S SECRETARY OF STATE FOR REFERENCE TO "WETBACKS"

(Mr. SHARP asked and was given permission to address the House for 1 minute.)

Mr. SHARP. Mr. Speaker, I yield to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. Mr. Speaker, I appreciate the gentleman's yielding.

I would just like to make a point relating to a statement made by the secretary of state form Indiana Mr. Simcox who made a speech last week expounding on a subject very appropriate to Indiana Secretaries of State, and that is foreign policy and immigration. In the course of that speech he referred to those coming into this country from Mexico as "wetbacks." The chairman of the Congressional Black Caucus and I as chairman of the Hispanic Caucus have asked Mr. Simcox for an apology for this insensitive remark.

If this man treats people as sensitively as this statement he made indicates, I wonder how equipped he is to deal with sensitivity, fairness with issues affecting the race in Indiana. His statement was uncalled for, unfortunate, and irresponsible, including the counting of minority ballots. I hope Mr. Simcox apologizes to the entire country, not just to those individuals he has specifically maligned.

Mr. MYERS of Indiana. Mr. Speaker, if the gentleman has any time left, will the gentleman yield to me?

Mr. SHARP. I am happy to yield to the gentleman from Indiana.

Mr. MYERS of Indiana. Mr. Speaker, Mr. Simcox has sent a letter to the gentleman—I have seen copies of it, he mailed a copy to me, and I would have thought the gentleman would have one now—about his choice of words. He does apologize if he has offended anyone.

This is used out of context now. It had nothing to do with the election, and to bring this up is irrelevant to the facts that bear on continuing this recount.

The SPEAKER pro tempore (Mr. MURTHA). The time of the gentleman from Indiana [Mr. SHARP] has expired.

AN APOLOGY AND EXPLANATION FROM MR. SIMCOX OF INDIANA

(Mr. GINGRICH asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous matter.)

Mr. GINGRICH. Mr. Speaker, I am delighted to read into the RECORD the answer by Mr. Simcox to the Honorable WILLIAM RICHARDSON:

STATE OF INDIANA,
Indianapolis, March 29, 1985.

Hon. WILLIAM RICHARDSON,
U.S. Congress,
Washington, DC.

DEAR CONGRESSMAN RICHARDSON: Your linking of a statement which I made in an unrelated speech with the present 8th Dis-

trict controversy is so ludicrous that it defies description.

I used a term in a speech last Monday evening which I did not understand to be offensive to certain people because I had read and heard it used in various formats. When I learned of its offensive nature, I issued a deep and sincere apology and expressed my regret that I might have offended even one person.

Now this statement is being used by those who would deprive the 8th District of a Congressman to suggest that somehow I sought to exclude minority votes from being counted in the race.

I believe most people will see your statements for what they really are—an attempt to pull the focus from the errant manner in which Congress has handled the 8th District affair from the very beginning.

Before you question my character, I would remind you that I have urged the counting of all ballots, in all precincts, and have pointed out that if this were done it would result in the congressional seating of the election night winner, whom I certified by 34 votes on December 13 of last year.

You who are so concerned about minority participation should remember that Democrat recount commissions controlled the process in counties in which minority ballots were discounted. If you had bothered to investigate the facts—which, of course, you did not—you would have seen that I have always focused on the election night total as the accurate reflection of the outcome of the race, not the recount.

Finally, on a human level, people in public life need to be man and woman enough to apologize for their mistakes. I have done that with respect to my unfortunate comment. I now ask for a similar apology from you for seeking to distort and inflame an election matter with personally devisive rhetoric.

I deeply regret my unknowing use of an offensive term. But, I also deeply regret the opportunism of those who would attempt to capitalize on the unfortunate incident by attempting to link it to a totally unrelated matter.

You don't reflect well on yourself, the Congress, or the American political process by having done so.

Sincerely,

EDWIN J. SIMCOX,
Secretary of State.

CLARIFICATION SOUGHT ON MINORITY'S POSITION ON VOTE-COUNTING

(Mr. FRANK asked and was given permission to address the House for 1 minute.)

Mr. FRANK. Mr. Speaker, maybe I can get clarified by Members on the minority side as to their position on the counting of which ballots. I have heard some Members of the minority even today—and some earlier—say that ballots should not be counted in the current recount that would not have been counted in Indiana, and a number of people have said they should not be counted. Now Mr. Simcox has just been quoted as saying—and I assume he will not be taking this one back in the near future—that he is for counting all the ballots.

This differs with the position that some Republican Members have stated today. The gentleman from Indiana [Mr. MYERS] earlier said, and I agreed with him, that with regard to Vanderburgh county you have to count them all where the precinct clerks or the inspectors did not initial any of them. One of the key issues that we have to focus on is, should voters be penalized because election officials did not properly initial their ballots?

Now, the task force of the gentleman from California has instructed that they be counted. Several Members on the minority side appear to have objected to that. That is the kind of specific issue I would have hoped would have been addressed.

I am unclear as to what the minority's position is. I agree with the gentleman from Indiana [Mr. MYERS] that we ought to count those where the precinct inspectors in Vanderburgh County did not initial them. Other Members on the Republican side have criticized that, and I would hope we could get some clarification because I think there is a very inconsistent position here as to whether these votes ought to be counted.

MEDICAL CARE SHOULD NOT BE "BUSINESS AS USUAL"

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. BENTLEY. Mr. Speaker, we are increasingly hearing frightening stories from hospitals of accidental deaths from the wrong medication being administered. Too often, for comfort, we hear that the wrong patient has received an operation.

A Wall Street Journal article of March 27, 1985, may shed some light on these problems. It discusses in detail the cost of deep staff cuts at hospitals across the country.

While we are concerned with fiscal responsibility at all levels of the Government and in all community services, the key word is responsibility.

It seems to me that in making the nursing staffs of our health care facilities the target of major budget cutting by hospitals is not responsible.

Going back to the days of Florence Nightingale and Clara Barton, nurses have followed in the footsteps of those who guard us at the most vulnerable, lonely time in our lives.

Our great scientific institutions and, yes even the Congress, boasts of millions spent in medical research, breakthroughs on the cutting edge of technology.

But, what good is this all; if, the human factor which gives the support necessary to all healing is being taken away?

Our nurses deserve praise, not pink slips. Our patients pay for the best and deserve it in having capable nursing care. Hospitals are not just businesses. They deal primarily in hope.

In order for the Members to better understand the problems, I insert here in the CONGRESSIONAL RECORD an article which appeared in the Wall Street Journal, March 27, 1985, entitled, "Hospital Nightmare: Cuts in Staff Demoralize Nurses as Care Suffers":

HOSPITAL NIGHTMARE: CUTS IN STAFF DEMORALIZE NURSES AS CARE SUFFERS

(By Jennifer Bingham Hull)

Last June, Ann Landers printed a letter in her column from a medical student complaining about nurses' attitudes. Some 7,000 angry nurses responded.

Their letters told of mounting difficulties for a profession known for long hours and low pay, citing exhaustion and stress so bad it endangers patients' lives. "I have come home and cried because I didn't have enough time to do a decent job for my patients," said one. A nurse in Hartford, Conn., has complained "endlessly" to her administrators. "All I hear is 'There is no budget for more help. Do the best you can,'" she wrote.

Ms. Landers called the response "staggering." She said it was the most depressing mail she had read in years.

Nursing is in turmoil. Cost pressures brought on by a new Medicare payment system are causing hospitals to reduce nursing and support staffs. The California Hospital Association reported a 9 percent drop in full-time registered nurses employed in California hospitals in 1983 and a 3 percent drop in part-time nurses. Preliminary results for 1984 indicate further reductions.

NOWHERE TO HIDE

Such numbers add up to more work for remaining nurses and less attention for patients. "The nurse is where the buck can't be passed anymore," says Jeff Goldsmith, a health-care analyst at Ernst & Whinney. "They are the biggest victims of cost-cutting because they can't hide from the patient. If the resources aren't there they still have to provide them."

Though hospital occupancy rates have fallen, the demands of patients are increasing. A new Medicare payment system is pressuring hospitals to discharge patients quickly, while the growth of outpatient surgery is leaving hospitals with sicker patients.

Nurses say care is deteriorating, so far mostly in small ways. The real worry, however, is that cost-cutting will seriously impede care in the future. "We're skating on thin ice, says A. David Tammelléo, an attorney who specializes in nursing issues. "With fewer nurses doing more work there is the imminent danger of errors of judgment and misassessment."

Even the nation's richest and most prestigious hospitals haven't been spared, as a look at Cedars-Sinai Medical Center illustrates. Located in Los Angeles, Cedars is a not-for-profit hospital with 1,120 beds, a large teaching program and a reputation for treating the celebrated and rich.

Cedars budget for nursing wages has been cut 6 percent in the past two years to $50 million. By the end of fiscal 1986, almost 300 full-time positions will have been cut in three years. Nurses comprise two-thirds of these cuts.

A look at the oncology ward brings these numbers to life. Most of its patients have

cancer. Nurses spend hours by the bedside here, talking of tests and treatments and death. Most are young, and several are recent graduates of top nursing schools. They wear bright shirts over white pants. No white caps no starch.

At 7 a.m. a bleary-eyed group begins its shift by listening to the night shift's recorded description of patients' conditions. One woman may need surgery. A nurse rolls her eyes and swallows hard. "God I hope not," she says. The tape recommends giving more attention to one patient. A nurse sighs. "I like that patient, but it's just too much," she says.

Nine nurses are scheduled for the 31 patients on the floor today, but one was needed elsewhere in the hospital so only eight are working. Such holes used to be filled with temporary help, but no longer. "You have to make do with what you have, period," says Amy Goldfarb, assistant coordinator on the floor.

Nurse Bernadette Moran will handle four patients today, one of whom is near death. By mid-morning Ms. Moran is racing. A dying lung-cancer patient is gasping for air. Ms. Moran grabs another nurse to help "suction" the man's trachea so he can breathe.

A JOB AND A HALF

She wants to suction the man more often, but three other patients need attention. She whisks a wastebasket from the room and moves on. "There is nothing more frustrating than to know you have to do patient care and can't because you don't have the time," she says.

Ms. Moran's frustration is common. On a recent shift Bonnie Markoe is the "charge" nurse. Charge nurses, who handle admissions and staffing, used to be free from patient care. Not anymore. Ms. Markoe is also responsible for three patients.

Staffing problems leave the nurse little time for them. One who is supposed to be walked several times isn't. Doctors' orders for drugs, procedures and dressing changes are left for the next shift. On another day Ms. Markoe says she mistakenly gave a patient antibiotics six hours early. The patient was fine but, "it just gets me when it's unsafe and too busy and there's no relief," she says.

On this shift a cancer patient named Morris is waiting for Ms. Moran to give him a shower. Morris says these nurses are too busy. And he complains that they aren't very good at starting intravenous lines, or IVs.

Cedars cut by two-thirds a special team that puts intravenous lines into patients. Now floor nurses start most IVs.

The oncology nurses aren't used to inserting the needles, and cancer patients often have loose skin and bad veins. Patients reveal scarred arms and complain of being stuck several times without success. "They've got lots of problems with the IVs," says Morris. "Some of them (the nurses) are in a hurry or inexperienced. The girl tried twice last night. I was in lots of pain."

Nurses don't like the new policy either. "We are doing all the work," says Ms. Markoe, "We watch them cry. We watch them die. Now we have to stick them with an IV," she says.

Nurses do like one recent change, a switch to so-called "primary care." Each nurse provides complete care for several patients assigned directly to her. Before, each nurse did one task for all patients.

THE TOTAL NURSE

Primary care means a 43-year-old leukemia patient named Christine is depending on Ms. Markoe this morning. The patient turns her head weakly as the nurse enters the room, revealing a swathed head, haggard face and eyes filled with trust. Ms. Markoe cares for Christine whenever the patient is on the floor. "The first time in the hospital I was so afraid of the tests," Christine says. "I remember leaving on a gurney and Bonnie was hugging me saying it will be all right . . . This is the total nurse."

Though the change to primary care wasn't related to cost-cutting, it is more efficient because nurses who know their patients can prevent complications that extend hospitalization, says Roxane Spitzer, Cedars' vice president of nursing.

Ms. Spitzer says it's more efficient for nurses to start IVs themselves. She says through productivity gains Cedars has been able to preserve quality care. She also says the hospital's nursing department was overstaffed.

But she worries about the future. "We absolutely can't handle any more cutbacks without directly affecting patient care," Ms. Spitzer says.

She notes that complaints from nurses have already increased. "Sometimes morale gets pretty bad when nurses are so stretched that they don't even have 20 minutes for lunch," she says.

NOT MUCH ADVANCEMENT

The nurses say running all day wouldn't be so bad if the pay were better. Donna Ray makes $25,000 after two years on the floor. That's above the average salary of $21,000 for nurses. But she sees little room for advancement, especially compared with her college friends working on Wall Street. "They are responsible for someone's money. I am responsible for someone's life. Something is wrong," she says.

Some of the frustration is showing up in more strikes by nurses' unions. the largest-ever took place in the Minneapolis-St. Paul area last summer. Some 6,000 nurses struck 15 hospitals for five weeks to protest layoffs of senior staff and their replacement with less-expensive junior nurses. The nurses negotiated a seniority system for layoffs and provisions for training.

At Cedars, though, nurses voted down a union last year. Perhaps they have enough battling in the ward.

One such battle begins late at night as a dying lung-cancer patient struggles for air. At one point, he grabs Julie Bourke, the night nurse, so hard he almost tears her clothes off. Ms. Bourke asks the residents in charge to prescribe a stronger from of morphine. When they refuse because of feared side effects, the exhausted nurse bursts into tears.

Ms. Ray and Ms. Moran take over in the morning, and there are more discussions about medication, but no change. Hours pass. The man is still agitated. His family is distraught. At 2 p.m. Ms. Ray approaches one of the residents, and her frustration and anger spill out.

"I just don't think you understand what that family is feeling back there," she says, eyes flashing, hair flying in her face. "Bernadette has been crying. Julie was crying. I'm upset." She notes that their argument has dragged on for hours. "That's a long time to see your father die," she says.

Ms. Ray keeps lobbying, and eventually the doctors prescribe a stronger medication. But by then the patient is in a coma. Two hours later he is dead.

The shift is over, but Ms. Moran is still finishing a chart. Ms. Ray sits on the floor with her head in her hand, exhausted. She has a letter from a patient's relative, thanking her for helping the family deal with death. But such appreciation may not be enough. "You know, we're really good nurses, Bernadette and I, but we're not going to stay here," says Ms. Ray. "We just can't take it."

□ 1320

RICK McINTYRE STILL THE WINNER

(Mr. THOMAS of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMAS of California. Mr. Speaker, to respond briefly to the gentleman from Massachusetts about his cry of "Count all the votes," as a member of the task force I would like to inform the gentleman that in Warrick County, for example, on election night the combined total of McIntyre and McCloskey was 17,034 votes.

The recount that was just conducted under the task force rule counted 17,029 ballots for both Mr. McIntyre and Mr. McCloskey.

At least in one county under the rules, to cry "Count all the votes," fewer votes are acutally being counted.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. THOMAS of California. Certainly.

Mr. FRANK. I thank the gentleman for yielding.

I do not see anything in the rules that says the votes should not be counted, unless there was some erroneous casting of those votes.

Does the gentleman allege that those five votes were illegitimately released and cast aside?

Mr. THOMAS of California. I would say to the gentleman from Massachusetts, if he will examine in Vanderburgh County, there was a gain of net five. The point is we are recounting under the gentleman's rules that he says are fundamentally fair and we are not changing the election night results. That is the point. Election night results are standing on the recount. It was a fair count election night, and I yield back the balance of my time.

Mr. FRANK. If the gentleman will yield, what the gentleman has pointed to is the fairness that some votes are not being counted.

REINTRODUCTION OF BILL TO STUDY EFFECTS OF ALCOHOL ADVERTISING ON ALCOHOL CONSUMPTION

(Mr. NIELSON of Utah asked and was given permission to address the

House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, on January 30, I introduced H.R. 824, a bill that requires the Bureau of Alcohol, Tobacco and Firearms to conduct a major study to determine the effects of alcohol advertising on the level of alcohol beverage consumption. The bill was referred by the House Parliamentarian to the Energy and Commerce Committee and was then referred to the Subcommittee on Health and the Environment.

After the bill was introduced, the chairman of the Subcommittee on Telecommunications, Consumer Protection, and Finance, on which I sit, announced that his subcommittee plans to hold a hearing on the subject of alcohol advertising next month.

Today I am reintroducing my bill in a slightly modified form so that it can be referred to the Telecommunications Subcommittee and can be made the subject of testimony and questioning at the hearing. The changes I have made do not affect the substantive content of the original bill to any material extent.

I have notified each of the cosponsors of my decision to introduce this bill in a slightly modified form, and each of them has agreed to become an original cosponsor of the new bill as well.

Alcohol abuse is a serious problem in this country. The comprehensive study of alcohol advertising mandated by the bill should provide valuable information on whether steps should be taken to regulate advertising practices in some way.

HOUSE SHOULD PUT AN END TO PETTINESS AND SEAT McINTYRE

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, I take exception to the word "diatribe" when discussing representative government in the home of democracy, the House of Representatives of these United States. It is never diatribe.

Mr. Speaker, it has been nearly 3 months since I and my fellow freshman colleagues enjoyed the privilege of being sworn as Members of this august body. But there still exists a vacancy from the Eighth District of Indiana. Rick McIntyre who was certified and later recertified does not serve with us. During the last several days the House Administration Committee's Task Force charged with recounting the ballots has completed its work in Vandenburgh County, the largest county in the district. Out of all the ballots counted, including the 5,000 disputed votes, a change of only 5 votes was recorded.

How long will this process continue? How long will the residents of the Eighth District of Indiana be without a Congressman to vote on the major issues Congress will face during the current session?

It's time to act responsibly. As the Chicago Tribune stated in an editorial dated March 12, "The taxpayers in southern Indiana, meanwhile, have no Representative in Congress. The House of Representatives ought to put an end to the pettiness and seat McIntyre." I agree. Let's seat McIntyre now.

OVER HALF A MILLION PEOPLE IN EIGHTH DISTRICT OF INDIANA NOT REPRESENTED AT TAX TIME

(Mr. COBEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBEY. Mr. Speaker, like so many other people, we are struggling with our tax returns as April 15 approaches. We must think as this date approaches of the fact that there are over half a million people in the Eighth District of Indiana that are not represented in this body. They have not been represented ever since January 3. This marks the 90th day.

I appeal to my colleagues on both sides of the aisle to correct this injustice today and give the people of the Eighth District of Indiana their rightful representation in this body.

GIVE VOICE OF AMERICA EQUIPMENT IT NEEDS

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, the Voice of America is our way of telling the world about the American story. In distant places it is the only corrective to the lies and innuendo and misinformation that abounds; but while the Voice of America's personnel do their work, with very dedicated people, its equipment simply does not. Not only do we have too little equipment, the equipment is old. About one-third of it is 30 years old; 80 percent of it is 15 years old.

The result is that in Central America, in the Middle East, in the eastern part of the Soviet Union and many other important places in the world, America's story is inconsistent, inaudible, and often not being told at all.

It is one thing to have our radios jammed. We can understand that, even though the fact that the Soviet Union spends twice as much in jamming as we do in broadcasting, but it is quite another to let America not speak abroad.

There is a 5-year schedule for the improvement of Voice of America capabilities, the modernization of the equipment that we so badly need. The authorization is there.

I urge the members of the Appropriations Committee and the Members of this body when it comes to the floor of the House to vote yes, so we can modernize, so we can have a Voice of America that can be heard.

SEAT RICK McINTYRE NOW

(Mr. COBLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COBLE. Mr. Speaker, the most unlikely segment of the Rick McIntyre matter is that he is being denied his seat by this House. This is the U.S. House of Representatives, not an exclusive body whose membership is restricted to elitists. This is the people's house, yet this is the House that says no to the seating of the certified winner of Indiana's Eighth House seat.

It is high time the people's house started acting like the people's house. The time has come for Democrats who espouse fairness and equity to cast their votes accordingly. Dialog emphasizing fairness on the floor of this House is never a waste of time.

Seat Rick McIntyre now.

THERE IS NO ELECTION CONTEST IN EIGHTH DISTRICT OF INDIANA

(Mr. STRANG asked and was given permissison to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRANG. Mr. Speaker, there is no election contest in Indiana's Eighth Congressional District. Indeed, Mr. Speaker, the loser of that race, Mr. McCloskey has never contested the outcome of that race.

The winner, Rick McIntyre, has accepted from the secretary a certificate certifying that he is the only certified winner.

The issue is that this body has failed to honor the clear certified winner sent here by the State of Indiana. Deliberate confusion, smoke screens and phony arguments cannot hide the fact that the only contest is the House of Representatives exercising capricious power against Indiana's certified Congressman, Rick McIntyre.

Mr. Speaker, let us seat Rick McIntyre.

FLOOD INSURANCE AND HOUSING REAUTHORIZATION BILLS

(Mr. WYLIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYLIE. Mr. Speaker, today, at the request of the administration, I

am introducing two legislative proposals developed by the administration.

The first bill would amend and extend the National Flood Insurance Program. The bill contains a 6-year extension of the National Flood Insurance Program and the emergency phase of the program. The date for the emergency phase extension, until 1991, is requested to coincide with the studies completion plan submitted to the Congress in September 1984. This extension would conform with the administration's decision to continue funding for flood studies at the current level rather than a more costly, enhanced level.

Mr. Speaker, an extension of this vital program is necessary. There are some 1.9 million flood insurance policies in effect throughout all 50 States, territories, and possessions. Without an extension of time of the authority to write and renew NFIP policies, all existing policies would expire and no new policies could be written, providing the public with no opportunity to obtain insurance coverage against floods and such coverage is not available in the private sector.

In addition, since 1983 the Federal Insurance Administration, under the very able leadership of Jeff Bragg of Ohio, has been successfully administering a significant new "Write Your Own Program" under which over 200 of the Nation's private property insurance companies have agreed to market and write the standard flood insurance policy on their own letterhead, as insurers, and to service the policyholders under an arrangement whereby the Federal Government permits the companies to retain a specified amount of the insurance premium for the payment of expenses and a specified amount of the insurance premium for the payment of expenses and provides such additional funds as may be needed for the payment of claims.

The proposed extension of the program authority through fiscal year 1991 will help encourage even greater participation by private companies and property insurance agents and brokers in the "Write Your Own Program" by providing the necessary assurance that the Flood Insurance Program, whose underlying purposes have enjoyed such consistent and strong support by the Congress, will not be subjected to the uncertainties and interruptions inherent in a more frequent authorization schedule.

The bill also would redefine administrative expenses to allow most of the expenses associated with the Flood Insurance Program to be charged to the insurance fund rather than be subject to the full appropriations, process. This may prove to be controversial, but I believe it is something Congress should at least examine, on its merits.

The second bill authorizes various programs under the jurisdiction of the Department of Housing and Urban Development. It provides the legislative language to carry out the President's budget recommendations. It is a comprehensive—yet austere authorization bill—in keeping with the desire for HUD to play its part in reducing the Federal deficit.

Mr. Speaker, I admit that I have reservations about some of the details of this bill, but I also believe it deserves consideration by Members of this body. I congratulate HUD Secretary Samuel Pierce, for this leadership in helping formulate this proposal, and look forward to working with him in developing a housing authorization bill this year.

There has been a great deal of misunderstanding about the course of HUD programs in recent years; particularly on the part of those who feel that the only way to assist needy citizens is through slow and costly new construction programs. Secretary Pierce led the way, with congressional assent, in doing away with the section 8 New Construction Program, and has focused HUD's efforts on direct assistance to people, rather than to bricks and mortar.

This emphasis on better use of existing housing stock, through rehabilitation, vouchers and better management of public housing facilities, has made possible significant reductions in the HUD budget. Nevertheless, the Department continues to carry out its basic missions in the housing and community development fields.

This year's administration bill contains some controversial provisions. The Community Development Block Grant Program would be reauthorized through fiscal year 1987, but at a reduced level for this fiscal year. It would also change the method of allocation under that program from 70 percent entitlement—30 percent nonentitlement to 60 percent entitlement—40 percent nonentitlement. This change, which would take effect begining in fiscal year 1986 would be necessary if the proposed termination of the Farmers' Home Administration community development program is effectuated.

As part of an administration initiative to eliminate Federal funding of local economic development programs, the bill also proposes to terminate the Urban Development Action Grant Program.

For the Assisted Housing Program, the bill makes the Voucher Program, passed as a demonstration by the Congress in 1983, a permanent program. It also authorizes appropriations for public housing operating subsidies, as determined by the performance funding system, while proposing a 2-year moratorium on new assisted housing commitments and a 1-year moratorium for all but emergency public housing modernization funding. It also replaces tax-exempt financing for public and Indian housing programs with one-time capital contributions.

The bill extends several FHA Insuring authorities for 2 years and contains a number of amendments designed to increase the efficiency of these mortgage insurance programs.

The bill also proposes initiatives to detect and prevent fraud and waste in Federal housing programs, including a provision to verify incomes of tenants being subsidized by these programs.

I emphasize that even with implementation of the significant reductions proposed in this bill, HUD would continue to assist more needy people than ever before. During fiscal years 1986 and 1987, 207,000 families would be added to the roles of those already receiving Federal housing assistance. This would bring the total number of families assisted to over 4.2 million.

At the same time, the Nation's housing debt, which was nearly a quarter of a trillion dollars in 1981, is declining rapidly because expensive building programs have been reduced or eliminated and resources have been concentrated on quicker, less expensive approaches such as rental rehabilitation and housing vouchers. Rental rehabilitation permits substandard units to be brought up to code standards. Vouchers, building on the successful section 8 existing program, provide low-income recipients with greater freedom in making their own decisions about the type and location of housing in which they live.

Mr. Speaker, I know that some of my colleagues have looked with great anxiety at this year's bottom line budget figures for the Department of Housing and Urban Development. I can understand the anxiety of anyone who looks only at the numbers. But in the coming weeks, I hope my colleagues will scrutinize seriously and soberly the details of the various proposals we will be considering, including the bill I am introducing today. Let us then discuss them in the context of the true bottom line—their cost effectiveness relative to previously tried programs and the pressing need to deliver assistance to those who need it most.

It is for the purpose of joining the debate that I have introduced this bill today. The administration deserves to be heard; and while I do not endorse everything in this bill—or for that matter either bill—I believe several of their legislative suggestions have merit and should be given serious consideration in any final housing authorization bill that is adopted.

TAXATION WITHOUT REPRESENTATION

(Mr. DREIER of California asked and was given permission to address

the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER of California. Mr. Speaker, the Evansville Press in Indiana has been running a regular editorial entitled "Taxation Without Representation" in which they keep a running tally of the number of days they are denied a representative in Congress. As stated in one of the editorials:

It's just our way of providing a daily reminder of the sense of frustration and outrage shared by our many readers who are denied a voice in what is supposed to be representative government.

The outrage in Indiana is completely justified. The voters in that district pay taxes. They deserve representation, yet they have been denied a voice in Congress because of petty politics.

The bare facts are that Mr. McIntyre was certified as the election's winner. After the election was challenged and a recount was completed, Mr. McIntyre's lead increased by more than 400 votes. Still, the results were rejected. Congress has persisted and has gone forward with a plan that ignores those election results.

We are now sending the message to voters that Federal elections are irrelevant and that individual votes don't count. What is worse is that this message is gaining credibility the longer Congress refuses to recognize that Mr. McIntyre was the clear winner. I urge my colleagues of this respectable body to restore integrity to the election process by seating Mr. McIntyre immediately. Furthermore, I urge that we send a clear message to the voters in Indiana that their votes do count and that their votes are respected. Let's seat the representative they elected to Congress. Let's seat Mr. McIntyre now.

□ 1330

WHERE IS RICK McINTYRE

(Mr. SILJANDER asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. SILJANDER. Mr. Speaker, where is Rick McIntyre? His colleagues across the country are wondering were is Rick McIntyre.

Speeches on podiums from coast to coast are wondering just where is Rick McIntyre. Members of Congress in hoardes have come to the well and asked where is Rick McIntyre.

Indiana voters have asked consistently where is Rick McIntyre. The people of the Eighth District, more specifically, have asked just where is Rick McIntrye.

The secretary of state of Indiana has asked where is Rick McIntyre. The Supreme Court of Indiana has wondered just where is Rick McIntyre.

Let me ask the question of the Democratic leadership: Just where is Rick McIntyre?

Out of fairness and compassion and a notion for justice, I would request that the majority leader do seat Rick McIntyre so all the American people and everyone wondering where is Rick McIntyre can find out. And the answer is that he should be sitting right next to you, Mr. Majority Leader.

SEATING OF RICHARD D. McINTYRE

(Mr. LIGHTFOOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIGHTFOOT. Today, of course, we will have a resolution very shortly on seating Mr. McIntyre. And we are some 50-odd days into the count.

I think that this thing has been debated about as long as it should be debated, and I hope that today we can settle on something.

I have a youngster that is in high school, and we have gone through a lot of the questions in the discussions we have had here, on this floor as to the one-person/one-vote rule that we have in this country. And I just wonder if many of the things we vote here on the House floor, if they would go the other way, just because they were close. It brings a lot of questions to mind.

So I would appeal to my colleagues on the other side of the aisle, strictly in the name of fairness, it looks like the Indiana vote is going McIntyre's way. It has been that way all along. It is about time we made a statement and do the proper thing.

PRIVILEGES OF THE HOUSE—RESOLUTION TO SEAT RICHARD D. McINTYRE

Mr. MICHEL. Mr. Speaker, I rise to a point special privilege, and I offer a privileged resolution and ask for its immediate consideration.

The SPEAKER pro tempore (Mr. MURTHA). The Clerk will report the resolution.

The Clerk read the resolution, as follows:

H. RES. 121

Whereas the House Administration Committee Task Force on the congressional election in the Eighth Congressional District of Indiana has exceeded its own timetable for a decision on the seating of Richard McIntyre; and

Whereas the task force recount of the votes in that district is still underway with no declared timetable for completion and no indication from the task force as to when the House Administration Committee or the full House will be presented with a recommendation on how to proceed with the seating of Mr. Richard McIntyre; and

Whereas the people of the Eighth Congressional District of Indiana continue to be deprived of their Constitutional right to representation in the House of Representatives, totally without justification and in defiance of their own laws and the precedents of the House; and

Whereas Richard McIntyre, as the only certified Member-elect from the Eighth District of Indiana, has a legitimate right to be seated in the House while the contested election issues are addressed by the House; and

Whereas the McIntyre certificate of election has never once been challenged by his Democratic opponent nor impeached in such a way as to bring into question its validity or its integrity: Now, therefore, be it

Resolved, That the Speaker of the House is hereby authorized and directed to administer the oath of office to the gentleman from Indiana, Mr. Richard D. McIntyre.

Resolved, That the question of the final right of Mr. McIntyre to a seat in the 99th Congress is referred to the Committee on House Administration.

The SPEAKER pro tempore. The resolution constitutes a question of the privileges of the House under rule IX.

MOTION OFFERED BY MR. WRIGHT

Mr. WRIGHT. Mr. Speaker, I move to refer the resolution to the Committee on House Administration.

The SPEAKER pro tempore. The gentleman from Texas [Mr. WRIGHT] will be recognized for 1 hour.

Mr. WRIGHT. Mr. Speaker, I yield to the gentleman from Illinois [Mr. MICHEL], the distinguished minority leader, 30 minutes of that time for purposes of debate only.

Mr. MICHEL. I thank the gentleman.

Mr. WRIGHT. Pending that, I yield myself such time as I may consume.

I should like simply to say that the entire purpose of the House Administration process has been to determine who, when all the valid votes are counted, is indeed the rightful winner of the contest in the Eighth District of Indiana.

While I realize that strong and lurid claims have been made, strong rhetoric used, accusing the members of the leadership of attempting to steal an election or to steal a House seat, we have repeatedly, publicly assured the membership and do again today that the recount now under way, the official count undertaken by the House in pursuance of its constitutional responsbilities to be the judge of elections of its own Members, is a fair, an honest, and a factual recount. It is being conducted by the Committee on House Administration under a task force whose chairman is the gentleman from California [Mr. PANETTA].

And I give my assurances upon my word of honor, and I think it should certainly be understood that this is the intention as repeatedly stated, that whoever is determined by that impartial group in the General Accounting Office to have received the most votes will be seated by this House, whether that be the Republi-

can nominee or the Democratic nominee.

Mr. Speaker, I yield 7 minutes to the distinguished gentleman from California [Mr. PANETTA], the chairman of the committee supervising that official recount.

Mr. PANETTA. Dear colleagues, in deciding this issue of seating, I think it is important for all Members to be aware of the current status of the task force action on this issue.

The task force was charged by House Resolution 1, and following the charge by additional resolutions, to investigate and determine whether the final right to take the seat representing the Eighth District belongs to Mr. McCloskey or Mr. McIntyre. Those resolutions were adopted and referred to the House Administration Committee pursuant to article I, section 5, clause 1 of the Constitution, in that each House, and I am quoting, "shall be the judge of the elections, returns, and qualifications of its own Members."

Pursuant to that authority, and the precedents that have been provided, our goal is to determine the intent of the voters in the Eighth District. Pursuant to that mandate of the House and the Constitution, the task force has proceeded to secure all of the ballots in the Eighth District.

We have adopted operating principles and procedures. We have adopted counting rules to count all of the votes. We have appointed a recount director, who is now in Indiana with 14 GAO auditors comprising 7 counting teams, which are now in the process of counting those votes. And we have prescribed counting procedures for the counting teams follow.

□ 1340

In addition, we have held hearings both in Washington, as well as in Indiana, to allow all interested witnesses to convey their views on this election, and we have also been present in Indiana to view the counting process itself as a task force.

Let me summarize where the recount process is: The recount began 1 week ago. We are dealing with 15 counties, representing approximately 234,000 votes. The largest of those counties, Vanderburgh County, representing about a third of the vote, has been completed, as of last Thursday night. It contains about 70,000 votes.

Spencer County has also been completed; about 10,000 votes. Warrick County, 17,000 votes, and Martin County, 5,000 votes, all of which have been completed as I speak now. Two additional counties, Pike County and Crawford Counties, will be completed by this evening, at which time we will have completed counting over half of the votes that were cast in the Eighth District.

We have seven GAO teams; six are out in the field, and one team is coordinating the count from a command headquarters in Evansville, IN. They are working through the weekends; they are working into the evenings. When they were in Warrick County, those counting teams worked until 11 o'clock that night, and they are continuing to work late into the evenings to try to complete this count. The only break they took was Sunday.

The process is time consuming. I want to inform the Members that it is not easy to go back and do an accurate and definitive count. It does mean counting all of the ballots and reviewing each of them. It means segregating those ballots which are questioned for one reason or another, so that each ballot or issue can be resolved by the task force. And we did that last Friday; we resolved two of the questions that were raised in favor of counting those ballots.

In addition, we are reconciling the vote counts in each of the precincts, which means that we take the full list of the voters who came to that particular precinct or polling place, and match it with the number of votes that were tabulated from that particular precinct or polling place.

We are looking at all of the processes that were implemented to insure that we have an accurate count. The point is that we intend to produce an accurate and definitive count, regardless of who the winner is.

I recognize that the initial intention of the chairman, and the intention of myself and the ranking minority member, was to complete the recount within 45 days. But both the chairman, myself, and the ranking members have made clear that we will not sacrifice accuracy in that process, and indeed, Jim Shumway, who is the recount director, has been quoted—and I repeat the quote because I think it is appropriate: "We will proceed as fast as we can to be certain of accuracy."

The hope is that we can complete this count within the next few days, and be in a position to report back to the House when it returns from its Easter recess. At that time we should be able to present to the House an accurate and definitive count, and who we recommend seating pursuant to that count.

There is no question about the authority of the House to proceed. That has been confirmed in past decisions; and it has been confirmed by a Federal court decision in this case as well. I do not think anyone questions the authority of the House to do this.

The real question is: Will we be allowed to implement that authority, and how will we implement that authority? It is the intention of the task force to implement it fairly, carefully, openly and honestly, and in so doing, to serve the best interests of the House of Representatives, the candidates, and the people of the Eighth Congressional District of Indiana.

Mr. SWINDALL. Will the gentleman yield?

Mr. PANETTA. I yield to the gentleman.

Mr. SWINDALL. I thank the gentleman for yielding to me.

Mr. Speaker, I just have one question. By the committee's own admission, this is a very time-consuming process. During this period of time we all know that the voters in the Eighth District, and for that matter everyone in the Eighth District, is without representation.

Would the committee state who would be prejudiced by this House seating interimly the certificate holder in that district; and then irrespective of the committee's ultimate determination, those individuals in the Eighth District would have representation. Who would be prejudiced?

Mr. PANETTA. The House has spoken on that issue. The task force has not taken up the issue of seating or not seating; the direction of the House has been clear; that we should determine who has the right to be seated—Mr. McCloskey or Mr. McIntyre—and that is exactly what we are doing.

Mr. SWINDALL. If the gentleman will yield further, my question is, who would be prejudiced by in that interim period, because it really is not fair to say that you are not denying the seat, because for the last 90 days no one has occupied that seat; so, ipso facto, it has been denied.

Who would be prejudiced?

Mr. PANETTA. The task force is not speaking to the issue, nor should it speak to the issue of whether Mr. McIntyre ought to be seated. The House has spoken on that issue; what the task force is trying to determine is who has the right, ultimately, to be seated. We have the power to do that. No one questions the power to do that, and the House has spoken on the resolution.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MICHEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we bring this resolution before this House for the third time for one reason: The people of the Eighth Congressional District of Indiana have no representative seated in this House. That is the issue here.

Our complaint is not that the McIntyre election is being made the target of an army of auditors out in Indiana or that a Republican winner is being challenged—although, believe me, we do look out for our own—it is because of the tea bags I am getting in my office from citizens of the Eighth District who do not have representation

in this body, but feel the sting of Federal taxation just the same.

We have made this case over and over again on this floor. In response, all we have gotten is gibberish about procedural technicalities, a burst of inflammatory rhetoric about racism, and an excuse of the day, I guess, from your congressional committee that changes with each new development.

We have yet to hear one good reason why this House has gone to the extreme of disenfranchising an entire congressional district. We have yet to hear one word from Mr. McCloskey, as a matter of fact, supposedly the aggrieved party. He has not claimed foul play, illegality, or impropriety. He has only claimed a seat in this Chamber which is no longer his.

The task force wanted 45 days to do a recount in Indiana. The task force got 45 days, and the task force can have 45 days more, frankly. Time would not be of the essence if you would just seat the Congressman so he can represent the people who elected him while your auditors audit and your campaign committee campaigns. The hour is late. Let's right the wrong.

Mr. Speaker, I believe in this resolution; I believe in the position we have taken; I believe in it right down to the marrow in my bones. Richard McIntyre has been wronged. This institution has been wronged. The people of Indiana have been wronged. I intend to keep bringing these resolutions to the floor until they have been righted.

I yield to the gentleman from the District of Columbia.

Mr. FAUNTROY. I thank the gentleman for yielding to me.

Mr. Speaker, I had resisted the temptation to enter this debate on the seating of the gentleman from the Eighth Congressional District, but recent references to the fact that the citizens of the Eighth District are being denied representation and that taxation without representation is tyranny have forced me to speak.

I am wondering where those who have been so concerned have been around the question of voting representation for the citizens of the District of Columbia. I represent more people than any single Member of this House; I represent more people than elect seven Senators.

Yet, I was born here, my mother and father who were born here have never had the opportunity to do what the citizens of the Eighth Congressional District have done, and that is to vote for somebody to represent them in the U.S. House and Senate.

Mr. MICHEL. Well, I just go back to that very basic document that founded this Government, and also have some special feelings about the Federal jurisdiction housing the Capitol of the U.S. Government, and the Founding Fathers felt strongly about it; this Member has felt strongly about it.

Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina [Mr. HENDON].

Mr. HENDON. Mr. Speaker, I have a troubling comparison to share with you and my colleagues, and particularly my dear friend from California, the chairman of the task force [Mr. PANETTA].

As we all know, Mr. Speaker, there are really only three things we need to do to take a seat in this distinguished body: We must meet the constitutional requirements of age and residency; we must be elected by the people; no one gets appointed to this body, and we must have a certificate from our State, certifying that we are, in fact, the winner of our election.

In 1985, a man named McIntyre came before this body, having faced the voters and having been certified the winner by the appropriate officer in his State. But as we all know, his certificate was rejected by the majority party and a recount was ordered in his district.

□ 1350

Now, we are told that is fair, that is the way we always do it, "that is standard procedure," you say. Standard procedure? It was not in 1983 when the seat in North Carolina 11, the seat I held in 1981 and 1982, was contested.

Here are the facts, Mr. Speaker, in that case, and I hope everyone will take note that the standard procedure of 1985 is a dramatic departure from the procedure used in 1983.

In my district in western North Carolina in November 1982, if the voters marked a straight Democrat ticket and then crossed over and put an X by my name, if they marked an X, Mr. Speaker, by my name clearly indicating their intent, I believe, to vote for me, the vote was counted for my opponent. The party preference, I was told at the time, overrode the clear intent of the voter.

My opponent, with the votes being counted in that manner, emerged victorious by some 1,300 votes. I was troubled, Mr. Speaker, to say the least, by the fact that an X by my name was counted for my opponent. I asked for a recount from the State board of elections but was denied. I went to Federal court to challenge the system of counting votes in that manner, but in the meantime my opponent, a very fine man, was certified the winner, and because he had that certificate, Mr. Speaker, he took that seat that I had held in this body.

I, as most here know, appealed that action to a Federal appeals court and to the House Administration Committee. Before the committee ruled, the 4th Circuit Court of Appeals ruled unanimously that the method used to count votes in my district in 1982 was unconstitutional.

I quote the unanimous decision of the appeals court:

> The imposition of a legislative preference for the straight party candidate when the voter has indicated no such preference is an arbitrary subversion of the electoral process that serves no compelling State interest.

The court continued:

> We conclude that the legislative directive to count an improperly split ballot as a vote for the straight party ticket is unconstitutional. This provision of the statute denies the equal protection of the laws to both the voter and the opponent of the candidate named on the straight party ticket.—*Hendon* v. *N.C. State Board of Elections*, 710 F.2d 177 (4th circuit 1983).

Based on that decision, Mr. Speaker, I asked the House Administration Committee to order a recount because my opponent, fine man that he was, as stated by the Federal appeals court, had been elected in an unconstitutional manner. Incredibly, in 1983 no recount was ordered by the committee. "He has the certificate," the majority said, "He should be seated." So he was. The certificate reigned, and a recount was not allowed. The exact opposite, Mr. Speaker, of what has happened in the McIntyre case.

I call on the majority party to use in the case of Rick McIntyre the same rules used in my case, and that is, Mr. Speaker, seat the man with the certificate. You did it in North Carolina in 1983. Do it for the people of Indiana's Eighth District today.

Mr. MICHEL. Mr. Speaker, I yield 5 minutes to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. Mr. Speaker, I would like to assure my colleagues in this body that the efforts that the freshman class on the Republican side have made to get Congressman-elect McIntyre seated are not a grandstand play for publicity. We are not trying to disrupt the actions of this body. We honestly, sincerely, and totally believe that Congressman-elect McIntyre should be in this body at this time.

We do not question the fact that this House has the ultimate right to be the sole judge of whom we shall seat in this body. We never have. We basically state that since Mr. McIntyre has the election certificate, and since there has never been a single shred of evidence to prove that he should not have been given that certificate, and since the confusion that has reigned has been more due to the fact of how the recount was conducted rather than on the original election itself, Mr. McIntyre should be seated.

As mentioned earlier, this is the 90th day that the Eighth Congressional District of the State of Indiana has not had a Representative sitting in this Chamber. We have already had several close votes. The MX missile last week is a case in point. It passed by only six votes on the initial vote.

The people of Indiana's Eighth District should have had a voice in that.

I would also like to point out that there is a procedure that was passed in 1969, the Federal Contested Election Act of 1969, to handle cases such as we have here in the McIntyre-McCloskey case.

As far as I can tell, every Member who is in a leadership position in the majority party in this body who was in the Congress at that time voted for that law. However, they have not seen fit to ask Mr. McCloskey to invoke it.

The burden of proof should be on Mr. McCloskey to prove that Mr. McIntyre should not be in this body. Mr. McCloskey has never seen fit to file such a contest. On the contrary, the burden of proof has been on Mr. McIntyre to prove that he in fact does indeed belong in this body. It is Mr. McIntyre versus the Congress. It should be Mr. McCloskey versus Mr. McIntyre.

We are going to have an opportunity here in 30 or 50 minutes to vote to seat provisionally Rick McIntyre pending the outcome of the second election recount that is currently in progress. I think that it is high time that we vote to do that, and I urge the Members of this body to do so.

Mr. MICHEL. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. Mr. Speaker, the question that we have before us is an important one which I do not think ought to be easily dismissed. It was interesting, when the chairman of the task force was asked the question as to whether there would be any prejudice if, in fact, we followed the regular procedures of the House and seated the certified winner. His answer was that it was basically irrelevant, that we ought not to consider it.

Mr. Speaker, it is not irrelevant. Mr. Speaker, that is exactly what we are about here today. We are not here contesting the recount that is going on now. That will continue on. In fact, we do not know how long it is going to take. We had been told previously that 45 days from the date on which we were last on the floor on this question, we would have the question resolved for us. I recall some speakers on the other side of the aisle suggesting that that seemed eminently fair but if that did not occur, they suggested they would vote at that point in time to seat Mr. McIntyre.

I suppose we will find out later on whether in fact that sentiment still prevails.

But the question here is, why? Why does this House today fail and why has this House for the last 90 days, failed to follow the clearly established precedents of this House? Why does this House refuse to follow the statute that was enacted to take care of matters of this sort, the Federal Election Contest Act. it states as a premise, that one who is certified the winner by his or her State is to be seated provisionally while any contest goes forward. We set up a mechanism whereby that can take place. Unfortunately, the person who lost and continues to lose in recount after recount did not bring forward such a contest, even though he had every right to do so. There has been no claim by Mr. McCloskey that there was fraud, there has been no claim by Mr. McCloskey that somehow the result that was fashioned, that was certified by the Secretary of State, is in any way wrong. And yet we have followed this extraordinary procedure.

Being a lawyer who practiced for 6 years before coming here, having served on the Judiciary Committee for 6 years, I happen to realize that oftentimes when we have disputes, we deal with questions of the burden of proof, that is, which party carries the burden of proof. That is an essential question in civil matters; it is an essential question in criminal matters. And I would argue that when one comes before us with the certification of election from the sovereign State, that that person has the right to be presumptively seated. Then the burden of proof is on those who would contest it to somehow attempt to set it aside in the regular course of events as have been established under the law.

But we are not following that in this case. Instead, we are following an extraordinary procedure. We found on the first day of this session that one person was asked to be set aside. And that was done by the majority leader; yet we were told it was not a partisan matter.

On our side, someone contested an individual from the Democratic side in a case from the State of Idaho. Yet on our side we voted to seat that person because we felt, as a principle, that person ought to be seated since he had the certification, pending the resolution of the contest.

On another opportunity, the minority leader attempted to have this brought to the floor again, and at that time we were again told that this was an extraordinary proceeding but that all we had to do was wait for 45 days and the question would be resolved.

Well, the 45th day has come and gone. As a matter of fact, the recount, basically, did not start until that time. And now we are told to "just bear with us a little longer. People of the Eighth Congressional District of Indiana, bear with us just a little bit longer with taxation without representation because somehow in the future we will resolve this question. In other words, "trust us."

□ 1400

Mr. WRIGHT. Mr. Speaker, I yield 3 minutes to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. I thank the gentleman for yielding me this time.

Mr. Speaker, I want to respond to the gentleman from California's statement a minute ago, and several statements that have been made earlier.

I have here in my hand a document entitled, "The Power of the House of Representatives To Refuse To Seat a Certified Member-Elect Pending the Outcome of a Contested Election," by Thomas Durbin, legislative attorney, American Law Division of the Congressional Research Service, Library of Congress, dated February 18, 1985, which document was placed in the CONGRESSIONAL RECORD during the first debate on this issue that is pending before the House today.

This document, which is made available to every Member, cites 10 precedents beginning in 1860, that has guided this body in the McCloskey-McIntyre case. Now, I do not question the gentleman's sincerity nor his integrity nor his ability as a lawyer. But I would like to ask the gentleman how he can stand here before this body and make such an outrageous statement, as he did a minute ago when he said we are not following the precedents of the House. We have clearly stated 10 precedents that have been made available to the gentleman and to every Member of this House, and to the American people, God, and everyone. How can the gentleman stand and make such an outrageous statement?

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman for an answer.

Mr. LUNGREN. I can make such a statement because the 1961 case, which has been used for the precedent in this case, in which the certification was impeached, was the reason for amending the Federal Election Contest Act in 1969. At that time, we amended the act and said that one who is certified is to be considered the prima facie winner. The prima facie winner is therefore to be seated until such time as the burden of proof is sustained for the contesting party.

Mr. ALEXANDER. I thank the gentleman and I want to reply to what the gentleman has said.

Mr. Speaker, we have here a bogus certification in Indiana. I appreciate the gentleman responding to my question because I have been puzzled how such an outrageous statement could be made.

Let me cite Indiana law under the statutes 29-5301, where it makes reference to the duties of the secretary of the state and the Governor in seating Congressmen. I will read from this statute, and I ask unanimous consent

that this entire statute be made as a part of the RECORD as extraneous to my remarks so everyone can see it.

The SPEAKER pro tempore. Without objection.

Mr. ALEXANDER. It says here that it is the duty of the secretary of state, as soon as he receives out of the certification from the various counties of the congressional district——

The SPEAKER pro tempore. The time of the gentleman from Arkansas [Mr. ALEXANDER] has expired.

Mr. WRIGHT. Mr. Speaker, I yield 30 additional seconds to the gentleman.

Mr. ALEXANDER. I thank the gentleman.

It is the duty of the secretary of state to certify the winner. The winner was Mr. McCloskey by 72 votes.

Mr. LUNGREN. Mr. Speaker, would the gentleman yield to explain his outrageous interpretation of the facts which are incorrect?

Mr. ALEXANDER. I do not yield. I do not have the time.

The statute goes on to say that the secretary of state does not have the right to refuse any of the certified votes that were sent to him by the various counties. Now, instead of certifying McCloskey, the secretary of state of Indiana calls for a recount, and he only recounts one county.

Mr. MICHEL. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. I thank the gentleman for yielding me this time.

Mr. Speaker, one of the things you learn in the law is that if you quote selectively from the law, you often make your case but you fool the people.

Mr. ALEXANDER. Here it is.

Mr. LUNGREN. The fact of the matter is, there is another section of the law which requires a 10-day period of time during which any miscalculation, arithmetic error, must be changed.

The clerk was required in that particular county by a judge to arithmetically determine the accuracy of the election night result as turned in. There was an error, and in fact it was not a recount, as the gentleman well knows. Because it is controlled by a different section of the code which refers to arithmetical error. No one has contested that they counted one number twice, which gave a wrong result. I am sure the gentleman is not suggesting that we ought to go with an arithmetic error.

What has happened is that the secretary of state followed the law, but he read both sections of the law, which the gentleman from Arkansas refuses to read.

Mr. ALEXANDER. I would like to reply to the gentleman if he would yield.

Mr. LUNGREN. He continues to read only one-half of the law.

Mr. MICHEL. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding me this time.

Mr. Speaker, it has been oft stated here that on election night there was some confusion around here. It seems that there is some confusion here yet, particularly in the mind of the gentleman from Arkansas.

I would warn people that I do not intend to yield any time today.

Mr. Speaker, Rick McIntyre was elected; he was certificated. His certificate was uncontested under our Federal Contested Elections Act. The gentleman from Arkansas alleges it was a bogus certification, and yet no contest was filed by Mr. McCloskey against that certification.

In addition, when excongressman McCloskey asked a Federal district court to seat him soley on the basis of his own press release, the court said he lost, and that his only recourse was to file a contest under the Federal Contested Elections Act. McCloskey did not, because he had no case. Instead he asked his friends to put him on the Federal payroll. His friends in this House promptly voted him a $75,000 annual salary.

The gentleman from Arkansas further stated that the secretary of state called for a recount.

The secretary of state did no such thing, of course.

Under Indiana law, recounts proceed in a normal way, at the request of the candidates.

That recount law, by the way, was enacted after Chambers versus Roush, just as our Federal Contested Elections Act was enacted after Chambers versus Roush. The principal element that makes the Chambers versus Roush an inappropriate precedent is that in that case there was a certification of one apparent winner by one secretary of state, and then a certification by another, of another winner. Indeed, there were also allegations of fraud in contests.

Chambers versus Roush is not a precedent for McIntyre. It is an excuse for this House's willful and arbitrary majority.

It is quite obvious that no matter how many precedents the gentleman from Arkansas can find for not seating people, he cannot find one that works for the McIntyre case. In place of precedent, the gentleman puts into the RECORD statements from the Library of Congress dealing with ancient history around here. He is welcome to put anything in the RECORD he chooses. I only wish more of it were germane to this issue.

What we are interested in today is justice, not what the rulings were under different laws in different circumstances in years gone by. The precedent is clear. We seat people with uncontested, unambiguous certificates until the House finds good reason to change that decision.

At least that's what we used to do, until the House majority decided, without responsible precedent, to pay two Congressmen and let neither vote, even though one was the certificated winner.

With respect to the recount, that was handled under the laws of the State of Indiana, and was handled correctly. The first election showed McIntyre the winner by a small vote. The recount, in which the recount commissioners were instructed by county judges, showed a greater McIntyre margin.

Now, since McCloskey was unable to make a contest in the normal way to the House Administration Committee, he came to the Congress where his friends on the majority side decided they would seat him notwithstanding the fact that his opponent, the Congressman-elect, was certificated.

Since then the majority has twice, by party line votes, refused to seat McIntyre.

But the worst outrage of all was that the majority has caused its friends on the House Administration Committee to invent a new set of rules for counting the votes in Indiana.

The House Administration Committee Task Force trashed the State law of Indiana. It absolutely disregarded it, and established a new standard, not based in House precedent.

Had there been a House precedent, there would have been a nice recount for our friend, Mr. HENDON of North Carolina. The gentleman from North Carolina has told the House about his case. If there was a precedent, he would have had a recount.

But, no, they would not recount his case. They had to wait to recount for one of their friends.

□ 1410

So we are now doing the second recount based on the House Administration majority rules, rigged in such a way to change the nature of that election. And that recount is proceeding very slowly. It is hard work. If any of you have been in recount proceedings before, you know very well that every vote is subject to close scrutiny. You win a few, you lose a few, and you simply do the job in the most careful manner you can.

My advice to that task force is not to hurry its work and to take its time. It must be sure it does the best it can, even though it starts from the false precedent of an invented rule which is different from Indiana law and different from the law under which every Member of this House from Indiana was elected.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. As I told the gentleman, I am not in the yielding business today.

The gentleman has broken my rhythm, for which I apologize.

The problem here is that the House is counting ballots on the basis of a false, and arbitrarily created, premise. From that miserable start, it is likely to come to the wrong conclusion. Even so, we should let it come to that conclusion deliberately, and let the task force take as long as is necessary to do a proper job.

However, while we wait for the task force to do that deliberate and careful job, there is absolutely no reason in the world other than partisan politics why we should not seat the duly elected, legally certificated member-elect from the Eighth District of Indiana.

To do any less makes this House look like the partisan playpen of an arrogant majority which refuses to recognize the will of the people of the Eighth District of Indiana.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield for the purpose of a unanimous-consent request?

Mr. WRIGHT. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Speaker, I rise to ask unanimous consent that the section of the law from the State of Indiana applying to the debate which we engaged in 1 minute ago concerning errors in certifications of votes of State elections be made a part of the RECORD so that the world can see the law.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Arkansas?

Mr. LUNGREN. Mr. Speaker, reserving the right to object, I would inquire of the gentleman from Arkansas as to whether that will include all sections of the code that are pertinent to this particular inquiry, including the section to which I referred a moment ago?

Mr. ALEXANDER. If the gentleman will yield, I would like to request section 29-5-306, Certification of the Secretary of State, section 29-5-307, Errors in Certification of Votes Corrections, which has to do with State elections, the gentleman's point, and section 29-5-309, Congressmen, all be made a part of the RECORD.

Mr. LUNGREN. Mr. Speaker, further reserving the right to object, I would yield to the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. I thank the gentleman for yielding.

PARLIAMENTARY INQUIRY

Mr. WRIGHT. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WRIGHT. Is all of this conversation coming off of our time?

The SPEAKER pro tempore. The Chair will advise the gentleman that in this instance the Chair will not deduct it from the gentleman's time.

Mr. WRIGHT. I thank the Chair.

Mr. MYERS of Indiana. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. Further reserving the right to object, I yield to the gentleman from Indiana.

Mr. MYERS of Indiana. Mr. Speaker, I asked for time a moment ago and was not recognized, but you must also include in the same Indiana election code section 3-1-26-7, which provides for a limitation of time when that certificate shall be issued. So you must include that in this. It is very important to this, because that is what Judge June Green, the Federal judge, held: that the Secretary of State could not issue that certificate anytime prior to 10 days, and after the 10 days when he was aware of an error, it would have been improper to issue that certificate.

Mr. LUNGREN. Mr. Speaker, further reserving the right to object, I would yield to the gentleman, and if he would accept that amendment, I would not object.

Mr. ALEXANDER. Is that the case that was decided in the District of Columbia?

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. LUNGREN. Mr. Speaker, I was stating that I would yield to the gentleman to find out whether he would accept that amendment, and through the language, I could not hear exactly what he said.

Mr. ALEXANDER. I accept the amendment to include all of the statutes of the State of Indiana relevant to this issue, which includes the ones I have cited, or any ones that the gentleman wishes to cite, so that the RECORD may be complete.

Mr. LUNGREN. Mr. Speaker, further reserving the right to object, does the gentleman specifically amend his request to include that section of the Indiana law that was referred to by the gentleman from Indiana [Mr. MYERS], that portion of the law to which the gentleman from Arkansas has been so blind in the past?

Mr. ALEXANDER. My request includes that portion of the law to which the gentleman from California refers.

Mr. LUNGREN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. MYERS of Indiana. Mr. Speaker, reserving the right to object, I am still not sure.

I am going to read just one very short paragraph that I ask to be included with yours, and that is section 3, which you did not cite, and I quote:

No certificate of election shall be issued until the ten (10) day period for the discovery and correction of errors has expired.

That was not in the sections that you cited.

Mr. ALEXANDER. If the gentleman from Indiana will look at the law, that provision is included as a part of the reference which I am trying to get included in the RECORD, and I have no objection.

Mr. MYERS of Indiana. With that inclusion, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The sections of the Indiana election law follow:

[Indiana Laws, statutes, etc.]

BURNS INDIANA STATUTES ANNOTATED

CODE EDITION—TITLES 1, 2, 3

3-1-26-6 [29-5306]. Certificate to secretary of state.—Clerks of the circuit courts, on the day succeeding the return day of such election, shall make out, in words, certified statements, officially sealed, of the number of votes given to each presidential elector, each person for United States senator, for representative in congress, for governor and lieutenant-governor, for judges of the Supreme, Appellate and circuit courts, clerk of the Supreme Court, reporter of the Supreme and Appellate Courts, attorney-general, prosecuting attorney, superintendent of public instruction, secretary of state [,] auditor, and treasurer of state, and for senator and representative in the general assembly, and shall send the same by registered mail, return receipt requested, to the secretary of state. [Acts 1945, ch. 208, § 319, p. 680.]

Compiler's Notes. The bracketed comma was inserted by the secretary of state.

The Appellate Court, referred to in this section, has been succeeded by the Court of Appeals. The judges of the Supreme Court and Court of Appeals are no longer subject to election but are voted on as to retention. See Const. Art. 7, § 11 and 33-2.1-2-6 (Burns' § 4-7716).

3-1-26-7 [29-5307]. Error in certification of vote—Correction.—Any error in the certification of the vote for any candidate at any general, special or city election discovered within ten [10] days after such certification shall be corrected by the clerk of the circuit court or the secretary of state, as the case may be, making such erroneous certification. Should the clerk of the circuit court or the secretary of state fail or refuse to correct such error, the duty to make the correction may be enforced by an action in mandamus brought by any duly qualified voter within five [5] days after the expiration of the ten [10] day period allowed for making such corrections. Such action shall be brought in the circuit or superior court of the county where the officer or board making the certification is domiciled.

No certificate of election shall be issued until the ten [10] day period for the discovery and correction of errors has expired. [Acts 1945, ch. 208, § 320, p. 680.]

Collateral References: The power of election officers to withdraw or change returns. 168 A. L. R. 855.

3-1-26-8 [29-5308]. Duties of secretary of state—Governor.—The secretary of state shall, in the presence of the governor, compare and estimate the number of votes cast for presidential electors, for judges of the Supreme and Appellate Courts, reporter of the Supreme and Appellate Courts, clerk of the Supreme Court, attorney-general, secretary, auditor and treasurer of state, and superintendent of public instruction, and certify to the governor the persons receiving the highest number of votes for such offices, and also compare and estimate the number of votes given for judges of the circuit court and prosecuting attorneys, and certify to the governor the persons having received the highest number of votes in their respective districts; and, at the expiration of the ten [10] day period allowed for the discovery and correction of errors, if none be found, the governor shall transmit, by mail, to such persons their commissions. [Acts 1945, ch. 208, § 321, p. 680.]

Compiler's Note. The Appellate Court, referred to in this section, has been succeeded by the Court of Appeals. See compiler's note to 3-1-26-6.

Opinions of Attorney-General. An officer, appointee, or employee of the executive branch of the state who was paid a salary from funds appropriated therefor could receive additional compensation for representing the governor or secretary of state in comparing and estimating votes cast at a general election, such additional compensation being chargeable either to the election expense appropriation or payable from the governor's contingency fund. 1954, No. 24, p. 86.

3-1-26-9 [29-5309]. Congressmen—Duties of secretary of state and governor.—The secretary of state as soon as he shall receive such certified statements, shall compare and estimate the votes given for United States senator and for representative in congress, and certify to the governor the persons having the highest number of votes as duly elected; and the governor shall give to each of the persons returned to him as aforesaid a certificate of his election, sealed with the seal, and attested by the secretary of state: Provided, That no return of any county which has come into his hands, and which has been duly authenticated by the clerk of the circuit court thereof, under seal, as hereinbefore provided shall be rejected by said secretary of state, but he shall estimate, aggregate and tabulate, and report to the governor the total number of votes cast in each county for each candidate for state office, supreme judge or other officer to be elected by all the voters of the state, and members of congress, as evidenced by the face of such returns so certified to him. [Acts 1945, ch. 208, § 322, p. 680.]

Mr. WRIGHT. Mr. Speaker, I yield 4 minutes to the gentleman from Indiana [Mr. SHARP].

Mr. SHARP. I thank the gentleman for yielding this time to me.

Mr. Speaker, our duty in this matter is not to make a personal choice.

Our duty is not to make a partisan choice.

Our duty is to determine who was the choice of the people of the Eighth Congressional District of Indiana.

How best can we fulfill that duty? How best can we determine the people's choice?

Some Members of the House have pleaded that the House should simply follow the election law of Indiana.

But the problem, Mr. Speaker, is that Indiana law cannot be simply understood or simply followed—not by election officials in Indiana and not by the U.S. House of Representatives.

The chief reason the House of Representatives is involved in this election dispute is because Indiana law and recounting practices did not give us a clear, timely result in which the people of the eighth district or the U.S. House of Representatives could have confidence.

Indiana law is regrettably unclear. Court interpretations of the law are contradictory. And Indiana officials do not apply the law uniformly.

On the technical issues involved in McCloskey-McIntyre dispute, one can find various and conflicting interpretations of Indiana law.

First, in January 1984, the Indiana Supreme Court adopted the most stringent view of the Indiana statute in the Schoffstall case.

Second, in the case before us today, each of the 15 recount commissions adopted its own interpretation of the law. And those interpretations conflict with one another.

Third, the Indiana House of Representatives, this year, in resolving two election disputes adopted a very broad interpretation of Indiana law.

Fourth, and even here in the U.S. House of Representatives, the Republicans urged the House Administration Committee to adopt yet another interpretation of Indiana for use in the recount that is now underway.

Those who wish to take up the lantern of Diogenes in search of clear guidance from Indiana law are doomed to a lifetime of frustration.

Indiana officials, Indiana news media, and Indiana citizens now know that Indiana law must be overhauled. In fact, the State Assembly of Indiana has begun to do just that.

If we cannot find certain guidance from Indiana law; we can nonetheless find guidance from basic principles of fairness, guidance from the precedents of this House; and guidance from the most common practice of the State of Indiana. Happily all three agree.

That guidance is summarized in the principle that when there is no fraud, all ballots should be counted where it is possible to know the intent of the voter.

In short, count all the ballots.

And this is the principle being followed by the Federal auditors who at this very moment are making the final count in Indiana.

Let me describe more simply the situation faced by the citizen of the eighth district.

Last year, on November 6, a citizen in Vanderburgh County made his choices for 17 public offices on a single ballot like this one.

That night, November 6, election officials counted his choice in determining who should be President of the United States; they counted his choice in determining who should be Governor of the State of Indiana; they counted his choice for county commissioner. They counted his choice for all 17 offices including the eighth district representative.

But weeks later, when the eighth district recount began, county officials—following their interpretation of the law—decided that our sample citizen's choice for Congress should not be counted. His choice should be ignored—because an election-day official had failed to follow technical directions of the law such as printing a precint number on this ballot.

The end result, Mr. Speaker, is that—

Indiana counted his choice for President;

Indiana counted his choice for Governor;

Indiana counted his choice for country commissioner.

But, Indiana refused to count his choice for Congress.

□ 1420

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. SHARP. Mr. Speaker, our sample citizen was not alone; the same thing happened to more than 5,000 citizens of the Eighth District. Their choices were counted for every other public office in Indiana but not for Congress.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. SHARP. Regular order, Mr. Speaker. May I please not be interrupted and be allowed to finish during my limited time here?

The SPEAKER pro tempore. The gentleman is absolutely correct.

Mr. SHARP. Mr. Speaker, let us see to it that all the ballots are counted.

If we do, we will be following basic principles of fairness;

We will be following the precedents of this House;

We will be doing what Indiana did last November in virtually every other election contest.

The SPEAKER pro tempore. The time of the gentleman from Indiana [Mr. SHARP] has expired.

Mr. MICHEL. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Speaker, my honorable colleague from the Second District of Indiana is just a little bit misleading in his remarks. I have great admiration and respect for him. However, I served in the Indiana General Assembly for a period of over 16 years, and I just recently talked to

the speaker of the house and the president pro tempore of the Senate, as well as the chairmen of both the election committees of those bodies, and they told me there is no anticipated election reform taking place, and for you to indicate, I say to the gentleman from Indiana [Mr. SHARP], that there is pending legislation that is going to change the election laws of the State of Indiana, I think is just not well founded.

Mr. SHARP. Mr. Speaker, will the gentleman yield to me?

Mr. BURTON of Indiana. Well, the gentleman would not yield to me.

Mr. SHARP. Mr. Speaker, the gentleman used my name and has criticized my statement.

Mr. BURTON of Indiana. I will yield at the conclusion of my remarks if I have time.

Mr. Speaker, I would further like to say that there are just a few things that we ought to make very clear here today. I think they have probably been made clear before, but I want to go over them just one more time.

First of all, 550,000 people in the State of Indiana here in the first part of April still are not represented, even though there has been a declared winner, there have been no allegations of fraud, there has been a recount, and that declared winner has been reaffirmed as the winner by 418 votes.

The allegation or the question of the votes being thrown out has also been brought up time and again, and I would like to say that 93 percent of the ballots that were disallowed were disallowed by recount commissioners that were Democrats, in those counties that were controlled by Democrat recount commissioners. Sixty percent of the counties in the State of Indiana or in the Eighth Congressional District were controlled by Democrat recount commissions, and when you start asking for this House to take control away from the State of Indiana after there has been a duly certified winner and a duly certified recount and your party has had more input than any other party, then I think it is totally unrealistic to think they are going to get a fairer count in this body than they got in the State of Indiana.

Mr. SHARP. Mr. Speaker, will the gentleman yield?

Mr. BURTON of Indiana. I yield now to the gentleman from Indiana.

Mr. SHARP. Mr. Speaker, I hope the gentleman knows that the State of Indiana has in one chamber passed a new election law.

The SPEAKER pro tempore. The time of the gentleman from Indiana [Mr. BURTON] has expired.

Mr. WRIGHT. Mr. Speaker, I yield 2 minutes to the gentleman from the District of Columbia [Mr. FAUNTROY].

Mr. FAUNTROY. Mr. Speaker, I received today a "Dear Colleague" letter from the distinguished minority leader and the distinguished minority whip raising the question of taxation without representation and sending along a tea bag to symbolize that great moment in our Nation's history.

We have heard a series of 1-minute speeches on how 500,000 citizens have been denied for 3 months voting representation in this House. The gentleman now knows that over 700,000 peopled have been denied that right for 200 years, and I certainly remember, looking back on the debate of 1978 when we had an opportunity to correct that historic wrong, that the gentleman from Mississippi [Mr. LOTT] and the gentleman from Illinois [Mr. MICHEL] voted against it. Now, if their minds have changed on this question, I certainly want to provide them the tea bags to help them get that amendment ratified.

In the meantime, let me say that I want to join the gentleman in calling for the citizens of the Eighth District to be freed from paying taxes until they are represented, but I ask that the same be done for the citizens of this Nation in the District of Columbia who pay more in Federal taxes than the citizens of any State of this Union save one. I want to say for the citizens of the District of Columbia, who have given more in lives per capita for the defense of this country than any State in this Union, that we, too, would like to be freed of the burden of paying more per capita in Federal taxes than any single citizen in any State in this Union.

Therefore, Mr. Speaker, as soon as I leave this well I am going to put in the hopper this bill that would do for the citizens of the District of Columbia what the gentleman from Illinois [Mr. MICHEL] would do for the citizens of the Eighth District of Indiana. I hope he will join me, because we pay far more in taxes than the citizens of the Eighth District; not only that, but we have been denied representation for over 200 years in the U.S. House of Representatives.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. FAUNTROY. I am happy to yield to the gentleman from Arkansas.

Mr. ALEXANDER. Mr. Speaker, I appreciate the gentleman's yielding.

I will cosponsor the gentleman's bill, and further, I ask unanimous consent that House bill 16-70 of the Indiana General Assembly, passed by a vote of 90-6, section 7 concerning the election code, be included as a part of my remarks and as extraneous matter in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. WALKER. Mr. Speaker, reserving the right to object, can the gentleman tell us just what this particular bill is about?

Mr. ALEXANDER. Yes. Mr. Speaker, if the gentleman will yield, the bill adds to section 7 the provisions which state that the Indiana Code shall have a new section to read as follows:

Section 18(a). If a recount is done under this chapter, the recount commission shall attempt to determine the voter's intent. In the absence of fraud, the voter's intent must be the final determination in counting the ballots notwithstanding any provisions of this chapter regardless of signatures, seals, initials, precedents, et cetera.

It is an attempt to clarify the law in the State of Indiana which permits the debate in the House today.

Mr. WALKER. Mr. Speaker, further reserving the right to object, I guess the gentleman can put this in if he wants, but it has absolutely nothing to do with the count on election night because, as I understand it, it adds a section to the recount code, and it still requires the fact that you have to have initials on the ballot in order for it to be counted under Indiana law, which is exactly one of the things which is in dispute with regard to the rules that have been developed by the task force here in the House of Representatives.

Mr. Speaker, further reserving the right to object, I yield to the gentleman from California [Mr. BADHAM].

Mr. FAUNTROY. Mr. Speaker, the gentleman does not have the time. I have the time, do I not?

The SPEAKER pro tempore. The gentleman from Pennsylvania has reserved the right to object.

Mr. WALKER. I reserve the right to object, and I yield to the gentleman from California.

Mr. BADHAM. Mr. Speaker, I thank the gentleman for yielding to me under his reservation.

Would it not appear to the gentleman from Pennsylvania that this is a piece of legislation that has been introduced? I mean it is not legislation. It is a bill that has been introduced in the State legislature, is it not?

Mr. WALKER. That is my understanding. I suppose if the gentleman from Arkansas wants to put such a piece of legislation in the RECORD, he could do that. I would be glad to yield to the gentleman from Indiana if he can clarify this or I would yield further to the gentleman from California if he can clarify it.

Mr. BADHAM. Mr. Speaker, if that is the case—and I imagine that will be either affirmed or denied—if that is the case, it is striking, do you not think, that here we have a proposed statute in the State of Indiana which apparently has no relationship to the State of North Carolina whatsoever where the elections commission in Indiana will by proposal be able to look into the minds and understand and try to delineate the thinking going through a voter's mind when he casts

a ballot? Now, we all know, in the case of North Carolina with Mr. HENDON, do we not, that we cannot, either in the Congress or in the courts or in North Carolina's Legislature, go behind the ballot itself and look into the intent of the voter? Is that not the gentleman's understanding?

□ 1430

Mr. WALKER. I would say to the gentleman, that is my understanding of what the House Administration Committee rule in the last Congress was; but, of course, that was the last Congress. This is now the new Congress and we have a different set of language that we want to introduce into the RECORD to make the case that the Democrats are trying to make in this Congress, having made a totally different case in the last Congress. We all understand what is going on around here.

Mr. BADHAM. Mr. Speaker, will the gentleman continue to yield?

Mr. WALKER. I would be glad to yield to the gentleman from California.

Mr. ALEXANDER. Mr. Speaker, in pursuit of my unanimous-consent request——

Mr. WALKER. Mr. Speaker, I have reserved the right to object.

The SPEAKER pro tempore. The gentleman from the District of Columbia had the time and the gentleman from Arkansas made a unanimous-consent request and the gentleman from Pennsylvania has reserved the right to object to the unanimous-consent request of the gentleman from Arkansas.

Mr. WALKER. Yes. I have reserved the right to object. We are trying to figure out just what it is the gentleman from Arkansas wants to include in the RECORD at this point.

The gentleman from Texas had indicated to me that he wanted me to yield to him.

Mr. ALEXANDER. Mr. Speaker, since we have already read the part of the bill that I wanted to be included in the RECORD, which is a part of this debate, I withdraw my request.

The SPEAKER pro tempore. The gentleman from Arkansas withdraws his request.

The time of the gentleman from the District of Columbia has expired.

Mr. FAUNTROY. Mr. Speaker, may I have 30 additional seconds?

Mr. WRIGHT. Mr. Speaker, I yield 30 additional seconds to the gentleman.

Mr. FAUNTROY. Mr. Speaker, I hated to yield a second of my time, inasmuch as for a lifetime I have been denied representation, as have 700,000 people; but I want to thank the gentleman for joining in this resolution.

I offer the same privilege to the distinguished minority leader, to join in this resolution to exempt the citizens of the District of Columbia from taxation until we get representation in this House and in the Senate.

Mr. WRIGHT. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. FRANK] for purposes of debate.

Mr. FRANK. Mr. Speaker, I thank the gentleman for yielding.

I am sorry that my friends on the other side have been in an unyielding mood. I tried to have a little conversation and I got accused of being a rhythm disrupter, so I am sorry we cannot discuss these things more back and forth.

I did want to comment on what my friend, the gentleman from California [Mr. LUNGREN] had to say about the question of the burden of proof. The burden of proof seems to me a rather peculiar concept in here, to the extent that the gentleman is upset because the burden of proof statute was not invoked. I think that is a good idea, because we have asked people to do a recount. I do not know how you do a recount with the burden of proof. If you have a recount and people have been told to recount the votes, is the burden of proof like a point spread? I mean, does the burden of proof mean you have to win by 15 or more?

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. FRANK. No, I will not yield to the gentleman, as he did not yield to me or anyone else. I asked the gentleman to yield and he would not yield to the gentleman from Arkansas; twice he refused to yield. We have to play this one both ways, gentlemen. The gentleman has not been yielding.

Mr. Speaker, I ask for regular order. I will be glad to yield when I am yielded to.

The point is this. The burden of proof statute seems to me to be a wholly inappropriate one, as the example of the elephant's stick which was wielded on the other side. The elephant's stick, I have said it before, is the guy walking around DuPont Circle and he has got a big stick. Somebody says, "What have you got the stick for?"

He says, "To keep away the elephants."

He is told there are no elephants in DuPont Circle.

He says, "Aha, the stick worked."

People on the other side who do not want to talk about the budget or anything like that, because they have problems, want to convince people that they are preventing us from doing something we never intended to do, steal an election. No one intended to steal an election.

The gentleman from Minnesota, who would not yield, said before that we were trying to seat our friend. No one here has moved to seat either party, because many of us are convinced that we do not honestly know now, in all the confusion that has been amply documented with bipartisan participation today, who won; so we said to the General Accounting Office, "Go count the votes."

So the gentleman from California says, "Where is the burden of proof?"

Well, what is the burden of proof when you count the votes? So you say, "We count these five legitimately—burden of proof, you get the sixth?"

I do not understand what the concept of the burden of proof meant. I hope the gentleman will get his own time from his own side. I would have asked him before, but I could not get the time from him, if he will get his own time and explain it to me. I want to know how the burden of proof helps us count votes.

Mr. MICHEL. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. Mr. Speaker, I am sorry the gentleman did not yield after using my name, but I understand that he did not have enough time.

The fact of the matter is, what we are talking about here is the procedure of the House. Mr. McIntyre is the certified winner from the State of Indiana. We have had gentlemen in the well from the State of Indiana who are seated here because of the certification that they had that stands in the same status as the gentleman from the Eighth District, Mr. McIntyre.

When one seeks to contest such a certification, one has the burden of proof. There is a prima facie winner. That decision was made by this Congress in 1969. We argued all this back in 1969. At that point in time, the public policy was established. The prima facie winner, the one who received the certification, is to be seated. If there is a contest, that contest is to go forward and if it proves at the end of that contest that in fact a different result should ensue, then a new person is seated.

The question I keep asking and asking and asking in vain of my colleagues on the other side is, why if we establish that as the general principle, has an extraordinary alternative been presented on this floor?

All I can say is that the basketball team, the players, and the coach of Georgetown University, should certainly wish that they could come here, because they lost by two points last night. Perhaps they should come here and ask for another game or another 5 minutes. They could then keep playing until finally at some point in time they would find themselves ahead and then they could call the game. That is what is happening here.

We have rules that have been established in statute for us to follow. We did not follow those rules. We then had rules that were established here after the fact of the rejection of the

person who should have been seated and these were fashioned on a 2-to-1 vote every single time. That does not sound quite like fairness.

If you ask about the burden of proof, it seems to me the gentleman knows exactly what it is I am talking about.

Mr. MICHEL. Mr. Speaker, I yield the balance of the time on our side, which I assume is 5 minutes, to the gentleman from California [Mr. THOMAS], who knows more about this subject than anybody else, having dealt with it from day one and having just returned from that partial recount.

Mr. THOMAS of California. Mr. Speaker, I thank the distinguished gentleman from Illinois, the minority leader, for yielding the time.

This gentleman from California appreciated some of the debate today. It has been lively, but not very enlightening. We have been speaking on a number of points, very few of which pertain directly to the issue we have in front of us.

On January 3 the majority leader said on the floor of this House in regard to the Indiana Eighth Congressional District that quote "election procedures have been neither timely nor regular and serious question have been raised as to their fairness."

I hope that you folks on the majority side of the aisle listened to the gentleman from North Carolina [Mr. HENDON] about his race in 1982, about the question of basic fairness, because I think some of you do not understand the depths of the feeling on this side of the aisle. It comes to some of us that if you cannot even win when you win, why in the world should we participate in any kind of a reasonable or orderly procedure in this House?

Where were you in 1982 when the Court said the procedures were unconstitutional, but you went ahead and seated the other fellow anyway?

What we have in the Eighth District in Indiana, despite the statements by some of the Members on the majority side, is a certificate that has never been challenged. It was not challenged under our Federal law. It was challenged by virtue of his cronies voting a straight partisan majority to send it to House Administration. That is how it was challenged. That is not a bogus certificate.

We have seen from the beginning an attempt to characterize Indiana's ballot authentication procedures as unique, complicated, and difficult. They are not that much unique from any other State.

As a matter of fact, I finally received from the Congressional Research Service, Library of Congress, dated March 21, a State ballot authentication provision going down State by State indicating those States that have authentication procedures similar to Indiana. There are 15. I would invite the attention of Members especially to the one involving the State of Arkansas, dealing with initials, dealing with the initialing of ballots in current law, backed up by case law in Arkansas, about whether or not those particular ballots should be counted in a recount.

Let us make no mistake.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. THOMAS of California. I will not yield and Mr. Speaker, I will not yield to anyone as I continue.

The task force's conclusion to write its own counting rules without holding hearings, without investigating the scope or the impact of the action, is not evidence that the majority is fair. It is not evidence that the majority is following its constitutional duties. It is simply an indication that it had to create its own counting rules, because after all, under Indiana law Mr. McIntyre had already won twice.

□ 1440

We have heard the task force's procedures as being characterized as somewhat judicial in nature, that it is our goal as a task force to function as a judge, to be the judiciary. We have heard reference to the GAO counting procedures.

Let us make one thing clear. The GAO is not there as it usually is, as an independent agency that is going to issue a report upon its findings. The GAO are auditors there, hired under task force administration money to count the votes according to the 2-to-1 majority vote as to what the procedures ought to be. And it ain't the GAO you and I know. It is the GAO under cover of the majority's partisan decision on rulemaking.

Let us talk about how this task force acting as a judicial body works. The task force finally went to Indiana last Friday. We reduced our judgment on two distinguishing mark ballots.

Now, we went through the procedure of marking the ballots so we did not know which candidate was voted for on the ballot. As we were ready to make our decisions, we did not have any black robes, but ready to make our decision as to how we were going to judge, count or not count, guess what? The staff and the supervisor said, "One of these ballots is for McIntyre, one of them is for McCloskey. Now go ahead and make your decision."

Is that what is called a judicial procedure in terms of rendering decisions on these ballots? That is what is going on in the task force, make no mistake; by a straight party vote, by pure partisanship this question was sent to House Administration. On a straight party vote, rules, especially the most critical rules on counting ballots as to whether or not you back up Indiana law was passed.

And make sure of it, sooner or later, as we examine those votes, not all of the votes are going to be counted, not even under task force rules. Count all the votes is political rhetoric. What is going to happen is most of the votes are going to be counted, just as they were on election day. And all of the arguments about what happened on the recount is smoke and nothing but smoke.

You examine the total number of ballots that are going to be counted under task force procedures and compare them with the election night.

Election night was fair. Rick McIntyre won and he should be seated.

Mr. WRIGHT. Mr. Speaker, I yield myself the remaining time. In closing this debate, I hope that we shall not again have to address the procedures through yet another needless vote until we shall have a completed count in our honest and earnest effort to learn who the true victor was.

With respect to the statement made by the gentleman who just preceded me, I respectfully suggest that surely fair minded people realize that the House has not been proceeding in a partisan manner. Just stop and think for a moment. If a straight-party line vote was all that mattered, we easily could have seated Mr. McCloskey, but we did not choose to do that. We chose, instead, to determine first by an honest recount who the winner was once all of the votes were counted. And we pledged at that time, and have renewed that pledge, that whoever the winner is will be seated.

Now, that is not a partisan decision. That is a decision based on the most fundamental, the most basic element of democracy, the right of every citizen to vote and the right of every voter to have his or her vote counted. That is what is at issue here.

I have gone through the process of briefing a long history of election contests. There have been numerous cases in which the House has exercised its responsibility to ascertain the true winner. Never have I discovered a single case in which there was such a prolonged rhetorical orgy on the part of one political party. Today in 1 minute speeches Members of the Republican freshman class took practically an hour just to make speeches to sell their point of view. Some of those speeches, like the florid press releases which have attended these utterances, fairly bristled with rank allegations of bad faith on the part of the House majority. This is particularly regrettable since it is not merely a political party but our institution itself which suffers from these overblown allegations.

Now, let us get away from all of the emotionalism, if you will, and examine the facts. First, it has been said, and wrongly so, that never before has the House set aside certification of a State

in choosing which of two claimants to seat. And that just is not true.

There is a long, long series of precedents going back to the 36th Congress in 1861 in which the Committee on Elections did exactly that. In the 40th Congress in 1867, in the case of Chavez against Cheever in New Mexico, the House did exactly that. It set aside both claimants, seating neither, until a recount could be determined to satisfy which was the winner in the contest to represent that territory as a Delegate.

Again in 1871 the House referred credentials of Members-elect to such a committee for investigation and recommended action based on congressional inquiry.

Again in 1877 the House challenged the credentials of a Member-elect who carried with him a certificate from his State and was, therefore, the prima facie winner. But the House was not satisfied until it had rendered its own impartial investigation.

Again in the case of Chalmers against Manning in 1884, the House refused to administer the oath to a person claiming to be a Member while the House was investigating.

As recently as 1934, arising from a Louisiana contest, one claimant had a certificate of election from the Governor of the State of Louisiana, but he was not seated until the House could discharge its constitutional responsibility to judge the election.

That is an unbroken chain of precedents. Nobody ever before has questioned this right and responsibility of the House, save those present Members on the Republican side who brought this case to court, seeking a mandamus to order the elected leaders of the House to administer the oath to Mr. McIntyre while the official recount is in progress. The court properly ruled that the arguments of the claimants had absolutely no validity. There was nothing whatsoever to justify a court case challenging the right and, indeed, the responsibility of the House of Representatives to determine the winner by our own orderly processes.

What is, then, the basic issue at stake? The basic issue is quite clearly whether voters are to be permitted to have their votes counted, or whether they are to be disfranchised.

There were in this instance as many as 5,000 voters in Indiana whose votes were arbitrarily cast aside, though many of them were counted in other electoral contests, and not permitted to be counted in this particular race. Is that not an irregularity? Is that not something of which this House should take cognizance? Is not this disfranchising of 5,000 qualified citizens of a State something in which we should have an interest?

It is apparently all right with the people in Indiana for us to insist that all their votes be counted. Despite the comment by the gentleman from Minnesota, Mr. FRENZEL, that we "rigged" the rules, the Louisville Courier Journal on March 13 stated that the recount rules for Indiana's race looked fair. As early as last December the Evansville Press said that "the 8th District recount involves a sorry spectacle of disenfranchising hundreds of voters by throwing out their ballots because they were not initialed by pollworkers." The editorial said "there is every possibility that the U.S. House of Representatives alone will decide," and went on to say "the House will be handed this opportunity primarily because local, officials blew it. The different recount rules employed from one county to the next, and the delayed certification of a winner for reasons which seem suspiciously political," said the Evansville Press, "beckon for a higher authority to make the call."

So that is what the Congress is doing. In an unbroken chain of constitutional precedents, recounted in Deschler's Precedents, it has been clear for all of the years that the principal, overriding consideration is not what some State official certifies. The principal, overriding consideration is what the voters themselves determine. The principal consideration in evaluating a ballot is the voters' intent. That has been true from the days of Waggonner versus Russell, 34 Nebraska, 116 Northwestern Reporter. It has been true in the case of McCrary where it is held "acts of election officials are merely directory, and the voters will not be disfranchised for failure of these officials to perform their duty." And again in Cannon's Precedents, "the House of Representatives should not consider itself obligated to follow" a West Virginia statute, but should "retain the discretionary right to follow the rule of endeavoring to discover the clear intention of the voter."

□ 1450

In case after case after case in constitutional law, the overriding, guiding principle has been that very one. That principle was followed by the Indiana Legislature itself in January.

The House of Representatives of the State Legislature in Indiana on January 7, 1985, in a case in which it assumed the responsibility of being the judge of elections of its members, held precisely as we have held in this case: That the overriding concern must be not the technicality of a law which permits the invalidating of a ballot because of some failure of an election official to inscribe his initials on it, but rather the intent of the voter wherever that is clear.

On that day the Indiana State Legislature applied the same identical principle that we have applied here to determine who the winner was, and in that case, the case of French versus Hibner, the vote was overwhelming in the Republican-controlled Indiana State Legislature.

So it is not a question of Republicans versus Democrats; it is a question of whether the people of the United States, whether they live in North Carolina or in Indiana; whether they live in Texas or in New York or Massachusetts, shall have their votes counted.

We say they shall, however those votes may fall, whoever the victor may be, let them fall where they will.

So that is our role; not to determine who we think the winner ought to have been, but rather to determine as the Constitution of the United States confers upon us the obligation to do what the voters themselves intended. So let there be an end to these ridiculous charges and aspersions of impure motive. I assure you on both sides of the aisle that when that nonpartisan, unbiased, frank and fair recount has been completed, we will move to seat whomever the victor may be, be he Republican or Democrat, and that ought to be the guiding goal of us all.

The SPEAKER pro tempore. The time of the gentleman has expired.

All time has expired.

Without objection, the previous question is ordered on the motion to refer.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to refer offered by the gentleman from Texas [Mr. WRIGHT].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LUNGREN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 241, nays 183, answered "present," 1, not voting, 7, as follows:

ANSWERED "PRESENT"—1

Panetta

NOT VOTING—7

Bonker	Dornan (CA)	Yates
Brooks	Hartnett	
Cheney	Weber	

□ 1500

The Clerk announced the following pairs:

On this vote:

Mr. BONKER for, with Mr. CHENEY against.

Mr. YATES for, with Mr. HARTNETT against.

Mr. BROOKS for, with Mr. DORNAN of California against.

Mr. WHITTEN changed his vote from "nay" to "yea."

So the motion to refer was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1510

CONFERENCE REPORT ON H.R. 1239, URGENT SUPPLEMENTAL FOR FAMINE RELIEF AND RECOVERY IN AFRICA

Mr. WHITTEN. Mr. Speaker, I call up the conference report on the bill (H.R. 1239) making urgent supplemental appropriations for the fiscal year ending September 30, 1985, for emergency famine relief and recovery in Africa, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore [Mr. BROWN of California]. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of March 27, 1985, at page 6467).

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] will be recognized for 30 minutes, and the gentleman from California [Mr. LEWIS] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi [Mr. WHITTEN].

GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill, H.R. 1239, and that I may include extraneous and tabular matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

URGENT SUPPLEMENTAL APPROPRIATION FOR FAMINE RELIEF AND RECOVERY IN AFRICA

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I bring you now the conference report on H.R. 1239 which will provide food for the starving people of Ethiopia and other countries in Africa in the amount of $400 million under Public Law 480, $137,500,000 for international disaster assistance, $25 million for emergency migration and refugee assistance, and $12,500,000 for the regular program of migration and refugee assistance. The agreement also includes an emergency reserve of $225 million for Public Law 480 and provides for the use of up to 200,000 metric tons of food under section 416.

Many of my colleagues have sponsored legislation leading to this action, notably SILVIO CONTE, TED WEISS, HOWARD WOLPE, MICKEY LELAND, and MARGE ROUKEMA.

The following conferees signed this conference report:

For the House: JAMIE L. WHITTEN, WILLIAM H. NATCHER, DAVID R. OBEY, BOB TRAXLER, MATTHEW F. MCHUGH, SILVIO O. CONTE, JACK F. KEMP, and VIRGINIA SMITH.

For the Senate: MARK O. HATFIELD, TED STEVENS, THAD COCHRAN, BOB KASTEN, JOHN C. STENNIS, and DANIEL K. INOUYE.

Mr. Speaker, it is a great deed we do here, but perhaps even greater, we have the food to provide. May I point out if present farm policies are followed in the future, it is likely we won't have surplus food. For today, Mr. Speaker, our Government is following a policy of attempting to obtain farm commodity prices by creating scarcity. Instead of capitalizing on our tremendous capacity to produce food, our greatest advantage over Russia, we called on our farmers to reduce the production of food and fiber, in an effort to increase price.

Claiming we had a surplus, upon finding out we did not, we actually had to call on farmers, the caretakers of our soil and natural resources, to produce to pay themselves in kind for not producing, a losing proposition for both the Government and the farmer.

The facts are that by our refusal to sell competitively and by cutting back production, our Government gave 11 percent of our production base to our competitors overseas. They increased their production by the amount we reduced ours. We lost 11 percent of the dollars we would have had to help our balance of trade.

Mr. Speaker, there is no question that the bankruptcy facing American farmers was largely caused by embargoing the farmer's exports as a part of our foreign policy. During the 1970's and again in 1980, farmers faced the following export restrictions:

RECENT EMBARGOES

1973 OILSEED EMBARGO

An embargo was placed on shipments of oilseeds from the United States to all destinations in the summer of 1973. Authority for the embargo stemmed from the Export Administration Act of 1969. Among the commodities affected by the export restrictions were soybeans and cottonseeds. Also limited were shipments of oilseed products including soybean meal, cake, and oil and cottonseed meal, cake, and oil.

1974 EXPORT SALES SUSPENSION

Actions taken in 1974 to limit U.S. export sales were not technically an embargo. The U.S. Government requested private U.S. grain firms to voluntarily restrain sales and the Soviet Union to limit U.S. purchases in response to short U.S. supplies. Commodities affected by the restraints included wheat and corn.

1975 EXPORT SUSPENSIONS

The export restrictions imposed in 1975 were similar to those in 1974. The U.S. Government requested voluntary restraints on sales to the Soviet Union and later, to Poland. Commodities affected by the restraints were wheat and coarse grains.

1980 SOVIET EMBARGO

The 1980 embargo was intended to indicate U.S. disapproval of the Soviet invasion of Afghanistan in December 1979. On January 4, 1980, President Carter announced a suspension of sales to the Soviet Union and subsequently instructed appropriate officials to terminate sales under the Export Administration Act on January 7. Agricultural commodities affected by the embargo were exports of wheat, feed grains, soybeans, animal feeds, meat, poultry, dairy products, and some animal fats. Exempt from the restrictions were 8.0 million tons of wheat and corn covered by the U.S.-U.S.S.R. Grain Agreement. The embargo remained in effect until April 24, 1981.

As evidence that these actions were wrong, the administration has stated:

First, no restrictions will be imposed on future exports of farm products because of rising domestic prices.

Second, farm exports will not be used as an instrument of foreign policy except in extreme situations and as part of a broader embargo.

Third, world markets must be freed of trade barriers and unfair trade practices.

The Congress has also enacted legislation which provides that in the future, if the export of agricultural commodities is suspended or restricted for reasons of national security or foreign policy, farmers shall be compensated by the U.S. Government for their losses based on a formula specified in the law (7 U.S.C. 1736j).

It is noted that, with regard to the embargo on sales to the Soviet Union, the middle-man, who sold agricultural commodities to the Soviet Union and was denied the right to deliver, was reimbursed for his contract losses by the Government. Yet, the farm producer, who was out the cost of his production, got nothing.

In the mid-1930's, the Commodity Credit Corporation, now a $25 billion corporation, was set up to support farm income, to keep a balance between labor, industry, and agriculture, to offset increasing costs, to sell competitively in world trade, and to keep up volume. For years, this worked.

Now, our Government refuses to use this Corporation. We are the only government in the world which does not sell what it has and does not need for what it will bring in world markets.

Over the last 25 years, industry and labor's share of the consumer dollar for food and fiber has increased from 49 percent to 73 percent—leaving the farmer's share, who has to buy from industry and labor at their prices, reduced from 51 percent to 27 percent—and they say: "Let him get by on that."

Mr. Speaker, he cannot.

Today, Mr. Speaker, the farmers owe $212,000,000,000 largely as a result of his Government embargoing his exports, and his Government refusing to use the proven vehicle, CCC, to sell his product to a hungry and needy world. Bankruptcies are common, suicides are numerous because of the erroneous policy we have followed.

H.R. 1189

Mr. Speaker, as a companion bill to the conference report which is before us, I introduced H.R. 1189. This bill has been considered in tandem with H.R. 1239. This bill directs the Department of Agriculture to use guarantees along with other means to keep farmers farming while we correct this erroneous government policy.

This bill passed the House on February 28, 1985, by a vote of 294 to 115. The Senate has not yet acted on the bill so we did not get it to conference along with H.R. 1239.

The conferees did agree unanimously to the following language in the statement of the managers:

The conference agreement has not included H.R. 1189 as an amendment. The conferees do expect H.R. 1189 to be considered during April 1985, and the Department of Agriculture, in the meantime, is to proceed with applications and actions to be ready to use the existing guarantee authority during the month of April.

Mr. Speaker, by all means we must continue to be a land of plenty and quit trying to be a land a scarcity.

Declining farm income led off the Great Depression. Let us guard against another.

I trust we may have your continuing support of H.R. 1189 when we return here on April 15.

H.R. 1189 provides:

$1 billion in additional funds for Farmers Home Administration [FmHA] guaranteed operating loans, and would call for a moratorium on repayment of principal and interest in order to prevent foreclosure. Loans would be limited to farm producers who have been engaged in farming operations for at least 5 years and whose total indebtedness exceeds three-fourths of the value of the farm and equipment, or equipment if renting the land, and loans could not exceed $750,000. Loans would be made by banks or other financial institutions, and would be repaid by the borrower.

The bill would provide $17 million for FmHA staff to conduct the program and $500,000 for the Economic Research Service to study how much existing farm debt was caused as a result of embargoes on the sale of U.S. agricultural products and the failure to offer for sale in world markets commodities surplus to domestic needs at competitive prices. The bill also directs the Small Business Administration [SBA] to use loan guarantee authority, as authorized by law, to restructure existing loans to farmers.

Mr. Speaker, I ask that all Members support the conference report on the Emergency Supplemental for Africa, as well as the conference report on H.R. 1189, after the Senate has completed its action, when we have that before the House soon after we return on April 15.

The SPEAKER pro tempore. The gentleman from Mississippi [Mr. WHITTEN] has consumed 9 minutes.

Mr. LEWIS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1239, the African Famine Relief and Recovery Act of 1985, the conference report that is before us today.

Mr. Speaker, the nations of Africa face a crisis that, thank the Lord, the world comes upon rarely, but when it does occur the world must respond with the sort of heart that reflects the history of the American people. The enactment of this legislation will enable the United States to provide 800 million dollars' worth of food and nonfood aid to 7 to 10 million people in dire need of our assistance.

Mr. Speaker, I yield such time as he may consume to my ranking member, the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the conference report to accompany H.R.

1239, the bill making urgent supplemental appropriations for emergency famine relief and recovery in Africa.

Together with the gentleman from New York [Mr. WEISS], the gentleman from Michigan [Mr. WOLPE], the gentleman from Texas [Mr. LELAND], and the gentlewoman from New Jersey [Mrs. ROUKEMA], I have worked for the past 4 months to develop a responsible emergency African relief package. With the leadership provided by the distinguished chairman of the committee, Mr. WHITTEN, and the critical assistance provided by the gentleman from Wisconsin [Mr. OBEY], the gentleman from New York [Mr. KEMP], and the gentlewoman from Nebraska [Mrs. SMITH], we have before us a responsible agreement making a U.S. commitment for relief. I am pleased to support the compromise which all of my fellow House conferees have worked out with the other body. And I urge the support of my colleagues for this agreement.

The enactment of this legislation will enable the United States to provide 800 million dollars' worth of food and nonfood aid to 7 to 10 million people in dire need of our assistance.

I would like to point out to any of my colleagues who may have questions or concerns with regard to the farm credit legislation that this conference agreement makes no provision for emergency farm credit. The $1 billion loan guarantee appropriation bill approved by the House on February 28 is under consideration in the other body. It has not been included in the conference agreement on the Africa relief supplemental which we now consider.

Let me take just a moment to explain the details of the agreements which we have reached on this supplemental with respect to food aid.

For the Public Law 480 title II Food Donation Program, the conferees have agreed to provide $400 million. This compares with the administration's request for $201 million, the House-passed level of $600 million, and the level of $285 million as passed by the other body.

Of this $400 million, we have agreed to appropriate $384 million, and make $16 million available from unobligated balances in the Commodity Credit Corporation. The $400 million total is to remain available throughout calendar year 1985; that is, until December 31, 1985. We have extended the availability of these funds for 3 additional months to provide AID and USDA with the necessary authority to deliver the food as swiftly as possible by the end of this calendar year. Conference report language states that it is our intention that the commodities be delivered—not simply committed—to Africa by December 31, 1985.

Our agreement also includes the House language providing that funds, not to exceed $100 million, shall be available for inland transportation with the certification of the AID Administrator that this money is needed to prevent starvation or unacceptable levels of loss or spoilage. We have retained this language because we believe that as much as $60 million, in addition to the $40 million requested by the administration, will be needed for inland transport.

While the conferees have agreed to delete the $120 million competitive sale or barter program which was included in the House-passed bill, we have retained the $225 million Public Law 480 title II emergency reserve fund. This fund contains $225 million, which is to remain available to the President through fiscal year 1986. To tap into this reserve, and make any of the funds available for additional emergency relief, the President simply needs to certify that the use of such funds is essential to famine relief in Africa.

In a statement of administration policy dated March 28, 1985, with regard to this requirement, it is stated that, "As required by title II of the bill, the administration will ensure that no funds are obligated that cannot be used effectively."

Finally, in addition to all of the assistance which I have just described, the conferees have agreed to provide 200,000 metric tons of wheat and dairy products acquired by the CCC through its price support operations. Through this section 416 program, commodities are to be made available to private voluntary organizations for donation through calendar year 1985. Fifty percent of these commodities are to be in the form of wheat or wheat products.

In order to address the concerns which we all share on the need that these commodities be distributed as rapidly and effectively as possible to the people of Ethiopia, we have also included language to prevent the Government of Ethiopia from gaining control of donated foods through seizure of commodities donated by the United States. We require that the Secretary of Agriculture certify to appropriate committees of the Congress that the commodities shall not be distributed through or otherwise be allowed to come under the control of the Ethiopian Government.

We believe that we have provided adequate clarification allowing the Ethiopian Government to participate in the transportation and distribution of commodities in cooperation with U.N. agencies and the private voluntary organizations, but that we have prevented the prospect of political manipulation of this food by the Government for its starving citizens.

The conference agreement includes $175 million in nonfood disaster and refugee assistance funds for Africa. This is the same amount as appropriated in the House bill, and the same amount as the ceiling provided in the Senate bill. The administration requested $50 million for nonfood aid.

The nonfood funds break down as follows: $137.5 million for international disaster assistance, $25 million for the U.S. emergency refugee and migration assistance fund, and $12.5 million for regular migration and refugee assistance activities. Of the disaster assistance funds, $2.5 million will be transferred to the operating expenses account of the Agency for International Development for monitoring the entire famine relief package funded in the bill. These latter funds are intended to be used to prevent unfair distribution or diversion of this much-needed assistance.

The nonfood funds in the bill are made available until March 31, 1986. This is a compromise between the House requirement that the funds be obligated by September 30, 1985, and the Senate availability through September 30, 1986.

The conferees agreed to amend Senate language requiring 5-day notification of the Appropriations Committees of the House and Senate prior to the obligation of disaster assistance funds, unless the emergency is life-threatening and immediate action is necessary. Similar 5-day notification language added by the Senate for emergency refugee assistance and regular refugee assistance was dropped by the conferees.

The House conferees accepted Senate language waiving the Brooke amendment banning aid to any country in default on prior U.S. loans. Unless waived, the Brooke amendment would prohibit any refugee assistance in the bill from being used in Sudan, a country which has provided a haven for thousands of refugees from Ethiopia, Chad, and other famine-stricken neighboring nations.

Senate language waiving the requirement for authorizing legislation before these funds for nonfood aid could be obligated was dropped in conference. The language is no longer necessary, as the authorizing bill, S. 689, passed the Senate on March 19 and the House on March 21, and is now awaiting the President's signature.

And finally, House conferees accepted Senate language designating the Administrator of the Agency for International Development as having the responsibility for determining the emergency food and disaster assistance needs for the funds included in the bill. This merely restates the current operating procedures.

Mr. Speaker, I am pleased to report that, despite the administration's expressed concern that the conference agreement would provide resources substantially in excess of its estimate of need, the administration does not

oppose the conference version of this bill.

I thank each of the members of this committee, and each of my colleagues in this House and in the other body who have worked so swiftly in bipartisan fashion to craft an urgent supplemental appropriations bill that the President will sign—and more importantly—that will deliver sustenance to the millions of starving men, women, and children of drought-ravaged sub-Saharan Africa.

□ 1530

Mr. Speaker, again I want to thank my chairman, the gentleman from Mississippi [Mr. JAMIE WHITTEN] for his cooperation, and my good friend of many, many years, the new chairman of the Subcommittee on Foreign Operations, the gentleman from Wisconsin [Mr. OBEY]. They were terrific.

Mrs. ROUKEMA. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I am glad to yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Speaker, I certainly would like to commend both the chairman of the committee, the gentleman from Mississippi [Mr. WHITTEN], and the gentleman from Massachusetts [Mr. CONTE] for their leadership, and I commend all the members of the conference committee that has reported this bill. It is an excellent bill in every way. It is not only fiscally prudent but it is humane, and the provisions you have written in here, the reserve provisions, those that can be triggered in the event of unforeseen additional needs, are very wise and very humane. I think they are very important, and the gentlemen are to be commenced.

Mr. WHITTEN. Mr. Speaker, I yield 4 minutes to the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. Mr. Speaker, I thank the chairman of the committee for this time.

I would simply like to congratulate the gentleman from Mississippi [Mr. WHITTEN], the chairman of the committee, for the speed with which this bill was brought to the House through conference and back to the House floor for final approval.

I think virtually everything that needs to be said has already been said. I would simply like to observe, as the gentleman from Massachusetts [Mr. CONTE] has already indicated, that in terms of chapter 2 funding this legislation includes $137.5 million for disaster assistance, the same amount which originally passed the House, and these funds will be used to provide medical services, supplies, shelter, and basic agricultural rehabilitation.

The Senate had proposed making these funds available on an "as necessary" basis through all of fiscal year 1986, and as has been indicated, we compromised by making the funds available through March 31, 1986, and dropping the "as necessary" requirement because we felt that the funds should be available through a specific appropriation.

All I would like to say in addition to that is that I am very pleased to hear from the gentleman from Massachusetts [Mr. CONTE] that the President will in fact sign this legislation. This African famine relief bill which we are sending to him this afternoon is a responsible piece of legislation. It is a crucial piece of legislation. In every way it is literally a lifesaver. It will save the lives of hundreds of thousands of children and families in Africa. I think we have a responsibility to do it, and I am pleased to hear that the administration agrees and will sign the bill at the earliest opportunity.

Mr. Speaker, I yield back the balance of my time.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentlewoman from Nebraska [Mrs. SMITH].

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in support of adoption of the conference report for H.R. 1239, the urgent supplemental appropriation for emergency famine relief and recovery in Africa.

I wish to commend Mr. WHITTEN and Mr. CONTE for their leadership in addressing the critical situation that is facing some 150 million hungry people in Africa. I likewise compliment this body for its prompt effort to genuinely contribute to meeting the needs of these fellow human beings.

In addition, I commend my colleagues for the provisions of this bill that provide assurance that the aid we send truly reaches the hungry.

While this urgent supplemental appropriation is made to address an acutely critical situation in Africa, I am compelled to remind my colleagues that at the same time, a severe crisis exists in our Nation's heartland.

Our farmers and ranchers are facing the dimmest economic conditions experienced in the agricultural sector in the past 50 years. For that reason, while I rise in support of H.R. 1239 today, I am also calling on my colleagues to support further action on H.R. 1189, the urgent supplemental appropriation for agricultural credit, to lend sorely needed assistance here at home to our agricultural community.

Language has been included in the conference report stating that the committee expects H.R. 1189 to be considered during April 1985. In the meantime, the Department of Agriculture is called upon to use existing guarantee authority during the planting season.

Fellow Members, you will recall that H.R. 1239 and H.R. 1189 were considered consecutively in this body, to address two critical problems—one at home and one abroad. With passage of this conference report, the Congress will have taken action to address the immediate crisis in Africa. I call on you to exert your influence so that our problem at home can be addressed, as well.

Mr. Speaker, our 3 million farmers—as many as the combined work forces of the transportation, steel, and automobile industries—are preparing for this year's operation of the most productive agricultural plant in the world.

Fully 22 percent of our work force and one-fifth of our total GNP activity are dependent upon this production process in our food and fiber system.

Over 1 trillion dollars' worth of assets, or about 70 percent of the capital assets of all manufacturing corporations in the United States make production agriculture one of the most capital-intensive ventures in our economy.

And in spite of the bad news that abounds regarding our agricultural economy, our export surplus of agricultural products, expected to total about $16 billion this fiscal year, continues to be the brightest spot in our huge balance of trade deficit—in spite of a record-high dollar.

Fellow Members of the House, I ask your support for adoption of this conference report, so that this Nation can continue in its role as the leader in lending assistance to the needy around the world. At the same time, I strongly urge your support for action to provide assistance to our own farmers and ranchers during their hour of crisis, as well.

□ 1540

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. MCHUGH], a member of the committee.

Mr. MCHUGH. Mr. Speaker, I also rise in support of the conference report and urge my colleagues to support it. The funds appropriated in this measure are desperately needed in Africa.

As one of those privileged to serve on the conference committee, I can assure my colleagues that we defended the House position vigorously and that a reasonable compromise has been struck. As the chairman pointed out, the final bill provides $400 million in additional food aid under title II of Public Law 480. These funds would remain available through December 31. As the conference report notes, however, "it is the intention of the conferees that the commodities provided in this act be delivered to Africa no later than December 31, 1985."

In addition, the bill retains the $225 million reserve to meet any additional food needs beyond those already identified, with the reserve remaining available for use through September 30, 1986. Finally, with regard to the

nonfood aid provisions, the conference report retains the original House provisions virtually intact. As the members will recall, our bill provided $137.5 million in disaster assistance, $25 million to replenish the U.S. Emergency Refugee and Migration Assistance Fund, and an additional $12.5 million for emergency assistance in Africa under the migration and refugee assistance account.

All of those numbers have been retained. However, at the insistence of the Senate, those funds can be programmed until March 31, 1986, rather than remaining available only until the end of the current fiscal year.

As you know, Mr. Speaker, our people and other people throughout the world have responded with compassion to the current crisis afflicting much of Africa. This conference report is an important part of our continuing response and it should be passed with broad support. Having said this, it would be a mistake to delude ourselves into believing that this bill will solve the underlying causes of the current crisis in Africa.

In fact, much more needs to be done. With the passage of this conference report, it is time that we begin addressing the long-term development needs of sub-Saharan Africa in a more vigorous and coherent fashion. To that end, the gentleman from New York [Mr. LUNDINE] and I will introduce legislation later in the week designed to support much needed policy reforms that must be undertaken by the African nations themselves. It is my hope that this Congress will respond with as much compassion to the long-term needs of Africa as we have to this tragic crisis that has so deeply moved the American people.

Mr. CONTE. Mr. Speaker, I have no further requests for time.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. WEISS].

Mr. WEISS. Mr. Speaker, I am pleased to rise in favor of the conference report on urgent supplemental appropriations for emergency famine relief and recovery for Africa.

We must deeply regret the necessity to appropriate these funds. We all grieve for the tens, perhaps hundreds of thousands of people who are sick, hungry, and dying in the 24 countries struck by this murderous famine. And, because we have no choice but to offer this humanitarian aid to a desperate continent, many Members of Congress and our staffs have spent a great many hours working toward enactment of this legislation. Through this appropriation we offer sustenance and support to our fellow human beings in Africa who are in mortal danger.

The long process that will reach its conclusion when this bill is signed by the President had its genesis in the late summer of 1984, when Chairman HOWARD WOLPE of the Africa Subcommittee and I concluded that the African famine was worsening and that the regular appropriations for emergency food and and disaster assistance would once again be insufficient to meet the 50-percent level that the United States traditionally contributes. The authors of this effort had traveled to Africa in 1983 and, as early witnesses to an unfolding tragedy, began to sound the alarm—an alarm that few heeded.

In September, we introduced a bill that would have appropriated $450 million in food and disaster assistance. When it became clear, in October and November, that food needs in Africa were escalating due to even greater numbers of people being affected by the famine, we decided to increase the aid levels to $1 billion. On January 3, H.R. 100 was introduced. Mr. WOLPE and I were joined by Chairman MICKEY LELAND of the Select Committee on Hunger. And a hard-working team of Democrats and Republicans including SILVIO CONTE, ranking minority member on the Appropriations Committee, and the gentlewoman from New Jersey [MARGE ROUKEMA], ranking minority member of the Select Committee on Hunger, negotiated through the House and Senate, first an authorization, then an appropriation bill. The distinguished chairman of the Committee on Foreign Affairs was fully supportive every step of the way. The Speaker was of great assistance throughout the process. With many hurdles overcome, including an inadequate request level put forward by the administration, we are here today to take the last step in the House before enactment. The Senate will, I hope, act this week.

This legislation found friends in many quarters: The media who kept the pictures of the affected people before the American public night after night; the American public itself—who responded with approximately $100 million, mostly in small contributions; the private voluntary organizations, both on the ground and lobbying here in Washington, who have been delivering food and disaster assistance in missions of mercy for decades. The Members of the House on both sides of the aisle who supported the effort are too numerous to include in a short statement; however, I do want to make reference to the chairman of the House Appropriations Committee, JAMIE WHITTEN, DAVID OBEY, chairman of the Subcommittee on Foreign Operations and Mr. CONTE for their especially fine work during the committee and conference process.

The Congress deserves congratulations on this achievement on this offering of $800 million worth of help to nations whose many dead and dying are part of one of the most extensive tragedies of this century. But what we offer at this time must be seen in the proper context. This is only emergency assistance. It is directed to countries affected by this most recent drought. It is intended to help slow the dying, build up strength, and get people back to doing a little subsistence farming. But it won't have much effect on the following facts of life in sub-Saharan Africa:

Population growth rates average 3.2 percent per year; the population will double in 21 years.

Although food production is increasing at the rate of 2 percent each year, because of the rapid population growth rate, per capital food production has declined by 20 percent during the past 20 years.

More than 20 percent of the population consumes less than the minimum amount necessary to sustain a healthy life.

The Saharan Desert is spreading so rapidly that at current rates a continent that is now 20-percent desert may become 50 percent by the year 2035 if something is not done to stop it. Each year about 1.8 million acres of crop and grazing land become desert.

If the relief and recovery assistance we are voting for today is not followed by programs capable of changing the underlying causes of the precarious condition of Africa's food supply, we will be back here year after year voting for even larger urgent supplemental appropriations and millions of more lives will have been sacrificed.

I urge all of my colleagues to extend America's offer of sustenance and support to our African brothers and sisters and children by voting "yes" on this conference report.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. Mr. Speaker, I want to thank the chairman of the committee for yielding to me and I want to express my enormous admiration to the gentleman from Mississippi [Mr. WHITTEN], the gentleman from Wisconsin [Mr. OBEY], the gentleman from Massachusetts [Mr. CONTE] and others for the bipartisan team effort that has brought this matter so swiftly to fruition by both parties and both Houses.

This belies that ugly rumor that we sometimes hear that Congress does not work, that we are a muscle-bound giant, that we cannot react to meet needs.

I am proud to be a Member of this body when we do react, when we meet the wishes of the American people who feel compassion and identification with the problems of mankind around the world in a way that we have for 200 years. This is what our religious and political traditions are all about.

This Congress has represented the American people magnificently and I

really wish to congratulate the half a dozen or so Members that I have mentioned.

This is a wise and a compassionate piece of legislation. From here on in, my minute or two will be a footnote on the remarks of the gentleman from New York [Mr. McHUGH] and the gentleman from New York [Mr. WEISS].

We must in all responsibility and in all wisdom go even further than we have gone today, because if we do not, we are going to be back here again this time next year, and 3 years later, and 7 years later, whenever the vagaries of weather and chance catch up to the sub-Saharan population in this horrifying maelstrom of drought, famine, and death.

Now, it is not drought that is killing people in sub-Saharan Africa. It is human stupidity. It is lack of ability to plan for what lies ahead and utter, inexplicable misuse of resources.

The gentlemen for New York, TEDDY WEISS, and MATTY McHUGH said it all. Sub-Saharan Africa's population is expanding by more than 3 percent a year due to the fact that the West has made available to that region the concept of public health, clean drinking water, sanitation, preventive diseases and a modicum of health care so that maternal and child care mortality has plummeted.

The population growth is not due to the fact that fertility has risen. It is due to the fact that morality has dropped dramatically. That in a sense is a gift from the West and, of course, every life saved is a miracle; but it has brought its complications, too, because as people have lived longer, as mothers have survived to bear more children, the population has soared, and the increase in food production of about 1 percent a year has not begun to keep up with the level of people production, the increase in population of a little over 3 percent a year.

□ 1550

So there has been a 2-percent decrease in per capita annual food availability, and it is cumulative and it is getting worse every year, and it portends impending doom, and horror, and hardship, and suffering of unimaginable proportions if we do not help the continent of sub-Sahara Africa to control their fertility as we have helped the Asian part of the world to do, and as we have helped Latin America to do.

I don't want to take away any of the importance of what we are doing here today, but the fact is that we must go beyond the Band-Aid approach we are taking on this and perform radical surgery.

What is needed is a comprehensive, long-term program aimed at linking increased food production in the region, through the use of appropriate agricultural technology, with a balanced program of development aimed at generally improving the status of women is sub-Saharan Africa.

Among other benefits, such a program will enable African women, who are perhaps the most underprivileged of all human beings, to control their own fertility and participate in the world around them beyond the parameters of the farm.

A balanced program of development would aim at providing African women with equal access to the world of education, work, and credit. Maternal and child health services should be an integral part of such a program.

Unless something is done to reduce the rate of population growth in Africa and, at the same time, provide African farmers with the appropriate technology and training to help them increase food production on a continuing basis, I fear we will never again see the day when Africa will be able to feed itself.

A long-term program aimed at food self-sufficiency in sub-Saharan Africa would be a more intelligent use of U.S. tax dollars than our current sporadic, stopgap efforts.

Unless we develop such a plan, we can expect to see similar supplemental appropriations for African famine relief come before the Congress on a cyclical basis, never ending and escalating in levels of need and cost.

Without such an effort, estimates show that the population of sub-Saharan Africa, currently at 434 million, will virtually double in about two decades,

Unless we do something to contain Africa's exploding population growth rate and provide the African farmer with the necessary tools to control his or her own destiny, I fear we will condemn the African people to a future of suffering and misery.

We must begin to treat the illness, not just the symptoms.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. LELAND].

Mr. LELAND. Mr. Speaker, I will not take long, but I would like to thank very much the efforts on the part of the gentleman from Mississippi [Mr. WHITTEN], chairman of the Appropriations Committee, and also the gentleman from Massachusetts [Mr. CONTE] for their steadfastness in this matter. Their efforts have resulted in the savings of millions of lives.

I am very proud to be associated in this matter, and also as a member and the chairman of the Select Committee on Hunger. A bipartisan effort has been waged here and has been absolutely astounding. It goes to show that if our two sides get together what we can do. We can measure the results of the efforts of all of us here in the many different ways that can be determined by the private voluntary organizations that will be the recipients of these many moneys that we have sent to Africa to try to do what we can to ameliorate the many, many problems they have.

I have heard the cry of the people from other sectors who have not been so closely aligned with the select committee, and also the Appropriation Committee efforts in calling for population control, and in the matters of which we can do the kinds of things that will stop the senseless misuse and abuse of the land in Africa. We know that that is a problem and that we do need, indeed, long-term developmental efforts.

But this is a matter of urgency, a matter of emergency, if you will, and we have got to do what we can to save these many lives. And we have done this in this legislation, with the efforts of the Speaker of the House, the minority leadership, and also the leadership of the Select Committee on Hunger, and through the efforts of the gentlewoman from New Jersey [Mrs. ROUKEMA], and myself, and the gentleman from New York [TED WEISS], who has been beautiful in leading this struggle, along with the gentleman from Michigan [HOWARD WOLPE], and the chairman of the Subcommittee on Africa, and also the wonderful chairman of the Foreign Affairs Committee. We have manifest an effort that has been put together by the House of Representatives with its leadership, and by that we will realize the results that I have alluded to earlier. And that is just the savings of lives, the millions of lives that are in jeopardy in Africa today.

Mr. Speaker, I thank you for giving me this time and I hope that all of our colleagues will support us in these matters.

Mr. Speaker, I rise to state my strong support for this conference report on H.R. 1239, the emergency Africa appropriation legislation. As chairman of the Select Committee on Hunger, I have been working for several months with colleagues from both the House and the Senate to determine what kind of assistance is needed to meet the Africa crisis, and to press for rapid passage of emergency aid.

Early in December, together with the gentleman from Michigan [Mr. WOLPE], the gentleman from New York [Mr. WEISS], and Senator MELCHER, I outlined an Africa famine relief measure and urged quick action. It was clear then that the situation in many drought-stricken African nations was critical. Thousands of people have been experiencing great suffering, due to lack of food, medicines, shelter, and other basic supplies. When Congress reconvened, Mr. WOLPE, Mr. WEISS, and myself introduced H.R. 100, the Africa Famine Relief and Recovery Act.

We have worked with the Foreign Affairs Committee and the Appropriations Committee to ensure quick action. The House of Representatives moved quickly, and reported out legislation with full bipartisan support in February. While action was delayed in the Senate, it has now been returned to the House for final approval. The bill I originally sponsored with Representatives TED WEISS and HOWARD WOLPE would have provided assistance at levels somewhat higher than those in H.R. 1239 as reported today. I nevertheless believe this conference report on H.R. 1239 is a fair and compassionate response to the needs in Africa.

The levels of disaster and refugee assistance stipulated in H.R. 1239 will be urgently needed in the next few months. Several of the most severely affected countries, including Sudan and Ethiopia, will have no harvest before the fall, so food and other emergency needs will continue to be very great.

I commend my colleagues in both the House and the Senate for their efforts in securing passage of this critically important legislation. We recognize that we have a special responsibility to alleviate the suffering of people who cannot secure enough to eat because of drought and other disasters. I urge my colleagues to approve this package of emergency assistance so that proposals for food, seeds, medicines, transportation, and other vital needs now awaiting funding can be quickly approved.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Speaker, I want to thank the chairman of the Appropriations Committee for yielding to me and the chairman of the subcommittee, the gentleman from Wisconsin [Mr. OBEY], the gentleman from New York [Mr. WEISS], the gentleman from Texas [Mr. LELAND], and the gentleman from Massachusetts [Mr. CONTE], all of whom have worked to bring this measure to final passage and enactment today.

Mr. Speaker, I rise today in strong support of H.R. 1239, the supplemental appropriations bill for emergency famine relief and recovery in Africa.

On Saturday, March 30, I sponsored a congressional forum on the African famine at Hamline University in St. Paul, MN. Over 200 persons, including a distinguished panel, participated in this program which focused on a description of the current crisis and how to break the famine cycle in Africa. The starvation of hundreds of thousands of people in Ethiopia and other countries in sub-Saharan Africa is certainly one of the worst tragedies of our time. All of us have been profoundly moved by the daily reports in the news media of the suffering and death which have become rampant throughout Ethiopia. While the crisis has struck hardest in Ethiopia, it has become clear that other countries in that region of the world are also in danger as available food supplies are strained to the breaking point by a massive influx of refugees and displaced persons.

The conference report which the House is considering today will provide $784 million in discretionary budget authority and $289 million in outlays for emergency famine relief and recovery. This total amount is composed of $400 million for Public Law 480—food for peace—$175 million for international disaster, migration, and refugee assistance, and $225 million for emergency food reserve supplies for African famine relief. Clearly, this aid will go a long way in meeting the immediate short-term needs of those who are starving.

The American people have traditionally been very generous in their support of both public and private relief efforts. The current crisis is no exception. Private contributions to numerous relief agencies, such as Catholic Relief Services, Oxfam, Lutheran World Service, Bread for the World, and numerous other organizations are in excess of $150 million. It is appropriate that we act today to reaffirm this commitment of the American people to recognize the suffering of these who are starving and to act publicly through our National Government to do our part to ease their suffering.

While we act today to meet immediate human needs, we should also remember that the problems facing the developing nations of sub-Saharan Africa will not go away overnight. In the face of famine and other catastrophes, long-term development goals are often forgotten. Clearly, if we are to go beyond crisis intervention every time a famine occurs, we will have to develop a consistent, long-term commitment to development aid. While the United States currently has extensive development projects in countries around the world, almost none of them is of the duration needed to solve serious problems, such as developing self-sufficiency in food production and promoting more stable population growth. Commitments on the order of 10 to 20 years are needed, according to many development experts, if we are truly committed to solving some of these difficult problems. Three major weaknesses have limited the effectiveness of our foreign aid programs. First, U.S. aid is often too shortsighted and crisis oriented; second, U.S. aid is often tied to too many political conditions; and third, U.S. policy goals are often unclear and inconsistent. While the primary responsibility for development must rest with the African governments themselves, it is nevertheless clear that there is much that we can do to improve the effectiveness of U.S. foreign aid programs.

We must place greater emphasis on a long-term commitment to development assistance which is tailored to the needs of the recipients. While we cannot prevent droughts and other natural disasters, we can lessen the consequences of these disasters and help people to be better prepared. We must support effective health care programs and population education programs which together can help the developing countries of Africa stabilize their growth rates. We should help to increase the productivity of Africa's small farmers who produce a majority of Africa's food. We must support increased efforts in the developing countries of Africa to maintain their natural resources, such as land, vegetation, wildlife, water, and others. Conservation is essential if these countries are to increase their agricultural productivity. We should also work more closely with other donors on a coordinated multilateral basis to increase the effectiveness of our aid. Finally, we must support more effective monitoring programs to insure that our aid reaches those who need it.

The emergency famine assistance which we are considering today as well as other foreign aid legislation which Congress will consider later this year are important to our own interests. The United States cannot live securely in a world racked by famine and disease. I hope that my colleagues will join me in supporting this measure today.

● Mr. FRENZEL. Mr. Speaker, I am pleased to vote for this appropriation to provide food relief for people starving in Africa.

This bill, when added to an expected supplemental appropriation, will about equal the money which would have been made available in the bill which was vetoed because of its farm credit rider. I believe it will be signed, and that Americans everywhere will support it.

A real problem, seldom expressed during consideration of relief measures, is that the governments of the principal affected countries are conducting policies that would seem to insure that misery will continue to plague their peoples.

The good news comes from Sudan. Its leader has agreed to the reform of domestic policies which gives some hope for improvement.

Bad news prevails in Ethiopia. Our ex-colleague from New Jersey, Millicent Fenwick, now U.S. Ambassador to FAO, has been a consistent critic of the Ethiopian Government's inhumanity to its own citizens. She says that not only has Ethiopia made extortionate changes for allowing the American

51-059 O-86-5 (Pt. 6)

people to give food to Ethiopians, but also that it has used the food as an instrument in its cruel relocation program. That program is designed primarily to break up regions of strong resistance to that unelected government.

When we complain about human rights violations, in the U.S.S.R., in Afghanistan, in Iran, in the Philippines, in Chile, in South Africa, we should not forget that Ethiopia is among the worst, and may even be the grand champion abuser of human rights.

However, not even inhumane governments allow us to disregard our own obligations.

H.R. 1239 should be promptly passed.●

Mr. WHITTEN. Mr. Speaker, I yield back the balance of my time.

Mr. CONTE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WHITTEN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CONTE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 400, nays 19, not voting 13, as follows:

[Roll No. 42]

□ 1610

So the conference report was agreed to.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. RANGEL. Mr. Speaker, I would like to make a statement explaining my absence from rollcall vote No. 42 on H.R. 1239.

Mr. Speaker, on H.R. 1239, the famine relief bill for the recovery in Africa, my colleague from New York, Congressman BENJAMIN GILMAN and I were called away from the House floor in our capacity, me as chairman of the Select Narcotics Committee and he as ranking member to meet with the Attorney General of the United States. We were unable to return to the House in time to vote on that most important piece of legislation.

Had we been there, we would have voted in the affirmative.

PERSONAL EXPLANATION

Mr. GUARINI. Mr. Speaker, on rollcall 42 on H.R. 1239 concerning the famine relief for Africa, I was inadvertently detained as a result of oversight hearings and arrived in the Chamber at the moment the voting machine closed.

Had I been present I would have voted in the affirmative.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 2: Page 2, lines 9 and 10, strike out "of which $480,000,000 is hereby appropriated and made available through September 30, 1985" and insert "of which $269,000,000 is hereby appropriated and $16,000,000 shall be derived from unobligated balances in the Commodity Credit Corporation".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein with an amendment, as follows: In lieu the matter stricken and inserted by said amendment, insert the following: "of which $384,000,000 is hereby appropriated to be available through December 31, 1985, and $16,000,000 shall be derived from unobligated balances in the Commodity Credit Corporation".

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 6: Page 3, line 9, after "Africa" insert ", which sums shall be available only for such purpose and which sums shall remain available until September 30, 1986: *Provided*, That, notwithstanding any other provision of law, such assistance shall be available for the furnishing of seeds and fertilizer and for the carrying out of other basic agricultural rehabilitation: *Provided further*, That the Committee on Appropriations of each House of Congress is notified five days in advance of the obligation of any such sums".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 6 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ", to be available only for such purpose and to remain available until March 31, 1986: *Provided*, That the Committee on Appropriations of each House of Congress is notified five days in advance of the obligation of any funds made available under this paragraph, unless the emergency is life threatening and immediate action is necessary"

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 8: Page 3, line 24, after "assistance"," insert "notwithstanding any other provision of law, such sums as may be necessary, but not more than".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "notwithstanding any other provision of law,".

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 9: Page 3, line 24, after "Africa" insert ", which sums shall be available only for such purpose and which sums shall remain available until September 30, 1986: *Provided*, That the Committee on Appropriations of each House of Congress is notified five days in advance of the obligation of any such sums".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 9 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ", to be available only for such purpose and to remain, available until March 31, 1986".

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13: Page 5, after linme 4, insert:

The Administrator of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961 shall have the responsibility for determining the emergency food and disaster assistance needs for which funds are appropriated by this Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 13 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the final amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 14: Page 5, after line 4, insert:

DISPOSITION OF ADDITIONAL AGRICULTURAL COMMODITIES UNDER SECTION 416 OF THE AGRICULTURAL ACT OF 1949

To prevent the waste of commodities acquired by the Commodity Credit Corporation through price support operations, the Secretary of Agriculture shall make available through Private Voluntary Organizations for donation to African nations requiring emergency food assistance, for fiscal year 1985, not less than two hundred thousand metric tons of agricultural commodities: *Provided*, That not less than one hundred thousand metric tons of the commodities made available under this sentence shall be in the form of wheat or wheat products: *Provided further*, That none of the commodities made available for donation under this sentence shall be made available until the Secretary of Agriculture has certified to the Chairmen of the Senate Committee on Foreign Relations and the House Committee on Foreign Affairs that the commodities shall not be distributed through or otherwise be allowed to come under the possession or control of the Government of Ethiopia. The Corporation shall pay, with respect to the commodities donated under the foregoing sentence, transporting, handling, and other charges, including the cost of overseas delivery. Such donations shall be in addition to the level of assistance programmed under any other authority.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 14 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

DISPOSITION OF ADDITIONAL AGRICULTURAL COMMODITIES UNDER SECTION 416 OF THE AGRICULTURAL ACT OF 1949

To prevent the waste of commodities acquired by the Commodity Credit Corporation through price support operations, the Secretary of Agriculture shall make available, through Private Voluntary Organizations for donation to African nations requiring emergency food assistance, for calendar year 1985, not more than two hundred metric tons of agricultural commodities: *Provided*, That 50 percentum of the commodities made available under this sentence shall be in the form of wheat or wheat products: *Provided further*, That none of the commodities made available for donation under this sentence shall be made available until the Secretary of Agriculture has certified to the appropriate committees of the Congress that the commodities shall not be distributed through or otherwise be allowed to come under the possession or control of the Government of Ethiopia. The Corporation shall pay, with respect to the commodities donated under the foregoing sentence, transporting, handling, and other charges, including the cost of overseas delivery. Such donations shall be in addition to the level of assistance programmed under any other authority.

Mr. LEWIS of California (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will posture further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken today after debate has been concluded on all motions to suspend the rules.

AMENDING THE ACT ESTABLISHING THE PETRIFIED FOREST NATIONAL PARK

Mr. UDALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1185) to amend the act establishing the Petrified Forest National Park.

The Clerk read as follows:

H.R. 1185

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act of March 28, 1958 (72 Stat. 69), to establish the Petrified Forest National Park, is amended by inserting the following at the end thereof: "township 19 north, range 24 east: the southwest quarter of the southwest quarter of section 27.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Arizona [Mr. UDALL] will be recognized for 20 minutes and the gentleman from Alaska [Mr. YOUNG] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Arizona [Mr. UDALL].

□ 1620

Mr. UDALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is a pleasure to rise in support of H.R. 1185, which would expand the boundaries of Petrified National Forest Park in Arizona to include 40 acres of extremely important archeological lands. I introduced this legislation on February 20, and it has been reported out of the Committee on Interior and Insular Affairs without opposition or amendment.

The Petrified Forest National Park is very well known for its unusual and fascinating natural resources, but it is not well known for its treasure of cultural resources. The park is now planning the development and interpretation of its archeological materials.

The inclusion of this parcel, known as site 236, would be a significant part of the effort. The archeological importance of this site is documented in other remarks made here today. Suffice it to say that this nearly 900-year old Anasazi ruin is considered by many to be one of the best examples of an undisturbed prehistoric Anasazi ruin left in the Southwest.

I think special mention should be made of the Archeological Conservancy, which purchased this site with privately donated funds and is generously donating it to the National Park Service. This national, nonprofit organization was founded in 1980 and is headquartered in Santa Fe, NM.

Although a young organization, it already has acquired 27 archeological sites in 11 States, including 3 in Arizona. Their work is important and much appreciated by all of us interested in the preservation of America's past.

So I am very gratified to support this legislation today and urge my colleagues to join me in placing this gift within the boundaries of the Petrified Forest National Park.

Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. I thank the gentleman for yielding time to me.

Mr. Speaker, H.R. 1185 was introduced by the distinguished chairman of the Interior and Insular Affairs Committee on February 20, 1985, and would amend the boundary of the Petrified Forest National Park to permit additional land to be included in the park.

The Petrified Forest National Park was originally established as a national monument by proclamation of President Theodore Roosevelt on December 8, 1906. Further proclamations by President Herbert Hoover added considerable area to the monument.

The Congress established the monument as a national park in the act on March 28, 1958, and further designated 50,260 acres as wilderness in the act of October 23, 1979. The park contains outstanding geological, paleontological, and archeological resources. H.R. 1185 would permit a 40-acre addition to the park. The proposed addition contains a recently discovered and extremely important archeological site dating from the 12th century A.D. which contain remnants of an unstudied large Pueblo and ceremonial area. This land is currently owned by the Archaeological Conservancy which has agreed to donate the land to the park upon enactment of this bill.

I would like to commend the Archaeological Conservancy for their hard work and generosity in making this outstanding archeological find available to the National Park Service.

The lands to be added to the park by this legislation are subject to the reserved mineral estate of the Santa Fe Pacific Railroad Co. I have been informed that Santa Fe has been working with the Bureau of Land Management in an attempt to exchange its mineral estate in this addition for Federal mineral interests elsewhere in Arizona. I am hopeful that the Bureau of Land Management will be able to achieve this exchange and thereby eliminate the problems so often associated with split estates in the West.

Mr. Speaker, I know of no controversy regarding this bill and urge its adoption.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. YOUNG of Alaska. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 1185.

● Mr. LAGOMARSINO. Mr. Speaker, as ranking member on the National Parks Subcommittee, I rise in support of H.R. 1185 to provide for a 40-acre addition to the Petrified Forest National Park in Arizona.

The land parcel, which lies adjacent to the park, is currently owned by the Archaeological Conservancy. The Conservancy has indicated its intent to donate the parcel to the Federal Government upon enactment of this legislation. In my opinion, this parcel would be a significant, as well as logical, addition to the Petrified Forest Park in view of its outstanding archeological resources, including a recent site dating from the 12th century A.D. As you may know, the park is noted for its unique Indian ruins and petroglyphs.

The mineral rights to the parcel are held by the Santa Fe Pacific Railroad Co. I have been informed that Santa Fe is currently working with the Bureau of Land Management [BLM] to develop an administrative exchange of the subsurface rights, and therefore, does not oppose enactment of this bill. I strongly endorse the concept of such exchanges to eliminate split estate conflicts in national park service areas; therefore, I urge the BLM to expedite this particular exchange.

The Subcommittee on National Parks and Recreation held hearings on H.R. 1185 on March 12, 1985. All of the witnesses, including the administration recommended enactment of the bill. It was unanimously recommended to the full committee, without amendment, on the same date. The Interior and Insular Affairs Committee approved H.R. 1185 by voice vote on March 20.

I would like to further comment that the bill does not require any Federal expenditures. For this reason, and the others I have already mentioned, I urge my colleagues to support and approve H.R. 1185.●

Mr. YOUNG of Alaska. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona [Mr. RUDD].

Mr. RUDD. I thank the gentleman for yielding time to me.

Mr. Speaker, I commend my colleague, the distinguished chairman of the Interior Committee, for the work that he has done on this very important bill. It is a bill that will contribute very measurably to the Park Service and the Archeological Conservancy which acquired the land. The land underneath was owned by Santa Fe Industries. They worked together through land exchanges, and this will be a tremendous, important addition to that park.

Mr. Speaker, I rise in support of H.R. 1185 to add a 40-acre parcel of land to the Petrified Forest National Park in Arizona.

This site, which lies in my Congressional District, includes a major Anasazi Indian village dating back to about A.D. 900 to 1100. It is one of the best preserved archeological sites in eastern Arizona. It includes a large circular depression adjacent to the village which is believed to be either a dance circle or great kiva, both of which would be unique to the area. Broken pottery is abundant on the site, as is other cultural material.

The Archeological Conservancy, a nonprofit organization dedicated to preserving archeological sites in the United States, recently acquired the 40-acre parcel for the express purpose of donating it for inclusion in the park. And Sante Fe Industries, which holds the subsurface mineral rights to the land, has successfully negotiated an administrative exchange of these rights with the Bureau of Land Management for rights elsewhere in Arizona.

The efforts of both Sante Fe and the Archaeological Conservancy have made possible a valuable addition to the park. I hope my colleagues will support this legislation, and that the bill will be adopted unanimously.

Mr. UDALL. Mr. Speaker, I yield back the balance of my time.

Mr. YOUNG of Alaska. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona [Mr. UDALL] that the House suspend the rules and pass the bill, H.R. 1185, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

DESIGNATING POINT REYES NATIONAL SEASHORE WILDERNESS AS THE PHILLIP BURTON WILDERNESS AREA

Mr. VENTO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1373) to designate the wilderness in the Point Reyes National Seashore in California as the "Phillip Burton Wilderness," as amended.

The Clerk read as follows:

H.R. 1373

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PHILLIP BURTON WILDERNESS.

(a) In recognition of Congressman Phillip Burton's dedication to the protection of the Nation's outstanding natural, scenic, and cultural resources and his leadership in establishing units of the National Park System and preserving their integrity against threats to those resources and specifically his tireless efforts which led to the enactment of the California Wilderness Act of 1984, the designated wilderness area of Point Reyes National Seashore, California as established pursuant to law, shall henceforth be known as the "Phillip Burton Wilderness."

(b) In order to carry out the provisions of this Act, the Secretary of the Interior is authorized and directed to provide such identification by signs, including, but not limited to changes in existing signs, materials, maps, markers, interpretive programs or other means as will adequately inform the public of the designation of the wilderness and the reasons therefor.

(c) REFERENCES.—Nothing in this Act shall affect the management of (or the application of any rule, regulation, or provision of law to) any area within the Point Reyes National Seashore, except that all references to the "Point Reyes Wilderness" or to "the wilderness in the Point Reyes National Seashore" which appear in any rule, regulation, provision of law or other official document shall hereafter be deemed to be references to the Phillip Burton Wilderness Area.

(d) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes and the gentleman from California [Mr. LEWIS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1373 was introduced by our esteemed colleague from Ohio, JOHN SEIBERLING, on February 28, 1985, and would name the wilderness within Point Reyes National Seashore the "Phillip Burton Wilderness."

Mr. Speaker, leadership casts a long shadow and today we honor the shadow cast by Phillip Burton over the wilderness designations that he so ably fought for.

There have been thousands of pages written about Phillip Burton, about the man, about his commitment to helping those people who had no one else to help them, about his unyielding opposition to those selfish souls with no vision, who would, if permitted, strip the public lands and rob Americans of their birthright, the right to see at least some of this great and beautiful unspoiled land in its natural state. On April 12, 1983, I stood in this Chamber, as many of you did, and said some things about the leadership of Phil Burton in establishing national parks, wilderness areas and the many other things he did to make this a better world. I'd like to repeat some of those words—for me they have as much meaning today as they did then. "For many younger Members, Phil was a wise counselor. An experienced source of the congressional process, Phil did not hesitate sharing his wisdom with others. His guidance has been and will continue to be an invaluable assistance for many of us and for Congress. I personally was fortunate to work closely with Phil on the Interior Committee, the Democratic Study Group executive committee and on legislation vital to Minnesota, the Boundary Waters Canoe Area Wilderness Act. As chairman of the Interior Parks Committee, Phil was in large part responsible for the adoption of this important legislation. The protection of BWCA from logging, mining, and overuse, and its continued high level of visitor participation is a lasting testament of the legislative handiwork created by Congressman Burton."

Mr. Speaker, the 1976 wilderness designation at Point Reyes National Seashore and the California Wilderness Act of 1984 are other lasting testaments to the leadership of Phil Burton and I urge all of my colleagues to join me in approving this bill to designate a "Phillip Burton Wilderness Area."

Mr. Speaker, I reserve the balance of my time.

Mr. LEWIS of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1373.

● Mr. LAGOMARSINO. Mr. Speaker, I rise in support of H.R. 1373 to designate the Point Reyes National Seashore in California as the Phillip Burton Wilderness. As the ranking member on the National Parks Subcommittee and one of the over 100 cosponsors of H.R. 1373, I strongly urge enactment of this bill as a fine tribute to the numerous conservation achievements of our late colleague, Phil Burton. Many of us in this body were honored by working with Phil in preserving many beautiful and unique wilderness areas for future generations. Probably the most notable of Phil's achievements was the California

Wilderness Act, passed by Congress last year.

As a Californian and member of the House Interior Committee, it was a privilege and a pleasure to personally work with Phil on this monumental legislation. Phil's efforts and accomplishments over the years speak for themselves. There was never a doubt regarding his dedication and commitment to protecting and preserving our Nation's priceless natural, cultural, and scenic resources. For these reasons, I believe it is entirely fitting and appropriate to designate the 25,000-acre Point Reyes Wilderness in honor of Phil's efforts in creating this wilderness, as well as many other conservation areas.

Although the administration opposes enactment of this bill due to a longstanding National Park Service policy opposing the naming of wilderness areas after individuals, I cannot support that view. There are currently several areas within the National Forest Wilderness System named after individuals, including the Dick Smith Wilderness Area in my congressional district. The administration's position, in my view, disregards Phil Burton's numerous contributions to our wilderness system. I appreciate the Park Service policy on this particular issue; however, I believe this is a completely justified exception. Furthermore, I do not believe it will set a dangerous precedent in this regard. Neither is it the Interior Committee's intent to create such a precedent. Future similar proposals would, I am confident, be closely scrutinized with the committee's intent in mind.

H.R. 1373 would designate no new wilderness and require only minimal Federal expenditures. In addition, it would not affect the management of the Point Reyes National Seashore in any way. The Subcommittee on National Parks and Recreation held hearings on H.R. 1373 on March 12, 1985. It was unanimously recommended to the full committee with a minor technical amendment on the same date. The Interior and Insular Affairs Committee approved H.R. 1373, as amended, by voice vote on March 20, 1985.

I, therefore, strongly urge all of my colleagues to support and approve H.R. 1373, as a fitting tribute to our late colleague, Phil Burton.●

Mr. VENTO. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. I thank the gentleman for yielding me this time, and I commend him for his leadership and support on this legislation.

Mr. Speaker, you will recall that when the great Roman senator, Cato, was showing a stranger around his city of Rome, he was asked by the stranger, after his tour of the city, "Well, where is the monument to Cato?" Cato, in reply, simply said, "Look around you."

Well, anywhere you go in the United States, you could probably look around you and see some monument to Phil Burton, not only in humanitarian legislation, but in conservation. Phil Burton was the author of the Golden Gate National Recreation Area bill and of the Redwoods National Park; of numerous wilderness bills, including the California wilderness bill, which was passed and signed into law last fall, and which added almost 2 million acres to the National Wilderness System in the State of California alone.

□ 1630

Phil Burton did not author the legislation creating the Point Reyes National Seashore, although he later sponsored legislation adding very significant acreages to it. That came about after the death of the author of the original legislation, the late Congressman Clem Miller, for whom one of the centers in the Point Reyes National Seashore is named. But Phil Burton was the author of the wilderness legislation that designated part of the Point Reyes National Seashore as wilderness.

In fact, he got two separate laws passed in the 94th Congress, Public Law 94-544 and Public Law 94-567, both designating the wilderness in Point Reyes National Seashore. Why have two laws designating the same wilderness? Because he got tired of waiting for the other body to act on the first bill, so he got the same bill passed again by the House, and the other body eventually passed both, and the President signed both into law. We remember that is the kind of thing Phil Burton often did and endeared himself to many of his fellow legislators.

Now, really to do justice to Phil Burton's achievements in the field of wilderness conservation, you would have to name every single wilderness in California the Phillip Burton Wilderness. However, some of us on the Interior Committee concluded, after conferring with his wife, SALA, and others who knew Phil, that the wilderness area that was most dear to his heart would be the one nearest to his native San Francisco in the Point Reyes National Seashore.

The SPEAKER pro tempore (Mr. GRAY of Illinois.) The time of the gentleman from Ohio [Mr. SEIBERLING] has expired.

Mr. VENTO. Mr. Speaker, I yield 3 additional minutes to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman.

Mr. Speaker, Phil and his wife, SALA, on many occasions went to Point Reyes and enjoyed it as a beautiful natural area that was still relatively close to their native San Francisco. So it seemed to us that this was the wilderness that was most suitable to memorialize Phillip Burton's contributions to the National Wilderness System, and there have indeed been tremendous contributions.

During our hearing, the Park Service came in and opposed the legislation. They did it on the grounds that in the National Park System, we should not be designating landmarks or naming landmarks for individuals. I said to the Assistant Director of the Park Service, "Well, I am sorry, but you have already passed that point. The biggest landmark in North America, Mt. McKinley, is in a national park and is named for an individual, and a politician at that." And, of course, we have Kings Canyon National Park and Muir Woods National Monument, all in the National Park System, with an individual's name attached to a main feature in that park. We also have Theodore Roosevelt Island in the National Capital Parks, and we even have a Theodore Roosevelt National Park in North Dakota.

So it does not seem inappropriate with respect to someone who did as much for conservation, who did as much for wilderness as Phillip Burton, to pick a wilderness system in a national park and name it for him.

I might say there are a dozen or more wilderness areas in the National Wilderness System in the United States, mostly in the national forests, named for individuals, such as Bob Marshall Wilderness in Montana.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. SEIBERLING. I am happy to yield to my colleague, the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Speaker, I wanted to say to my friend from Ohio that I think it is appropriate that he speak on behalf of naming this beautiful area after Phil Burton because the gentleman, in his own right, has done so much to further the cause of preserving our environment.

I know that Phil's widow and Member of Congress, SALA BURTON, is here on the floor, and I just wanted to tell SALA and to tell my colleagues how appropriate I believe this is to name the beautiful wilderness area after Phil, and I think it is a fitting birthday present for SALA, whose birthday was yesterday. We are all very, very happy that this is finally coming about and I want to congratulate the gentleman.

Mr. SEIBERLING. I thank my colleague from Ohio.

Mr. Speaker, let me simply say that Phillip Burton was no ordinary politician. He was an extraordinary politican and an extraordinary human

being. He was a politician's politician and a legislator's legislator. If there is anyone who served in this body in the 14-plus years that I have served in it who deserves to have a wilderness area named for him, it is certainly Phillip Burton.

I think that is why we find 124 cosponsors on this bill. So let me just say, "Phil, I know that, wherever you are, you are looking on the work that this Congress and this House have done to protect wilderness areas and smiling. This is our way of saying thanks."

Mr. LEWIS of California. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER], to ask two questions.

Mr. WALKER. I thank the gentleman for yielding this time to me.

Mr. Speaker, it is my understanding that the bill we have before us does have some opposition, not on the question of whether or not Phil Burton was a great Member of this body or a great politician, but the question does arise as to whether or not we are not setting a precedent here which is a change of the way in which we have treated national parks since the founding of the National Park Service in 1872.

It is my understanding that there is a letter from the Department of the Interior that indicates that, in fact, this is a major change and that this would be the first time that we will have renamed a park or a unit of a park after a Member of Congress.

They also point out that indeed we have already named the Golden Gate National Recreation Area in honor of Mr. Burton and raise the question of whether or not to make the change since it would be the first such change since 1872.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Minnesota.

Mr. VENTO. I appreciate the gentleman yielding.

Mr. Speaker, of course, as the gentleman indicated, the National Park Service did not testify in favor of the bill, but I must point out to the gentleman that there are indeed parks, and this does not name the park; it names the wilderness within the park after Congressman Burton, which, as it has been suggested, he was responsible for creating.

The park does have facilities in it dedicated to Clem Miller, the Golden Gate facility is dedicated to Phil Burton, but it is not named after him. So this would actually name one of the units.

We do name Forest Service wildernesses after individuals. There are various features of various parks, like the John Muir Woods, the Mt. McKinley, and other features within parks that have this. It is, in a sense, an unusual move, but I think it is justified based on the nature and the work that our colleague did with regard to wildernesses, not just in California but on a national basis.

So I think it is a good and appropriate thing, and I can assure the gentleman that I will be careful in terms of bringing legislation before this body that would establish naming any wildernesses within any park facilities.

The SPEAKER pro tempore. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. LEWIS of California. I yield 2 additional minutes to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding this additional time to me.

Mr. Speaker, I thank the gentleman for his explanation, but is the Department of the Interior correct in saying that we have not done this before with regard to a Member of Congress?

Mr. VENTO. No. I think that is an oversimplification. I think, I would only agree to the fact that we have not, as a practice, named wildernesses within parks after individuals.

Mr. WALKER. The Department of the Interior says, "In no instance has Congress renamed a park or a unit of a park after a former Member of Congress." That is not a true statement?

Mr. VENTO. I do not know, but there are obviously other names associated with parks that are political figures.

Mr. LEWIS of California. Mr. Speaker, will the gentleman yield?

Mr. WALKER. Let me yield to the gentleman from California.

Mr. LEWIS of California. I thank the gentleman for yielding.

Mr. Speaker, the answer is "Yes."

Mr. WALKER. The answer is "Yes," that this statement by the Department of the Interior is correct, so we are taking a precedent-setting action here with regard to the naming of a unit of a park or a park for a Member of Congress. This will be the first time that we will have done that.

Ms. OAKAR. Mr Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

My question to you is: So what? So what if it is a precedent, in view of the work that Phil Burton did on preserving the environment. We ought to be honoring people like Mr. Burton, who is deceased.

□ 1640

I am frankly amazed that you would raise that as an issue. I am just amazed at that.

Mr. WALKER. I thank the gentlewoman and——

Ms. OAKAR. You do not have to agree with his voting record, but so what?

Mr. WALKER. I am certain that the gentlewoman is constantly amazed by many things that occur on the House floor, but I would say to her that I think, as a part of this discussion, it is relevant to point out that the Department of the Interior does have some very grave reservations about this procedure being followed and what precedents we make for the future.

So the gentlewoman says, "So what?" to many things, but the problem is that what we do on this floor——

Ms. OAKAR. I do not say, "So what?" to many things, but I do say, "So what?" to this.

Mr. WALKER. Regular order, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Pennsylvania has the time. Does the gentleman yield, and, if so, to whom?

Mr. WALKER. Mr. Speaker, I think it is important to recognize that in setting this precedent, we will probably set a precedent that will carry over, and perhaps what we will have is a number of Members around here who would like to see parks named after them, too. But I hope in this instance we will take into account the Department of the Interior's objections to the bill.

Mr. VENTO. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio [Mr. SEIBERLING].

Mr. SEIBERLING. Mr. Speaker, I would like to respond to the gentleman from Pennsylvania.

I was chairman of the Parks Subcommittee for two successive Congresses, at the request of Phillip Burton when he yielded up that subcommittee chairmanship. After he passed away, we made it a separate subcommittee again and the gentleman from Minnesota [Mr. VENTO] is doing an outstanding job of chairing it.

I have consistently opposed naming national parks for individuals, and I will continue to oppose it. This bill would not name a national park for an individual; it would simply name a wilderness area for an individual.

Now, the Park Service may think that its wilderness areas are superior to the dozen or more wilderness areas in the other parts of the national wilderness system that are named for individuals. I happen to think these include some magnificent wilderness areas comparable to any wilderness in the parks. Nor do I see anything wrong with naming a wilderness area for a politician or any reason why we should exclude a person because he is a politician. The real question we must ask ourselves is: Does the individual merit having a wilderness named for him? Is it appropriate?

If there was ever anybody in this House who deserved to have a wilder-

ness area named for him, it is Phillip Burton. I would oppose naming it for just any politician, and I am not excluding myself in that. But I certainly think Phillip Burton merits this in an absolutely extraordinary way. It does not create any precedent that will plague us in the future, for a very simple reason: Phillip Burton's achievements in conservation place him in a class occupied by very few people who have served in this House. If we follow the standard set by his achievements in this field, we will rarely be called upon to repeat this kind of legislation in the future.

Mr. VENTO. Mr. Speaker, I yield 2 minutes to the distinguished delegate, the gentleman from the Virgin Islands [Mr. DE LUGO].

Mr. DE LUGO. Mr. Speaker, I wholeheartedly endorse H.R. 1373 and I am proud to be an original cosponsor of this legislation which will designate the 25,000-acre wilderness located within the Point Reyes National Seashore in California as the Phillip Burton Wilderness.

Phil Burton was, without a doubt, one of the finest men I have ever met. It was a privilege to have his friendship and to work with him on issues so crucial to the poor and the underprivileged, to the ecological future of our Nation, and to the territories of our Nation.

He was a man driven, and one wonders in retrospect if he did not have some premonition that he had but limited time to accomplish his goals.

And what goals they were. He became the conscience of this House, and had he cared about publicity he might even have become known as the conscience of the Nation. For he took on issues that had no champions, that some, in fact, ran from.

One of his former colleagues said of him: "There's only one constituency he gives a damn about—the poor, the elderly, the black and the disabled."

To that I would add the disenfranchised and then neglected territories of the United States, and the people of those territories will be forever grateful to Phil Burton for his efforts, guidance, and counsel on their behalf.

That he accomplished so much is a tribute to his brilliant command of the legislative process and his masterful use of power that left many in awe, and others in frustration. It is still and will always be an honor for me that he was my mentor.

His crusading efforts to protect the environment are legend. In an obituary in the National Parks magazine, he was quoted as saying:

> You know this business of protecting unspoiled places is kind of like a religion to me * * *. We really have only 10 years left to save these places.

For such a man there can be no more fitting memorial than the seashore wilderness, a place of soaring cliffs and unspoiled beaches next to a deep and surging ocean: So majestic, and so restless, and so like the man himself.

Mr. PASHAYAN. Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. LEWIS].

Mr. FOLEY. Mr. Speaker, will the gentleman yield to me?

Mr. LEWIS of California. I am happy to yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, I just want to associate myself with the remarks of the gentleman from the Virgin Islands [Mr. DE LUGO]. I know the gentleman from California is supporting this bill, and I would like to associate my views with those of the gentleman from the Virgin Islands in noting that Phillip Burton was one of the great legislators of our time, and I hope the House will give overwhelming support to this bill.

Mr. Speaker, I thank my colleague for yielding.

Mr. LEWIS of California. Mr. Speaker, I thank the gentleman from Washington.

Mr. Speaker, it is a great honor for me to come to the floor today and express my support for this measure which would pay tribute to one of the greatest legislators this House has seen, Phillip Burton of San Francisco. I do not do so lightly, and there will be a bit of controversy, I suppose, as a result of it, but I would like to share with my colleagues my own experience over the years in the business of public affairs with Phillip Burton.

The first time I had the privilege of seeing the gentleman, I was a young student in San Francisco, and there was a group meeting in a park not far from our office and I wandered down there during lunch to see what these crazy people were doing. It was not Phillip Burton I was seeing that day; his wife SALA was the spokesperson.

The family is an activist family. The family is involved in public affairs in a very, very serious way.

My first opportunity to really get to know Phillip was when I had the questionable experience of carrying on the responsibility for reapportionment in the California Legislature from the Republican side. Phillip was in Congress, and that was another of his charges. When he took on that piece of legislative responsibility, I can tell you that he did his homework, he did it well, and he did it with a vengeance. I grew to admire him deeply for his commitment and his capacity. I cannot say to the Members of the House that I always agreed with him. Just in this last go-round, he left my house out of my district. Nonetheless, he did his job thoroughly, and he did it in that case as a partisan and most effectively.

When it came to other forms of legislation in the House, I think, at least in my experience, Phillip Burton was without peer. He was committed and he recognized the reality that all of us would serve better if we came to the floor presuming that we did not have all the answers to all the problems that were around, but, rather, that you should select those areas of public affairs where you truly want to have an impact, then do your homework and plan your direction one step at a time. He did that with great care.

In the field we are dealing with today, that is, the country's wilderness, Phillip Burton became a master. I must relate one of the asides that is most interesting about the work he did here. He almost went out of his way not to visit those areas. He was not exactly an outdoorsman himself. He did most of his work inside his office or at home at night. I once, in discussing wilderness prospects for my desert, threatened to take him to the desert in August for a couple of weeks before he started his work, just to try to discourage him a bit. But having said that, Phillip created an atmosphere and an environment, if you will, in this House in which Members of both sides of the aisle recognized the importance and the responsibility that we have to preserve that which is most critical to us. And what issue of more importance could there be than our wilderness?

Phillip Burton as a Democrat could serve as a point of study for those who would be effective partisans from the Republican side of the aisle. I recall him on more than one occasion describing the gentleman from Pennsylvania [Mr. WALKER] as "a professional who played hardball but who was serious about his business."

Phillip Burton in this House created a following on his side of the aisle that I think we will long wait to see in the future.

□ 1650

For those of us who believe that most of our problems are not purely partisan problems, it seems to me that on our side of the aisle, the Republican party should practice the business of doing our homework, of attempting to affect public policy progressively and recognizing that we have a responsibility from time to time to govern as well.

This precedent, as it has been described, will not be a precedent that is oft repeated. It is not the intention of the committee to go around renaming locations in the country after Member after Member. As a practical fact of life, it is a recognition of the reality that Phillip Burton was the only person who could have or will in the future have the kind of impact that this House has brought forth in terms of this critical area of public responsibility.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. LEWIS of California. I would be happy to yield.

Mr. SEIBERLING. Mr. Speaker, I would like to associate myself with the gentleman's remarks, which are really very fine.

Phillip Burton was a great legislator, not only because he had a superlative sense of the way the legislative process works, not only because he had the intellect and the drive to get things done, but, most important of all, he had a heart. He loved creating parks and wilderness areas, not just because he thought it was a nice thing to do, but because he thought about the people who would be enjoying them, even if he never would. That is something we as legislators need to remember, that when all is said and done, you have to have a heart, or your life won't amount to a row of beans.

Mr. LEWIS of California. Well, let me say in closing that SALA BURTON, Phillip's wife, and our colleague, is here on the floor. I certainly would not want to end my remarks without extending both my affection and my respect for her as well.

It is critical for us to realize that good lawyers go in the courtroom and they do battle, but they respect most their opponents who are effective, who are fair, who are tough, and whose word is good.

Above all things, Phillip Burton's word was good.

Mr. PASHAYAN. Mr. Speaker, will the gentleman yield?

Mr. LEWIS of California. I am happy to yield to the gentleman from California.

Mr. PASHAYAN. Mr. Speaker, I would like to associate myself with the gentleman's remarks.

Mr. VENTO. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LEHMAN].

Mr. LEHMAN of California. Mr. Speaker, I would like to say a few brief words in support of H.R. 1373 to designate 25,000 acres of the Point Reyes National Seashore in California as the Phillip Burton Wilderness.

As a cosponsor of this legislation and as a personal friend of Phil Burton, I believe that naming a wilderness in his honor is a small tribute to a very big man. It is a symbolic gesture to remind us today and new generations tomorrow that one person can make a difference, can bring about change, and can fight against the odds and win. No single individual in my lifetime did more to set aside landscapes for our future than Phillip Burton. Phil's fingerprints can be found on the maps of our most sacred environmental treasures—from Lake Tahoe to the California wilderness to the Point Reyes National Seashore.

And Phil did all of this for the American people, to ensure that rich or poor we would all inherit a grand national estate to enjoy forever. The fruits of his labor are ours, but there is no question that he enjoyed the work itself.

Phil Burton gave this Nation the gift of his labor. Dedicating the Phillip Burton Wilderness in his honor should serve as a reminder of the work that he expects us to carry on. I, for one, would hate to disappoint him.

The issue here is not one of precedent. Phil Burton was never bound by such narrow concepts. Yet, there are not many features in our national parks named for individuals. There are not many Phil Burtons, either. He deserves this honor. That is the only issue.

Mr. Speaker, I urge my colleagues to vote yes on H.R. 1373.

Mr. PASHAYAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this legislation.

I should like to add in addition to the superb remarks from my colleague, the gentleman from California [Mr. LEWIS] that not only did Phillip Burton do his homework, but he practiced another of that part of politics, that one could always talk to Phillip. I certainly found myself 99 percent of the time in opposition on issues to the positions that he had taken, but if anybody was a master of the art of sitting down and talking something over and reasoning it out, Phillip Burton was that man.

I think perhaps all of us might remind ourselves that if we were to do a little bit more of that, that perhaps some of the very good business of the House might be expedited.

Mr. Speaker, as cosponsor of the legislation before us, I rise in full support of H.R. 1373. This bill has been developed in a bipartisan effort by the Committee on Interior and Insular Affairs. It enjoys bipartisan support today.

It was just a few days removed from 2 years since this body lost Phillip Burton. His loss shocked us all. Phillip Burton was garrulous, rambunctious, emotional, cunning, brilliant, and forthright.

The issue before us today is a simple extension of the recognition this body and this Nation feels for the master politician that was Phillip Burton. Parks and seashores and wilderness areas in and around San Francisco were of keen interest to Phillip Burton. The Point Reyes National Seashore is but one of the jewels he helped to carve.

If politics is an art, no artist painted with a more deft touch than Phillip Burton. Today, it is only fitting that the House of Representatives complete the portrait that has become the man.

The land in question today, some 25,000 acres, is a small corner of wilderness. It does not measure the man, nor is it intended to do so. It only sets aside a small portion of the Federal estate as a reminder of the legislative skills that he practiced with the fury of the Sun itself.

Mr. VENTO. Mr. Speaker, I yield 2 minutes to the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. Mr. Speaker, Point Reyes Wilderness Area is in the heart of my district, so I am very pleased to be here today at this historic moment. I can say that in 1962 when Point Reyes National Seashore came into existence, it was because of the hard work of Congressman Clem Miller and we do have the visitors facility there named after Clem Miller.

I can think of nothing more appropriate than to name this wilderness area after the late great Phillip Burton.

I would read from the committee report, because I think it explains really why this is being done:

> The effort to obtain enactment of this wilderness designation was led by Representative Phillip Burton. Representative Burton worked tirelessly to obtain passage of the California Wilderness Act, first introducing a bill in the 96th Congress which passed the House but was not acted on by the Senate. A similar bill was introduced by Mr. Burton in the 97th Congress but was not acted upon in the Senate.

Phil Burton did not give up until that bill finally did pass and his wife, SALA, played a very important role in that.

This wilderness area is magnificent. It is visited by millions and millions of Americans. I think the American people who go through that park ought to know that one person can make a difference. And Phil Burton made that difference. What does naming this area after Phil Burton mean? I hope some of my colleagues on the other side of the aisle will listen to this, because what this really means is that when people from all over America and from all over the world go through this magnificent facility, this beautiful wilderness area in Point Reyes, they will know by the signs that are posted along the way that it was Phillip Burton who made it possible.

I think this is fitting.

● Mr. LEVINE of California. Mr. Speaker, I am pleased to rise in support of H.R. 1373, legislation which designates the 25,370-acre wilderness located within the Point Reyes National Seashore, CA, as the Phillip Burton Wilderness.

Former Representative Burton was a dear friend who dedicated his life to the protection of our precious natural resources. He was a leader in efforts to establish wilderness areas and was instrumental in the preservation of wil-

derness areas in California. It is appropriate that the wilderness area established in 1976, which lies within the Point Reyes National Seashore, should bear Phil's name.

For close to 6 years, the California wilderness bill had been embroiled in controversy. It was one of the most hard-fought wilderness bills considered by Congress, as conservationists sought protection of the forest land which development interests attempted to keep open to timbering, mining, and real estate.

The foundation of the California wilderness bill signed by President Reagan late last year was laid primarily by the work of Phil Burton, who had crafted a version of the bill which set aside 2.33 million acres of land as wilderness. The legislation, an amended version of the Burton bill, designates as wilderness 1.8 million forest acres, a compromise reached by Senators CRANSTON and WILSON between the Burton bill and the 1.2 million-acre proposal supported by the Reagan administration.

The bill also preserves 83 miles of California's Tuolumne River in its wild state, revoking a permit for a dam being planned there. And it protects Mono Lake, a huge inland sea near Los Angeles rich in waterfowl and ancient geological formations, by designating it as a Federal scenic area.

Phil Burton recognized the importance of preserving these precious areas for future generations, and he struggled for many years to do so. By the simple step of naming one of these wilderness areas for him, Congress will ensure that Phil will be honored, not just by those who knew him and were his friends, but by future generations as well.

Mr. Speaker, I urge my colleagues to salute Phil Burton by supporting H.R. 1373.●

● Mr. MINETA. Mr. Speaker, north of San Francisco is a majestic and beautiful peninsula which we set aside in 1962 as the Point Reyes National Seashore.

Over the years since then we took many steps to develop and protect this unique resource. Phil Burton had, shall we say, a hand in these actions.

In fact, as we all know, neither Point Reyes nor any other national park, recreation area, or wilderness area anywhere in this Nation would be the same if it were not for Phil.

Those of us who knew Phil Burton miss him. And those of us who know the Point Reyes National Seashore are forever in his debt.

The administration opposed this bill on the grounds that naming this wilderness area after Phil sets a new precedent.

One can imagine how Phil would have responded to such an administration position.

Let us do what our colleague would have done, and ignore such shortsighted advice.

Let us do the right thing, and adopt H.R. 1373 and name the wilderness areas of Point Reyes after Phillip Burton.●

● Mr. WAXMAN. Mr. Speaker, the legislation before us today to designate 25,370 acres of wilderness within the Point Reyes' National Seashore, CA, as the "Phillip Burton Wilderness" deserves the unanimous support of the House.

The legacy of Phil Burton's achievements as perhaps this country's most visionary and skillful conservationist is understood and appreciated best by those of us who had the privilege of working with him in the House of Representatives. Armed with his unshakable dedication to the public interest and his superior understanding of the legislative process, Phil was able to move legislation through the House against almost impossible odds. He won legislation that doubled the size of our wilderness areas, almost doubled the size of the Wild and Scenic Rivers System, and tripled the size of the National Trails System.

One of the many major legislative successes for Phil was the expansion of the Point Reyes' National Seashore close to his home of San Francisco. He shepherded legislation three times through the House which extended its boundaries and he sponsored the bill in 1976 which established the wilderness area within Point Reyes.

No single legislator has worked more passionately to protect our natural inheritance than Phil Burton did. To his memory, and to the legacy he left us, we owe this personal tribute.●

● Mr. EDWARDS of California. Mr. Speaker, I rise today in support of H.R. 1373, a bill to designate the wilderness in the Point Reyes' National Seashore as the "Phillip Burton Wilderness." This bill has been cosponsored by over 100 Members of Congress, including both Democrats and Republicans and a majority of the California delegation.

As chairman of the California Democratic congressional delegation, I know I speak for all of my colleagues in thanking Congressman BRUCE VENTO for swiftly bringing H.R. 1373 to the floor. I'd also like to express our gratitude to Congressman JOHN SEIBERLING for introducing this legislation that recognizes the vast accomplishments of a man we all admired and dearly miss. There is a tremendous void in the delegation without Phil Burton. Yet, we all find comfort in the memory of his determination and passion for the environment. We think of Phil each day, and his memory gives us added inspiration to carry on his work.

Phil did more than perhaps any other Member of Congress to enhance the Nation's parks and wilderness. He fought to win, not for himself, but for the millions of people who would benefit from his actions. Conservationists throughout the world have applauded Phil for his victories and future generations will reap the rewards of his legacy.

Phil's environmental triumphs were extensive. As a member of the House Interior Committee and chairman of the Park's Subcommittee, he virtually doubled the size of the Nation's park system. In California alone Phil's unrelenting efforts resulted in the expansion of the Redwood National Park, the establishment of the Golden Gate National Recreational Area, the Santa Monica Mountains National Recreational Area, and protection for the Lake Tahoe Basin.

There are other significant accomplishments one of which I know is very fresh in all our minds. It was Phil who laid the groundwork for the California Wilderness Act which passed the Congress last year. That grand legislation, which was the product of 4 years of dedicated work by Phil, designated 1.8 million acres of land in California as national wilderness.

And of course today especially we must recognize Phil's efforts to help preserve the Point Reyes' National Seashore. Located less than a half hour from his beloved San Francisco, Point Reyes is truly an outstanding resource which is valued for its long beaches backed by tall cliffs, lagoons, and forested ridges. In 1974, 1978, and 1980, Phil successfully enlarged this beautiful area. He also triumphed in 1976 when over 25,000 acres within the Point Reyes' National Seashore received wilderness designation.

Phil fought to preserve places like Point Reyes because he understood the need for natural open space which would provide beauty and solitude for those who sought refuge from our crowded hectic urban life. Developers he knew were eager to build. Phil was concerned with this and wanted to ensure that future generations could enjoy and explore nature's generous offerings. We are all deeply grateful to Phil for his foresight and determination.

Mr. Speaker, in view of Phil's leadership and commitment on wilderness and park issues and his work on behalf of Point Reyes, I believe it is only fitting and appropriate that the wilderness in the Point Reyes' National Seashore be designated as the Phillip Burton Wilderness. I urge my colleagues to vote in favor of H.R. 1373.●

● Mr. STARK. Mr. Speaker, I rise in strong support of the measure before us, H.R. 1373, which would designate Point Reyes' National Seashore Wilderness as the "Phillip Burton Wilderness."

It is appropriate that a wilderness area be named after Congressman Burton. He was a leader in bringing new areas under wilderness protection and he was instrumental in expanding our Nation's park system.

As an advocate for the environment and wilderness, Phil stood tall like a California redwood tree in the Congress. His achievements still reach toward the sky, like the boughs of those mighty trees.

There are other memorials to the successes of Congressman Burton. But there are none that I think he would have appreciated more, than having a wilderness area which he worked hard to create, named in his honor.

I urge my colleagues to join me in honoring the memory of Congressman Burton and vote to pass H.R. 1373.●

Mr. PASHAYAN. Mr. Speaker, I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the bill, H.R. 1373, as amended.

The question was taken.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

AMENDMENTS WITH RESPECT TO U.S. SENTENCING COMMISSION

Mr. CONYERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1847) to amend title 28, United States Code, with respect to the U.S. Sentencing Commission.

The Clerk read as follows:

H.R. 1847

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 58 (relating to United States Sentencing Commission) of title 28, United States Code, is amended—

(1) in section 991(a), by striking out "in regular active service"; and

(2) in section 993(b)(2), by adding after "Commission." the following new sentence: "Before the appointment of the first Chairman, the Administrative Office of the United States Courts may make requests for appropriations for the Commission.".

The SPEAKER pro tempore. Is a second demanded?

Mr. GEKAS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. CONYERS] will be recognized for 20 minutes and the gentleman from Pennsylvania [Mr. GEKAS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. CONYERS].

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. CONYERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the bill now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CONYERS. Mr. Speaker H.R. 1847 makes two minor amendments to the Sentencing Reform Act of 1984, which was enacted last year as one of the crime provisions of the continuing resolution. The bill seeks to resolve some problems that are interfering with the implementation of the Sentencing Reform Act. The act calls for the immediate establishment of a seven-member, Presidentially appointed Sentencing Commission as an independent agency in the Judicial Branch. The Commission is to issue sentencing guidelines that will limit jidicial discretion in the imposition of sentences.

The act requires the President to appoint the Commissioners after consulting with a broad spectrum of groups involved in, or affected by the criminal justice system. The Judicial Conference is required to recommend six persons for the three positions on the Commission that are reserved for active Federal judges.

The establishment of the Commission was effective when the legislation was signed; most other provisions of the act become effective on November 1, 1986. The guidelines, however, will not become effective until 6 months after they have been submitted, along with a report about the guidelines, to Congress. Thus, if the guidelines are to be in place when the rest of the provisions become effective, they must be submitted to Congress no later than May 1, 1986.

Almost 6 months after the act was signed no commissioners have been appointed. While the Commission originally had 18 months in which it could fulfill its task and still have the guidelines in place on time, it now has 13. Since the nominees are subject to Senate confirmation, it seems unlikely that commissioners can take office until late April at the earliest, which leaves the Commission only a year to complete its work.

According to testimony last week at a hearing of the Subcommittee on Criminal Justice, the delay is partly due to the legislation's authorizing only the Commission to submit a budget. The legislation includes no express authorization for funds. Since, unlike most independent commissions, the Sentencing Commission is in the judicial rather than the executive branch, the administration does not believe it is authorized to request an appropriation. Normal congressional procedures require an administrative or judicial request for appropriations. Since there are no funds to pay commissioners, and there are no commissioners, there is no one to request funds. In addition, the Chief Justice earlier declined to submit a list of recommended judicial commissioners because of concerns about the reduction in the number of Federal judges that would result from the appointment of full-time Federal judges as commissioners.

Judge Gerald Bard Tjoflat, testifying on behalf of the Judicial Conference, stated at the hearing that the President will receive a list of recommendations from the Conference within a matter of days. The Department of Justice testified that this will allow the President to complete the final selection process. These developments, however, do not resolve the funding problems. In addition, the Judicial Conference retains its concerns regarding the restriction to active judges.

This bill resolves these problems by authorizing the Administrative Office of the United States Courts to request a budget for the Commission and allowing the President to appoint senior, as well as active, Federal judges to the Commission. I fully expect, however, that the appointment will include one or more active judges. The legislation has the support of both the Department of Justice and the Judicial Conference. We have chosen to bypass committee deliberations and place the bill on the suspension calendar because time is critical if the Commission is to complete its work on schedule. It is my understanding that the other body will take up this bill before the Easter recess.

The failure to have the Commission in operation by this late date raises serious questions about the ability of the Commission to adequately perform its duties in the allotted time. Both Minnesota and Pennsylvania established guidelines commissions in 1978. Min-

nesota's guidelines were not submitted to the legislature until early 1980, and Pennsylvania's early 1981. Washington's commission, created in 1981, submitted its guidelines in 1983 and 1984. New York's Sentencing Commission is also behind schedule. If State experience is any indication, we cannot afford additional delay.

It may well be that, in time, Congress will decide to abandon this new system. Since the majority of the Congress and the President have decided to gamble on its success, however, all of us must join in providing the best environment for these policies to succeed. The Subcommittee on Criminal Justice will continue to monitor the implementation of the act to avoid any further problems.

Mr. Speaker, I urge support of this legislation.

□ 1700

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Speaker, I first wish to put on the record my personal commendation to the chairman of the subcommittee for two reasons. One is the quick and efficient way in which he brought this particular piece of legislation to the floor. And second, for submerging his long-time questioning of the wisdom of having a Sentencing Commission in the first place to the need to implement what the Congress has already spoken on behalf of, this new type of sentencing reform.

I wish to repeat in my own way what the gentleman made absolutely clear, that these are technical changes offered only in the spirit of trying to implement as fast as possible the work of the Sentencing Commission. We could not have foreseen, or perhaps we should have foreseen with all that we do in the Judiciary Committee about the already often stated backlog that the Federal Court System has, and maybe it would have been prudent for us to have provided at the outset that the President should have the right to appoint a senior judge as well as a sitting judge on the Sentencing Commission component of the Federal judges.

We did not, however, foresee that. This bill would cure that lack of foresight in the original designation and crafting of the bill.

And as for the funding, it is a kind of catch-22 which we are attempting here to correct. Since there is no Commission, there is no Commission ready to request funds. Since there are no funds, the Commission cannot operate. That catch-22 is eliminated with the adoption of this bill which allows the court system itself to request the funds in order to get one of its babies going; namely, the Sentencing Commission.

So again I join the chairman of the subcommittee in urging the immediate adoption of the legislation. It will hasten the day when back to this Congress will come a set of sentencing guidelines which will be able, in my judgment, to better suit a violent crime with suitable punishment, and be able to reward the entire system with predictability.

Mr. Speaker, I reserve the balance of my time.

Mr. CONYERS. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey [Mr. RODINO], the chairman of the Committee on the Judiciary. And I thank my ranking minority member for his generous remarks.

Mr. RODINO. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of this legislation which is needed to implement the Sentencing Reform Act and also to commend the chairman of the subcommittee for his timely action here to ensure that that act be fully implemented.

When the Congress enacted the Sentencing Reform Act last year, it placed the Sentencing Commission on a very tight schedule. Sentencing guidelines must be submitted by May of next year if the new system is to go into effect as planned. Yet here we are 5 months after the law was enacted, and 5 months after commissioners could have been appointed, and no one has been nominated. That commissioners have not yet been appointed seriously endangers meeting the statutory timetable. Enactment of this legislation is therefore important.

For over a decade I have advocated—and have introduced legislation to achieve—reform of the Federal sentencing process. I was one of the earliest proponents of Federal sentencing guidelines, and, although I would have preferred enactment of a slightly different guidelines system, I believe that the Sentencing Reform Act, when implemented, will be a considerable improvement over the chaos that currently reigns in Federal sentencing procedures. We must do everything necessary to ensure that it fulfills that potential.

Three positions on the U.S. Sentencing Commission are reserved for Federal judges. The Sentencing Reform Act permits only active judges to fill these positions. This bill would authorize the appointment of senior judges as well. My only concern about this provision was that expanding the field of potential Judicial Conference suggestions for the commission and the time that may be required to process legislation might further delay the submission of the list to the President and slow down the nomination process. A representative of the Judicial Conference has assured the committee, however, that the list will immediately be submitted to the President in accordance with the law as it now stands, including the requirement that the list contain the names of active judges.

It is expected that at least one or more active judges will be appointed by the President. This bill will give the President the flexibility to appoint senior judges as well as active judges, however.

The second problem addressed in this bill has to do with funding. No funds have yet been appropriated for the Commission. The Sentencing Reform Act authorizes only the Commission to request funds, but there are no commissioners yet to do so. This bill authorizes the Administrative Office of the U.S. Courts to request initial funding for the Commission.

This bill is cosponsored by a bipartisan membership of the Committee on the Judiciary. It is supported by the Department of Justice and the Judicial Conference.

I urge my colleagues to join me in voting to get the new sentencing process underway.

□ 1710

It is unfortunate and regrettable that 5 months have elapsed since this bill was enacted into law, and that no commissioners have yet been appointed. Of course, we have no control over that since the commissioners were to be appointed by the President after receiving recommendations from the Judicial Conference. There is a time limit that has been set for promulgation of the guidelines.

The Sentencing Commission proposal that was adopted by the Senate last year contained a provision which required that the judges that be appointed be active judges. So it is not for any lack of any prior warning or notice on our side.

We have been assured and we hope that they will carry out that assurance, that this list now will finally be presented and the President may proceed to make the necessary appointments to begin to carry out the kinds of reforms that we envision.

I want to commend also the gentleman from Pennsylvania for his support. Again, this is a bipartisan measure and I urge the entire body to act in support of this legislation so that we may actually bring about sentencing reform.

Mr. GEKAS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. Mr. Speaker, last year when we managed to pass the Comprehensive Crime Control Act of 1984, through a rather circuitous route eventually, one of the prime parts of that bill was the sentencing reform. This was on the Senate side very much the endeavor of many years

of the senior Senator from Massachusetts, Senator KENNEDY; it was bipartisan over there.

There is, I guess, very little dispute now as to the efficacy of this change. The problem that has ensued is one of some dispute between ourselves and the judiciary branch, but in some ways because of some technical amendments that are necessary to allow for the proper funding mechanism.

I would just tell my colleagues who voted for this major crime legislation last year that the sentencing provisions being among the centerpieces of that legislation, that this simple legislation here, bipartisan in nature, is a means to achieve that which we sought last time.

It is simple in terms of being technical in nature; it does nothing more or nothing less than facilitating the actual Sentencing Commission that we set into motion last year with our vote. It is unfortunate that we need extra legislation; but I think this is absolutely essential. It is unfortunate that we have lost about 5 months, but I think perhaps that won't be overly burdensome to those who are appointed to this Commission, and I would suggest that our colleagues unanimously vote in support of this legislation so that we can get the Commission off the ground, and so we can get the sentencing guidelines that are so necessary to the overall reform of our system in place.

I thank both the chairman of the subcommittee for his timely action, and the ranking member as well.

Mr. CONYERS. Mr. Speaker, I have no further requests for time, so I yield back the balance of my time.

Mr. GEKAS. Mr. Speaker, I yield 3 minutes to my colleague, the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding to me, and I do not rise in opposition to the bill in any way, but I do want to rise and question the procedure by which we are considering the bill here today.

There are a number of people who have indicated over the last several weeks that some of us on the minority side seem to be somewhat sensitive to the kind of procedures used around the House.

This is an example of the procedures that cause some of us to be a little leery at times. As I understand it, this bill was introduced to the House yesterday, and already today we have it out here on the House floor. And it was done last week when the whip schedule was announced; this bill was not on the schedule, so the Members had no advance notification of it; we found out basically today that the bill was going to come up on the floor, and we have some question as to whether or not—that is fair warning.

Now the other day when we had a lot of talk about the minority bringing the McIntyre resolution to the floor, there was much weeping and wailing and consternation on the House floor about the fact that the minority would bring this piece of legislation out on the floor despite the fact that the minority whip had announced the week before that that was a possibility.

Now we have a bill that comes out here onto the floor with no advance notice to the Members. I understand that we are going to have a couple of other bills later on today that are also going to be brought to the floor from the Committee on Ways and Means, also without advance notice, and as a matter of fact, bills which only cleared the committee early this afternoon.

I think that those who find us being sensitive from time to time to the fact that we are required to legislate without indepth knowledge about the matters before us will look at these particular procedures and begin to understand that there in fact is some sensitivity.

I will be glad to yield to the gentleman from California.

Mr. LUNGREN. I understand the gentleman's upset, but I will tell you that this is bipartisan in nature and that of all bills I would object to, this is not the one.

I only wish that the comprehensive crime package had come up as quickly last session. We ought to thank our lucky stars we got this here so fast, and I understand the gentleman's concern, but truly, if I am going to be surprised on anything, I would love to be surprised by things like this.

Mr. WALKER. I thank the gentleman, and I said at the opening of my remarks that I do not intend to oppose the bill; I understand it is bipartisan. I have talked to the gentleman about it.

But it is an example of the kind of problem that we are seeing all too often on the House floor with regard to legislative scheduling. It is an example of the fact the Chair controls the legislative scheduling and often does not even bother to consult with the minority about these things.

We have a couple of bills, as I say, coming on later on today that I understand were scheduled without even bothering to consult with the minority leadership. That is just totally unacceptable.

Mr. GEKAS. Mr. Speaker, I yield myself such time as I may require, simply to point out, as did the gentleman from California to my colleague from Pennsylvania [Mr. WALKER] that in this particular strategy, I am in full complicity because of the urgency of the matter.

I feel that there will be occasions, many occasions just like the one at hand in which the two parties are going to be able to agree to expedite legislation. It remains for watchdogs like the gentleman from Pennsylvania [Mr. WALKER] and others to monitor all of these things to make sure that both the minority is informed and that there is a general agreement reached before expedition of legislation like today's example could be acted upon.

So I am happy that we are able to bring this legislation so quickly to the floor in this instance, this does not mean in any way that I will always concede that this procedure is the best procedure to follow. In this case it is.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan [Mr. CONYERS] that the House suspend the rules and pass the bill, H.R. 1847.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

□ 1720

AUTHORIZING USE OF THE CAPITOL ROTUNDA IN COMMEMORATING THE 100TH ANNIVERSARY OF THE DEATH OF ULYSSES S. GRANT

Ms. OAKAR. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 59) commemorating the 100th anniversary of the death of Ulysses S. Grant, the 18th President of the United States.

The Clerk read as follows:

H. CON RES. 59

Resolved by the House of Representatives (the Senate concurring), That the rotunda of the United States Capitol is hereby authorized to be used on July 23, 1985, from 11 to 11:30 o'clock ante meridiem for a ceremony as part of the commemoration of the anniversary of the death of Ulysses S. Grant, the eighteenth President of the United States. Physical preparations for the conduct of the ceremony shall be carried out in accordance with such conditions as may be prescribed by the Architect of the Capitol.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentlewoman from Ohio [Ms. OAKAR] will be recognized for 20 minutes and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the concurrent resolution before us was agreed to by the Committee on House Administration on March 28, 1985. This proposed ceremony would be part of the commemoration activities of the 100th anniversary of the death of our 18th President, Ulysses S. Grant. The U.S. Army and the Ulysses S. Grant Association

of Illinois are the organizations coordinating these events.

I would like to commend the gentleman from Illinois [Mr. GRAY], who is in the Speaker's chair now. I know the gentleman wants to speak on this resolution and that he has a statement that will be put in the RECORD. As the prime sponsor of this concurrent resolution, I know how much it means to the gentleman and his constituents and, indeed, to the country.

Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to echo the comments of the gentlewoman from Ohio about our Speaker and remind Members that he is a graduate of this illustrious committee, so he knows a good deal on this subject.

There is no objection to this, insofar as I am aware, and the minority urges its prompt passage.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Illinois [Mr. GROTBERG].

Mr. GROTBERG. I thank the gentleman for yielding, and I congratulate the gentlewoman from Ohio [Ms. OAKAR] for presenting the rotunda of the U.S. Capitol as a fitting place for a memorial for the gentleman from Illinois, Mr. Grant—General Grant, the Galena gentleman—whose home is in the district of our colleague, Congresswoman MARTIN.

I have been waiting for an appropriate moment to bring a message to this Congress, and I think I may have found it. Mr. Speaker, I would remind the House that we are in a delicate stage of trade negotiations with the Japanese at this very moment. Their willingness to open their domestic markets to our telecommunications industries, among others, will determine whether protectionist sentiment in the Congress and across the Nation will increase or subside. I hope that the Japanese will allow more importation of American products because free trade can only be beneficial to both countries.

In this very House of Representatives, though, we should do our part to demonstrate the quality of our own American-made goods. During the orientation for new Members of Congress late last year, some of us had the rare opportunity to listen to the U.S. Navy Choir sing in Statuary Hall among the monuments to the great heroes of our country. But something caught my eye that evening which disturbed me. It was the piano that was used to accompany our U.S. sailors. It was not a Wurlitzer, Baldwin, or Steinway. It was a Yamaha. It seemed incredible to me that the U.S. Navy, the heroes of Pearl Harbor, would be using a Yamaha. Now, I know that relations between our two countries have improved over the past 40 years, but it seemed to me to be more appropriate for a U.S.-made piano to be used during that special event in that hallowed American shrine Statuary Hall. I hope that by July 23, 1985, there will be an American-made piano available to our national heroes including those of days past like the memorializing of the General from Illinois on the 100th anniversary of his death I am drafting a resolution to assure that the shrine of American democracy, the U.S. Capitol, shall have the dignity of American-made accouterments for such services, and hope to work with another distinguished Illinoisan, Chairman ANNUNZIO, of the Committee on House Administration to make it possible.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume, only to observe that I am certainly glad those singers were not accompanied by a Yamaha motorcycle.

Mr. Speaker, I yield back the balance of my time.

Ms. OAKAR. Mr. Speaker, I yield myself such time as I may consume to assure my friend, who spoke about the need to have American products, that I very much agree with him. I do want the gentleman to know that I could not agree more, and that is why I feel so strongly about the enormous trade deficit that we have in this country. I certainly support the thrust of the gentleman's remarks.

Mr. GROTBERG. I thank the gentlewoman.

Ms. OAKAR. Mr. Speaker, I have no further requests for time. Again I want to commend the gentleman and all his fine work in expeditiously getting this resolution on the floor of the House.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Ohio [Ms. OAKAR] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 59.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 59, the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

AUTHORIZING USE OF THE CAPITOL ROTUNDA TO COMMEMORATE DAYS OF REMEMBRANCE OF VICTIMS OF HOLOCAUST

Ms. OAKAR. Mr. Speaker, I move to suspend the rules and concur in the Senate concurrent resolution (S. Con. Res. 33) authorizing the rotunda of the U.S. Capitol to be used on April 18, 1985, for a ceremony commemorating the days of remembrance of victims of the Holocaust.

The Clerk read as follows:

S. CON. RES. 33

Whereas pursuant to the Act entitled "An Act to establish the United States Holocaust Memorial Council" and approved October 7, 1980 (94 Stat. 1547), the United States Holocaust Memorial Council is directed to provide for appropriate ways for the Nation to commemorate the days of remembrance of victims of the Holocaust, as an annual, national, civic commemoration of the Holocaust, and to encourage and sponsor appropriate observances of such days of remembrance throughout the United States;

Whereas pursuant to such Act, the United States Holocaust Memorial Council has designated April 14, through April 21, 1985, as "Days of Remembrance of Victims of the Holocaust"; and

Whereas the United States Holocaust Memorial Council has recommended that a one-hour ceremony be held at noon on April 18, 1985, consisting of speeches, readings and musical presentations as part of the days of remembrance activities: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the rotunda of the United States Capitol is hereby authorized to be used on April 18, 1985, from 10 o'clock ante meridiem until 3 o'clock post meridiem for a ceremony as part of the commemoration of the days of remembrance of victims of the Holocaust. Physical preparations for the conduct of the ceremony shall be carried out in accordance with such conditions as may be prescribed by the Architect of the Capitol.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentlewoman from Ohio [Ms. OAKAR] will be recognized for 20 minutes and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Senate concurrent resolution before us is a companion resolution to House Concurrent Resolution 98, which was agreed to by the Committee on House Administration on March 28, 1985.

Mr. Speaker, the U.S. Holocaust Memorial Council established in October 1980 by a unanimous vote of Congress, has each year since 1979 coordinated ceremonies commemorating the victims of the Holocaust during the days of remembrance. Observances are held in Washington, DC, and in States and

cities throughout our great country. These national ceremonies have been addressed each year by the President, by Members of Congress from both parties. This personal involvement of the Nation's leaders underscores a national commitment to honor the memory of the victims. Authorizing the Capitol rotunda for such a ceremony would signify the commitment of the American people that the Holocaust not be forgotten.

Mr. Speaker, I reserve the balance of my time.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the committee's minority supports this bill. The hall should be used for this good purpose. There is a very small amount of time available to us to pass this resolution, so we should do it forthwith, with no additional talking for that purpose.

Mr. Speaker, I yield back the balance of my time.

Ms. OAKAR. Mr. Speaker, I yield myself such time as I may consume just to add that this is an important commemoration that all of us feel strongly about.

I want to commend the gentleman from New York [Mr. SOLARZ], who is the prime sponsor of this resolution. The gentleman could not be here because of committee work.

● Mr. KANJORSKI. Mr. Speaker, I rise in strong support of House Concurrent Resolution 98, legislation which would authorize the use of the Capitol rotunda on April 18 for ceremonies to commemorate the victims of the Holocaust.

In all of human history, there are few darker moments than the systematic murder of millions of innocent persons during the period now known as the Holocaust.

This cold, calculated genocide almost succeeded in wiping out an entire religion and deprived the world of the talents of millions of gifted individuals. Even those Jews who survived the torture and forced labor in the concentration camps had their lives irreparably damaged by the physical and mental abuse they suffered, and by the loss of their loved ones.

Even though the Holocaust took place less than a half a century ago, there are an increasing number of people throughout the world who are unaware of it. Even worse, there are a disturbing number of "revisionist" historians who deny that it ever took place—in total disregard of mountains of documentary evidence.

As Americans, we owe it to ourselves and to our children to make sure that this unpleasant event is neither forgotten, denied, nor repeated. The use of the Capitol rotunda, our most treasured and important national historic site, for this commemoration will help us to avoid the pitfall noted by the 19th century philosopher, George Santayana when he noted, "Those who cannot remember the past are condemned to repeat it."

I urge all of my colleagues to vote "aye" on House Concurrent Resolution 98.●

Ms. OAKAR. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Ohio [Ms. OAKAR] that the House suspend the rules and concur in the Senate concurrent resolution, Senate Concurrent Resolution 33.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Concurrent Resolution 33, the Senate concurrent resolution just concurred in.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

□ 1730

PHASING OUT THE FEDERAL SUPPLEMENTAL COMPENSATION PROGRAM

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1866) to phase out the Federal Supplemental Compensation Program.

The Clerk read as follows:

H.R. 1866

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That (a) CONTINUATION OF COMPENSATION FOR INDIVIDUALS WHOSE ELIGIBILITY BEGINS PRIOR TO TERMINATION DATE.—Section 602(f)(2) of the Federal Supplemental Compensation Act of 1982 is amended—

(1) by striking out "(2) No Federal" and inserting in lieu thereof "(2)(A) Except as provided in subparagraph (B), no Federal"; and

(2) by adding at the end thereof the following new subparagraph:

"(B) In the case of any individual who is receiving Federal supplemental compensation for the week which includes March 31, 1985, such compensation shall continue to be payable to such individual in accordance with subsection (e) for any week thereafter, in a period of consecutive weeks for each of which he meets the eligibility requirements of this Act.".

(b) CONFORMING AMENDMENT TO PERIOD OF ELIGIBILITY.—Section 605(2) of such Act is amended by inserting "(except as otherwise provided in section 602(f)(2)(B))" after "April 1, 1985".

(c) MODIFICATION OF AGREEMENTS.—The Secretary of Labor shall, at the earliest practicable date after the date of the enactment of this Act, propose to each State with which he has in effect an agreement under section 602 of the Federal Supplemental Compensation Act of 1982 a modification of such agreement designed to provide for the payment of Federal supplemental compensation under such Act in accordance with the amendments made by the Act. Notwithstanding any other provision of law, if any State fails or refuse within the three-week period beginning on the date the Secretary of Labor proposes such modification to such State, to enter into such modification of such agreement, the Secretary of Labor shall terminate such agreement effective with the end of the last week which ends on or before the close of such three-week period. Pending modification (or termination) of the agreement, States may pay federal supplemental compensation in accordance with the amendments made by this Act for weeks beginning after March 31, 1985, and shall be reimbursed in accordance with the provisions of the Federal Supplemental Compensation Act of 1982.

The SPEAKER pro tempore. Is a second demanded?

Mr. CAMPBELL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 20 minutes and the gentleman from South Carolina [Mr. CAMPBELL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Federal Supplemental Compensation [FSC] Program expires at the end of this week. If we fail to act before we adjourn, checks to 340,000 long-term unemployed men and women will suddenly stop.

This temporary program was created in the depth of the 1982 recession. It has been extended twice since the original enactment. The most recent extension expired the end of March.

Being out of work in America—this land of opportunity—often carries the possibility of living near the poverty line. Yet, with the recession officially over and many areas prospering, unemployment seems to have all but disappeared as a political or economic concern. We seem to have lost sight of the faces behind the unemployment numbers.

Mr. Speaker, H.R. 1866 is little more than a gesture to the long-term unemployed. It merely allows those people who are on FSC this week to receive the remainder of their entitlement. No new claimants will be permitted after this week.

I understand the sentiment of those Members who say the House should do

more, even if it means a veto from the President or silence from the Senate. I know the political arguments in favor of the Democratic-controlled House staking out its position on this issue and confronting the President. If political one-upsmanship were the only goal, I would have supported that course.

But to risk the remaining week of benefits for more than 300,000 unemployed, to make a political point, is no longer an option at this 11th hour. For Congress to tangle this issue in politics at this point makes little sense.

I ask my colleagues of both parties to support this very small gesture to the Nation's long-term unemployed.

[April 2, 1985]

SUMMARY OF H.R. 1866

AMENDING THE FEDERAL SUPPLEMENTAL COMPENSATION (FSC) PROGRAM

Present law

The Federal Supplemental Compensation [FSC] program provides 8, 10, 12, or 14 additional weeks of unemployment benefits to unemployed workers who have exhausted their regular State benefits and any Extended Benefits [EB] to which they were entitled (the permanent EB program provides 13 additional weeks of benefits but is triggered on only in Alaska, West Virginia, Idaho, and Puerto Rico).

The number of weeks of FSC payble in a State is based on the State's insured unemployment rate [IUR], a measure of those people in the State claiming regular State unemployment benefits during the most recent 13 week period. States can qualify for the 14 or 12 week tiers based on either their current IUR or their average IUR since January 1, 1982. 10 and 8 week tiers are based solely on the current IUR.

The last week for which FSC can be collected is the week *ending* on Saturday, April 6, 1985. There is no provision in current law for "phasing out" recipients. Benefits cease after the week ending April 6, 1985 regardless of the number of weeks an individual has collected of his original entitlement.

H.R. 1866

Under the bill, individuals who are currently on the FSC program, that is individuals who claim FSC benefits for the week March 31—April 6, will be allowed to collect the remainder of their FSC benefits. No new claimants would come on the program after April 6, 1985.

Cost: CBO estimates increased unemployment compensation outlays of $160 million. Due to reduced AFDC and food stamp outlays and additional revenues, CBO estimates a net budgetary impact of $140 million.

Mr. Speaker, I have no requests for time, and I reserve the balance of my time.

Mr. CAMPBELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support the Suspension of the Rules in order to pass H.R. 1866, a bill to phase out benefits for current claimants under the Federal Supplemental Compensation Program.

FSC began in September 1982 as a temporary program to continue unemployment benefits for the long-term unemployed. At that time the nationwide unemployment rate was 10.1 percent and growing. The program was scheduled to expire several times since its creation but we extended its operation several times. The last extension expired on March 31, 1985.

In contrast to the recessionary economy which led us to create the FSC Program, today's nationwide unemployment rate is 7.3 percent. There are 7.2 million more persons employed today than were employed when the program began in 1982. Because of the economic recovery a further extension of the FSC Program is not warranted.

There may exist some local pockets of high unemployment caused by structural changes in the economy. The long-term, structurally unemployed can benefit from the training and relocation assistance offered in programs such as title III of the Jobs Partnership Training Act.

The bill today would allow an orderly phase out of the FSC Program which expired March 31. The current law contains no phaseout provision. All benefits end abruptly. The bill before us would allow persons who qualified for FSC before it expired to receive all the benefits which they expected to receive. It is a matter of fairness and equity that these persons receive the benefits which we led them to believe they would receive. No new claimants would be added to the program.

Mr. Speaker, the legislation protects persons who were on the FSC rolls from an abrupt loss of their benefits. I support the passage of this bill.

Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. I thank the gentleman for yielding me this time.

Mr. Speaker, we have often extended this emergency third tier level of federally supported unemployment compensation benefits. It is time for it to expire, and this bill allows it to expire.

It will cost $160 billion, which is unbudgeted, and will result in additional deficit in fiscal year 1985. During the committee debate, we talked about extending it. On the other hand, there were some of us who believed it should expire forthwith without the extra $160 billion.

In the end, the committee made the difficult decision that equity required that we pay off those people who were in the program now; that is, those who become eligible through April 6, and who would have had additional benefits coming.

I very seldom vote for unemployment compensation bills, but I think this one deserves the support of the House.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee [Mr. FORD], the chairman of the subcommittee.

Mr. FORD of Tennessee. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in full support of the bill that is before the House today. We reported this legislation from the subcommittee in a different form. We supported legislation that would have called for a 3-month extension of the FSC Program along with a phaseout provision of the program itself.

We extended the program some 18 months ago, and we failed to put a phasein provision within the bill. Therefore, we were compelled to come back at the expiration to deal with a phaseout program only because of the threat to the veto of the bill from the President himself, and whether or not the Senate would take any action. The subcommittee felt that a 90-day extension for those victims who will be taken off the 26 weeks of State unemployment benefits, and knowing that the extended benefits program under reconciliation only covered three jurisdictions, and therefore we felt that the 350,000 people receiving the benefits and the 45,000 people per week triggering off the State unemployment benefits needed some type of relief, and to say that we are going to phase the program out, we are going to pick up the new starts with new claimants, and at the same time notify those recipients of State unemployment benefits that they would no longer be entitled after 90 days for the Federal supplemental compensation benefit.

Athough that legislation was reported out of the committee, an amendment was offered today at the full committee level, I did not support that amendment, but I am in full agreement with the full committee chairman today in saying that we should move this legislation under suspension today to make sure that those who are recipients of FSC will continue to receive those weeks payable under the program. We will phase the program out at the end of the 8, 10, or 12 weeks that a person would be entitled to.

Mr. CAMPBELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to take one moment, if I might, to congratulate the chairman of the subcommittee and the chairman of the full committee and to say to them from the minority side that it was a pleasure to work with them. We had some differences of opinion; the process worked well; they worked well, and we were able to expedite this and there will not be anyone that is cut off of their benefits because of lack of action by either the subcommittee, the full committee or this body.

Mr. Speaker, I yield 3 minutes to the gentleman from Illinois [Mr. MICHEL]. the distinguished minority leader.

Mr. MICHEL. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of this legislation. I happen to represent a district where the effects of chronic unemployment are still being felt. I represent people who are still looking for work as diligently and as aggressively as they can, but the work simply is not there.

In my opinion, there is a need for this extention. The legislation does not go as far as many of us would like. I have advocated the reform of the Unemployment Compensation Program so that we could target in on those areas within a State with the highest unemployment. I am still hopeful that over the long term we can work with the administration toward getting them to turn to pick up on that proposal and that idea.

The legislation addresses the need for extension with the need for fiscal restraint. This legislation addresses the reality that the President will not sign legislation calling for millions more in assistance. The choice is either to showboat, I guess, with something more or get a bill passed and signed with something less. I prefer the latter.

I hope my colleagues will join me in supporting the measure and I have to express my personal appreciation to the distinguished gentleman from South Carolina and the chairman of the committee who have worked so hard to get the bill to the floor.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentlewoman from Connecticut [Mrs. KENNELLY].

Mrs. KENNELLY. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of H.R. 1866 which will allow for the continuation of Federal supplemental compensation to unemployed workers now receiving this Federal assistance.

This bill is the least we can do. It is not all that we should do. This bill keeps current recipients from abruptly losing their assistance. It does nothing more.

This bill is not an extension of the program. It does nothing for the unemployed who will exhaust their State unemployment insurance at the end of this week or at any time in the future, as we should be doing. This bill does nothing to reform the unemployment insurance system in order to make it more responsive to pockets of high unemployment or to the needs of the increasing numbers of long-term unemployed workers.

I am disappointed that we only have this limited bill before us today. We should not be blind to the serious problems which remain in our economy. We should be encouraging innovative job training programs which will help the unemployed find new jobs. We should be building the link between retraining and unemployment compensation. We should be maintaining our investment in job training and employment programs—rather than trying to cut them back by nearly a quarter of last year's funding, as the administration recommends in its budget message.

This legislation does none of this but for the men and women who are depending on Federal supplemental compensation benefits now, this legislation is vital. I urge my colleagues to vote in favor of its passage.

□ 1740

Mr. CAMPBELL. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. I thank the gentleman for yielding this time to me.

Mr. Speaker, I also wish to add my voice to those who are commending the committee for their responsible and responsive action, but I would like to point out that I think that we are just offering, really, a band-aid solution for a hemorrhaging problem and that problem is the problem of displaced workers in America.

Despite the fact that we are reading all these statistics that are pumped out downtown every week indicating that maybe the economy is really moving forward in a direction we want it to, and I think there are a lot of positive indicators, the fact remains that we still have across America 2 million American people who are displaced workers and we are not adequately dealing with their problem.

My colleague, the gentleman from Illinois [Mr. DURBIN] and I, along with 62 of our other colleagues on both sides of this aisle, are identified with a measure that is designed to tackle the problem of displaced workers in America. I would urge the committee, in its deliberations, to give the urgent attention required to the proposal to establish in America individual training accounts.

They make a lot of sense. It is a voluntary action involving employees and employers. It would set up a program under which each would contribute eight-tenths of 1 percent, or $250 a year, whichever is less, to an individual training account. The moneys would be handled by the Department of the Treasury. They would be invested in high-yield securities. They would continue to draw interest. The contribution from the employee and the employer would continue up until that time when the $4,000 mark had been reached and then there would no longer be any contribution.

The ideal situation would be that the employee would never have to use the individual training account, but we know by experience that the average worker in America today is probably going to change jobs five or six times, and unfortunately, most often that job change comes not because of any desire but because it is forced upon the worker.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. BOEHLERT. I yield to my distinguished colleague, the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Speaker, I want to congratulate the gentleman on his remarks in identifying a piece of legislation that we ought to be dealing with. I have the privilege of co-chairing a task force with the gentleman on employment and training and as the gentleman has stated, Congresswoman KENNELLY and others, we have not really dealt with the issue of unemployment comprehensively in this country.

We are going to have to deal with that soon. We cannot forget the jobless in passing a bill which I consider not enough. I am sorry, and I want to state this publicly, that the original bill was not passed out by the Committee on Ways and Means. But I look forward to working with the gentleman in getting the individual training account bill passed in a bipartisan spirit, and I want to again congratulate the gentleman on the fine work that he does.

Mr. BOEHLERT. I thank my colleague.

Mr. Speaker, I think it is extremely important that we recognize there are 2 million displaced workers in America today. We cannot forget their needs. We cannot come up with 3 or 6 or 9 or 12 months of temporary solutions to that very real problem. Let us examine the concept of individual training accounts.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. OBERSTAR].

Mr. OBERSTAR. I thank the gentleman for yielding this time to me.

Mr. Speaker, I do want to compliment the Committee on Ways and Means for bringing this legislation to the floor. Two weeks ago any FSC extension was dead. There was no hope at all for extension of the Federal Supplemental Compensation Program and now we have a liferaft for some 340,000 Americans who are the neediest among those who are out of work; a liferaft, but a frail one at that.

The legislation does not include reform such as substate triggers or the sliding scale proposal that has been offered by our colleagues, the gentleman from Pennsylvania, Mr. CLINGER, and the gentleman from Ohio, Mr. PEASE. It does not include any long-range proposals for improving the unemployment compensation program that have been discussed in repeated hearings of the subcommitttee chaired by the gentleman from Tennessee.

Earlier, his bill was described as a minimum program. Frankly, it is barely a minimum. It is the least that we can do, and it is the very least. This

is not the House's finest hour. When we have 8½ million people out of work, when we have more people out of work and out of employment compensation longer than at any time in the entire postwar era of this country, and this House is not moving out aggressively to deal with the problem of the long-term employed who, through no fault of their own, have lost their jobs, who are trying to keep family and home intact, who are trying to find other work, who are trying to get training to pursue new employment opportunities, and all we are throwing out is a bone to those who are about to run out of their unemployment compensation, saying, "Here, just muddle along a little while longer," then we are not practicing the quality of social justice the American people expect, especially from those of us on this side of the aisle.

To those whose employment compensation benefits are about to run out, to those hundreds of thousands of people all across this country who have been devastated by the flood of imports just discussed a little while ago across this country, who are going to be hit hard for longer periods of time than we have ever seen in this country as the decline of industrial America continues, people who will exhaust their unemployment benefits in the weeks ahead, this bill offers no hope. This House offers no hope. It just says this is it. That is all. Forget it. No more FSC.

The Federal Government ought to be a partner in providing extension of benefits, a partner with the States. It ought to be providing assistance to those workers whose lives are adversely impacted by this national economy. This is not an economy of individual States. It is the economy of the whole country, and that is what we are talking about when we come forward with a program of supplemental compensation benefits. If we do not have the vision and the courage, the strength to stand up to a President who drew his line and said, "No I do not want any more benefits for the unemployed," then we do not deserve to be here. We ought to be offering and exercising an independent judgment in this body, and that judgment ought to be in favor of those who are the most vulnerable, who are the most hard hit among us. We ought to be able to provide help for those in the shoe industry who have lost their jobs, and those in the machine tool industry, and the steel industry, in textiles, wood fiber, autos, and many other industry sectors including, as we are seeing, with a $6.8 billion trade deficit, electronics, they too, in that industry are losing ground. We ought to be offering at least a 3-month extension of FSC, with reforms, instead of apologizing for doing so little.

Mr. CAMPBELL. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in reluctant support of this legislation—a bill which provides only a phaseout for current Federal supplemental compensation assistance.

Mr. Speaker, I realize that the time constraints with which we are faced make this legislation necessary. Many individuals currently receiving FSC are unaware that their benefits may expire, and this phaseout at least assures that they will receive the benefits to which they expected to be entitled.

Unfortunately, this legislation does not provide any relief to individuals who become employed after April 6. Those individuals will receive only their State unemployment entitlement—and since only three jurisdictions are triggered on the Extended Benefits Program, we provide no relief today for the long-term unemployed.

These are the people who I'm concerned about. These are the people who live in my congressional district—they are people, not numbers. In the very near future, I would urge the Ways and Means Committee to report legislation to address the problems with extended benefits.

I have introduced legislation—H.R. 646—which goes a long way toward resolving this problem, and I want to thank the distinguished subcommittee chairman, Mr. FORD, for holding hearings earlier this year on my bill. I understand that the subcommittee legislative recommendation is similar in many respects to my bill. I commend Mr. FORD for his efforts on behalf of the long-term unemployed, and again urge the Ways and Means Committee to report leglislation soon to help alleviate the concerns of these individuals.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio [Mr. PEASE].

□ 1750

Mr. PEASE. Mr. Speaker, I, too, rise in reluctant support of this bill. I do support it because it will provide continued benefits for some 340,000 long-term unemployed workers who otherwise would lose all their benefits as of this weekend, and yet I must express great disappointment on two counts.

First of all, there is no 3-month extension of FSC as had been recommended by the Subcommittee on Unemployment Compensation.

I would like to make it clear and I think we all ought to understand that the reason there is no 3-month extension or 6-month extension, which we would have preferred, is the opposition from the White House. President Reagan has definitely set the parameters for our discussion of extension of FSC. The fact that we have a truncated bill on the floor today, which only goes a little way toward what needs to be done, is due to opposition from the White House.

This is not a bill that we think ought to be passed. This is not what we think needs to be done. This is what we think can possibly be signed by the President.

Second, I am disappointed because this bill contains no reform. We need to move ahead in the months ahead, combine EB and FSC into a single program that makes sense, talk about substate triggers, talk about retraining and job search and all the other things that would make unemployment compensation at the Federal level a simple, integrated, easy-to-understand responsive system.

I am going to be working on that legislation over the next couple months. I invite my colleagues to join me in that endeavor.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. PEASE. I would be happy to yield to my distinguished colleague.

Mr. VENTO. Mr. Speaker, I want to commend the gentleman for his work on this and for the types of reform that he has been trying to achieve.

I also want to commend my colleague, the gentleman from Minnesota [Mr. OBERSTAR] for the work he has done.

I am disappointed with this. I think that there is a pragmatic decision that has been made here with which I do not agree. I think we ought to move out of this House with the type of legislation that we feel is necessary to deal with the type of structural unemployment problems that are occurring.

Extended unemployment would be helpful and should be extended until more perfect programs are in fact in place.

The best that can be said for this measure is that it will complete the benefit pay to those who are currently eligible and therefore I will cast an unenthusiastic vote for this measure.

Mr. CAMPBELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have said that this is an effort to help those who are expecting benefits, who are already receiving benefits. I think that it would be very beneficial for us to point out some of the facts of unemployment, though, since we have not yet undertaken reform.

I would like to say that the minority is very interested in reform. We discussed substate triggers. We did not have the data that was available to us to undertake that. That has been recommended by the minority leader as well as many others. We are interested in doing that and undertaking reform, but we are at the 11th hour. The other

body has passed this legislation. Were we to have brought out a reform bill or an amended bill, you would have doomed those people who are now receiving benefits to a loss of the benefits they are now getting; so we brought out what could be done. It was a matter of doing what could be done.

Now, this I should point out to you is not a new thing on FSC. FSC started in 1982 on this cycle as a part of TEFRA when the total unemployment rate in this country was over 10 percent. It is almost 3 percentage points lower than that. We have spent in the process of trying to alleviate some of the pain, and you can never alleviate all of it, some of the pain of those who are unemployed, over $9.4 billion in the process.

We have a program that has been extended four times already. Were we to have extended it again, we would have extended it five times.

There are over 7 million more people working today than when we put in FSC in 1982.

It is not perfect. There is no question, but I think all the facts ought to be on the table when we discuss this legislation and those people who were on the system and expecting their benefits were the ones that we felt very strongly, I did and others on my side, and sought to convince the administration and others, should not be cut off from that which they were already eligible for.

I would point out that a similar program in 1978 was phased out at a lesser rate than we are now doing and that the benefits of those who are on the program would be exactly the same as they are now.

I did not wish to belabor this, but I wanted to point out in some detail that this does not signal the end of reform, but it is very difficult to reform at the 11th hour and the 59th minute. This side does not schedule to mark up reform and the distinguished chairman of the subcommittee has indicated that he wants to pursue reform. The minority is interested in working with both the chairman of the subcommittee and with the distinguished gentleman from Ohio, who has done so much work on it; so this should not be construed as an abandonment of reform. It should be construed as the best that is possible to help those who are now about to be cut off, in fact have been cut off, and we are now letting them get the rest of their benefits. I just wanted to put it in perspective.

Mr. FORD of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL. I am glad to yield to the gentleman from Tennessee.

Mr. FORD of Tennessee. Well, I thank my colleague for yielding, and I say to the gentleman from South Carolina [Mr. CAMPBELL], I want to thank the gentleman for his able assistance on this particular bill that we have on the House floor today and offering the amendment before the full committee, although it was not the bill that we reported up; but I am glad to hear the gentleman say today, and the gentleman said it in the committee, that this is not the end, that the gentleman would like to see the subcommittee move on some type of reform measure. We do, in fact, have the reform measure, EB and FSC before the Ways and Means Committee, but it would be the intent of the Chair to go back to the subcommittee and look at the high pockets of unemployment in our States and talk about the substate triggers which the gentleman has talked about, as well as a reform measure that would in fact respond to a downturn in the economy.

I look forward to working with the ranking minority member of the committee and hopefully we can bring a bill and fashion a bill for the House floor within the next 60 to 90 days.

Mr. CAMPBELL. Well, Mr. Speaker, I thank the gentleman. I would say that I think he has put his finger on the problem. There are pockets that have to be addressed and we have not yet devised a mechanism to address those pockets of structural unemployment. We have other programs, but not within this system, and the blanket system itself, this extension, is not a way to address pockets. We must work on that system and I look forward to working with the gentleman in that regard.

Mr. PEASE. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL. I am happy to yield to the gentleman from Ohio.

Mr. PEASE. Mr. Speaker, I thank the gentleman for yielding.

I, too, would like to commend the gentleman from South Carolina as the ranking member of the subcommittee. He has worked long and hard and I think very sincerely to try to fashion some good legislation. I, too, look forward to working with the gentleman to try to come up with a reform package over the next several weeks.

My disappointment is that we cannot do more at this time. I realize it is the 11th hour, but I suspect that even the workers who are now on FSC and who are about to lose their benefits would be willing to endure a break of 1 or 2 weeks if we were to go ahead now and put on the floor the kind of a bill that we really think ought to be here.

I think it is just useful to put down for the record that it is opposition from the White House that puts us here now at this time unable to go forward with any more than a barebones continuation for those who are on the program.

Mr. CAMPBELL. Mr. Speaker, I thank the gentleman. I have enjoyed working with him. I will say again, the other body has passed this exact legislation in a bipartisan effort, an effort was put forth for reform, I understand, in that body in committee and was voted down overwhelmingly, recognizing that this was as much as was possible.

Ms. OAKAR. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL. Certainly, I would be happy to yield.

Ms. OAKAR. Mr. Speaker, I want to thank the gentleman for complimenting the gentleman from Ohio. Those of us from his home State know that one of his passions in this Congress is the unemployed and it was very, very refreshing to hear the gentleman from South Carolina compliment the gentleman from Ohio. He deserves that praise and I just wanted to extend my gratitude.

Mr. CAMPBELL. Well, Mr. Speaker, I thank the gentlewoman.

I would say that the gentlewoman from Ohio is one of the hardest working Members of the committee. We may from time to time have differences of opinion, but never have we lacked the effort to try to work them out.

Mr. Speaker, I reserve the balance of my time.

□ 1800

Mr. ROSTENKOWSKI. I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I represent a district that has lost 55,000 steel jobs. The highest unemployment rate for the density of population in the country is in my district.

What I see here is a position where sooner or later we are going to have to take the President to task here in Congress because if there is going to have to be a fight, let that fight come, because there is very little job training moneys. And this administration wants to eliminate the Job Corps.

Ohio certainly is not experiencing this great economic uplift.

I think this is a band-aid piece that we kowtow to the President, and I am forced to vote for it and do not like voting for it. I think that the efforts of the gentleman from Ohio Mr. PEASE, should have gotten more consideration. And I think that this Congress is going to have to deal with the structurally unemployed, because we are reaching the poverty levels of the 1960's. I think everybody is familiar with the social dynamics that occurred in this country at that time, and not everybody is eating a piece of pie.

So I think we have to consider that and not be put into the position of being afraid to tackle the President or fight this President. Maybe it is time we tell him to get his best hold on

these issues and bring it to the floor, rather than to sit back very passively.

So I really appreciate what my colleague from Ohio has brought forth and his attempts were great attempts, and I was proud to cosponsor those attempts.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. LEVIN].

Mr. LEVIN of Michigan. I thank the chairman.

I thought last Friday I might go to the unemployment lines in Michigan and see who is on FSC. I met a gentleman 64 years old, an engineer. His response was, "No one," he has been looking for work, "will provide work because of my age. Unemployment," he said, "is my only source of wage replacement."

And then I met a gentleman who is 42 years old. He has a medical problem, but he is not entitled to workmen's compensation. Here is what he said:

> I don't know what I am going to do when my unemployment runs out. I have been told that I am too qualified for training under JTPA because I have too many skills.

We need reform, but we do not need retreat. And I respect very much the chairman of the committee and his efforts to try to probe how far we can go. It may be that this is the best that the President will buy.

But I think we have to understand who these workers are and we have to understand what training is available and what is not. And we have to understand whether the administration is talking out of both sides of its mouth, which it is, when on the one hand it says no extension, go to training, but then cuts training programs by tens of millions of dollars.

For many workers, I am afraid, this extension, especially those who are not yet on FSC, will not help at all. It is going to be a lame excuse.

I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. DURBIN].

Mr. DURBIN. I want to thank the gentleman from Illinois and commend him and the gentleman from Tennessee for their fine efforts in this legislation.

But I would also like to call to the attention of the Chamber the fact that has been stated and restated during the course of this debate, that what we are doing today is a compassionate thing, but it frankly is not addressing the major problem facing this country.

The Department of Labor, the Bureau of Labor Statistics did a survey of the American workers who had lost their jobs between the years 1979–83, and only took those workers who had previously worked for 3 years before they lost their jobs, the classic dislocated workers. They found 5 million of them over the last 4 years; 60 percent of those 5 million have been reemployed. The other 40 percent have not. Many have dropped out of the work force, many are sitting there still looking for jobs.

What we are doing today is providing food, but we are not providing hope. My colleague from New York, Congressman BOEHLERT, has talked about legislation, which I have cosponsored with him on individual training accounts, which tries to address this problem.

But I would like to call the attention of the Chamber to one statistic to keep in mind if you want to measure our effort in training and retraining people. At the height of the success of the GI bill in 1947 our country was spending 1 percent of our gross national product in retraining and educating our returning veterans, about $4 billion. Today, if we spent 1 percent of our gross national product on training and retraining workers we would have to spend in today's dollars $30 billion to match the level of the GI bill in 1947.

How much are we spending in total? It is $4 billion to $5 billion. We are still stuck at the same figure, while the problem increases.

I would hope that we will go beyond this compassionate move today to speak to hope, to speak to the future, to speak to restoring training and education programs, to put people back to work.

I yield back the balance of my time.

Mr. CAMPBELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

I realize what we have here is a difficult decision. It was a difficult decision in the Ways and Means Committee. It is difficult because, whenever you let a temporary unemployment compensation program come to an end, you know there will still be unemployed workers who could benefit from another extension.

I think, however, that we have to understand that there have been clear signals from the White House and from the other body that they would not entertain legislation that extended the program beyond the phase-out contained in the committee bill before you today. So we had to make a tough decision. We made a decision to at least provide that benefits would continue for those presently on the FSC Program. In other words, we have provided for an orderly phase-out of the program.

We should look at other programs for the long-term unemployed. But, the decision we face today is do we provide an orderly phase-out, which will help thousands of workers; or, do we go for another extension that, we know, will never become law?

The choices we faced today were whether to help a few or to help no one. The committee decided to extend help to the few still collecting FSC. I fully expected that, in the near future, the committee will consider pending proposals that will improve our unemployment compensation programs.

I have no further requests for time, Mr. Speaker.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois [Mr. ROSTENKOWSKI] that the House suspend the rules and pass the bill, H.R. 1866.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

● Mr. FEIGHAN. Mr. Speaker, half a loaf, they say, is better than none. Reluctantly following this logic, I and many of my colleagues voted for the bill passed by the House today to extend the life of the Federal Supplemental Compensation [FSC] Program for a week and to guarantee full benefits to those already participating in the program.

I had hoped that the Ways and Means Committee would have the courage to pass a 3-month, or at worst a 30-day, extension of FSC benefits. Working under the shadow of President Reagan's threatened veto of such an extension, and fearful of opposition in the Senate, the committee instead chose the path of least resistance.

Last week, the House was willing to spend $1.5 billion for 21 unneeded missiles. Yet today the Ways and Means Committee could not bring itself to report a 3-month extension of unemployment compensation that would have carried a price tag of $260 million.

Congress established the FSC program in 1982 in response to the high employment caused by the recession and in response to the slashing of the Extended Benefits [EB] program carried out as part of the 1981 Reagan tax cuts. With a national unemployment rate still standing at 7.4 percent, the need for the FSC Program persists. Despite the President's uncanny ability to portray the current employment situation in a positive light, the fact remains that the unemployment rate today is at least as high as when he took office. More than 10 million people remain out of work. Nine States and at least 21 metroplitan regions still have unemployment rates in excess of 10 percent.

In my home State of Ohio, the unemployment rate stands at close to 9 percent. Many of the workers who make up these statistics will not be able to go back to work with the next

upward swing of the business cycle. They are dislocated workers whose plants and industries have shut down or relocated. Except for California, Ohio has the highest percentage of long-term unemployed in the country.

For those already receiving FSC benefits, today's bill offers a few additional weeks of relief. For those who would have become eligible for the FSC program after April 6, the bill offers nothing. I can only hope that the committee and the House will now take action on my colleague, Mr. Pease's bill to revive the FSC Program in a modified form, with benefits targeted more precisely to high unemployment States and regions.

Whoever said half a loaf is better than none, Mr. Speaker, probably wasn't on the receiving end.●

● Mr. FORD of Michigan. Mr. Speaker, I rise in reluctant support of this legislation which phases out the Federal Supplemental Compensation [FSC] Program. I am disappointed that the Committee on Ways and Means failed to approve an extension of this program in the face of bitter opposition from the White House.

During his press conference last week, the President stated in response to a question on FSC that the proper place for unemployed workers was in programs of the Job Training Partnership Act [JTPA]. What the President neglected to mention is that his fiscal year 1986 budget proposed cuts of 55 percent from the fiscal year 1985 level for title III of the JTPA, which provides employment and training assistance for dislocated workers. Apparently, in the President's vision of the American economy, there are no dislocated workers and other long-term unemployed. In Michigan, this is simply not the case.

Although this legislation will enable 17,000 unemployed workers in Michigan who are currently receiving FSC to continue to receive such much needed assistance, no newly eligible unemployed workers will be able to receive FSC. Clearly, this will place additional burdens on already strained State and local services.●

● Mr. WEISS. Mr. Speaker, I will vote in favor of the proposed extension of Federal Supplemental Compensation [FSC] Program, but only with grave reservations.

I believe that what we are accomplishing today amounts to nothing more than a token effort on behalf of hundreds of thousands of unemployed workers across our Nation. First the victims of an ill-advised economic policy that threw millions out of work, and now the victims of a heartless budget policy that threatens to eliminate training programs and to cut off their unemployment benefits, these workers deserve far more from the country to which they have contributed throughout their lives.

The truth is that elimination of the FSC program might be conceivable if, as the Reagan administration claims, the benefits of the economic recovery were extending to everyone in the Nation. But the hard facts demonstrate that this is far from the case. The official figures, which only gloss over the extent of the unemployment problem, show that 8.9 million workers remained unemployed in February. If we add to that number the millions of Americans who are involuntarily working parttime, and the millions who are discouraged and have given up looking for work, the actual unemployment level rises to more than 15 million.

Thus, it is clear that unemployment continues at epidemic levels, sapping our economic strength and devastating the lives of individual Americans who desperately want to contribute their work to our Nation. To these millions of Americans, economic recovery has meant nothing more than economic tragedy. And the failure of the President and the Congress to adequately meet the need of this embattled population is nothing short of a disgrace.

The FSC Program expired on March 31, and if no extension is approved, final benefits will be paid on April 6. This means that Federal unemployment benefits will be eliminated for most Americans on that date. The permanent program of extended benefits [EB], which was gutted in 1981, now serves only two States. The overly stringent standards for participation preclude States like Michigan, Mississippi, and Indiana, with unemployment rates in excess of 10 percent, from participating. The elimination of the FSC, a stopgap program enacted in 1982 to serve the victims of the recession, will throw 325,000 current recipients off the rolls.

Last week, the House Ways and Means Subcommittee on Public Assistance and Unemployment Compensation approved a measure providing for a 3-month extension of the FSC. While benefits would have been limited for those who entered the program after April 6, new beneficiaries would have continued to be accepted into the program. However, the full committee has backed away from this very limited commitment. The bill they have reported will do nothing more than allow current recipients to exhaust the benefits to which they would have been entitled had the program not expired. This means that the entire FSC will be phased out in the coming weeks.

I will vote for this bill because it is better than nothing. But there is little else I can say in its favor. It must be apparent, to all who have taken the time to think about the toll of continued epidemic joblessness in this country, that we urgently need to mount a comprehensive attack on this problem that goes far beyond anything we are now doing. We need to approve emergency aid for the long-term unemployed that does not arbitrarily exclude those who exhaust their State benefits after April 6. We need to reform the permanent Extended Benefits Program to keep in place a reliable system of ongoing aid to areas with problematic unemployment. And we need to seriously address the problem of underfunding for crucial job training programs that will help workers establish themselves in paying jobs.

I believe it is a grievous error to allow the threat of a Presidential veto to force us to respond to the serious crisis of long-term unemployment with little more than tokenism. This bill certainly does not do justice to the working people of this Nation, who have been forced to swallow bitter pill after bitter pill by an administration that seems intent on ignoring the reality of the crisis they have engendered.

I greatly hope that increased attention will be paid to the issue of unemployment in the coming weeks of this legislative session, and I strongly urge my colleagues to support additional aid for this disenfranchised group, which they both need and deserve.●

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

REPEALING CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS ADDED BY TAX REFORM ACT OF 1984

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1869) to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes.

The Clerk read as follows:

H.R. 1869

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REPEAL OF CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS, ETC.

(a) CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS.—Subsection (d) of section 274 of the Internal Revenue Code of 1954 (relating to substantiation required) is amended by striking out "contemporaneous", and the Internal Revenue Code of 1954 shall be applied and administered as if such word had not been added to such subsection (d).

(b) PROVISIONS RELATING TO RETURN PREPARERS AND NEGLIGENCE PENALTY.—Paragraphs (2) and (3) of section 179(b) of the Tax Reform Act of 1984 are hereby re-

pealed, and the Internal Revenue Code of 1954 shall be applied and administered as if such paragraphs (and the amendments made by such paragraphs) had not been enacted.

(c) REPEAL OF REGULATIONS.—Regulations issued before the date of the enactment of this Act to carry out the amendments made by section 179(b) of the Tax Reform Act of 1984 shall have no force and effect.

SEC. 2 REVISED SUBSTANTIATION REQUIREMENTS.

(a) REQUIREMENT OF WRITTEN EVIDENCE.—Subsection (d) of section 274 of the Internal Revenue Code of 1954 is amended by striking out "(A) the amount" and inserting in lieu thereof "or sufficient written evidence corroborating the taxpayer's own statement (A) the amount".

(b) SUBSTANTIATION REQUIREMENTS NOT TO APPLY TO CERTAIN VEHICLES WITH LITTLE PERSONAL USE.—

(1) Subsection (d) of section 274 of such Code is amended by adding at the end thereof the following new sentence: "This subsection shall not apply to any qualified nonpersonal use vehicle (as defined in subsection (i))."

(2) Section 274 of such Code is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) QUALIFIED NONPERSONAL USE VEHICLE.—For purposes of subsection (d), the term 'qualified nonpersonal use vehicle means any vehicle which, by reason of its nature, is not likely to be used more than a de minimis amount for personal purposes."

SEC. 3. EXEMPTION FROM REQUIRED INCOME TAX WITHHOLDING FOR CERTAIN FRINGE BENEFITS.

Section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) is amended by adding at the end thereof the following new subsection:

"(s) EXEMPTION FROM WITHHOLDING FOR ANY VEHICLE FRINGE BENEFIT.—

"(1) EMPLOYER ELECTION NOT TO WITHHOLD.—The employer may elect not to deduct and withhold any tax under this chapter with respect to any vehicle fringe benefit provided to any employee if such employee is notified (at such time and in such manner as the Secretary shall by regulations prescribe) by the employer that the employer is making such election. The preceding sentence shall not apply to any vehicle fringe benefit unless the amount of such benefit is included by the employer on a statement timely furnished under section 6051.

"(2) EMPLOYER MUST FURNISH W-2.—Any vehicle fringe benefit shall be treated as wages from which amounts are required to be deducted and withheld under this chapter for purposes of section 6051.

"(3) VEHICLE FRINGE BENEFIT.—For purposes of this subsection, the term 'vehicle fringe benefit' means any fringe benefit—

"(A) which constitutes wages (as defined in section 3401), and

"(B) which consists of providing a highway motor vehicle for the use of the employee."

SEC. 4. REDUCTION IN LIMITATIONS ON INVESTMENT TAX CREDIT AND DEPRECIATION FOR LUXURY AUTOMOBILES.

(a) GENERAL RULE.—

(1) INVESTMENT TAX CREDIT.—Paragraph (1) of section 280F(a) of the Internal Revenue Code of 1954 (relating to investment tax credit) is amended by striking out "$1,000" and inserting in lieu thereof "$675".

(2) DEPRECIATION.—Paragraph (2) of section 380F(a) of such Code (relating to depreciation) is amended—

(A) by striking out "$4,000" in subparagraph (A)(i) and inserting in lieu thereof "$3,600", and

(B) by striking out "$6,000" each place it appears in subparagraphs (A)(ii) and (B)(ii) and inserting in lieu thereof "$5,400".

(b) ONE-YEAR DEFERRAL OF INFLATION ADJUSTMENT.—Subparagraph (B) of section 280F(d)(7) of such Code (relating to automobile price inflation adjustment) is amended—

(1) by striking out "October of 1983" and inserting in lieu thereof "October of 1984", and

(2) by striking out "calendar year 1984" and inserting in lieu thereof "any calendar year before 1986".

SEC. 5. NEW REGULATIONS.

Not later than October 1, 1985, the Secretary of the Treasury or his delegate shall prescribe regulations to carry out the provisions of this Act which shall fully reflect such provisions.

SEC. 6. EFFECTIVE DATES.

(a) REPEALS.—The amendment and repeals made by subsections (a) and (b) of section 1 shall take effect as if included in the amendments made by section 179(b) of the Tax Reform Act of 1984.

(b) REVISED SUBSTANTIATION REQUIREMENTS.—

(1) IN GENERAL.—The amendments made by section 2 shall apply to taxable years beginning after December 31, 1985.

(2) RESTORATION OF PRIOR LAW FOR 1985.—For taxable years beginning in 1985, section 274(d) of the Internal Revenue Code of 1954 shall apply as it read before the amendments made by section 179(b)(1) of the Tax Reform Act of 1984.

(c) WITHHOLDING AMENDMENT.—The amendment made by section 3 shall take effect on January 1, 1985.

(d) REDUCTION IN LIMITATIONS ON INVESTMENT TAX CREDIT AND DEPRECIATION.—

(1) Except as provided in paragraph (2), the amendments made by section 4 shall apply to—

(A) property placed in service after April 2, 1985, in taxable years ending after such date, and

(B) property leased after April 2, 1985, in taxable years ending after such date.

(2) The amendments made by section 4 shall not apply to any property—

(A) acquired by the taxpayer pursuant to a binding contract in effect on April 1, 1985, and at all times thereafter, but only if the property is placed in service before August 1, 1985, or

(B) of which the taxpayer is the lessee, but only if the lease is pursuant to a binding contract in effect on April 1, 1985, and at all times thereafter, and only if the taxpayer first uses such property under the lease before August 1, 1985.

The SPEAKER pro tempore. Is a second demanded?

Mr. DUNCAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 20 minutes and the gentleman from Tennessee [Mr. DUNCAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Committee on Ways and Means today approved legislation to repeal the contemporaneous recordkeeping requirement added last year by the Senate and enacted in the Deficit Reduction Act of 1984. The bill before the House today repeals the requirement that records be contemporaneous and generally reinstates prior law for 1985. In addition, the no-fault negligence and return preparers' penalties are repealed. Moreover, the Treasury regulations on recordkeeping are explicitly invalidated.

Most importantly, however, the committee has determined that it is essential that Congress provide taxpayers with clear guidelines for the kind of records that must be maintained and who has to maintain such records. Therefore, the committee's bill, in conjunction with its committee report, provides rules for taxpayers to determine in the future how to maintain adequate records or sufficient written evidence to corroborate statements supporting business expense deductions. Further, the committee's bill exempts from the recordkeeping requirement certain vehicles which are not used more than a de minimis amount for personal purposes. Examples of such vehicles include forklifts, tractors, school buses, and marked police cars.

In order to assure that these guidelines will be promptly and accurately implemented by IRS, the bill mandates that new regulations fully reflecting these amendments be issued by October 1, 1985. The revised substantiation guidelines are not effective until 1986. The law that applied prior to the 1984 Act will continue to apply through 1985.

The committee's bill also affords employers and employees flexibility in the event that an employee does receive a motor vehicle which is treated as a taxable fringe benefit. An employer need not withhold income tax on a taxable vehicle fringe benefit so long as the amount of the benefit is reported on the employee's W-2. This change is effective for 1985.

Finally, Mr. Speaker, it is unfortunate that these necessary changes to the auto recordkeeping provisions will result in a revenue loss. However, I feel that it is essential that this legislation not contribute to the massive Federal deficit problem that we already confront. For this reason, the Committee on Ways and Means has produced a bill with related revenue offsets. Specifically, the bill further limits the investment tax credit and depreciation deductions for luxury cars, and delays the automobile inflation adjustment for one year. Thus,

the bill is revenue neutral, and does not exacerbate our deficit problems.

Mr. Speaker, I believe this bill represents a reasonable, balanced compromise between the need to distinguish between personal and legitimate business expenses, and the rights of taxpayers to conduct business without undue interference by the Federal Government.

I urge support for H.R. 1869.

REPEAL OF RECORDKEEPING REQUIREMENTS

A. RECORDKEEPING REQUIREMENTS

The Committee on Ways and Means today adopted legislation repealing the "contemporaneous" recordkeeping requirements of the Deficit Reduction Act of 1984. These provisions required individuals to keep contemporaneous records showing the date, mileage and purpose of each trip. The contemporaneous recordkeeping requirement is repealed for all listed property, such as automobiles, airplanes, yachts and computers. In addition, the regulations issued by the Department of the Treasury to carry out the contemporaneous recordkeeping requirements are legislatively repealed.

The legislation also repeals the special negligence penalty for failure to have contemporaneous records and the provision requiring accountants to obtain written confirmation from the taxpayer that records exist.

The substantiation of automobile business deductions requirement is generally returned to prior law, except for the addition of a requirement that there be some written evidence corroborating the taxpayer's own statement and the modification of the types of items subject to those requirements.

Delivery trucks, buses, marked police and fire vehicles, ambulances, hearses, and any vehicles designed to carry cargo with a loaded gross vehicle weight of over 14,000 pounds are excluded from the recordkeeping requirements. In addition, the Secretary of the Treasury shall issue regulations to carry out the provisions of this Act no later than October 1, 1985.

B. WITHHOLDING

Income tax withholding for vehicle fringe benefits woud become optional, allowing the employer to either include the imputed income on an employee's W-2, or withhold on whatever basis the employer finds to be most convenient.

C. REVENUE OFFSET

The legislation is made revenue neutral by reducing the amount of investment tax credit and depreciation for luxury automobiles. These reductions are generally effective on April 2, 1985 In addition, the present law automobile inflation adjustment is deferred until January 1, 1986.

D. EFFECTIVE DATES

The repeal of the contemporaneous recordkeeping requirement, the no-fault negligence penalty and the preparers' penalty is effective as if those provisions had never been enacted. Thus, prior law recordkeeping requirements apply for 1985. The revised substantiation requirements apply to taxable years beginning after December 31, 1985. The withholding provision is effective January 1, 1985.

□ 1810

Mr. DUNCAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. DUNCAN. Mr. Speaker, I am pleased to join Chairman DAN ROSTENKOWSKI in bringing this important piece of legislation to the floor. It addresses many of the controversial aspects of the auto recordkeeping rules that were enacted as part of the Deficit Reduction Act of 1984.

In particular, it would remove the contemporaneous recordkeeping requirement and make the recordkeeping rules more reasonable, yet still consistent with encouraging compliance with these provisions. Importantly, it would retroactively repeal the IRS regulations that have been so controversial while at the same time directing the IRS to issue regulations before October 1, 1985, with respect to the new rules. This will provide time for taxpayers to adjust to the new rules because they will not become effective until January 1, 1986. In the meantime, the pre-1984 act law will apply. Important relief also is given to employers with respect to their withholding obligations for these noncash fringe benefits. While the bill does not specifically address fringe benefits, it does give the Treasury guidance with respect to certain types of vehicles in the fringe benefit area.

I also am joining the chairman in a letter to the Secretary of the Treasury, James Baker, suggesting that Treasury reconsider some of the fringe benefit rules developed in its regulations. To the extent that this reconsideration is not satisfactory, I would expect that Chairman ROSTENKOWSKI would be willing to come back and reconsider legislation in this area.

Last, the changes in recordkeeping do have a projected revenue loss, possibly several hundred million dollars, from 1985 to fiscal 1988. The chairman indicated that he was unwilling to report out this bill unless these changes were made revenue neutral. To achieve this, certain modifications were made to the so-called luxury car provisions. There is certainly some controversy as to the accuracy of these projected revenue losses in view of the inherent difficulty of projecting compliance with our tax laws. Nevertheless, I share the chairman's concern that the Congress not send the wrong message by enacting a revenue loser as its first piece of tax legislation. In view of that, I have reluctantly supported the chairman in the modification of the luxury car provisions to make this provision revenue neutral. I am hopeful that other alternatives to achieve revenue neutrality will be explored before the time of Conference.

I think this is an important piece of legislation for the House to act on expeditiously in view of the amount of confusion that has been created with respect to the recordkeeping provisions and I, therefore, encourage Members to vote in favor of the bill.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee [Mr. FORD].

Mr. FORD of Tennessee. Mr. Chairman, I am in full support of the legislation that is before us, and legislation before the committee to repeal the contemporaneous recordkeeping requirements.

Could you describe to me, Mr. Chairman, how the legislation would deal with utility company vehicles, pickup trucks, small vans such as those used for delivery by florists?

Mr. ROSTENKOWSKI. Mr. FORD, utility company cherry pickers and larger trucks, as well as single seat delivery vans would be exempt from any recordkeeping requirements, and would not result in any inclusion in income.

Pickup trucks, like cars, would be treated largely as they were under prior law. The committee report explains in greater detail how these provisions would affect different types of vehicles.

Mr. FORD of Tennessee. Thank you, Mr. Chairman. I would like to thank you for moving so swiftly to bring this legislation to the House floor.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 3 minutes to the gentleman from Louisiana [Mr. ROEMER].

Mr. ROEMER. I thank the chairman for yielding, and I thank the members of the Committee on Ways and Means, specifically the chairman; the ranking member, Mr. DUNCAN; Mr. DAUB of Nebraska, and Mr. ANTHONY of Arkansas.

These and others gave of their time and their attention to the matter at hand. There are many ways to describe this bill; one word comes to mind, and that is victory. It is a victory for those people who drive the trucks, pick the crops, man the small businesses across America.

It is a victory for the little guy, if you would, without running that into the ground. It is a victory for the people who were asked last year to drive with one hand and keep records with the other. It is a victory for people who believe in common sense. It is a victory for people who believe there is more to life in America than the raw numbers. It is a victory for people who have paid taxes all their life, and ask only one thing in return: common sense, a decent shake, a fair chance.

I have been lucky to have been a Member of the House for the last 4½ years, and this is perhaps my luckiest moment; to be part of a move to change an IRS regulation and a congressional act that made no sense.

Now there has been very little criticism of what the committee has tried to do. I will not be part even of that very little criticism. I do not think there is a revenue loss here that needs to be made up, but I agree with the

committee that in terms of deficit considerations, we cannot take a chance.

I want to say to those who have criticized what has been done here by saying that it is somehow a retreat, a lack of courage, a backing down, be careful. You are wrong.

What we have done here is take the nitpicking regulations, overly done, off the back of the average guy and tell those who drive the luxury cars "You pay your fair share, and in return it will be revenue-neutral." Those who are quick to criticize, be careful. Be careful. This bill will pass, this bill will be law because it is right. I thank all of those who added their little common sense to make a good idea a great one.

Mr. VOLKMER. Will the gentleman yield?

Mr. ROEMER. I yield to the gentleman.

Mr. VOLKMER. Mr. Speaker, I appreciate the opportunity to add my commendations to the distinguished chairman of the House Ways and Means Committee and the other members of the committee for bringing this legislation to the floor. It became quickly apparent that this solution to the problem of luxury cars as commuting vehicles produced an effect similar to hitting a gnat with a sledgehammer. Farmers, small businessmen, and ordinary people in my district have written to tell me of the confusion they have suffered in trying to understand this new requirement and how much trouble they have in trying to comply. Repeal of this onerous provision will be a welcome relief to them.

I am also pleased to note that the committee is requesting the IRS to end the problem facing the law enforcement officers in Missouri and other States. Hopefully no longer will they be expected to pay income tax because the Internal Revenue Service believes that they are receiving a benefit when they are required to take their police vehicles home at night. We expect them to be on call 24 hours a day, and I do not think we should make them pay for it.

Mr. ROEMER and Mr. ANTHONY are to be commended for their leadership in this effort, and I am pleased to have worked with them on their legislation in this area.

Mr. ROEMER. I thank you, and I thank all those again on the Ways and Means Committee, those who have written me; my mother, my sisters, my brother—everybody who has helped. Seriously, I thank you very much.

Mr. DUNCAN. Mr. Speaker, I yield 3 minutes to the gentleman from Nebraska [Mr. DAUB], who has spent considerable time in trying to work out something on this legislation.

Mr. DAUB. Thank you very much, Mr. Chairman, and thank you very much to my ranking member, Mr. DUNCAN, for the time.

Let me add my compliments to the chairman of the committee for his help and for his willingness to move this particular piece of legislation in a broader form, swiftly through committee and to the floor. Our committee staff worked diligently and their efforts should be recognized.

The contemporaneous recordkeeping rules enacted last year resulted in an unacceptable administrative burden for taxpayers in terms of documenting their automobile deductions.

Once having created this problem, Congress has an obligation to act responsibly in repealing the contemporaneous records keeping requirement and in solving many of the associated problems.

The bill referred from the Committee on Ways and Means today to us here on the floor for action reflects the bipartisan efforts by Mr. ANTHONY, Mr. ROEMER, and others to develop a responsible solution. Their efforts in this debate and focusing Members' attention on the problem was critical in this process.

The bill also reflects the input of many in my own second congressional district. Trade associations and business groups, and while this undoubtedly is a compromise bill, yet in many respects it is a bill that reflects the participation of agriculture and small business groups in the process as well.

□ 1820

I want to indicate that for the RECORD I have a letter dated today from the National Federation of Independent Business, endorsing the bill and calling upon Congress to recognize this as one of their key small business votes.

NATIONAL FEDERATION OF INDEPENDENT BUSINESS,
Washington, DC, April 2, 1985.

Hon. HAL DAUB,
U.S. House of Representatives,
Washington, DC.

DEAR HAL: NFIB would like to commend you and the Ways and Means Committee for the prompt action taken today to repeal the adequate "contemporaneous" recordkeeping requirements of the Tax Reform Act of 1984, the provision which authorized the IRS "auto log" regulations.

While we support the provisions of the committee bill regarding the recordkeeping requirements, the withholding provisions, and the penalties for non-compliance, we do have some concerns over the revenue numbers put forth by the Joint Committee on Taxation. It is not clear to us that a revenue loss would result from the changes made by the committee bill. We have seen no substantiation for the revenue figures of the Joint Committee and thus question the need for the actions taken to make the bill revenue neutral.

NFIB does, however, support the legislation reported from the Ways and Means Committee and will consider it a key small business vote. We would like to see the bill move quickly into a conference with the Senate where our concern over the revenue figures hopefully can be addressed further.

Again, we appreciate your work on this legislation.

Sincerely,

JOHN J. MOTLEY III,
Director of Federal Legislation.

In addition to that, I want to compliment the National Association of Wholesalers and Distributors for their assistance in helping us to understand the nature of the bill.

The bill and associated committee language offers many important improvements for taxpayers, and let me enumerate some of them very briefly. Of course, we understand the repeal of the contemporaneous records keeping requirement. We next should note that no records keeping for special-use trucks and vehicles, including marked police and fire vehicles, will be required, that there is a repeal of the taxpayers' presumed negligence penalty and a repeal of the tax preparers' negligence penalty.

Elective withholding is an important feature that should be noted by Members, which provides the widest possible latitude for employers and employees for pay period, quarterly, biannual, annual or annual FICA only withholding. Indeed, with respect to the revenue provision of the bill, my preferences may be otherwise but the concept of being sure that this bill is in fact, in the chairman's words, "revenue neutral" is a goal that I do believe that we have met.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. DAUB. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. I would first like to congratulate the gentleman and commend him for his fine work, along with the others who worked so hard on this legislation.

I would like to ask the gentleman a question. Is it true that this legislation now corrects the charge that was going to be levied against policemen and those who took marked vehicles home and were on duty all of the time or on call? Does this now eliminate that charge that was going to levied against them?

Mr. DAUB. The gentleman is precisely correct.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 3 minutes to the gentleman from North Dakota [Mr. DORGAN].

Mr. DORGAN of North Dakota. I thank the chairman for yielding this time.

Mr. Speaker, I thought it might be useful to just give a background of how we have arrived at this position. There has not been a minute or an hour or a day's deliberation ever in the Ways and Means Committee of whether we as Members of Congress should ask those folks who drive pickup trucks out in the country or who drive automobiles for business purposes, keep log books and keep notations in those log books for every

trip they make. That has never been a part of a hearing or any kind.

Here is what happened: Committee members on the Ways and Means Committee felt that we ought to restrict the amount of deduction for business expense of an automobile. We had some folks out buying Rolls Royces and Jaguars, $100,000 automobiles, and writing them off as business expenses. In the 40-, 50-percent bracket, that means the American taxpayer is paying half the bill for those luxury automobiles.

A good idea was offered to the committee, and the idea was: let's limit the amount of writeoff. You do not need to drive a Rolls Royce and charge it off to the taxpayer on your income tax return. So we decided, yes, that would be a good idea. We passed it in the Ways and Means Committee. Of course, the other body had a similar idea, but they came up with a different approach. In the conference committee, most of the other body's approach was adopted. And then the Internal Revenue Service got hold of it, and in their own inimitable way they created their own interpretation of it, which came up with contemporaneous records, including the requirement that when you get in the pickup truck to go out and round up some cattle late in the afternoon, you are supposed to take your pencil and note pad out and make a record of that trip, and every other single trip you make in that pickup truck.

Now, the American people have a way of telling the U.S. Congress that when we do something that is not very smart we ought to back off. We got thousands and thousands of letters here in Congress from the American people saying, "Look, this is dumb, we do not accept this, we ask you to back up."

So what we have done now in the Ways and Means Committee is to back up. It is not retreating from a position that is logical and understandable and correct. It is going back to a position that is the right position in the first place. This process of developing regulations down at the IRS and the machinations between us and the other body resulted in something that we just cannot defend.

The result now is we are repealing the contemporaneous record requirement. We do not want to turn people into bookkeepers every time they get into the pickup or the car that they use for business purposes.

The question we have to ask ourselves is: What is reasonable? Should we require enormous burdens of the many in order to catch the few who cheat? The answer is no. We should instead develop devices to catch those few who cheat on their tax returns. It is not reasonable to require this log book requirement that has come out of the Internal Revenue Service regulations, and that is why today in the Ways and Means Committee we did the right thing. We backed off to a position that requires sufficient records to document the writeoff of an automobile or a vehicle for business expense, but we will no longer require those who want to drive pickup trucks and those who are required to drive vehicles in pursuit of their business to be bookkeepers in order to do that. This is a good step and I urge its passage.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from Virginia [Mr. BLILEY].

Mr. BLILEY. I thank the gentleman for yielding time to me.

Mr. Speaker, I want to commend the chairman of the Ways and Means Committee, the gentleman from Tennessee, and the other Members for bringing this bill to the floor today.

Mr. Speaker, I rise in support of the Ways and Means Committee bill before us. I congratulate the committee for repealing the contemporaneous recordkeeping requirements of last year's tax bill. Clearly the committee realized the depth of the Member's concerns when H.R. 600, which I was proud to cointroduce with Representative ROEMER, and other legislations passed the magic 218 number in cosponsors last week.

The committee appropriately recognized that the less time taxpayers have to spend on filling out burdensome tax forms the more time they have to earn money and generate new revenues to the Treasury. In repealing contemporaneous recordkeeping, and substituting a limited requirement that adequate written records be kept, we may realize more revenue and do it without as much pain as we've heard about over the past 3 months.

I have a few concerns about this bill, however, and they relate to how much revenue repealing this requirement is likely to cost the Treasury. There is a revenue trade-off in the bill which would ratchet the investment tax credit [ITC] limit down from its present level. While I would not have supported that provision individually, it may indeed be that this trade-off is unnecessary. The conferees on the House and Senate versions of this legislation will hopefully reexamine the revenue figures which served as the basis for engineering this trade.

With that exception, Mr. Speaker, I support this legislation. It not only repeals contemporaneous recordkeeping and indeed, bars that word from the Internal Revenue Service's lexicon when it goes to rewrite its regulations.

Above that, the legislation also directs the IRS to exempt via regulation cars used in public service from the imputed income provisions of last year's tax bill as well.

Mr. Speaker, I support this legislation almost without reservation. I trust that the coming conference between the two bodies will clear away those reservations.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Arkasnsas [Mr. ANTHONY].

Mr. ANTHONY. Mr. Speaker, I want to thank the chairman of the Committee on Ways and Means for his willingness to work with the Members of Congress who were very interested in trying to repeal the contemporaneous recordkeeping and also my two colleagues that I worked with last week in trying to draw up some language and make some sense out of chaos, the gentleman from Nebraska [Mr. DAUB] and the gentleman from Louisiana [Mr. ROEMER].

There are a couple of areas in here that I think are very important and would be easy for Members to overlook, but I think it is something that you can go home and brag about after this piece of legislation passes. One thing that we will do by this piece of legislation is allow more flexibility on withholding on the taxable use of automobiles. By the law in 1984 we required employers to start withholding. July 1 would be the date by which they would have to start doing that. Hopefully, by having this provision inserted in the repeal bill, we will stop future onslaught of mail coming into our office asking for some relief. What we do is give the election to withhold the income and employment taxes on a semiannual or annual basis as well as on a quarterly or pay period basis. And, more particularly, and the thing that I think is very important for Members to remember, is the election not to withhold income taxes if the employer so notified the employee and includes the amount on the employee's W-2 form. I think that really does streamline it for the employer. It gives small, medium size and large employers maximum flexibility in overcoming what could be a tremendous problem for them.

Another area that I am also pleased that we were able to address, if you happen to be policeman, if you happen to be on the fire department or if you happen to be in the medical health area of ambulances, by this legislation and the legislative history we are saying to the Service to take a look at these specific areas and to give them some relief. I think these are two very real reasons to support this legislation.

□ 1830

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. I thank the gentleman for yielding me this time.

Mr. Speaker, on behalf of salespeople, farmers, public officials, construction workers, any and all Americans who use vehicles for legitimate busi-

ness purposes, and therefore take legitimate business expense deductions, I can only say: Thank you, thank you, thank you.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Alabama [Mr. ERDREICH].

Mr. ERDREICH. I thank the gentleman for yielding me this time.

Mr. Speaker, I opposed the so-called Tax Reform Act of 1984, which included this new auto logkeeping regulation—another bureaucratic business bashing measure that must be repealed.

During recent weeks, I have received hundreds of calls and letters from people who use their cars and trucks to earn a living—insurance salesmen, appliance repairmen, small businessmen—all expressing their outrage at this regulation that encourages increased and needless recordkeeping, not productivity and job expansion.

Here are a few to-the-point comments I received:

At a time when America is the high cost producer of goods and services, it seems almost ludicrous that our Government would impose additional non-productive costs on small business.

The amount of time and expense American business will expend on this monster the IRS has created will far outweigh any benefits in tax revenues received.

The hours spent keeping these burdensome records each week are yet another attempt by the Federal Government to discourage the success of small businesses and destroy free enterprise.

I feel the new IRS requirements for recordkeeping on auto use borders on harassment. It cannot possibly return enough revenue to the Government to be worth the time it demands.

This situation as regards company vehicles and recordkeeping is another example of how governments who try to correct problems end up making worse ones.

I sponsored repeal of this rule and am pleased repeal is now moving.

We must minimize regulatory and paperwork burdens to create the kind of climate that will enable businesses in Jefferson County and across the country to increase growth, productivity, and jobs creation. The total repeal of this burdensome auto-logging rule is a positive step in that direction.

Mr. DUNCAN. Mr. Speaker, I yield 2 minutes to the gentleman from Missouri [Mr. TAYLOR].

Mr. TAYLOR. I thank the gentleman for yielding me this time.

Mr. Speaker, I would like to take this opportunity to express my appreciation to the chairman and the members of the Ways and Means Committee for the good sense that they have displayed in the repeal of this unjust regulation that is harassing our people.

As we look at this regulation and some of the things that the IRS does sometimes, I am kind of reminded of the story back home about one time when one of my rural communities needed a new firetruck. They voted a bond issue after about three tries and they got the money and they bought their new firetruck and they were real proud of it.

They had a volunteer fire department; they built a little building with volunteer labor to keep the firetruck in. They shined it religiously every evening. They had some new, white helmets that they also bought for them, and they would sit around the fire house every night and admire their new fire truck hoping that they were going to get a call so they could show off their new firetruck.

Lo and behold, one night the call came in. A lady right down on the end of Fifth Street had called in and her little prize cat had got right up into the top of a tree. They called the firetruck to come and rescue the cat.

They got the firetruck out, the bells rung, the lights flashing, the sirens went off and down the street they went and everybody gathered out on the street to see the firetruck make its maiden run.

They arrived at the scene of the cat; they put the spotlight up in the tree, and there was the little white cat. The fire chief got the ladder down very carefully. He ascended the ladder; he took the little kitten and brought it back down and laid it on the sidewalk. The crowds cheered; they backed the firetruck out. The put the ladder back on it and headed back up the street with the bells ringing and the lights flashing and the sirens howling. Everybody was so happy, and they looked down and darned if they had not run over the cat.

Now, you know, sometimes in our quest to solve the problems of this country, we have things happen like happened with this recordkeeping, but thank heavens, we have still got a country where the people of this Nation can be heard through this House of the people, and I commend the Committee on Ways and Means for bringing this legislation before this body.

Mr. DUNCAN. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding me this time.

Mr. Speaker, let me say that what we are doing here is absolutely the right thing, but procedurally, we are doing it the wrong way. This idea that we pass bills in committee in the morning, and then bring them to the floor in the afternoon, leaves some of us a little cold because I hope that the committee well understands what is in this particular bill and what is in the committee to report. None of the Members here on the floor have had very much of a chance to be familiar with it.

This package was delivered onto the floor just a few minutes ago; we have had no chance to study it, and I have understood now through the grapevine that there are a number of groups that represent major constituencies in the country that have some problems with some provisions in the bill. I understand one of the small business groups, for instance, has some problems with parts of the bill.

The point is, I do not know, really, what all of the problems may be, but the fact is that we have very little time to do any deliberation on this here on the House floor, and we are being asked to pass it up or down.

I certainly hope that this is not going to be a pattern of the way we do legislative business. We have heard many complaints here on the floor from the majority side in recent days about the fact that the minority brought a bill onto the floor without any notification. We have exactly the same situation here. We have got a bill that came out on the floor without notification.

It is for a noteworthy purpose; I would commend to the Members that we ought to pass the legislation, but this really is no way to be legislating. We really ought to have the rules of the House obeyed.

Just one example: We have in the committee report here, the loss to the Congressional Budget Office estimates because as the report itself says, "Because of time constraints, it is not feasible to present a letter from the Director of the Congressional Budget Office before the bill is filed." We could not even get the budget estimates because we did it too fast.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. I thank the gentleman for yielding me this time.

Mr. Speaker, I stand in strong support of H.R. 1869, the contemporaneous recordkeeping repeal bill. This has to be a good example of bad law by Congress and lousy regulation by regulators. Thank goodness the American taxpayer rose up and said, "Enough Congress, enough," and we were willing to respond.

Mr. ROSTENKOWKI. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma [Mr. MCCURDY].

Mr. MCCURDY. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of this legislation, and I commend the chairman of the Ways and Means Committee, Mr. ROEMER, and the other cosponsors of the legislation to repeal the contemporaneous recordkeeping requirements.

I believe this is a good day for farmers, for small businessmen, and even some church pastors back in my district who have contacted me regarding this legislation. I believe this bill is a major step toward restoring some

common sense in the Federal Government.

Regulations should work for people; not against them. This is one of the few pieces of legislation that has resulted in a tremendous concern and outpouring of letters and statements from constituents throughout my district in Oklahoma. I even received, for the first time, letters and calls from relatives.

This regulation originally touched nearly every businessman, small farmer and individual throughout our States. This is a good day, and I urge the adoption of this legislation and the repeal of these regulations.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. SHAW].

Mr. SHAW. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to add my compliments to the chairman and to the ranking member for bringing this to us in, I might say, an expeditious manner. I would rather have seen it go through the rules process; however, I think that the urgency of the situation certainly dictates the necessity to bring it up even under the suspension of the rules.

I would also like to compliment the gentleman from Louisiana [Mr. ROEMER] for bringing this matter to the House and also I would like to thank him for allowing me to be a cosponsor of this important piece of legislation.

One of the hardest things to do in life, and certainly in politics, is to get up and admit you are wrong. By this action, however, the House is looking at what it had passed once before and the resulting regulation, and saying there has got to be a better way. It is giving us an opportunity to legislate common sense and reasonable regulations.

This is exactly what this bill does. It puts common sense back in the tax law and I am looking for a unanimous vote on this important piece of legislation.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of this bill and I want to thank the chairman of the committee, the gentleman from Illinois [Mr. ROSTENKOWSKI], as well as the gentleman from North Dakota [Mr. DORGAN], and the gentleman from Arkansas [Mr. ANTHONY] for working with me on an issue unrelated to the contemporaneous records issue on cars. That other issue is the tax status of flights on business aircraft provided as a fringe benefit. It does not deal specifically with the auto logging question, but it is related in that it deals with how the Tax Code is going to treat transportation.

The regulations developed by the Treasury Department to value, for tax purposes, purely personal travel on business aircraft and hitch-hiking for personal purposes on an empty seat basis on business flights are totally out of line. The discussion in the Ways and Means Committee on this topic this morning was most heartening because it showed that the committee shares my concerns that what has been set forth in the Treasury regulations is simply unreasonable. I also trust the IRS will heed the guidance of the committee's discussion this morning and move ahead with revisions in their regulations. I would suggest that an appropriate valuation scheme for the purely personal use of these aircraft, not in conjunction with any business trip, would be along the following lines:

First, valuation at one-half coach fare for flights on aircraft weighing 6,000 pounds and under;

Second, valuation at coach fare for flights on aircraft weighing more than 6,000 but up to 10,000 pounds; and

Third, valuation at first class fare for flights on aircraft weighing over 10,000 pounds.

I would stress that the coach and first class fares I am discussing would not be those in the marketplace today, but instead would be standards developed by the IRS in consultation with the Department of Transportation to assure that the fares do not treat unfairly less densely used routes. Furthermore, the valuation for owner-flown aircraft would, most appropriately, be the total cost of operation for the particular flight should the operator care to use that lower valuation.

The impact of the IRS regulations on the general aviation industry in this country has been most severe at a time when the industry is in its worst shape since the early 1950's. Relief is urgently needed, and I am encouraged that the Ways and Means Committee has shown a willingness to help get these ludicrous regulations reworked.

Mr. DUNCAN. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin [Mr. ROTH].

Mr. ROTH. I thank the gentleman for yielding this time to me.

Mr. Speaker, I am delighted that this legislation is finally before us. I introduced legislation, 541, to address this problem because I am sure that every Member of this body has received letters from back home from the constituents who were very irate about this legislation, and rightfully so. So I compliment the Members of this body who worked to repeal the regulations. I compliment the members of the Committee on Ways and Means for bringing this legislation before us.

I think this also should send a strong signal not only to the people in this body but to the people throughout the country, throughout this land, that this Government does work. All too often all of us have heard that people back home are saying that this Government does not react fast enough; it takes too long to get anything done.

Well, when the people speak, this Government listens, and this is precisely another example. When we had the 10-percent withholding on interest and dividends, the people spoke and very shortly this Congress acted, and this is another case in point, that this Congress does act when the people speak.

Mr. DUNCAN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. LUKEN].

Mr. LUKEN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise to speak in support of this bill, and to commend the gentleman from Illinois for the alacrity with which the committee responded.

I am most pleased that the House of Representatives has responded so quickly to the outcry from taxpayers across the country to the outrageous contemporaneous recordkeeping requirements that have so upset citizens across the country. This provision of the Deficit Reduction Act, and the overbroad regulations it spawned, have generated more heat—and some light—than any issue of recent vintage, including the ill-fated proposal to withhold taxes on interest and dividend income.

The Internal Revenue Service is not totally blind to the uproar that has been heard over the issue, and has made an attempt to mollify the rule's most vocal opponents by selectively exempting groups from its application. Predictably, this effort has failed because by its very nature it was inequitable, and left out many people who should not be burdened with recordkeeping including those who drive emergency vehicles home.

The Subcommittee on Tax, Access to Equity Capital and Business Opportunities, which I chair, held the first congressional hearing on the subject in early February, and heard from multiple segments of small business about the burdens these regulations would impose on people during the course of their daily business. Several of our witnesses expressed the rage that members of their industries felt after seeing just how burdensome and costly it would be to comply with the law. The original regulations would have cost, according to one witness, over $7 billion. The law went so far as to require police and firemen to pay taxes on income imputed from the

value they receive for commuting in their vehicles.

Clearly, Congress has now recognized that this is not the type of simplification of taxes that the public is seeking, and we have acted to undo the damage that was done under the Deficit Reduction Act.

I would hope that the lesson that we learned from this experience is to carefully examine suggestions that come to us to improve tax compliance, and not add last-minute provisions to the law, the impact of which we can only guess. It is not worth putting burdens on honest taxpayers in order to get compliance from a few scofflaws who would ignore the new regulations anyway.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Georgia [Mr. ROWLAND].

Mr. ROWLAND of Georgia. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in strong support of this piece of legislation.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. ROWLAND of Georgia. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Speaker, I just want the body to know that when we first introduced H.R. 600, which was the genesis of this idea, it was the gentleman from Georgia, Dr. ROWLAND, who was first in line to help. I thank the gentleman for all of his assistance.

Mr. ROWLAND of Georgia. I thank the gentleman for those remarks, and I am very pleased to see this legislation that had been enacted repealed now. The contemporaneous recordkeeping for the most part will be put back the way it was and removed a heavy burden from many people in this country.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it was raised in an earlier colloquy on the floor that the Congressional Budget Office letter with its revenue estimates was not available. I would like to read into the RECORD the Congressional Budget Office letter received by the committee which answers the question raised by the gentleman from Pennsylvania [Mr. WALKER].

Hon. DAN ROSTENKOWSKI,
Chairman, Committee on Ways and Means, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has examined a bill as ordered reported by the Committee on Ways and Means on April 2, 1985, which would make changes to certain provisions enacted in the Deficit Reduction Act of 1984 (DEFRA). The bill would repeal the contemporaneous recordkeeping requirement for certain deductions and credits imposed by DEFRA. The bill would also repeal the withholding requirement for the imputed value of personal use of business property. In addition, the bill would alter the limits on the investment tax credit and accelerated depreciation available with respect to automobiles.

The Congressional Budget Office has reviewed and concurs with estimates of the revenue effects of the bill prepared by the staff of the Joint Committee on Taxation. The bill would reduce fiscal year revenues by $67 million in 1985 and $4 million in 1986, and increase revenues by $4 million in 1987, $46 million in 1988, $52 million in 1989, and $57 million in 1990.

If you wish further details on this estimate, we will be pleased to provide them.

With best wishes.

Sincerely,

RUDOLPH G. PENNER.

Mr. DUNCAN. Mr. Speaker, I wonder if the gentleman from Illinois would yield 1 minute to me. I yielded back the balance of my time.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ROSTENKOWSKI] has 1 minute remaining.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield the balance of my time to the gentleman from Tennessee [Mr. DUNCAN].

Mr. DUNCAN. Mr. Speaker, I yield 30 seconds to the gentleman from New York [Mr. HORTON].

Mr. HORTON. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of this legislation and commend the members of the Ways and Means Committee for working so quickly to repeal these unreasonable recordkeeping requirements. The regulations deriving from section 179(b) place a tremendous paperwork burden on farmers, salesmen, and other small businessmen.

From 1974 to 1977, I chaired the Commission on Federal Paperwork. During that time, the Commission worked diligently to review Federal paperwork requirements and made recommendations to enable the Federal Government to serve the American people more efficiently and effectively. The regulations on adequate contemporaneous records mark a significant departure from the efforts we in Congress made to reduce the paperwork burden on the American taxpayer.

To illustrate the reasons for my support for this legislation, I would like to share with you a portion of my 1977 letter of transmission from the final report of the Paperwork Commission. This passage sheds light on the faulty assumptions which underly the regulations on adequate contemporaneous records.

The theme we heard repeatedly throughout the country is that the vast majority of Americans want to obey the law. Most Americans want to cooperate and participate in furthering Federal programs and national goals. However, these people can be frustrated by a government which, in their view, does not trust them . . .

Many people feel, and the Commission agrees, that a multibillion dollar wall of paperwork has been erected between the government and the people. Countless reporting and recordkeeping requirements and other heavy handed investigation and monitoring schemes have been instituted based on what we view as a faulty premise that people will not obey laws and rules unless they are checked, monitored, and rechecked.

This situation and this assumption must be reversed if we are to restore efficiency within government and confidence in government by the people and if we are to realize the potential for cooperative attainment of our goals as a Nation. Many of the major conclusions and recommendations of the Commission on Federal Paperwork are aimed at this goal.

These words and the philosophy they represent, are as true today as they were in 1977. Citizens, by and large, have no problem maintaining necessary tax records. The regulations deriving from section 179(b) are not necessary, they are patently unfair. I urge my colleagues to support this bill and restore fairness to this section of the Tax Code.

Mr. DUNCAN. Mr. Speaker, I yield 30 seconds to the gentleman from Georgia [Mr. SWINDALL].

Mr. SWINDALL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I, too, rise in support of this legislation and also commend the Committee on Ways and Means for their promptness.

(Without objection, Mr. ROSTENKOWSKI was allowed to address the House for 1 minute.)

Mr. ROSTENKOWSKI. Mr. Speaker, I yield to the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. I thank the gentleman for yielding.

Mr. Speaker, I wanted to clarify the intent of certain language on page 15 of the committee report, and I will read from that very quickly.

The committee expects that it is appropriate for Treasury to provide in regulations that under certain conditions all use of such vehicles by an employee is excluded as a working condition fringe benefit from the employee's income and wages. If, for example, an employer requires for bona fide business reasons that an employee take such a vehicle to his or her home when the employee is not working and that no personal use is made of the vehicle, then all use of the vehicle could be considered business use, which would be deductible under section 162 and thus excluded from income under section 132(d) as a working condition fringe.

Mr. Chairman, I am just wondering if the intent of this language in the committee report is to exclude the requirement that employers who are currently requiring $3 be included in employees' taxable income, that that requirement be deleted when we are talking about schoolbuses, emergency vehicles, and police vehicles?

Mr. ROSTENKOWSKI. Our intention was to indicate to the Treasury our view of such vehicle use as work-

ing condition fringes as explained in the committee report.

● Mr. GALLO. Mr. Speaker, I am pleased to join with so many of my fellow Members of Congress in supporting Mr. ROSTENKOWSKI's bill, H.R. 1869.

As you all know, this legislation deals with contemporaneous recordkeeping, a requirement of the Deficit Reduction Act of 1985. A well-intentioned provision, but, a provision which simply does not work.

The IRS has indicated that it will amend these regulations, but I think that we, the elected officials of this great Nation, have a responsibility to correct a problem when we see one.

As the regulations now stand, taxpayers are required to maintain comprehensive records which include individual entries for each use of property for which a business property deduction is sought. Each and every entry must be recorded at or near the time that the use is made. It is burdensome.

I'm afraid that some people in Government have forgotten.

It seems that some people in Government sometimes forget that there are real people out there. Taxpayers who have tried to comply with the regulations report that the creation of these records is extremely burdensome.

Americans applaud and understand the purposes of the Deficit Reduction Act. They agree that the tax laws should be applied uniformly and fairly. They do not believe that the act achieves those purposes. Instead, they find the present situation to be nothing more than a full employment act for lawyers and accountants.

I agree with my constituents and my colleagues. I am happy to support this legislation.

Thank you.●

● Mr. FRENZEL. Mr. Speaker, H.R. 1869 represents, like most tax bills, a compromise. It does what our constituents have asked. It repeals the silly, and hated, contemporaneous recordkeeping, and provides a basis for reasonable records. The compromise is that the bill is made revenue neutral to compensate for revenues which may be lost because of less stringent reporting requirements.

The Senate committee has approved a different version, so there will be changes before the final version is determined. Let it suffice for now to say the committee has moved promptly and carefully. Law-abiding, tax-paying citizens will welcome the relief from onerous, and unnecessary bookkeeping.●

Mr. Speaker, one Member has already complained about the irregular procedure which brings this bill to the floor without committee report and without notice. I will make the same complaint about the trade resolution.

But I am compelled to answer my own complaint, and others as well. No committee of this House endures the pressures that this one is subjected to every day. Every Member wants auto recordkeeping straightened out right now. Every Member wants the opportunity to show by vote his or her displeasure with the lack of access to markets in Japan.

The Ways and Means Committee is an unusual committee. Given strong leadership by its chairman, it is at the same time responsive to reasonable requests from Members and careful about yielding to unreasonable ones.

While I complain about procedures, I recognize the collective needs which caused these bills to move forward, and acknowledge that, were I chairman, I would be bringing them to the floor now, too.

Despite my one negative vote, I have nothing but praise for the committee and its leadership. It makes tough decisions on a regular basis that have earned the confidence if not the unvarying support of all the Members.●

● Mr. AUCOIN. Mr. Speaker, I rise in support of H.R. 1869, repealing the contemporaneous recordkeeping requirement for business use of vehicles.

If ever a Government requirement deserved a swift death, this is it. Without exception, Oregonians I work for are appalled at the astronomical waste of time these rules would inflict.

Typical of the reaction from hundreds of large and small companies and self-employed business people in Oregon was that of an electrical supplies salesman from my hometown of Forest Grove.

"Making a living as a salesman is difficult enough," he told me, "without having to perform such nonsensical recordkeeping."

The manager of a small food brokerage company in Milwaukie, OR, told me that he will need the equivalent of one additional part-time person just to keep up with the paperwork required to comply with these rules.

When you multiply out the costs to businesses across the country, the grand total comes to $7 billion. Seven billion dollars' worth of paper shuffling, in order to save the Government approximately $140 million. If there ever were a monumentally bad bargain, this is it. If ever there were a case of Government overkill, this is it. And it's no secret who will end up footing the bill: We all will, as consumers.

Mr. Speaker, I want to commend Mr. ROSTENKOWSKI, the chairman of the Ways and Means Committee, for bringing this legislation to the floor so quickly. The mileage-keeping rule richly deserves to be repealed, and I urge my colleagues to join me in voting to consign it to the waste can.●

● Mr. BROOMFIELD. Mr. Speaker, I am pleased that the House is considering this bill to revise the IRS recordkeeping requirements for those who use their own or company cars in their business, and I fully intend to support its passage.

Many actions by the Government have often angered the public. However, few have created the level of protest that was created by these rules, and rightly so. The burden that they would have imposed was extreme and fully out of proportion to any revenue gain.

The bureaucrats who write regulations implementing the laws must always be aware of the practical effects of their words, and this was certainly not the case with these regulations. What we saw instead was the Government at its most oppressive, intrusive, and unreasonable state.

These recordkeeping requirements deserve to be revised, and I hope the Senate will also act quickly to do so.●

● Mr. MOLLOHAN. Mr. Speaker, I rise today to urge my colleagues to vote in support of H.R. 1869, Chairman ROSTENKOWSKI's legislation to repeal the burdensome contemporaneous recordkeeping requirements adopted as part of the last year's Tax Reform Act.

These rules may have been well intended, Mr. Speaker, but so was the Edsel automobile. It has become evident in the short time since the regulations were written that their effect has been simply to impede the environment for small business to act efficiently and productively. Everyone is in favor of measures to improve taxpayers' compliance with the various provisions of the Tax Code, but it becomes a counterproductive exercise when that improved compliance comes at the expense of greatly increased inconvenience to the vast majority of businessmen who pay their taxes honestly and in good faith.

Mr. Speaker, so many cliches come to mind when one considers these regulations: "burdensome," "redtape," "over-regulation" are adjectives tailor made for these regulations, and, again, I urge my colleagues to vote for their repeal. Thank you.●

● Mr. BRUCE. Mr. Speaker, I rise today in support of H.R. 1869, the House measure to repeal the contemporaneous recordkeeping requirements contained in the Deficit Reduction Act of 1984.

Mr. Speaker when I first arrived in Congress and learned of these regulations I asked my constituents to join with me in pressuring the Internal Revenue Service to modify these regulations and offer reasonable recordkeeping procedures. Unfortunately, the changes made by IRS did not eliminate the inefficiencies in the rules but were at once too complex and too limiting to provide much relief. The only remedy remaining was

to take congressional action repealing these burdensome regulations.

The bill we debate today is a congressional response that will end the confusion and uncertainty created last year. Effective upon its enactment, H.R. 1869 would repeal the contemporaneous recordkeeping requirement and restore the pre-1984 law regarding tax deductions for business use of automobiles and other similar property. A provision to provide written substantiation regarding these deductions would not go into effect until 1986.

Mr. Speaker, the public outcry in protest to these regulations has been unprecedented. In my district alone, I have received hundreds of individual letters from constituents citing examples of the hardship these burdensome regulations would impose. Lost productivity, expensive, unnecessary paperwork, and the loss of vital public safety services provided by voluntary forces are all at stake. Farmers, small businessmen, fire, police, and the clergy are unanimous in their concern that Congress take action. I know that I am not alone and that my other colleagues have experienced similar complaints from the public.

Mr. Speaker, the bill we will vote on today is sensible and the only action to take to stop the confusion which exists across the country on this issue. It should not be the purpose of the tax law to force average citizens to prove their honesty to the IRS everytime they use a standard business deduction. I therefore ask my colleagues to join with me and pass H.R. 1869.●

● Mr. RAY. Mr. Speaker, earlier this evening, the House voted overwhelmingly to approve legislation overturning the IRS regulation which requires contemporaneous recordkeeping of the mileage covered when using an automobile for business purposes. I strongly supported the effort to repeal this burdensome requirement and was a cosponsor of legislation similar to the measure which the House passed this evening.

I believe that we must crack down on those people who are trying to escape paying their fair share of taxes. But, Mr. Speaker, we all are aware that the burden imposed by this IRS regulation has been unbearable for everyone—especially for our farmers and small businessmen. The IRS regulation has essentially punished the majority for the transgressions of the minority, and we should work to see that this kind of foolishness is not allowed to creep into our laws again.

I commend the Ways and Means Committee for its swift action today in bringing to the floor a bill that repeals a regulation that has adversely affected nearly everyone.●

● Mr. COLEMAN of Texas. Mr. Speaker, I rise in support of this legislation and commend the Committee on Ways and Means for moving so swiftly in bringing it to the floor of the House of Representatives.

The legislation would repeal the contemporaneous recordkeeping rules for the use of personal automobiles for business purposes. This would include farm vehicles, vans, and certain types of trucks used in carrying goods. It would also repeal the section of the law which taxes the use of public vehicles by off-duty law enforcement and public safety personnel as a fringe benefit.

These two rules have paralyzed the small businesses, farmers and public safety personnel of this Nation. The recordkeeping rules are a case of government out of control. The web of redtape has entangled many sectors of our economy, and caused an outcry for regulatory relief. This legislation would provide that relief. The bill would repeal the rule and thus return the law to the pre-1985 rules.

This is only fair. The recordkeeping rules were a gross oversight contained in the Deficit Reduction Act of 1984, which has created unnecessary Government intervention. By passing this legislation we will be getting the Government off the backs of the American people.●

● Mr. FORD of Michigan. Mr. Speaker, I rise in support of the legislation repealing the contemporaneous recordkeeping requirements of the Deficit Reduction Act of 1984 (Public Law 98-369). Clearly, this provision of Public Law 98-369 imposed an excessive burden on both businesses and their employees. The Congress never intended to impose a recordkeeping requirement that would force such individuals to keep minutely detailed daily logs of all trips made in connection with their business. It has become apparent that administrative changes by the Internal Revenue Service will prove to be inadequate in relieving businesses of this paperwork burden.

This bill would repeal the recordkeeping requirement for all listed property, including automobiles and computers. The legislation also would repeal the special negligence penalty for failure to have contemporaneous records and the provision requiring accountants to obtain written confirmation from the taxpayer that such records exist. Delivery trucks, buses, marked police and fire vehicles, ambulances, hearses and other vehicles not designed for personal use will be completely exempted from all recordkeeping requirements.

Further, the withholding provisions would be made optional, allowing the employer to either include the imputed income on an employee's W-2, or withhold taxes on such income in any other convenient manner. The only change from prior law is the addition of a requirement that there be some written evidence supporting a taxpayer's claimed deduction. I urge my colleagues to support this effort to provide much-needed relief for small businesses.●

● Mr. SWINDALL. Mr. Speaker, my first knowledge of the recordkeeping requirements came less than 3 days after I was sworn into Congress when I received a phone call from my brother, Kevin, who is back home running the family furniture business. In the course of the conversation, he told me that we had failed to make three deliveries that day, whereupon I asked him why he was bothering me with that fact, since I had run for Congress to help run the country, and that it was his job to run the business. His response was that it was because of the way we were running the country that he had called and that the reason he had failed to make three deliveries that day was because of the contemporaneous recordkeeping provision which Congress had passed. Needless to say, I instantly cosponsored the repeal legislation and it is in support of that repeal that I rise today.

By way of background, in 1984 the U.S. Congress passed an omnibus tax bill which included among many other provisions, a requirement that taxpayers who claim tax deductions for the business use of their automobiles keep strict records. When the IRS drew up the regulations to implement the contemporaneous records language included in the tax bill, records were required to document such inane details as the exact mileage each day traveled for business and the business purpose of each business trip claimed, for example, to make a sales presentation to customer X. A House committee estimated that some 30 million cars where covered by this new requirement. Needless to say, the time required to comply with these regulations was ridiculous, and a tremendous burden for the businessperson whose time could be better spent conducting business.

The story which I just related regarding the drop in productivity in my small furniture business resulting from this ludicrous law illustrates on a microscopic scale what has already occurred on a macroscopic scale with small businesses and farms throughout these United States. To repeal this law is to allow small businesses to continue the type of productivity this Government must encourage rather than discourage.

The cries of protest I heard with regard to this obscure tax proposal, which was buried in the Omnibus Tax Act, have far exceeded those I have witnessed on any other law or bill since I've been here in Congress. In fact, I understand that this car log regulation has the distinction of causing more letters to flow into our congressional post offices than any other single issue in the 99th Congress.

I am pleased to see that the Congress has seen the error of its ways and is moving to correct this abomination by repealing the car log provision, and is considering replacing the car log requirement by restoring generally the previous language which had heretofore existed for many years. In addition, the bill we are considering will reduce the amount of investment tax credit and depreciation allowed for luxury cars, in an effort to make the legislation revenue neutral, or in other words compensate for the lost revenue associated with the repeal. As Members of Congress I think we all realize that it's impossible for us to completely anticipate how a law will actually work once it's enacted. This is a prime example of how a seemingly innocuous proposal can become a nightmare. Fortunately, we are taking the opportunity to say it was the wrong way to approach the problem, and we eliminated the approach.

Taxpayers who use their vehicles for business purposes will still be required to maintain adequate records and have other sufficient evidence, as before, and will further be required to provide the evidence in writing. But, there's a point at which the cost for improved compliance exceeds the tax revenues which result. I think we all agree that only legitimate business expenses should be deductible, but there are better ways to prevent abuse of our tax system.

For all these reasons, Mr. Speaker, I urge repeal of the so-called contemporaneous recordkeeping legislation.●

● Mr. ROTH. Mr. Speaker, I rise in support of this legislation to repeal the contemporaneous recordkeeping requirements of the Deficit Reduction Act of 1984. I commend the members of the Ways and Means Committee for acting so quickly to allow us to repeal this unreasonable burden.

I introduced legislation to address this problem because the sentiments of my constituents echoed loudly the detailed problems caused by this law and the subsequent IRS regulations. These modified proposed regulations require that detailed vehicle logs be kept in order for a farmer or a business person to benefit from the lawful deduction of the expenses incurred by the business use of a car or truck.

Testifying at a hearing before the Ways and Means Committee, I shared these concerns. From over 200 letters per day from my constituents, I have learned that because of these new rules, the average business person would have to spend from 20 minutes to 2 hours per day filling out new forms. This would sap his or her other productivity and result in additional costs which ultimately would be passed on to the consumer.

This new paperwork requirement imposed by section 179(b) of the Deficit Reduction Act of 1984, was an attempt by Congress to restrict tax avoidance that is based upon the deduction of vehicle expenses, when these expenses are not truly related to business use. This well-intended provision simply doesn't work. In order to encourage tax compliance, nearly everyone would have to become bookkeepers for the Government.

We do not want to perpetuate a tax loophole or promote tax evasion. We in this Congress must protect taxpayers from an unreasonable requirement to keep excruciatingly detailed logs of mileage, times, dates, and purpose of travel.

We have heard repeatedly from my constituents that business people and farmers do not mind paying their fair share of taxes. But they do strongly object to unjustifiable Federal requirements for thousands of pages of unneeded paperwork. It is unfair to burden with unnecessary paperwork business people and other taxpayers who routinely use vehicles for tax purposes. It is unfair to turn productive business people into unproductive bookkeepers for the IRS. This country cannot afford these types of senseless regulations.

A repeal of this law would not relieve taxpayers of reasonable recordkeeping responsibilities. Taxpayers would still be required to maintain adequate records or sufficient corroborating evidence to document claimed deductions, just as they did before.

I do not believe that Congress intended to create an unreasonable paperwork burden on those who use vehicles for farming and business purposes. Therefore, we must respond now to relieve taxpayers from this unintended burden. I hope that my colleagues will join me in supporting this measure which will restore some fairness to our Tax Code.●

The SPEAKER pro tempore. All time has expired.

The question is on the motion offered by the gentleman from Illinois [Mr. ROSTENKOWSKI] that the House suspend the rules and pass the bill, H.R. 1869.

The question was taken.

Mr. ROSTENKOWSKI. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

□ 1850

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the bill just debated, the extraneous material to include a letter from the Treasury Department.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

EXPRESSING SENSE OF CONGRESS THAT THE PRESIDENT TAKE ACTION RELATING TO TRADE DEFICIT AND UNFAIR INTERNATIONAL TRADE PRACTICES OF JAPAN

Mr. ROSTENKOWSKI. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 107) to express the sense of the Congress that the President take action to reduce the growing U.S. merchandise trade deficit and that he take action to respond to unfair international trade practices of Japan.

The Clerk read as follows:

H. CON. RES. 107

Whereas the global United States merchandise trade deficit reached an unprecedented level of $123,000,000,000 in 1984—representing a tripling of the trade deficit in three years;

Whereas this unprecedented trade deficit is partially the result of the strong dollar, which in turn is related to the large fiscal deficit confronting this country and the large volume of foreign capital needed to finance this deficit;

Whereas concerted action by both the President and the Congress is needed to reduce the fiscal deficit and thereby bring the dollar down to a level which will help restore United States trade competitiveness;

Whereas unless such action is taken, the ability of the United States to resist broad-scale import protection for United States producers will be substantially reduced;

Whereas the United States merchandise balance of trade deficit with Japan reached $37,000,000,000 in 1984—accounting for almost one-third of the entire United States deficit with the world;

Whereas although United States exporters lack equitable and fair access to the Japanese market for manufactured goods, forest products, and key agricultural commodities in which the United States has a comparative advantage, Japanese producers have extensive access to the United States market for products in which Japan has a comparative advantage;

Whereas Congress recognizes that lack of market access to Japan—the world's second largest Free World economy—and the overall imbalance in bilateral trade has the potential of undermining the entire range of bilateral relations between the United States and Japan;

Whereas the problem of market access to Japan—particularly in manufactured goods—is not confined to the United States but is a common problem shared by most of the world's trading nations;

Whereas negotiating with Japan over the years to secure meaningful improvements in market access for competitive United States exports has been largely unsuccessful;

Whereas progress in the current negotiations on access in the telecommunications, forest products, pharmaceuticals and medical equipment sectors is essential if the bilateral trading relationship between the

United States and Japan is to be on an equitable and mutually advantageous basis;

Whereas action by the United States is appropriate—

(1) to enforce United States rights under trade agreements, to which Japan is a party, and

(2) to respond to Japanese acts, policies, and practices which are—

(A) inconsistent with, or deny the United States the benefits of, trade agreements to which Japan is a party; and

(B) are unjustifiable, unreasonable, or discriminatory: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President shall take all appropriate and feasible action to—

(1) develop a concrete plan for reducing the trade deficit by attacking its causes, including the high value of the dollar on exchange markets, in order to assure that United States products can compete on a fairer basis in United States and foreign markets; and

(2) secure the elimination of Japanese acts, policies, and practices which are—

(A) inconsistent with, or deny the United States the benefits of, trade agreements to which Japan is a party; and

(B) are unjustifiable, unreasonable, or discriminatory.

SEC. 2. (a) Within 45 days after the day on which this concurrent resolution is agreed to by the Congress, the President shall determine whether Japan has taken sufficient action to assure the elimination of those Japanese acts, policies, and practices described in paragraph (2) of the first section of this concurrent resolution.

(b) Before the close of the 60th day after the day on which this concurrent resolution is agreed to by the Congress, the President shall report to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate the determination made under subsection (a), together with the reasons for that determination. If that determination is negative, the President shall promptly take action to eliminate those acts, policies, and practices described in such paragraph (2) by more aggressive use of existing customs laws and other trade laws governing the importation of merchandise. The action taken by the President under this subsection, which shall be described in the report, shall be sufficient to insure that access to the Japanese market is fair and equitable, as measured by increased sales of competitive products from the U.S. and elsewhere, and verified by affirmation from the U.S. Business Community.

(c) A summary of the report made under subsection (b) shall be published in the Federal Register.

SEC. 3. Any action taken by the President under section (2)(b) may be modified or revoked only if the President determines that the objective described in that section has been achieved. The President shall report to Congress, and publish in the Federal Register, notice of such determination.

The SPEAKER pro tempore. Is a second demanded?

Mr. SCHULZE. Mr. Speaker, I demand a second.

Mr. FRENZEL. Mr. Speaker, I demand a second.

PARLIAMENTARY INQUIRY

Mr. SCHULZE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. SCHULZE. Mr. Speaker, my inquiry is whether the gentleman from Minnesota is opposed to the resolution?

The SPEAKER pro tempore. Is the gentleman from Minnesota opposed to the resolution?

Mr. FRENZEL. In its present form, I am, Mr. Speaker.

The SPEAKER pro tempore. The gentleman qualifies.

Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois [Mr. ROSTENKOWSKI] will be recognized for 20 minutes and the gentleman from Minnesota [Mr. FRENZEL] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Illinois [Mr. ROSTENKOWSKI].

Mr. ROSTENKOWSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I introduced, with the cosponsorship of several colleagues, a concurrent resolution calling on the President to do two things: First, to take action to reduce the growing U.S. merchandise trade deficit and second, to respond to unfair trade practices of Japan.

The committee considered and approved this legislation just this morning by voice vote and requested that it be placed on the suspension calendar for immediate consideration by the House.

The purpose of this resolution is twofold. First, it draws attention to the need to deal with some of the underlying causes of the global U.S. trade deficit, particularly the massive budget deficit plaguing this country and the strong dollar which results. The size of our trade deficit is alarming because of the erosion it implies for our exporting and import-competing sectors. It is alarming because of the protectionist sentiment which it spawns. But most alarming of all is what it says about our ability to manage the U.S. economy in a sound and responsible way.

By the administration's own estimates, the strong dollar is responsible for about half of the U.S. trade deficit, acting as it does as a subsidy on imports and a tax on exports. If the Congress, with the cooperation and leadership of the administration, could succeed in reducing the budget deficit and thereby reduce the need to import massive amounts of foreign capital to finance the deficit, we would help bring the dollar down to a level which would restore the competitiveness of U.S. exports in world markets. This resolution calls upon the President to take forceful action in addressing this problem. I can assure you that if the President takes the lead on this issue, I will cooperate fully in taking whatever steps may be necessary to reduce the budget deficit.

Second, the resolution also calls upon the President to take action against Japan for its persistent failure to remove its unfair, and deeply ingrained barriers, to imports—particularly of manufactured goods.

I recommend this step with great reluctance and deep reservations. However, I believe this action is necessary and justified because for too long, Japan has been a major beneficiary of free trade while shouldering few of the burdens which that system is meant to impose on all developed countries. Despite the enormous success that Japanese products enjoy in the U.S. market, American producers are unable to penetrate Japanese markets significantly, even in sectors where we are the world's most competitive producers: including telecommunications and certain electronic goods, wood products, and pharmaceuticals and medical equipment.

This is not to say that American producers are unable to win market access across the board in Japan's markets, or that some firms or products are not successful in Japan. But it is bare exaggeration to say that those successes can be counted on two hands. By most objective measures, Japan's market is not truly open to imports of manufactured goods. Not just American goods, but goods from Japan's trading partners in Europe, Southeast Asia, and other parts of the world.

In conclusion, Mr. Speaker, this resolution sends a message both to the administration and to Japan that the House of Representatives wishes the administration to take firm action to deal with the dual problems of the global U.S. trade deficit and the problem of market access in Japan. It expresses the sense of the House in this regard but is not binding on the President. Mr. Speaker, I urge my colleagues to support this resolution.

SUMMARY OF H. CON. RES. 107

To express the Sense of the Congress that the President take action to reduce the U.S. trade deficit and to respond to unfair international trade practices of Japan.

Contains findings with respect to the size of the U.S. merchandise trade deficit, its relationship to the strong dollar and the need for concerted action by both the President and Congress to address these problems; and states that unless such action is taken the ability of the U.S. to resist import protection will be substantially reduced.

Contains findings that the merchandise trade deficit with Japan and the lack of access to Japan for U.S. exporters is a serious problem; that U.S. exporters lack equitable and fair market access for many manufactured goods in which the U.S. has a comparative advantage, while many competitive Japanese products enjoy extensive access to the U.S. market.

Contains findings that negotiations with Japan to improve market access have been largely unsuccessful and that action by the

U.S. is appropriate to enforce U.S. rights under various trade agreements and to respond to Japanese actions which are unjustifiable, unreasonable or discriminatory.

Resolves that it is the Sense of the Congress that the President shall take all appropriate and feasible action to: (1) develop a plan for reducing the trade deficit by attacking its causes, including the high dollar; and (2) secure the elimination of Japanese acts, policies and practices which are inconsistent with or deny the U.S. the benefits of trade agreements and are unjustifiable, unreasonable or discriminatory.

Calls further for a determination by the President within 45 days as to whether Japan has taken sufficient action to assure the elimination of these acts, policies and practices and, if that determination is negative, calls for prompt action to eliminate such acts, policies and practices by more aggressive use of existing customs laws and other trade laws governing the importation of Japanese merchandise.

States that such action shall be sufficient to insure that access to the Japanese market is fair and equitable, as measured by increased sales of competitive products from the U.S. and elsewhere, and verified by affirmation from the U.S. business community.

States that revocation of any action should only be made if the President determines that the objectives of eliminating Japanese import restraints has been achieved.

Calls for reports to Congress as to the President's determinations and actions.

COMMITTEE ON WAYS AND MEANS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, DC, April 2, 1985.

Hon. JAMES A. BAKER III,
Secretary of the Treasury, Department of the Treasury, Washington, DC.

DEAR MR. SECRETARY: As you will recall, on March 5, 1985, the Committee on Ways and Means conducted an extensive hearing on the temporary and proposed recordkeeping regulations as revised by the Department. Assistant Secretary for Tax Policy, Ron Pearlman, and the Commissioner of Internal Revenue Service (IRS), Roscoe Egger, testified on behalf of the Administration. The Members of the Committee questioned both Witnesses intensively on the application of the regulations to specific situations and on the rationale for certain rules. In addition to the questions on the recordkeeping regulations under Code section 274(d), a number of questions arose relating to the fringe benefit regulations under Code sections 61 and 132, many of which Assistant Secretary Pearlman and Commissioner Egger agreed to reexamine.

To facilitate timely and informative responses to the concerns raised by the Members, I would like to restate the specific areas of concern raised by Members at the hearing:

(1) Valuation of employer-provided vehicles and aircraft

(a) whether the use of SIFL and multiples thereof is the proper valuation for the use of corporate aircraft;

(b) whether the cost of chartering is the proper valuation for the use of corporate aircraft when the trip has no business purpose;

(c) whether different valuation rules should apply to nonluxury cars provided to employees, for instance, a fixed dollar per day for commuting and a cents-per-mile for other personal use;

(d) whether the Annual Lease Value is the proper valuation for use of vans and trucks, including pick-up trucks;

(e) why the special rules for valuing commuting use of autos, trucks, and aircraft are not available to key employees and one-percent shareholders.

(2) Exclusion from income for taxpayers using employer-provided vehicles in certain occupations:

(a) whether the use of fire department, police department or emergency medical vehicles and vehicles used by oil and gas well servicers, electricians, plumbers, and veterinarians to drive between their homes and their places of business should be considered a working condition fringe.

We also ask you to review an issue not raised at the hearing, but of serious concern to a number of our Members relating to the mileage allowance of rural letter carriers. It is our understanding that an agreement on how to treat these allowances between the IRS and the letter carriers was dissolved retroactively, and is causing severe problems among those taxpayers being audited for past years. We think this is patently unfair to these taxpayers, and expect you to give this matter your personal attention immediately.

We would appreciate your personal attention in reviewing these issues, given the need for early guidance to employers for withholding purposes. As you know, several of these regulatory issues are the subject of legislation introduced in Congress. We strongly feel that these problems which derive from regulations should be resolved administratively and not through legislation. However, if these issues are not expeditiously resolved, it is clear that legislation will be forthcoming. Such a result may only create additional problems for all concerned. We look forward to your early response.

Mr. FRENZEL. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I want to commend the Ways and Means Committee and its staff for constructing a resolution much better than that passed last week by the Senate on the issue of United States-Japan trade relations.

This House concurrent resolution does not make Japan a single scapegoat for the underlying problems causing our unprecedented trade deficit. Nor does the resolution depend on the shaky foundation of automobile imports, where, in my judgment, the issue is aggressive competition, and not unfair trade practices.

It identifies the Japan problem for what it is: restricted market access. It does not put all the blame on Japan, but it recognizes the access problem and urges the President to deal with it both promptly and vigorously.

I am aware that most Members can hardly wait to cast an anti-Japan vote. They will vote for this resolution even as they wish it were much stronger. The pressures to have a quick vote were powerful.

However, I am very concerned about the procedure of marking up a resolution and rushing to the floor with it the same day; I am not sure how useful such an exercise is when Members have not had adequate opportunity to examine the issues. Also, the administration has not taken a position on the language and, before doing so, surely would have to give the current 60-day negotiating period, endorsed by Prime Minister Nakasone only a few days ago, time to bear fruit, especially with respect to trade in telecommunications products.

The resolution focuses on our global trade deficit, recognizing one of its prime causes as the strong U.S. dollar against all major currencies, which has resulted in a serious erosion of U.S. price competitiveness abroad.

It restates the obvious: We must get our budget deficit under control if we are to restore our trade position. Now we have a bilateral deficit, not just with Japan, but with all our major trading partners. The resolution correctly points out that our substantial trade deficit is making it difficult to resist broad-scale protectionist measures against any number of importers, including Japan.

The resolution also focuses on the special problems we have had with Japan. It is true that Japan has not provided market access for competitive imports to the same degree as its exporters enjoy in other markets, especially the United States.

Our producers have experienced less than equitable and fair access in certain manufactured goods, telecommunications, forest products, pharmaceuticals, medical equipment, and some agriculture commodities, to name only a few categories. Such access can only be measured by increased sales of competitive products from the United States and elsewhere, as verified by the U.S. business community in terms of new market opportunities in Japan.

This resolution asks the President for a determination within 45 days as to whether Japan is providing adequate market access and is meeting its obligations under trade agreements to eliminate unjustifiable, unreasonable, and discriminatory practices. If the President determines that Japan continues to deny fair access to its markets, this resolution urges the President to take prompt action to eliminate the unfair practices through more aggressive use of existing customs and other trade laws.

Japan, of course, is not the only trading partner with which we have had difficulties. Our huge trade deficit with Canada is larger on a per capita, or GNP, basis than our Japanese deficit. Our trade balance with the European Community has deteriorated much more significantly than with Japan.

In addition, the EC maintains financing and other subsidies that displace U.S. exporters in foreign markets. We must continue to pursue solutions to our trade problems through

both bilateral and multilateral negotiations, and continue to press for a new round of GATT negotiations beginning this fall.

We must be tough on those trading partners which use unfair practices, but we also must continue to negotiate, and to tailor our responses to the specific offenses. If we unleash protectionist actions based on emotional response, we will hurt ourselves and the world trading system. If we are lucky, we might occasionally hurt the individual trading partners which we have targeted.

Mr. Speaker, I know we have problems with Japan. I agree this resolution is a reasonable approach compared with the Senate language. I know Members want to vote on it.

However, I have a strong aversion to bypassing our subcommittee and passing language whose ink is still wet. When both the Prime Minister of Japan and President Reagan have pledged success to new discussions, I believe we should be especially careful. The resolution is not a bad one, but I shall vote against it on procedural grounds.

Mr. Speaker, I reserve the balance of my time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Arkansas [Mr. ANTHONY].

Mr. ANTHONY. Mr. Speaker, I rise in support of House Concurrent Resolution 107. I think there are some important things that we need to remember here. This resolution is not directed just at Japan. It is directed at the President as well. The President, through his spokesmen, have acknowledged that at least half the present trade deficit, the largest in the history of the United States, running about $122 billion, is the result of the strong dollar. We can debate over and over what causes the dollar to be too strong, but the dollar, by most estimates, is at least 60 percent overvalued at the present time. We can talk to anybody that is trying to export any type of commodity and they will tell you that the strength of the dollar is killing them.

Here is what is happening. The business people are making a judgment whether or not to produce in the United States. Right now they are in the process of exporting those jobs and future plants are going to go offshore because it is the only way they can compete.

We are in a war. This is only the first shot. After this passes, I think we are going to have to load the gun and put some real bullets in it. We are going to have to start passing some legislation. We are not just pointing the gun at Japan. You have got Taiwan, you have got Korea, and you have got Canada.

Canada alone is responsible for a depression in the wood products industry. You can look through all areas of our trade and you can see that they want this vast market in order to uplift their boat of economic viability, but they are doing it at the threat of the loss of jobs here and long-term economic viability in this country.

Gentlemen, this is just the first salvo in a long battle.

□ 1900

Mr. FRENZEL. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Indiana [Mr. HILLIS].

Mr. HILLIS. I thank the gentleman for yielding.

At this hour, you know, this is an important bill to be debating this late in the day and on such short notice. And I suppose the topic of the House should be whether we want to engage in some Japan babying or bashing or whatever you want to call it. But there is a real problem that exists here and we all should recognize that, and I think we do.

We have had an unprecedented level and deficit of trade balance of over $123 billion, and approximately one-third of that in the past year; $37 billion in 1984 was accounted for with our trade imbalance with Japan. This has been a well known fact and one that just did not happen yesterday and one that we have known about for a long time.

Yet we do not seem to be able to get any progress made in solving this problem. On two occasions within the past 10 days the Japanese have demonstrated their reluctance to treat the American worker and the American farmer with equality.

A little prior to last week the Japanese announced that they were increasing the shipment of their cars by 25 percent to the United States. This week the Japanese Government asked for still more time to complete their technical standards for telecommunication equipment which would allow American manufacturers access to the Japanese market.

The basic question here is is this fair, and I think we all know the answer to that.

The other basic question here is will this resolution do anything about it, and that is where I have problems in supporting it. I do not think that it is strong enough to really send a message to the people that have to receive it.

With reluctance, I am going to support this resolution with reservations for I think we should be doing more in this area than what the committee proposes at this time.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minute to the gentleman from Ohio [Mr. PEASE].

Mr. PEASE. Mr. Speaker, it is appropriate, I think, that we should be discussing this particular resolution at the same time, in the same evening, as we just passed a bill regarding unemployment compensation. We were wrestling over the problem of some 8 million Americans who are still unemployed even after we have been into a recovery for 2 years.

We have been talking about 2 or 3 million Americans who are structurally unemployed who were previously unemployed for 3 years or longer and have been unable to find jobs.

That unemployment, which is such a vexing problem for us, is directly related to the problem of our huge trade deficit. This is a very appropriate resolution in that it calls attention on the one hand to our overall trade deficit problem and the fact that part of that is of our own making because of our huge Federal fiscal deficits, and the resultant strong dollar which puts our exports at a disadvantage and imports into this country at a distinct advantage.

But the second half of the resolution is equally important because it directs the attention of Americans, as it should, to the particular problems caused by our trade deficit with the Japanese. We had almost a $40 billion trade deficit last year with the Japanese, a $20 billion trade deficit in automobiles alone, and yet we expect to see another $6 or $8 billion in automobiles coming in this year from Japan. We must do something to open up the Japanese markets to our manufacturing industry or we will no longer be a manufacturing nation.

Mr. FRENZEL. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. CRANE], the distinguished subcommittee ranking member.

Mr. CRANE. Mr. Speaker, there are ingredients of this resolution that I can support wholeheartedly, and especially those that make reference to insisting that the Japanese abide by trading agreements to which they are a party. I think our administration should be employing all of the pressures that can be brought to bear on the Japanese with respect to such commitments they have made.

There is also the ingredient of the resolution that I approve of wholeheartedly which acknowledges our responsibility, at least in part, in contributing to some of our own deficit problems with regard to imports. The truth of the matter is our deficits have contributed to a strong dollar, and the strong dollar has injured virtually every sector of our economy that is in the export market.

That is not the total explanation behind the trade deficit with Japan, but it is certainly a major ingredient of it.

In addition to that, the pent up demand that, at the end of the recession in this country, found expression with more purchasing power, more Americans who had delayed pur-

chases, caused us to purchase more imported goods because we were not producing domestically enough to meet that need.

In addition to that, however, I think we have got to examine our own skirts and make sure that they are absolutely clean before we single out any individual country for indictment. For example, we took testimony before the Trade Subcommittee a couple of weeks ago and in the course of that testimony it came out that we have the highest import duties on trucks of any industrial country in the world. In addition to that, we all had the experience of the avocado growers crawling all over the Ways and Means Committee because of the Israeli free trade bill, and they are not the only ones that have endeavored through the years to enjoy some degree of protection.

I spoke to the bakers this past weekend, and the bakers inform me that it costs them 22 cents a pound for sugar here in the United States, whereas their competitors up in Canada pay only 5 to 6 cents per pound for sugar.

We have done the same thing in a variety of categories. So when one talks comparative advantage, I think one must recognize that we ain't playing entirely by the free market rules either.

In addition to this, there are some figures in the specified categories enumerated in this resolution dealing with such things as pharmaceuticals and telecommunications that require more perspective. In an article in the Wall Street Journal of March 27 by George Gilder, he notes:

> After a four-year surge of high-technology sales to Japan, including an export rise of 48 percent in computers, 38 percent in telecommunications gear, 51 percent in analytical instruments, 41 percent in pharmaceuticals, and 63 percent in electronic parts * * *.

Notwithstanding the soaring value of our dollar, I think we have to recognize that there is progress being made, albeit not as fast as most of us would like to see.

There is one other ingredient to this debate, too, however, when you look at that $37 billion trade imbalance with Japan. I saw figures about 2 years ago that indicated that there is a component of our total trade with Japan that is not calculated in these trade figures. For example, at that time about 21 billion dollars' worth of energy was imported into Japan from American-owned energy companies and yet because it was routed through third countries those dollar figures were not calculated in the trade figures.

In addition to that, at that time in Japan there were Americans doing business to the tune of about $15 billion, whereas the amount of Japanese business in the States at that time amounted to only about $5 billion, another $10 billion differential in our favor.

I think the commitment to insist upon enforcement of trading agreements is something we can all embrace. But I do share the sentiments of my colleague from Minnesota. I think we have proceeded with haste.

The fact of the matter is we did not mark up this particular resolution until past noon today in committee, and it is already here on the floor. I feel it really requires more lengthy study, and for that reason I reluctantly oppose it and would urge my colleagues to do likewise.

I yield back the balance of my time to my distinguished colleague from Minnesota [Mr. FRENZEL].

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. Mr. Speaker, I rise in support of this resolution and I commend the gentleman for moving it forward.

Mr. Speaker, this resolution, House Concurrent Resolution 107, is not, I would point out, as strong as the resolution passed by the Senate last week or House Concurrent Resolution 106 introduced today by Mr. BROOMFIELD and myself and over 35 other Members. It should be supported nevertheless until stronger measures can be enacted. This resolution tells the President to "develop a concrete plan for reducing the trade deficit by attacking its causes" and to secure the "elimination" of unfair Japanese acts, policies, and practices. I am fearful that this resolution really only tells the President to negotiate some more with the Japanese. It does not call upon the President, as the Senate resolution and our resolution does, to use existing laws, including regulations, to deal forcefully with the Japanese. It is a weak sister to the Senate measure. If it is adopted today, I hope it will be strengthened in conference.

There is no question that the President, the Congress, and this Nation must take decisive action to confront the international trade crisis between the United States and Japan which threatens our economic recovery, our industries, and hundreds of thousands of American jobs. We have talked all too long.

The situation is quite clear. For years, the United States has attempted to practice so-called free trade policies while Japan has played by a different set of rules.

The result is in an overall trade deficit of $123 billion in 1984—a deficit which could very well exceed $170 billion by the end of 1985.

In the case of Japan, the U.S. trade deficit has grown from $10 billion in 1980 to $37 billion in 1984.

The bottom line is that the United States opens its doors wide; Japan opens its doors a mere crack, or not at all.

In the area of telecommunications, the administration has engaged in another round of negotiations with Japan to open their market for U.S. equipment and services. The trade deficit in telecommunications equipment has grown from $516 million in 1979 to $1.9 billion in 1984. The administration began with nine specific goals.

An internal administration evaluation of the negotiations as of March 17, 1985, showed that only two of those nine goals had been achieved.

Last Thursday, the chief U.S. negotiator, Lionel Olmer, told the Energy and Commerce Committee's Subcommittee on Commerce that further progress had not been achieved.

Specifically, Japan has: refused to eliminate prior registration and approval requirements for Type 2 business services; refused to eliminate arbitrary criteria and criteria that have no technical relevance; refused to adopt a regulatory basis for equipment approval focused on possible "harm to the network"—the same as in the United States; refused to put in writing an agreement to have impartial members on a single independent agency that would approve equipment and network services; refused to permit foreign suppliers an opportunity to comment on proposed administrative procedures, standards, and rules of certification; and refused to establish a legitimate appeal process external to the Ministry of Posts and Telecommunications.

In the area of automobiles, the U.S. automotive trade deficit since 1981 has more than doubled—from $11 billion to $27 billion.

The administration threw away a voluntary restraint agreement with Japan in hopes of greater access to Japan's markets for U.S. goods and services. The Japanese have responded with a 25-percent increase in automobile shipments and a continuation of its closed door policy to U.S. exports. Our trade talks with the Japanese, according to Secretary Malcolm Baldrige, have been "disappointing." We reach agreements in principle, but when the specifics are negotiated, any relation to the principle is purely coincidental. Most importantly, while we talk, the trade deficit climbs.

Japan's barriers to other U.S. exports such as pharmaceuticals, medical equipment, wood products, agriculture products, and other goods and services have become intolerable.

Today's newspapers indicate another expression by the President of "confidence" in Prime Minister Nakasone's commitment a few months ago in Los Angeles to "open" Japan's markets. The President says today he is once again "assured" that Mr. Nakasone "is going to continue doing his utmost to

bring about changes." Thus, the President concludes:

So * * * we'll just have to wait and see what he can accomplish.

Mr. President, we have been waiting for years while the Japanese bureaucrats who are not influenced by Mr. Nakasone's assurance eat us alive at the negotiating table.

The time for tabletalk negotiations has ended. The President must tell our Japanese trading partner that this Nation can no longer sit idly by while Japan's unfair and discriminatory trade practices build and expand Japanese industry at the expense of American firms and workers.

We do not advocate trade war. Instead we seek bipartisan support for the President to take affirmative action to avoid a situation where this country could become a $1 trillion net debtor country over the next 5 years while Japan becomes a $500 billion creditor nation.

If we are ever to have free and fair trade between Japan and the United States, Japan must start playing by fair rules. For the sake of American firms and American workers, we must demand it.

This resolution—weak as it is—could help. But it is only a beginning. We must do more now.

Before closing Mr. Speaker, I want to commend my able colleague from Michigan, Mr. BROOMFIELD, for his contributions to the provisions of House Concurrent Resolution 106 which he and I, along with 39 other Members from both sides of the aisle. The support is welcome, as he is an able and effective Member. I particularly commend him for his support for an industry vital to Michigan, the automobile industry and its workers. It is a pleasure to work with him.

Mr. Speaker, I insert at this point several relevant charts and my recent correspondence with the Commerce Department concerning these matters:

January 1982—First trade package announced.

May 1982—Second trade package.

June-November 1982—Several staff level trips to Tokyo to discuss implementation of these measures.

January 1983—Third trade package. First Reagan/Nakasone Summit. Need for market access in Japan noted.

October 1983—Fourth trade package.

November 1983—President Reagan visits Toyko. Launches an intensive effort to address major bilateral trade issues. Vice President Bush coordinates for United States.

January-April 1984—Followup negotiations.

January 1984—NTT Agreement renewed.

April 27, 1984—Fifth trade package. Addresses several key issues.

May 1984—Vice President Bush visits Tokyo. Welcomes package but notes we have a long way to go. "Yen-dollar accord" announced.

January 1985—Reagan/Nakasone Summit in California. The sectoral initiative launched.

January 28-29, 1985—Undersecretarial delegation visits Tokyo to begin sectoral negotiations.

February 1985 to present—Undersecretarial delegation visits to continue negotiations.

THE SECRETARY OF COMMERCE,
Washington, DC.

Hon. JOHN D. DINGELL,
Subcommittee on Oversight and Investigations,
House of Representatives,
Washington, DC

DEAR JOHN: Thank you for your letters regarding the Japanese automobile export restraint.

I have enclosed information which addresses the questions you raise. I understand that the Treasury Department plans to respond directly to you on question 13 regarding the yen/dollar exchange rate and Japan's commodity tax on automobiles.

To supplement our direct responses to your questions, we have enclosed a copy of our analysis of the Japanese auto export restraint.

I hope that the information we are providing will be of use to you and other members of the Subcommittee.

Sincerely,

MAC,
Secretary of Commerce.

Question 1: Please provide a table showing annually in dollars for the period beginning January 1, 1970 to the present the Japanese trade balance with the United States. Also show for each year the worldwide trade balance of the United States.

Answer:

U.S. MERCHANDISE TRADE BALANCE WITH THE WORLD AND JAPAN

[In billions of U.S. dollars]

Year	Total		Japan	
	F.a.s.1	c.i.f.2	F.a.s.1	c.i.f.2
1970	2.3	[3]—0.2	—1.2	(4)
1971	—2.6	[3]—5.3	—3.2	(4)
1972	—7.1	[3]10.4	—4.1	(4)
1973	.5	[3]—3.6	—1.4	(4)
1974	—4.5	—12.8	—1.7	—2.8
1975	9.1	1.8	—1.7	—2.8
1976	—8.3	—17.3	—5.4	—6.8
1977	—29.2	—39.2	—8.0	—9.8
1978	—31.1	—42.4	—11.6	—13.6
1979	—27.6	—40.4	—8.7	—10.6
1980	—24.6	—36.4	—9.9	—12.2
1981	—27.3	—39.7	—15.8	—18.1
1982	—31.8	—42.7	—16.8	—19.0
1983	—57.6	—69.4	—19.3	—21.7
1984	—107.9	—123.3	—33.6	—36.8

1 Exports, f.a.s.; imports, f.a.s./customs values.
2 Exports, f.a.s.; imports, c.i.f.
3 Estimated.
4 Not available.

Question 2: Please identify all major initiatives in the past decade by various Administrations to open Japanese markets to U.S. products and indicate the effect of those initiatives on the U.S. balance of trade.

Answer:

U.S. TRADE INITIATIVES TOWARD JAPAN

The U.S. bilateral pressure on Japan to open its markets reached the current high level of intensity only recently. During the 1975-1979 period most trade complaints or market access concerns were channeled into the MTN negotiations. The average Japanese import duty will be about 3 percent in 1987. An overall effort, pressed by the United States, to avoid any new trade restrictions in the wake of the oil shocks was the OECD Trade Pledge. Japan was an adherent. Also emerging from our multilateral initiatives on government procurement was the 1980 bilateral agreement to open up the purchases of NTT to U.S. goods.

In 1977, the Trade Facilitation Committee (TFC) was created to resolve individual market access complaints brought by U.S. firms. Many of these specific problems were resolved successfully, but with no mandate to address the overall market access problem.

The real bilateral effort to open the Japanese market to U.S. goods, services and investments began in late 1981 when several U.S. cabinet officers visited Japan to press the issue. The chronology from that date follows (see attached summary of Japan's five trade packages):

January 1982. First trade package announced.

May 1982. Second trade package.

June-November 1982. Several staff level trips to Tokyo to discuss implementation of these measures.

January 1983. Third trade package.

January 1983. First Reagan/Nakasone Summit. Need for market access in Japan noted.

October 1983. Fourth trade package.

November 1983. President Reagan visits Toyko. Launches an intensive effort to address major bilateral trade issues. Vice President Bush coordinates for U.S.

January-April 1984. Followup negotiations.

January 1984. NTT Agreement renewed.

April 27, 1984. Fifth trade package. Addresses several key issues.

May 1984. Vice President Bush visits Tokyo. Welcomes package but notes we have a long way to go.

May 1984. "Yen-dollar accord" announced.

January 1985. Reagan/Nakasone Summit in California. The sectoral initiative launched.

January 28-29, 1985. Undersecretarial delegation visits Toyko to begin sectoral negotiations.

Throughout this period the U.S. bilateral trade deficit with Japan has grown worse. There are many factors involved: exchange rate changes, different economic growth rates, and incomplete implementation of Japanese liberalization measures. It is not possible to quantify the effects, but it can be said that full market access has not been achieved.

Question 3: Please provide a table showing annually for the period beginning January 1, 1970 to the present, the number of motor vehicles produced and assembled in the United States that were exported to Japan and those that were produced and assembled in Japan and exported to the United States.

Answer.

UNITED STATES-JAPANESE MOTOR VEHICLE TRADE, 1970–1984

[Thousands of units]

Year	United States imports from Japan			United States exports to Japan		
	Cars	Other vehicles	Total	Cars	Other vehicles [1]	Total
1970	381	29	410	5	.....	5
1971	704	84	788	5	.....	5
1972	698	168	866	5	.....	5
1973	625	181	806	11	.....	12
1974	792	265	1,057	14	.....	14
1975	696	152	848	15	.....	15
1976	1,129	178	1,307	14	.....	14
1977	1,342	273	1,615	14	.....	14
1978	1,563	453	2,016	13	.....	13
1979	1,617	516	2,133	15	.....	15
1980	1,992	638	2,630	7	.....	7
1981	1,912	663	2,575	4	.....	4
1982	1,801	712	2,513	3	.....	3
1983	1,871	877	2,748	3	.....	3
1984 [2]	1,803	1,064	2,867	2	.....	2

[1] Volume less than 1,000 units annually.
[2] Actual data for January-November 1984 period.

Question 4. Please provide a table showing from the time the Japanese voluntary restraints were first initiated to March 1984 the number (in separate columns) of cars, trucks, and vans authorized for exportation each year and the number (in separate columns) of such vehicles actually exported to the United States. If the restraints are extended, what changes in these numbers can we expect?

Answer.

JAPANESE EXPORTS TO THE UNITED STATES, APRIL 1981–NOVEMBER 1984

Period	Japanese car exports to the United States [JAMA]	Japanese van and truck exports to the United States [JAMA] [1]	United States imports of cars from Japan by date of export [2]	United States imports of vans from Japan by date of export [2]
April 1981–March 1982:				
Authorized volume	1,680,000	82,500 vans, no truck limit	1,680,000	82,500
Actual volume	1,679,000	546,185	1,689,155 [3]	69,129
April 1982–March 1983:				
Authorized volume	1,680,000	82,500 vans, no truck limit	1,680,000	82,500
Actual volume	1,680,000	400,984	1,680,454	81,981
April 1983–March 1984:				
Authorized volume	1,680,000	82,500 vans, no truck limit	1,680,000	82,500
Actual volume	1,680,000	567,018	1,687,427	85,114
April 1984–March 1985:				
Authorized volume	1,850,000	90,850 vans, no truck limit	1,850,000	90,850
Actual volume [4]	1,378,152	512,882	1,094,010	53,707

[1] Actual volume numbers combine van and truck exports from Japan. The Japan Automobile Manufacturers Association [JAMA] classifies both vans and trucks as commercial vehicles and thus does not report separate van and truck exports.
[2] The Commerce Department monitors Japanese car and van exports by collecting data on United States imports of such vehicles by date of export from Japan. Allowing for time lags due to shipments in transit from Japan to the United States and minor statistical discrepancies, these data are comparable to JAMA export statistics.
[3] Because the Commerce Department's monitoring system was not fully in place until mid-1981, this number includes an unspecified number of vans in addition to passenger cars.
[4] JAMA data covers exports during the April-November 1984 period; Commerce data on U.S. imports of cars and vans includes shipments from Japan since April 1, 1984 which had arrived in the United States as of November 30, 1984.

Note.—At this stage, it is not possible to predict what changes Japan would make in its current export levels if the restraints are continued. However, it is likely that the Japanese Government would suggest at least a small increase in car and van exports over present levels.

Question 5. Please explain why the voluntary restraints were not discussed last week. When will they be discussed? Last fall your Department and others in the Administration reportedly indicated that a decision on the extension issue would not be made until a year's data were available for analyses. Is that still the Administration's view? What data are you seeking? Since some of that data will not be available until next month, when will the analyses be completed? Will that provide sufficient time to meet with the Japanese and request an extension?

Answer. At the time the summit meeting between President Reagan and Prime Minister Nakasone, neither Government had completed its analysis of the restraint, so discussion of the issue was considered premature. Discussions between the two countries are frequent and would not be difficult to schedule quickly if necessary.

The Administration is considering a wide range of factors, including data on the financial condition of the U.S. automobile industry, in reaching a decision on the issue of the Japanese export restraint. Actual or preliminary 1984 data already is available on U.S. auto industry sales, production and employment. Because full-year 1984 financial data for U.S. automobile manufacturers is not yet available, the Administration has not completed its review and analysis. In addition, the Administration is reviewing various independent estimates of the industry's full-year 1984 financial performance, including those published by the leading industry security analysts. A final decision on the restraint will not be made until we have received and analyzed the full-year 1984 financial statements of the U.S. auto companies. We expect that this information will be available by mid-February.

Part I of the Commerce restraint analysis (attached) examines the financial condition of the U.S. automobile manufacturing industry as of September 30, 1984. Once full-year 1984 data is available on the financial performance of the industry, the Commerce Department will prepare a supplementary analysis.

Question 6. While I understand that auto industry profits are one aspect of the health of the industry, another is negative revenue. What was the debt-to-equity ratio prior to the 1979-1982 recession period? What was it in that period? What is it now?

Answer. The Department, as part of its on-going analysis of the condition of the U.S. automobile industry, monitors various balance sheet indicators. One such indicator is the long-term debt-to-equity ratio. The combined long-term debt-to-equity ratio for General Motors, Ford, Chrysler and American Motors was 0.11 at the end of 1978, well below 1980–83 year-end levels. As of September 30, 1984, the combined long-term debt to equity ratio for the U.S. Big Four stood at .16.

Combined Long-Term Debt-to-Equity Ratio: General Motors, Ford, Chrysler, American Motors

[Long-term debt/stockholders equity]

Period ending:	
1978	0.11
1979	0.10
1980	0.24
1981	0.34
1982	0.37
1983	0.24
1984:3	0.16

Source: Company annual and quarterly reports.

Question 7. I understand that several agencies, such as the Council of Economic Advisors, your Department, and the Treasury Department are conducting various studies concerning the voluntary restraints and their effects. Please identify all such studies in 1984 and indicate their purpose and their status. If, as a part of those studies, modeling is being used, please identify the model and indicate the assumptions and parameters used and how current the model is. Please provide copies of all such studies.

Answer. The Department of Commerce and the Council of Economic Advisors each prepared studies on the restraint issue with input from other government agencies. These two studies examine the financial and competitive condition of the U.S. automobile industry, and the effects of the restraint on the industry and consumers.

These studies will provide senior Administration officials with information necessary for making a decision on the restraint. A copy of the Department's analysis of the restraint is enclosed.

Commerce Department financial projections for the auto industry contained in our analysis were largely derived from forecasting models for General Motors, Ford, and Chrysler, which were developed by the Department and an independent consultant in 1984. These models generate detailed cash flow statements and balance sheets for each company based on annual report data. The models use regression equations for items when: (a) the regressions appear to be reliable estimators of historical accounting relationships, and (b) the accounting relationships are not expected to change dramatically in the future. The models use simultaneous equations and a decision tree mechanism to alter debt and marketable securities levels based on independent public forecasts of interest rates.

Income statement forecasts were conducted using an existing Department model. The income statement includes estimates of variable profit margins based on data obtained from securities analysts and company breakeven data.

Question 8. Please provide a table showing for each foreign country any trade restrictions imposed on the importation of motor vehicles, including restrictions resulting from taxes, standards or regulations which effectively discriminate against foreign imports. The table should cover any informal restrictions in each country that the Executive Branch is aware of. What countries permit an open market in regard to motor vehicles? Are they major auto producing countries?

Answer. Most developing nations which produce automobiles currently impose local content requirements, import quotas, high tariffs and/or other barriers that restrict foreign access to their automotive markets. The enclosed Commerce Department study on Automotive Local Content Laws in Other Countries describes most of these barriers.

Of the major automobile-producing nations in Europe, Italy, France and Spain maintain formal restrictions on Japanese car imports. Italy limits Japanese car imports to 2,200 units annually; France restricts such imports to approximately 3.0 percent of its market; and Spain maintains local content requirements on domestic producers, imposes high import tariffs and largely restricts automobile imports to those brought in from European Community and by local producers. In addition, Japan currently limits its automobile exports to the United Kingdom and West Germany, to other major auto-producing countries in Europe, to Canada and to the United States.

Members of the European Community (EC) levy a 10.3 percent duty on passenger car imports and a 22 percent duty on most truck imports. In addition, most EC nations impose a motor vehicle tax on imports (as well as domestically built vehicles) which vary according to engine displacement or horsepower.

Japan currently does not apply any tariff on imports of either passenger cars or trucks. The principal barriers to increased U.S. vehicle exports to Japan are the high price of U.S. products relative to Japanese products; significant differences in U.S. and Japanese emission and safety standards and the lack of a self-certification testing procedure to show compliance with these standards; the fact that Japan is a "right-hand" drive country; and the closed nature of Japan's vehicle distribution system.

Japan's commodity tax on automobiles, which ranges from 18.5 to 23.0 percent depending on engine displacement, and high Japanese dealer markups on U.S. products also add to the cost of U.S. vehicles in Japan. Japan's requirements for certifying vehcile compliance with government safety and environmental standards are applied to imports in a non-discriminatory manner. However, because U.S. manufacturers sell a very limited quantity of vehicles in Japan, the vehicle homologation process (conversion to Japanese standards) is a significant administrative and technical burden and adds significantly to the per unit cost of selling in Japan.

For purposes of comparison, the United States currently maintains a 25.0 percent tariff on imported trucks and a 2.6 percent tariff on passenger car imports. Strict emissions and safety standards for motor vehicles also are in effect. In contrast to most other nations, however, the U.S. system allows vehicle manufacturers to self-certify that they comply with government safety standards based on their own testing results.

Question 9. Please provide an estimate of the extent to which additional Japanese-made vehicles will be annually imported over the next five years if the voluntary restraints are not extended after March 1985. What percentage of the automobile and truck sales market in 1983 and 1984 has been captured by foreign imports and of that percentage, what is the Japanese share? What will be the foreign and Japanese share over the next five years if the restraints are not extended?

Answer. In 1983, imported Japanese cars captured 20.9 percent of total U.S. car sales and imports from all countries (except Canada) gained 26.0 percent. In 1984, these sales shares fell to 18.3 and 23.5 percent, respectively.

Imported Japanese trucks captured 13.0 percent of the U.S. truck market in 1983 and 13.6 percent in 1984. Import trucks from all sources (except Canada) held 14.8 percent in 1983 and 14.9 percent in 1984.

Part III of the Commerce Department's restraint analysis examines the sales outlook for Japanese, European and domestically built cars in an unrestrained U.S. market environment. Sales projections presented in this section are based on a variety of factors, including: (1) relevant historical data concerning growth in the U.S. market share of Japanese producers; (2) Japanese company announcements of U.S. production plans; (3) U.S. company announcements concerning import plans; and (4) an examination of forecasts by numerous industry observers.

In the absence of any restraint, the Department projects that by 1987 Japanese auto imports could increase by approximately 1.1 million units over the 1984 level of shipments, from 1,906,000 units to some 3,025,000 units. (The latter figure includes some 450,000 units imported by U.S. producers). Under this scenario, combined with moderate growth in the total U.S. market for autos, Japanese import share could increase from the 1984 level of 18.3 percent to approximately 27.7 percent.

Question 10. If these restraints are abandoned, what will be the effects (in regard to the auto industry) on (a) U.S. job opportunities, (b) U.S. investment, (c) competition, (d) the principal suppliers (i.e., steel, textile, rubber, machine tools, glass, chemical and plant, and semi-conductors) of the domestic motor vehicle manufacturing industry, (d) local and State governments, and (e) the U.S. trade deficit?

Answer. The Department's analysis addressed the impact of an unrestrained U.S. auto market on U.S. auto production and sales, import sales (particularly Japanese), employment (including auto industry suppliers), and the financial condition of the U.S. auto industry. It did not address the impact on local and state governments, on investment by U.S. auto manufacturers, or on the U.S. trade deficit. The impact analysis appears in part III of the Department's restraint study.

Based on this analysis the Department estimates that approximately 110,000 U.S. auto industry jobs could be lost by 1987 if the Japanese export restraint is lifted. This estimate includes jobs lost in supplying industries and also incorporates job gains related to increased production of Japanese cars in the United States. A significant portion of this potential decline in auto industry employment could occur through employee attrition, which now equals about 4-5 percent or 35-45,000 workers per year.

The Department also calculated the potential effects of removing the restraint on the U.S. automobile import bill. Based on an estimated average Japanese car import value of $6,300 in 1984, the value of U.S. auto imports from Japan could rise by about $7.0 billion by 1987, to about $20 billion.

Question 11. Unless the United States can be guaranteed access to a significant share of the Japanese market for U.S. made vehicles, why should the U.S. agree that the restraints be lifted? To what extent has the Administration considered sacrificing the restraints for opening Japanese markets for non-motor vehicle products of the U.S.?

Answer. A principal objective of U.S. trade policy is to remove foreign barriers to U.S. exports, particularly those affecting sectors in which we are internationally competitive. The Administration favors this general approach over ones which seek to reduce the U.S. trade deficit by restricting our imports from other countries. In the case of U.S. automotive trade with Japan, the U.S. Government has sought and obtained tariff cuts on numerous automotive parts and also has pushed for modifications in Japanese standards-related testing procedures, which act as an impediment to greater U.S. vehicle exports to Japan. Modifications in this latter area recently were made and several U.S. manufacturers have begun to evaluate the new testing procedures.

In reviewing the restraint issue, the Administration has focused primarily on the effects of removing the restraint on the U.S. automobile industry. The Administration has not sought to link the restraint decision to other trade initiatives vis-a-vis Japan.

Question 12. To what extent has the price of domestically produced vehicles that are in competition with Japanese exports increased annually at the manufacturer and dealer level since restraints were instituted? If there was an increase, please explain how it was attributable to the restraints.

Answer. This issue is addressed in Part II of the Commerce Department's restraint analysis. There is widespread disagreement about the impact of the Japanese automobile export restraint on U.S. car prices. Based on available data, we believe that domestic small car prices have increased less rapidly than either Japanese car prices or average U.S. car prices since 1982. This general trend appears to apply to both manu-

facturers' list prices and retail transaction prices, which include dealer markups and vehicle transportation charges. The new car component of the CPI, which adjusts for changes in vehicle sales mix and quality, has risen slightly less rapidly than the CPI for all items since the restraint began. Average (domestic and import) new car transaction prices, which are unadjusted, have moderated along with the CPI for all items since 1980, but have risen faster than this general inflation index.

In its analysis, the Council of Economic Advisors (CEA) examined the effects on domestic and Japanese car prices, and the associated consumer benefits, of lifting the Japanese export restraint. The CEA found that, if the present constraints of complying with CAFE standards were removed, domestic small car and average Japanese car prices would decline by $260 and $1,200 per car, respectively, following elimination of the restraint. Domestic large car prices would remain approximately constant. Consumers would realize a $4.1 billion first-year benefit from the elimination of the restraint as average car prices fell and total car purchases increased. The CEA estimated that the employment level in the automotive industry would be reduced by 30,000 jobs under this scenario.

RESPONSE TO ISSUES RAISED IN JANUARY 29 LETTER

The Administration has not yet reached a decision on the issue of continuing the Japanese automobile export restraint. To date, the issue has been reviewed by the interagency Trade Policy Staff Committee and the Trade Policy Review Group. In addition, the Cabinet Council on Commerce and Trade (CCCT) and Trade Policy Committee (TPC) recently held a joint meeting on the Japanese restraint.

Based on information available to us, we share your doubts that existing Japanese automobile production capacity would act as a major constraint on future Japanese exports to this country, at least in the short run. We also appreciate your concerns about the U.S. production and employment losses which could result from a surge in U.S. imports of Japanese cars. In addition, the Administration is sensitive to the potential impact of a large increase in Japanese car exports on our growing bilateral trade deficit with Japan. Once these and other elements have been weighed carefully by the Administration, we will be in a position to make a decision on the issue of continuing of the restraint.

ANALYSIS OF THE JAPANESE AUTO EXPORT RESTRAINT

EXECUTIVE SUMMARY

The Japanese auto export restraint is a temporary program which was initiated in 1981 to provide a "breathing space" to the U.S. industry to weather the effects of the recession, modernize plant and equipment, and develop new products to improve its competitiveness. From April 1, 1981, to March 31, 1984, the Japanese Government limited annual automobile exports to the United States to 1.76 million cars, passenger vans, and utility vehicles, and to 70,000 units to Puerto Rico. In November 1983, the Japanese Government announced a fourth year of restraints to run from April 1, 1984 to March 31, 1985. The levels for this fourth year were set at about 1.94 million units to the United States and 77,000 units to Puerto Rico. A decision is now needed on whether the U.S. Government should seek a fifth year of restraint.

This preliminary analysis was prepared to provide a basis for that decision. It addresses three areas: the condition of the U.S. auto industry at the end of 1984; the impact of the restraint to date on the U.S. auto industry and consumers; and the likely future effect of unrestrained Japanese auto exports on the U.S. auto companies and their employees.

Condition of the U.S. auto industry

In 1984 U.S. manufacturers sold an estimated 11.5 million motor vehicles (7.95 million cars, 3.5 million trucks), 22.3 percent above sales in 1983. Production increased about 18.5 percent. At the end of 1984, total auto industry employment was estimated to be about 880,000 with about 50,000 workers still on indefinite layoff.

As of September 30, 1984 the financial condition of the U.S. auto companies was at its best level since 1978. The U.S. companies have largely recovered from the recession and are in much stronger financial shape. In both 1983 and 1984, the companies earned record profits. As of the end of September 1984, industry profits stood at $7.6 billion, far above the $6.2 billion they earned for the full-year 1983. The industry is expected to report full-year 1984 income of around $10 billion. In constant 1978 dollars, this figure would be $6.3 billion, well above the 1978 level of $4.9 billion.

An examination of industry financial statements as of September 30, 1984, shows that the company balance sheets have not returned to 1978 levels. Due to changes in the basic financial and operating structure of the industry since the late 1970s, they may never do so. For example, the industry has implemented aggressive working capital management programs designed to reduce receivables and inventories (the "just-in-time" system), while stretching payables. This program reduces liquidity, but increases cash flows.

Balance sheet leverage, though higher than in 1978, is low compared with many industries, and continues to improve. Barring radical increases in Japanese market share (i.e., to 40 percent or more of the U.S. market), combined with a severe recession, cash flows should be sufficient to finance capital expenditures, debt repayment, and dividends without substantial borrowing.

Impact of the restraint

The Japanese auto export restraint largely achieved its intended purpose—to provide a "breathing space" for U.S. vehicle manufacturers to introduce new, more fuel-efficient products, improve quality and productivity, and restore profitability. Industry plans to invest about $80 billion in property, plant, and equipment and $17 billion in product research and development between 1978 and 1985 largely will be met. In constant 1978 dollars, and U.S. Big Four producers collectively will spend about $87 billion in these two areas. During the restraint period, U.S. manufacturers also reduced their break-even level by slashing fixed costs from about 11.2 million units to 7.9 million units currently.

The U.S. industry's labor productivity has improved significantly since 1980 as a result of these spending and cost cutting measures, and now stands well above productivity levels in 1973 and 1978, the last two record production years. However, because of the prolonged U.S. auto sales downturn, the expected benefits of the restraint to domestic producers were not realized fully until early 1983. Similarly, the anticipated economic costs of the restraint to domestic consumers, particularly in terms of higher prices, appear to have been modest until the U.S. economy began to recover strongly in early 1983. From that point unitl March 1985, the Department estimates that the restraint resulted in additional 54,000 to 105,000 jobs in the U.S. auto companies and parts and material suppliers; and added between $1.2 to $2.2 billion to the combined net income of GM, Ford, and Chrysler during 1983 and 1984.

The price effects of the restraint are difficult to assess accurately. There is no doubt that the restraint has been a bonanza for U.S. Japanese car dealers. It is widely reported that these dealers have added $500-$3,500 per unit to manufacturers' suggested list prices. The amount dealers actually realize from such sales is probably less than these markups over list, but an accurate measure is not available. The best independent econometric study indicates that average car prices, adjusted for changes in product mix and quality, rose by $500 in 1983 alone. Price time services data show that domestic car prices, and particularly domestic small car prices, rose less rapidly than Japanese car prices during the 1982–84 period (an estimated 19.1 percent versus 26.6 percent). Higher manufacturer and dealer markups on Japanese cars appear to account for much of the average price increase. These prices were also increased to the extent that Japanese car manufacturers and their dealers "forced" U.S. consumers into higher priced models in order to maximize profits. However, this effect of the Japanese export restraint is difficult to assess, given the significant shift in consumer demand toward larger cars during 1983 and 1984.

Small cars, including subcompacts and compacts, held 60.5 percent of the U.S. market in 1982, but only 55.2 percent in 1983, and 49.0 pecent in 1984.

Future effects

The Department also examined the likely effects on the U.S. auto industry of allowing the Japanese export restraint to expire in March 1985. Due to the continuing competitive advantages of the Japanese car companies, we estimate that in the absence of a "price war", elimination of the restraint would result in growth of Japanese car sales (including U.S.-assembled models) from just over 2 million units (19.6 percent of the U.S. market) in 1984, to approximately 3.7 million units (33.9 percent) in 1987. This forecast assumes moderate growth in total U.S. car sales from 10.4 to 10.9 million units during this period. It also assumes that real energy costs remain stable and,

thus, that small, mid-size, and large car sales as a percentage of the U.S. market, remain the same as in 1984. In addition, this forecast reflects evidence that, in the absence of a major appreciation of the yen against the dollar, the manufacturing cost advantage of Japanese auto producers will continue to be substantial ($2,000 or more) through at least 1987.

Approximately one-third of the projected 1.7 million unit increase in Japanese car sales is likely to be due to a large rise in U.S. production by subsidiaries of Japanese firms. The balance (1.1 million units) would be due to rising imports from Japan. Under this scenario, traditional U.S. car builders would experience about a 1.1 million unit drop in sales and production between 1984 and 1987, despite a 500,000 unit increase in total market volume. European importers also would experience a reduction in total unit sales as a result of vulnerability in the small car segment.

Because most of the loss in sales by traditional U.S. manufacturers is expected to occur in the small car segment, the overall profitability and financial condition of U.S. auto manufacturers should not be affected severely. U.S. industry profits, in an unrestrained market environment, are projected to fall from about $10 billion in 1984 to about $9 billion in 1987. At this reduced level, the industry should be able to continue its investment plans without substantial new borrowing. The primary short-term risk to the industry's financial health is a major economic downturn which, in conjunction with higher import levels, could seriously erode profitability. Domestic industry employment, in contrast, is likly to decline significantly, even in the absence of a recession. New job losses could range from about 110,000 workers in 1987 if sales reach 10.9 million units, to over 180,000 in a depressed (8.9 million unit) sales year.

Corporate average fuel economy standards

This analysis did not specifically assess the effect of unrestrained Japanese car exports on the U.S. companies' ability to meet the Corporate Average Fuel Economy (CAFE) standards. But, it should be noted that a 1.1 million unit reduction in sales of domestically manufactured small cars in 1987 will seriously reduce their ability to met these standards and may adversely affect their ability to use "carryback" credits to meet the 1985 standards.

Under the carryback procedures, if a manufacturer can demonstrate that it expects to exceed the CAFE within the next three years, it can carryback these excess credits to meet a shortfall in the current year. Although final (MY) 1984 CAFE figures are not yet available, it appears that two U.S. manufacturers have not met the standard. One has apparently missed the standard by 1.7 mpg and has received approval from the National Highway and Traffic Safety Administration (NHTSA) to use credits it expects to earn in (MY) 1986 to meet the standard. The other manufacturer has apparently fallen about 2.2 mpg short of the standard and is expected to apply to use (MY) 1987 credits to cover this shortfall.

Failure to meet the standard makes a manufacturer liable for civil penalties of $5 per vehicle for each 0.1 mpg by which it failed to meet the standard. Noncompliance is also a violation of the Act.

Current product plans of the U.S. manufacturers indicate that, barring a severe loss in sales of small cars, the U.S. manufacturers should be able to comply with the standards in the future. But the situation could become very tight if the restraint is lifted. Not only may they not meet the standard, but it is also unclear what will happen if the manufacturers fail to exceed the standards in the future by an amount which they used in carrybacks to meet 1984 and, perhaps, 1985 standards.

While Administrative mechanisms are available to reduce the existing 27.5 mpg standard, the best way to resolve the problem appears to be legislative. While this approach is full of difficulties (i.e., in many circles, CAFE is seen as the only element of the Administration's energy policy), it is one we may have to pursue if the restraint is lifted.

PART I—CONDITION OF U.S. AUTO INDUSTRY AT END OF 1984

This section describes recent trends in U.S. auto industry sales, production, employment, and financial performance, and evaluates the current financial health of domestic automobile manufacturers. The financial condition of the industry is analyzed as of September 30, 1984, the date on which the most recently released public financial statements are based. When possible, full-year 1984 estimates of key indicators are included.

Auto industry sales, production and employment

Sales of automobiles continued to recover strongly in 1984, increasing 13.2 percent over 1983 sales. Domestic car sales were up 17.0 percent to 7.95 million units, and import sales were up 2.2 percent to 2.44 million units in 1984. Japanese car sales declined 0.5 percent in 1984 to 1.91 million units. Import penetration declined from 26.0 percent in 1983 to 23.5 percent in 1984. Japanese market share fell from 20.9 percent in 1983 to 18.5 percent in 1984 because of the restraint and the strength in the domestic car market.

Domestic auto production rose 14.5 percent in 1984 over 1983, totaling 7.76 million units in 1984. Industry employment rose substantially, from an average of 757,800 in 1983 to an estimated average of 866,000 in 1984. While this is a considerable improvement, total industry employment is still well below the 1978 peak of 1.03 million workers. Productivity improvement, illustrated by a 14.5 percent increase in 1984 production with only a 5.3 percent employment increase, suggests no return to 1978 employment levels. (See Attachment I for a numerical summary of recent trends in U.S. auto industry sales, production and employment).

Financial condition

The financial condition of U.S. automobile manufacturers at the end of 1984 was at its best level in several years. Most of the companies' 1984 profitability indicators exceeded those of both 1983, a highly profitable recovery year, and 1978, the last good year prior to the recession. Higher earnings led to correspondingly greater cash flows in 1983 and 1984. Balance sheet indicators improved steadily following the recession, but remained below most 1978 levels as of September 30, 1984.

The cumulative effects of years of low earnings, losses, and large borrowings to finance huge capital outlays are still evident when examining balance sheets. For example, neither balance sheet leverage nor liquidity has returned to 1978 levels. These factors, together with heightened foreign competition, are the principal reasons the chief debt rating agencies (i.e., Moody's and Standard & Poor's) have not restored fully 1978 ratings.

TABLE I.—SENIOR LONG-TERM DEBT RATINGS

	Moody's		Standard and Poor's	
	1978	1984	1978	1984
GM	Aaa	Aa2	AAA	AA+
Ford	Aaa	A1	AAA	A—
Chrysler	Baa	Baa3	BBB	BBB

While U.S. auto manufacturers' balance sheets are not fully restored, the industry's financial health is strong. Improved cost control should enable the U.S. companies to continue to produce sizeable earnings and cash flows. Barring radical Japanese penetration increases (to 40 percent or more of the U.S. market), combined with a severe recession, cash flows should be sufficient to finance capital expenditures, debt repayments, and dividends without substantial borrowing. Moreover, balance sheets may not ever recover entirely to 1978 levels due to changes in the financial and operating structure of the industry. For example, industry management has embarked on an aggressive working capital management program designed to reduce receivables and inventories ("just in time" inventories) while stretching payables. Although this program will reduce liquidity, it should increase cash flows. Balance sheet leverage, though higher than in 1978, is low compared with many industries, and continues to improve.

Profitability

TABLE II.—PROFITABILITY OF U.S. BIG FOUR AUTO PRODUCERS

[Percent]

	Full-year 1978	Full-year 1983	Jan-Sept 1983	Jan-Sept 1984
Gross profit margin	15.84	17.44	16.89	17.35
Operating profit margin	7.10	5.90	4.94	7.17
Contribution of unconsolidated subs. to net income	8.83	23.50	27.01	13.75
Return on sales	4.03	4.54	4.05	6.38
Net income (millions)	$4,929	$6,152	$3,950	$7,609

Profitability improvements, which increased in 1983, continued largely unabated in 1984, resulting in record earnings of $10 billion (estimated) for the U.S. companies. This figure was 63 percent above the previous record set in 1983 and 103 percent above 1978. In constant 1978 dollars, 1984 net income ($6.3 billion) is substantially lower, but still well above 1978 earnings ($4.9 billion). Attachment II presents more detailed information on recent U.S. industry profitability.

The earnings growth is the result of higher demand; a market shift to larger, more option-equipped cars, which have wider profit margins; stringent cost control; productivity gains; tax loss carryforward credits; and the Japanese export restraint. Dramatically reduced fixed costs, better variable cost management, and the product mix shift have enabled the companies to widen their margins above those of 1978—on slightly lower volume. The industry's operating profit margin was 7.10 percent in 1978, compared with 7.17 percent for the first 3 quarters of 1984. The 1984 amount would have been higher had GM's margin not deteriorated. GM experienced parts problems with new front-wheel-drive models, production disruptions related to model changes, and the loss of one week's production due to the UAW strike. These factors also caused GM's operating profit to fall below that of 1978.

Return on sales rose from 4.03 percent in 1978 to 6.38 percent for the first 3 quarters of 1984, reflecting the aforementioned improvements and substantially increased earnings from unconsolidated subsidiaries (primarily finance companies). Unconsolidated earnings tripled between 1978 and 1984, as banks, long the main source of financing of retail purchase, retreated from the market during the downturn of 1980–1982. Finance companies filled the gap and experienced rapid growth in their receivables volume and net interest income.

Cash flow

Chiefly because of record earnings, the auto companies' internal cash generating ability was very strong in 1983 and 1984. Internally generated cash (cash from operations) was $12.3 billion for the first 9 months of 1984, while the year-earlier amount was $8.9 billion. The full-year 1984 figure should exceed $16 billion, compared with $15.4 billion for full-year 1983. When compared with 1978, the companies ability to generate internally cash to cover capital expenditures, debt repayments and dividends rose. The ratio of cash from operations to capital expenditures, net long-term debt repayments, and dividends climbed from 1.04 for full-year 1978 to 1.43 for full-year 1983 before dropping slightly to 1.32 for the first 9 months of 1984. (See Attachment III).

This improvement belies some important developments. First, dividends were low by historical standards in 1983 and 1984. The dividend payout rate dropped to 18.5% as of September 30, 1984, compared with 44.8% for 1978. Second, capital expenditures were low in 1983 compared with 1978, as the industry reached a trough in its capital investment cycle. The ratio of capital investment to sales was 5.8% in 1983, versus 6.4% in 1978. At the same time, however, debt repayments increased in 1983 and 1984, as the companies' stronger cash flows enabled them to reduce significantly borrowings incurred between 1980 and 1982.

Future cash flows should continue to be strong although capital expenditures and dividends, which are expected to increase rapidly starting in 1985, might preclude continued accumulation of large cash balances.

Balance sheet

TABLE III.—BALANCE SHEET INDICATORS: U.S. BIG FOUR

	December 31		September 30	
	1978	1983	1983	1984
Working capital (millions)	$12,270	$5,700	$2,633	$9,011
Current ratio	1.55	1.19	1.09	1.27
Quick ratio	0.77	0.70	0.55	0.81
Long-term debt-to equity ratio	0.11	0.25	0.27	0.16

The companies' balance sheets have strengthened considerably since the recession, but they have still not returned to 1978 levels. Balance sheet leverage, as measured by the ratio of long-term debt to owners' equity, improved from .25 on December 31, 1983 to .16 on September 30, 1984, but was still above that of December 31, 1978—.11. While the companies' excellent cash flows permitted them to repay large blocks of debt, owners' equity (though sizeable) was lower than it would have been because of cumulative losses and low earnings between 1979 and 1982. Owners' equity was also adversely affected by the strength of the dollar, which reduced the value of foreign assets and earnings when consolidated with American operations.

Liquidity followed a pattern similar to that of leverage. Working capital rose from $5.7 billion at the end of 1983 to $9.0 billion on September 30, 1984; it was $12.3 billion at the end of 1978. Chrysler's working capital was negative on Sept. 30, 1984. The current ratio (current assets/current liabilities) has also improved, but at 1.27 on September 30, 1984, it was still below the 1.55 level on December 31, 1978. Part of the drop in liquidity resulted from the advent of "just-in-time" inventories. However, much of the reduction also arose from the effects of the recession during which companies stretched payables and accrued liabilities while reducing receivables in order to strengthen cash flow.

The quick ratio, which is the companies' most liquid assets (cash, marketable securities, and receivables) divided by current liabilities, exceeded the 1978 level. It grew from .77 at the end of 1978 to .81 on September 30, 1984. As noted earlier, the industry's strong cash flows were the primary cause of the buildup, and should help the industry weather the next cyclical downturn. However, even this rapid cash buildup was not enough to restore entirely working capital and the current ratio to 1978 levels.

PART II—IMPACT OF THE JAPANESE AUTO EXPORT RESTRAINT TO DATE

This section presents data on recent trends in Japanese car sales. It also provides estimates of the impact of the Japanese auto export restraint on domestic auto sales and production, automotive employment, new car prices and industry financial performance. In addition, information is provided on the extent to which U.S. auto manufacturers used the restraint period to improve their competitive position.

Recent trends in Japanese car sales

Table IV shows U.S. sales of Japanese cars and the Japanese market share during the April 1981–March 1985 (first quarter of 1985 is forecasted) restraint period, as well as during the four previous 12-month periods (April 1977–March 1981). A breakdown of this data by quarters is contained in Attachment IV. U.S. sales of Japanese cars and the Japanese market share remained approximately constant from April 1977 to March 1979. Japanese penetration of the U.S. market grew more rapidly during the next 12 months, reaching 18.1

percent of total sales, and then jumped another 3.3 percentage points between April 1980 and March 1981 in the wake of the Iranian oil crisis and the 1980–82 industry sales decline.

As a result of the continuing downturn in the U.S. auto market in the first and second restraint years, Japanese market share continued to increase, reaching a peak of 23.5 percent by March 1983. The impact of the U.S. economic recovery began in the third restraint year (April 1983–March 1984) and Japanese market share fell. It should reach about 18.6 percent by the end of the current restraint year in March 1985. On a unit sales basis, Japanese sales in the United States have registered modest annual increases since the end of the first restraint year. Unit sales of Japanese cars should reach their highest level ever during the year ending March 31, 1985, based on the latest available sales data.

TABLE IV.—JAPANESE CAR SALES AND SALES SHARE IN THE UNITED STATES, APRIL 1977–MARCH 1985

[Millions of units]

	Sales			Percent	
	Total	Domestic	Japanese	Domestic share	Japanese share
Years prior to restraint:					
April 1, 1977—March 31, 1978	11.10	9.00	1.41	81.1	12.7
April 1, 1978—March 31, 1979	11.51	9.44	1.43	82.0	12.4
April 1, 1979—March 31, 1980	10.36	7.92	1.88	76.4	18.1
April 1, 1980—March 31, 1981	8.84	6.46	1.89	73.1	21.4
Restraint years:					
April 1, 1981—March 31, 1982	8.10	5.87	1.78	72.5	22.0
April 1, 1982—March 31, 1983	8.08	5.81	1.83	71.9	22.6
April 1, 1983—March 31, 1984	9.71	7.33	1.84	75.5	18.9
April 1, 1984—March 31, 1985	10.48	8.00	1.95	76.4	18.6

F = Forecast.

Effects of the Japanese restraint

Historical analysis provides only limited clues about the likely volume of Japanese car sales in the United States during the 1981–84 period in the absence of the Japanese export restraint. However, a comparison of seasonally adjusted annual selling rates (SAAR) and inventory levels for U.S. and Japanese cars suggests that the first two years of export restraint probably had only a minor negative impact on Japanese sales in the United States. In contrast, these same indicators suggest that the export restraint had a significant limiting effect on both Japanese unit sales and the Japanese market share during the post-1982 period.

During the economically depressed April 1981–March 1983 period, monthly seasonally adjusted annual sales rates (SAAR) for domestic and import cars (80% of the latter category are Japanese vehicles) followed roughly the same trend. The SAARs for both domestic and import cars fell significantly during 1981, fluctuated during the first nine months of 1982 at a level slightly above that of late 1981, and then rebounded in the final quarter of 1982. Beginning in early 1983, domestic and import car SAARs diverged sharply, with the domestic car SAAR continuing to grow while the import car SAAR leveled off at 2.3 million units (quarterly basis). From this point on, SAAR data suggest that the Japanese export restraint depressed Japanese car sales well below their potential.

Trends in U.S. inventories of Japanese cars lend further support for the conclusion that the export restraint did not seriously limit Japanese car sales until the second quarter of 1983. The total U.S. inventory of Japanese cars averaged a strong 42 days supply during the April 1981–March 1982 period; a more moderate 32 days supply in April 1982–March 1983; a lean 24 days supply in April 1983–March 1984; and only a 19 days supply in April–November 1984. Under normal circumstances, most Japanese car dealers probably would hold a 40–45 day inventory.

Sales effects

Table V presents two estimates of the impact of the export restraint on Japanese unit sales, based on two different assumptions about likely market share gains of Japanese manufacturers in the absence of the restraint. Estimate A is based on the conservative assumption that the Japanese market share would have continued to grow at the same 0.6 percentage point rate per year during the April 1983–March 1985 period as it did during the first two restraint years. As noted previously, the fixed-unit export restraint probably did not seriously limit Japanese sales during the April 1981–March 1983 period.

Estimate B of the impact of the export restraint on Japanese car sales is based on the assumption that, in the absence of the restraint, Japanese car sales would have grown during the April 1983–March 1985 period at a pace comparable to that occurring from April 1979 to March 1981 (3 percentage points per year). This higher Japanese sales forecast reflects the widespread belief that the large manufacturing cost (about $2,000 per unit) and perceived quality advantage of Japanese companies would have allowed them to realize large sales and market share gains as the U.S. economy recovered during 1983 and 1984. The large number of Japanese companies competing in, or planning to enter, the U.S. market also suggests that major Japanese sales and share gains would have occurred without the restraint. Based on these considerations, Estimate B probably provides the better estimate of the sales effects of the Japanese export restraint.

TABLE V.—IMPACT OF EXPORT RESTRAINT ON JAPANESE CAR SALES IN THE UNITED STATES

[Millions of units]

Period	Actual Japanese sales		Forecast with restraint					
			Estimate A			Estimate B		
	Units	Percent of total	Units	Percent of total	Difference	Units	Percent of total	Difference
April 1981–March 1982	1.78	22.0	1.78	22.0		1.78	22.0	
April 1982–March 1983	1.83	22.6	1.83	22.6		1.83	22.6	
April 1983–March 1984	1.84	18.9	2.25	23.2	0.41	2.49	25.6	0.65
April 1984–March 1985	E 1.95	18.6	2.49	23.8	0.54	3.00	28.6	1.05
Cumulative sales effect					0.95			1.70

E = estimate.

The cumulative differences between estimates A and B in table II and actual Japanese sales between April 1981–March 1985—.95 and 1.70 million units, respectively—represent the approximate loss in Japanese car sales as a result of the export restraint.

Production and employment effects

Table VI provides estimates of the U.S. production and employment effects of the Japanese export restraint. Assuming a substitution ratio of 75 additional domestic car sales for every 100-unit reduction in Japanese sales, the sales impact figures in Table V imply that about 700,000 to 1,275,000 more domestic cars will be produced in the April 1983-March 1985 period than would have been built if the export restraint had not been imposed. Based on a recent industry estimate of the labor content of a small domestic car including assem-

bly operations and first-tier suppliers, and an average of 2,000 manhours worked per year, these production gain numbers imply that the export restraint preserved between 32,000 and 62,000 U.S. auto industry jobs. Indirect employment increases in second-tier and material-supplying industries (steel, rubber, etc.) are not included in this calculation. Based on a comparable industry estimate of labor content per car which includes second-tier parts manufacturers and material suppliers, the export restraint preserved an estimated 54,000 to 105,000 U.S. jobs.

Based on 1983 J.D. Power and Associates' survey data regarding new car buyer comparison shopping patterns and discussions with U.S. industry officials. These sources indicate that about 25 percent of all new Japanese car buyers did not consider domestic models in their purchase decisions.

TABLE VI.—IMPACT OF EXPORT RESTRAINT ON CAR PRODUCTION AND AUTOMOTIVE EMPLOYMENT IN THE UNITED STATES

Period	U.S. production gain in millions of units		U.S. employment gain in thousands of jobs	
	Estimate A	Estimate B	Estimate A	Estimate B
April 1983–March 1984	0.31	.049	24.2	38.3
April 1984–March 1985	.41	.79	32.0	61.7
Cumulative effects	.72	1.28	32.0	61.7

Price effects

The price effects of the Japanese auto export restraint are difficult to assess in view of shortcomings in available price data (including data comparability problems) and the variety of economic factors influencing the pricing decisions of both vehicle manufacturers and dealers. In many parts of the country, U.S. dealers have raised Japanese car sticker prices substantially above manufacturers' suggested list prices during the restraint period. These dealer sticker price increases appear to range from $500 to $3,500 per Japanese car. However, the amount dealers actually realize from such sales also seems to vary widely, since dealers frequently allow customers to bargain for reductions from the increased sticker prices. Unfortunately, statistically reliable national data on the net price effect of these complex transactions are not available. Consequently, several independent studies of the price effects of the restraint and price time series were analyzed for common trends. Other factors influencing the U.S. car market (i.e., energy costs, regulatory requirements, the general inflation rate and level of demand) during the restraint period also were considered in this analysis.

Several recent private sector analyses of the price effects of the Japanese export restraint conclude that the restraint has had a significant upward effect on car prices, particularly Japanese car prices, since early 1983. In contrast, internal price studies by two major U.S. auto manufacturers found only slight price increases as a result of the restraint. However, the latter two analyses were confined largely to changes in manufacturers' list prices, or in adjusted transaction prices which do not differentiate between domestic and import cars. Consequently, these company analyses are incomplete, and may be misleading.

Three independent econometric studies reviewed as part of this analysis—by Robert Crandall (Brookings Institution), Wharton Econometrics, and two IMF economists—found substantial price increases due to the restraint beginning in 1983. The Crandall and Wharton studies, which did not adjust for market-driven changes in product mix, estimated that the restraint added $4-500 to the price of each new domestic car sold in 1983 and about $1,000 to the price of each new Japanese car sold in that year. The IMF analysis reported a somewhat lower 1983 estimate ($450 per car) based on a comparison of average new car transaction prices and the new car component of the CPI. This study did not distinguish between the price effects on domestic and imported cars. However, because the IMF study made an implicit adjustment for improvements in car quality by using the new car component of the CPI as a base, and then compared this base with unadjusted transaction prices, it probably provides the best econometric estimate of the "pure" (quality-adjusted) price effects of the restraint.

Transaction price data is compiled by the Bureau of Economic Analysis, U.S. Department of Commerce, based on survey data collected by the Bureau of Labor Statistics, U.S. Department of Labor. Transaction prices include transportation charges, dealer preparation charges, and dealer markups of discounts from manufacturers' list prices. Factory-direct rebates are excluded.

The Department also compiled and analyzed several time series on Japanese and domestic car prices. Several of these data sets were used in the aforementioned econometric studies. While none of the price measures reviewed is adequate for assessing the price effects of the Japanese export restraint, together they show a fairly consistent pattern.

Tables VII and VIII present summary data on recent trends in new car prices. Table VII shows that during model years 1983 and 1984 (October 1982–September 1984), the average annual increase in U.S. Big Three new car list prices was below the comparable increase in the new car component of the Consumer Price Index (CPI). The average increase in Japanese Big Three (Toyota, Nissan, Honda) new car list prices, in contrast, was about the same as the CPI new car increase in 1983, but more than double the CPI increase in 1984. Both the new car component of the CPI and the average manufacturer's list price changes in Table VII adjust for changes in vehicle equipment levels over time. The CPI for new cars also adjusts for technological improvements. Thus, these two set of price data are largely, but not entirely, comparable.

TABLE VII.—SALES-WEIGHTED AVERAGE PERCENTAGE CHANGES IN MANUFACTURERS SUGGESTED RETAIL PRICES: DOMESTIC AND JAPANESE CARS

Model year	Percent change in CPI–new cars	Percent change in U.S. big 3 car prices	Percent change in Japanese big 3 car prices
1979	7.9	8.7	6.5
1980	8.0	10.5	10.9
1981	6.1	9.2	11.3
1982	3.9	6.4	6.2
1983	2.5	1.3	2.7
1984	[E]2.9	2.1	6.4
1985	NA	*3.5	*2.0

*Based on company announcements through 1/11/85.
[E]=estimate. NA=not available.

Source: CPI=Bureau of Labor Statistics, as reported in MVMA's "Third Quarter 1984 Economic Indicators"; manufacturers' list prices calculated from price change announcements reported in "Automotive News."

Table VIII looks at trends in new car transaction prices. Unlike Table VII data, Table VIII data are not adjusted for changes in vehicle technology or equipment levels. However, Table VIII data do reflect the total price paid for new automobiles—including both manufacturer and dealer markups. This table indicates that average (domestic and import) new car prices have moderated along with the CPI since 1980. During the last two years (1982–84), however, Japanese car transaction prices have risen to a greater degree than domestic car prices. Domestic new car transaction price increases were only about half as great as the rise in Japanese new car transaction prices from 1982 to 1983 and, in contrast to Japanese car price increases, were well below the CPI increase in 1984.

TABLE VIII.—AVERAGE NEW CAR RETAIL TRANSACTION PRICES: DOMESTIC AND JAPANESE CARS, PERCENT CHANGE

	1980–81	1981–82	1982–83	1983–84 [1]
Domestic cars:				
Compact	+15.8	+10.2	+3.5	+4.5
Intermediate	+19.1	+7.2	+4.9	+5.5
Full-size	+18.9	+9.4	+5.0	+6.4
Total	+17.0	[2] +11.0	[2] +6.3	+5.4
Import cars:				
Japanese	+8.7	+3.4	+10.3	+11.0
Other imports	+43.4	+24.4	+12.3	+4.4
Total imports	+18.4	+9.1	+12.2	+11.0
Total cars	+17.3	+10.5	+7.8	+6.2
CPI–all items	+10.4	+6.1	+3.2	+3.8

[1] 1983–84 percentage change figures are based on preliminary data for 1984.
[2] As a result of the significant shift in domestic sales mix toward larger cars and a reversal in pricing trends within vehicles segments, the average transaction price for all domestic cars rose more rapidly from 1981 to 1983 than the average transaction prices for compact, intermediate, or full-size domestic cars.

Source: Bureau of Economic Analysis, published and unpublished data.

Table VIII also indicates that transaction prices of new U.S. compact cars (subcompact plus compact) rose less rapidly than domestic intermediate, domestic large, or Japanese car prices from 1982 to 1984. This pattern can be attributed in part to the relatively greater number of attractive Japanese product offerings in the lower end than in the higher end of the market, and to U.S. auto manufacturers' efforts to meet federal Corporate Average Fuel Economy (CAFE) standards. As a result of an unanticipated change in product mix (total U.S. small car sales fell from 61.5 percent in 1981 to about 54 percent of the market in 1984), two U.S. companies could not meet the model year 1983 or 1984 CAFE standards. To improve their abililty to comply with the CAFE statute, these companies appear to have consciously exercised greater price restraint on small rather than large cars since 1983. They also have encouraged dealers to do the same through frequent use of special sales incentives on small cars.

Consumer costs of the restraint

Using the sales and price data presented in previous sections, an attempt was made to estimate the approximate total cost to the U.S. consumer of the Japanese export restraint. The cost of the restraint to consumers can be divided into two parts: (1) the additional cost resulting from "pure" price increases on domestic and Japanese cars; and (2) the increase in total new car expenditures due to restrictions in product choice. In theory, the latter form of cost increase results from pressures on buyers to buy higher-priced Japanese cars, since more basic models are unavailable to them as a result of the restraint. Because of the theoretical and methodological uncertainties in estimating this form of cost increase, the Department's analysis was confined to calculating only the pure price effects of the restraint.

Based on evidence presented earlier, that the quality-adjusted price increase as a result of the restraint was about $500 per car, the estimated cost of the restraint to consumers in the form of higher new car expenditures was approximately $4.9 billion in the April 1983-March 1984 period, and could reach $5.2 billion in the restraint year ending March 31, 1985.

Capital investment and R&D spending

A key issue in the analysis of the Japanese auto export restraint is the degree to which U.S. vehicle manufacturers have used the four-year "breathing space" to develop new products, modernize their manufacturing facilities and increase productivity. Data collected on trends in U.S. auto industry capital investment (expenditures for property, plant and equipment), in research and development spending and in worker productivity indicate that domestic manufacturers have made substantial financial commitments and progress in these areas since 1980.

TABLE IX.—U.S. BIG FOUR CAPITAL INVESTMENT AND R&D SPENDING

[Millions of dollars]

	Net sales	Capital investment	Percent of sales	R&D spending	Percent of sales	Total plant/ product-related expenditures	Percent of sales
1974	68,000	4,567	6.7	2,162	3.3	6,729	10.3
1975	73,600	3,666	5.0	2,060	2.9	5,762	8.1
1976	93,900	3,838	4.1	2,458	2.7	6,296	7.0
1977	111,700	6,179	5.5	2,950	2.7	9,129	8.5

Source: Company annual and quarterly reports.

U.S. automobile manufacturers committed an estimated $40 billion ($32.7 billion in 1978 dollars) to investments in property, plant and equipment (PPE) during the 1981–84 period, building upon outlays of about $35 billion ($32.9 billion in 1978 dollars) during the previous four-year period. Reflecting the cyclical nature of product-related investments, as well as differences in the timing of major PPE expenditures among companies, total annual capital spending fluctuated considerably during the 1977–84 period. Industry investments in property, plant and equipment are expected to equal at least $50 billion between 1985 and 1989, with announced 1985 outlays totaling $13–14 billion.

Industry expenditures on research and development also were substantial during the 1981–84 period. Such expenditures totaled an estimated $17.9 billion, up 21.3 percent from $14.8 billion between 1977 and 1980. As a percentage of net sales, R&D spending averaged 3.5 percent from 1981 to 1984, compared with 3.2 percent in 1977–80. Combined R&D and capital expenditures within the industry reached over $58 billion (11.4 percent of net sales) in 1981–84, well above the $49.8 billion (10.7 percent of net sales) spent in these areas during 1977–80.

In 1978, U.S. Big Four automakers predicted that they would spend $78.5 billion (Wards Automotive Yearbook, 1979) between 1978 and 1985 to modernize and retool their plants in order to build a complete fleet of fuel-efficient, front-wheel-drive cars and light trucks. This figure excluded anticipated R&D expenditures of about $17 billion in constant dollars during the same period. (The U.S. Automotive Industry, 1980.)

Table X summarizes the progress which U.S. auto producers have made toward both spending targets since 1978, as well as the continued advances expected through 1985. These data show that U.S. Big Four auto producers already have exceeded their long-term spending targets for R&D investments, in constant dollar terms, but have fallen about $12 billion (constant dollars) short of meeting their antici-

pated 1978–85 level of capital investment. At least part of this spending "short-fall" can be attributed to continued consumer demand for rear-wheel drive cars, as well as to the severe auto sales downturn and profit squeeze in 1980–82.

Productivity improvements

In addition to largely meeting ambitious long-term capital investment and R&D spending targets, U.S. car manufacturers have made significant improvements in worker productivity since 1980. As Table XI shows, total U.S. Industry productivity rose from a low of 9.6 cars and trucks per employee in 1980 to an estimated 13.8 vehicles per employee in 1984. This was significantly above the total industry productivity levels posted in the previous two record production years of 1973 and 1978 (11.3 and 12.3 vehicles per employee, respectively). The 1980–84 gain in U.S. Big Three hourly worker productivity was even greater than that recorded for all employees—from 13.4 vehicles per worker in 1980 to 18.9 vehicles per worker in 1984, an increase of 40.6 percent. Although the dramatic rise in production volume from 1982 to 1984 contributed importantly to the productivity increase, changes in industry operating practices and improvements in manufacturing technology also were key factors. Future productivity advances of up to five percent per year are expected within the U.S. industry as a result of ongoing plant modernization programs and more efficient labor relations practices and management techniques.

PART III—FUTURE OF THE U.S. AUTO INDUSTRY WITHOUT RESTRAINT

This section outlines the Department's estimates of the impact on the U.S. auto industry of allowing the Japanese auto export restraint to expire on March 31, 1985. The future size and financial health of traditional U.S. auto manufacturers will be influenced heavily by trends in four variables: the total level of U.S. car sales, the competitiveness of U.S. producers, the degree of import penetration, and the extent of participation by Japanese producer in the mid-size and large car markets. In addition, traditional domestic producers will face substantial new challenges from the U.S. car and truck manufacturing subsidiaries of Japanese firms, whose output is likely to supplement rather than replace Japanese imports.

Despite major gains in domestic manufacturers' productivity since the restraint began, Japanese auto producers appear to have maintained or increased their previously reported ($1,500 to $2,000 per small car) U.S. landed cost advantage. The Japanese manufacturing cost advantage—the result of lower worker compensation rates, lower capital and material costs, and higher productivity—continues to be a moving target. Movements in U.S. dollar/Japanese yen exchange rates have aggravated this competitive situation, by partially or wholly neutralizing the favorable impact of recent U.S. efficiency improvements on the underlying production cost differential. Moreover, past estimates of the Japanese cost advantage may have underestimated the extent of U.S. producers' competitive problems. Thus, given the current competitive strength of Japanese producers, only a gradual reduction, if any, in their manufacturing cost advantage is likely to occur during the 1985–87 period. (See attachment V for a more detailed assessment of the Japanese manufacturing cost advantage, including the influence of recent trends in U.S. and Japanese productivity levels.)

Based on recent studies of productivity in the U.S. and Japanese auto industries, the Department estimates that U.S. firms require at least 20 percent more hours to produce a small automobile than Japanese companies. This estimate assumes that the productivity of U.S. and Japanese material and second-tier suppliers are equivalent. Most of the Japanese advantage is believed to result from higher productivity at the assembly and first-tier supplier levels.

Non-restraint sales forecast

Table XII below summarizes the Department's preliminary forecast of the U.S. passenger car market during 1985–87 in the absence of the Japanese auto export restraint. For the purposes of this analysis, the Department relied on Data Resources, Inc.'s (DRI) 1985–87 forecast for total U.S. car sales. The forecast is somewhat less optimistic (an average of 500,000 units lower in each year) than the 1985 U.S. Industrial Outlook auto sales forecast prepared by the Department's staff in mid-1984. The DRI forecast assumes moderate GNP growth and inflation during this period, with a slight slowdown in economic activity in 1986. It predicts total sales levels that fall between the most pessimistic (9.8 million units—Merrill Lynch Economics) and optimistic (12.0 million units—Arvid Jouppi Associates, Inc.) public forecasts available at the time of this study. In addition, it tracks closely the composite 1985–87 sales forecast reported by the Motor Vehicle Manufacturers Association. Third Quarter 1984 Economic Indicators: The Motor Vehicle's Role in the U.S. Economy, MVMA, p. 8)

Throughout this analysis, it was assumed that small (defined as subcompact), mid-size (compact, intermediate and foreign luxury), and large (U.S./Canadian-built full-size and luxury) cars would account for approximately the same share of the U.S. market in the 1985–

87 period as they did in 1984 (45, 37, and 18 percent, respectively). This assumption is based largely on the belief that real gasoline prices will remain essentially constant between 1985 and 1987, and thus will not stimulate any major shift in sales among segments.

In addition, the Department did not explicity assume a "price war" as the result of elimination of the restraint. It is likely that consumer prices for Japanese cars will decline, if only as a result of the elimination of additional markups by U.S. Japanese car dealers. The extent of such a price reduction easily could increase the Japanese car sales levels forecast here.

TABLE XII.—SCENARIO I SUMMARY: UNRESTRAINED U.S. MARKET

	1984	Percent	1985F	Percent	1986F	Percent	1987F	Percent
Total sales of Japanese imports	1,906	18.3	2,275	21.3	2,675	25.2	3,025	27.7
Sales of U.S.-built Japanese cars	133	1.3	275	2.5	525	5.0	675	6.2
Total Japanese car sales	2,039	19.6	2,550	23.8	3,200	30.2	3,700	33.9
Total sales of European imports	534	5.1	530	5.0	480	4.5	475	4.4
Total sales of U.S./Canadian-built cars	7,818	75.3	7,620	71.2	6,920	65.3	6,725	61.7
Total U.S. car sales	10,391	100.0	10,700	100.0	10,600	100.0	10,900	100.0

In an unrestrained U.S. market, total sales of Japanese-designed cars are expected to grow from just over 2 million units in 1984 (19.6 percent of the market) to 3.7 million units in 1987 (33.9 percent of the market) based on the DRI sales forecast for this period. Sales of U.S.-built Japanese cars, which are included in the above Japanese sales totals, are anticipated to increase from 133,000 units in 1984 to nearly 700,000 units in 1987. During the period under consideration, Japanese production capacity should not be a limiting factor; approximately 3 million units of existing or planned straight-time capacity (2 shifts per day with no overtime) should be available to accommodate car exports to the United States. This capacity estimate accounts for Japanese car sales in Japan and Japanese exports to non-U.S. markets.

These expectations are based on: (1) the limited relevant historical data available concerning the growth in U.S. market share by Japanese producers (i.e., 3.3 percentage points in the year preceding the restraint and 0.6 percentage points per year in the next two years); 2) Japanese company announcements of U.S. production plans; and 3) an examination of forecasts by numerous industry observers. Collectively, these sources suggest that non-captive Japanese import share growth reasonably could equal 1.5 percentage points annually. This is equivalent to an average unit sales growth of about 10 percent per year in 1985 and 1986 and of over 12 percent in 1987, when forecasted total sales growth is greater.

In the small car market, *Japanese imports and U.S.-built units are likely to gain share at the expense of both traditional U.S. and European manufacturers' products'* (VW, Renault), while in the mid-size market, only traditional U.S. producers models are expected to lose share. European mid-size cars, because of their upscale market positions, greater nameplate identity, and consistent sales growth in recent years, probably would retain market share if the Japanese export restraint were removed.

Under the non-restraint scenario presented in Table XII, traditional U.S. car builders would experience about a 1.1 million unit drop in sales between 1984 and 1987, despite a 500,000 unit increase in total market volume. Much of this sales decline would occur in the small car segment as a result of both increased imports (captive and non-captive) and sales of U.S.-built Japanese vehicles. However, increasing Japanese competitive pressure also would be felt in the mid-size car segment, and could result in the elimination of growth opportunities for U.S. manufacturers in this market. Attachment VI provides a more detailed analysis of the sales (assumed to equal production) effects of increased Japanese car sales in an unrestrained market environment, as well as a list of major assumptions in this forecast.

Restrained market

For purposes of comparison, Table XIII shows the likely impact on U.S. imports and traditional U.S. auto manufacturers' sales of maintaining some form of restraint on Japanese car exports. (See Attachment VII for additional information). In this sales scenario, Japanese captive and non-captive imports retain their 1984 market share, and thus increase unit volume in proportion to total U.S. market growth. In this situation, traditional domestic car manufacturers would experience a small decline in both total unit sales and sales share, with much of the loss occurring in the small car segment.

TABLE XIII.—SCENARIO II SUMMARY: RESTRAINED U.S. MARKET

	1984	Percent	1985	Percent	1986F	Percent	1987F	Percent
Total sales of Japanese imports	1,906	18.3	1,975	18.5	1,950	18.4	2,010	18.4
Sales of U.S.-built Japanese cars	133	1.3	275	2.5	525	5.0	675	6.2
Total Japanese Car Sales	2,039	19.6	2,250	21.0	2,475	23.4	2,685	24.6
Total sales of European imports	534	5.1	540	5.0	535	5.0	545	5.0
Total Sales of U.S./Canadian-built cars	7,818	75.3	7,910	74.0	7,590	71.6	7,670	70.4
Total U.S. car sales	10,391	100.0	10,700	100.0	10,600	100.0	10,900	100.0

Production and employment effects

Based on the employment estimating factors used in Part II of this analysis, a 1.1 million unit U.S. sales/production decline (unrestrained scenario) would lead to the elimination of about 145,000 U.S. auto industry jobs by 1987 if worker productivity remained at 1984 levels. Assuming an industry estimate of a five percent annual gain in worker productivity from 1984 to 1987, the effective job loss at traditional U.S. auto companies and their parts and material suppliers would be closer to 125,000 workers. This loss would be partially offset by smaller employment gains (about 15–20,000 workers) at the U.S. assembly plants of Japanese auto makers and their U.S. suppliers. Thus, at 1987 productivity levels, the new employment loss in the U.S. auto industry, including parts and material suppliers, could be about 110,000 workers, nearly double the earlier estimate of jobs preserved during the fourth year of the restraint. These numbers only reflect potential changes in auto industry employment. They do not incorporate estimates of the new change in total U.S. employment as a result of the restraint, which should be minor. (Jobs gained in the automotive sector would be largely transfers from other sectors of the economy.)

In order to look at a bleaker scenario we examined the likely effects of a picture set forth by some analysts. In this worst case scenario, Japanese market share rises to 40 percent of total U.S. sales, and total sales fall by 1.7 million units from 1986 to 1987 as they did from 1979 to 1980. In this case, net job losses in the domestic industry could exceed 180,000 jobs; 1.7 million units/8.74 vehicles per employee, less 15–20,000 new jobs in U.S. plants assembling or supplying parts for Japanese cars.

Impact of unrestrained Japanese exports on U.S. industry financial performance

Using 1984 sales share information by passenger car segment and the market forecasts in Tables XII and XIII, the Department projected the effects on U.S. Big Three financial performance of both maintaining and removing the Japanese export restraint in 1985. Table XIV summarizes the results of these two analyses, as well as the estimated financial impact of a major U.S. recession and a 40 percent Japanese car sales share. These results were derived using financial forecasting models for General Motors, Ford and Chrysler, which were developed by the Department and an independent consultant in 1984. These models generate detailed income statements, balance sheets and cash flow statements for each company based on annual report data and other information compiled by the Department's staff.

TABLE XIV.—FINANCIAL IMPACT ON U.S. BIG THREE OF REMOVING RESTRAINT

	Restrained market				Unrestrained market			1987 recession/no restraint		
	1984	1985	1986	1987	1985	1986	1987	1985	1986	1987
Indicators of profitability:										
Total net income (billions of dollars)	10.0	9.6	9.6	10.2	9.1	9.1	9.2	9.1	9.1	5.9
Return on equity [1]	23.3	23.0	19.5	18.0	22.0	18.7	16.5	22.0	18.7	10.8
Balance sheet indicators:										
Current ratio	1.27	1.40	1.56	1.73	1.39	1.53	1.68	1.39	1.53	1.61
LT debt/equity [1]	.16	.07	.06	.06	.08	.06	.06	.08	.06	.07

[1] As of September 30, 1984.

In a restrained market, U.S. Big Three car makers are projected to realize a combined after-tax profit of $9.6 billion in 1985 and 1986, about $400 million less than they are expected to earn in 1984. Nominal profits would rise to just about the 1984 level in 1987, although total Big Three sales volume would be about 133,000 units lower than in 1984. As a result of expected growth in stockholders' equity, the combined return on equity of Big Three manufacturers would fall from 23.3 percent in the first nine months of 1984 to 18.0 percent in 1987 under a restrained market scenario. Despite somewhat lower profitability, key balance sheet indicators—including combined U.S. Big Three current ratios and long-term debt to equity ratios—should continue to show improvement in a restrained market situation. (However, the industry's new working capital management efforts may result in lower current ratios than projected).

In an unrestrained environment, rising Japanese car sales volumes would reduce the traditional U.S. producers' net income significantly, but not to the degree that might be predicted from the expected drop in total Big Three output. Industry profits could be expected to fall about $1 billion below their 1984 level in 1985 and remain at that level through 1987. This result reflects the fact that average unit variable profit margins of U.S. producers are considerably higher for large cars than for small ones. Because domestic mid-size and large car production volumes probably would not be affected seriously by removal of the Japanses export restraint in a healthy U.S. economic environment, average Big Three unit margins and total profitability could be expected to decline only moderately.

Under the restrained market scenario, the return on equity of the U.S. Big Three automakers would decline from 1983 to 1984 levels by 1987, but still could indicate profitability comparable to that achieved in 1978. Similarly, the domestic industry's current ratio and long-term debt position, as shown in Table XIV, are expected to improve slightly between 1985 and 1987 dispite elimination of the Japanese export restraint.

It should be emphasized that the Department's forecast analysis assumes constant real average variable profits. In an unrestrained market, where higher imports primarily reduce U.S. small car volume, average small car variable profit margins can be expected to drop. Thus, the resultant decline in domestic companies' earnings probably would be more severe than the model forecasts. In addition, companies whose sales are primarily in the small car segment would be affected even more adversely in these circumstances.

The greatest financial risks to U.S. auto manufacturers would appear if the United States experienced a severe recession in 1986 or 1987, and if the removal of restrictions on Japanese car exports resulted in a very high Japanese market share. In the worst case scenario (i.e., total U.S. car sales fall in 1987 by 1.7 million units and Japanese cars capture 40 percent of the Market). Average variable profit margins of U.S. manufacturers probably would drop sharply, reducing profits. Even assuming no change in variable margins per unit in a depressed market, lower volume alone would reduce U.S. Big Three net income by approximately $3.2 billion annually as shown in Table XIV. In this situation, the industry's return on equity could be expected to decline by more than 50 percent from the 1983-84 level. Industry balance sheets would be less affected than would profitability by the effects of a serious short-term sales downturn and increases in Japanses market share. Based on the Department's analyses, the principal short-term balance sheet impact would be a moderate rise in industry indebtedness. Collectively, these results suggest there are considerable risks to the industry's profitability and financial condition in an unrestrained market if a major sales downturn occurs.

Table XII (unrestrained market), Table XIII (restrained market), and the related analysis on production and employment effects provide reasonable, but nonetheless extreme, estimates of the possible outcome of U.S.-Japanese discussions concerning the auto export restraint. Table XV presents estimates of the U.S. sales, production and employment impacts of intermediate Japanese car sales scenarios in relation to the restrained market outlook discussed previously.

TABLE XV.—U.S. SALES, PRODUCTION, EMPLOYMENT, AND NET INCOME EFFECTS OF VARYING FUTURE JAPANESE AUTOMOBILE IMPORT LEVELS

[Thousands of units and jobs]

	1984 actual	1985 forecast	1986 forecast	1987 forecast
Level of Japanese car imports	1,906	2,200	2,400	2,600
Percent of forecasted market	18.3	20.6	22.6	23.9
Change from Scenario II [1]	NA	+225	+450	+590
U.S. sales/production level [2]	NA	7,690	7,175	7,125
Change from Scenario II		−220	−415	−545
U.S. employment effect (net) [3]	NA	−22.8	−39.9	−47.4
Big three net income (billions of dollars)	10.0	9.2	9.4	9.7
Change from Scenario II	NA	−.4	−.2	−.5

NA = not applicable.

[1] See table XIII and attachment VII (restrained market scenario).

[2] Assumes that all of the loss in traditional U.S. producers' sales and production occurs in the small car segment. These figures exclude sales/production by U.S. subsidiaries of Japanese firms, whose share is based on publicly announced plans.

[3] Assumes a 5 percent annual increase in U.S. industry productivity from 1984 levels. Employment gains at U.S. subsidiaries of Japanese firms and their U.S. suppliers are factored into this calculation. These numbers are +5,000 in 1985, +10,000 in 1986, and +15,000 in 1987.

Date in Table XV indicate that an increase in Japanese car imports from 1.9 to 2.6 million units between 1984 and 1987 could be expected to result in a 545,000 annual unit reduction in traditional U.S. car manufacturers' output by 1987. Allowing for anticipated productivity improvements within the industry and rising U.S. production by subsidiaries of Japanese companies, about 50,000 fewer workers would be employed in the U.S. auto industry during 1987 under this liberalized restraint scenario than if Japanese imports were frozen at their 1984 market share. Because Japanese share gains between 1984 and 1987 probably would occur primarily in the small car segment, the probable impact of a liberalized restraint on the net income of U.S. Big Three manufacturers should be modest. Only a major recession, combined with the Japanese car import levels reported in Table XV, would be likely to lead to serious decline in traditional U.S. auto companies' earnings during this period.

ATTACHMENT V

Direct comparisons of vehicle quality between one manufacturer and another, or between one industry and another (i.e., U.S. versus Japanese), are extremely difficult to make. Vehicle quality can be defined and analyzed in numerous ways. Quality assessments can be based on objective measures, such as the size and frequency of recalls or of warranty and non-warranty repairs within a specified period of time. Alternatively, quality can be measured in terms of consumer perceptions related to a wide range of vehicle attributes. Because of the complexity of the quality issue, automobile manufacturers generally assess their own quality using variations of both approaches.

A review of company statements and vehicle recall announcements suggests that U.S. auto manufacturers are making consistent progress in improving quality. At the same time, however, some public surveys concerning consumer perceptions of vehicle quality indicate that this progress may not be recognized fully in the market. This aspect of the quality issue—the likelihood that consumer recognition of quality improvements will lag behind changes in vehicle quality based on objective measures—may represent the more serious challenge to domestic producers. Thus, long-term efforts by U.S. auto manufacturers probably will be required to close the gap in perceived quality which now seems to exist between domestic and many imported products.

Comparison of U.S. and foreign vehicle manufacturing costs

The most difficult and critical challenge facing the U.S. auto industry is to narrow the manufacturing cost gap with Japanese producers. Although domestic producers have made impressive progress since 1980 in reducing costs, recent studies suggest that this cost gap has not been reduced and may have increased in the past few years. The Japanese manufacturing cost advantage is a "moving target." As American producers cut their per-unit production costs, Japanese producers also make new progress, and the gap persists or widens. Movements in U.S. dollar/Japanese yen exchange rates have aggravated this situation, by partially or wholly neutralizing the impact of U.S. efficiency improvements on the underlying production cost differential. However, adverse exchange rate movements by themselves do not explain the persistent production cost gap between U.S. and Japanese vehicle manufacturers. Moreover, it is likely that unfavorable exchange rate swings are translated only partially into a larger Japanese production cost advantage, given the fact that certain Japanese costs are denominated in U.S. dollar terms.

Cost differences will be the overwhelming factor in determining the future level of small car production in the United States. This comparison of costs has become even more complex in the last few years, given the wider range of outsourcing options available to U.S. manufacturers. Such options include both the outright purchase of small vehicles and major components from lower-cost producers and joint venture arrangements to share technology, capital and risk.

Despite the record profits earned by the domestic producers in 1983 and the continuation of positive trends in the areas of output per worker, labor costs per unit, inventory management and defect prevention, the cost of producing a small passenger car or compact truck in the United States remains significantly greater than in Japan. U.S. production costs also appear to exceed manufacturing costs in several of the newly developing auto-producing nations, despite the fact that productivity is generally lower in these locations.

Previous studies of the Japanese manufacturing cost advantage have produced a wide range of estimates and explanations of this cost gap. Analysis of this issue has evolved from attributing most of the U.S.-Japan cost disparity to lower Japanese compensation rates, to indicating that several additional factors, including differences in productivity and capital and material costs, contribute to the total cost variance. Conservative estimates (mostly 2 to 3 years old) of the total Japanese cost advantage in small car production fall between $1,000 and $2,000 per unit (Joint U.S.-Japan Automobile Study, University of Michigan, Ann Arbor, Michigan, February 1984, pp. 151-52) and result in a Japanese landed cost advantage in the United States of about $800 to $1,500 per unit. A more recent study by Booz-Allen (Paul A. Branstad, "The Structural Costs of Complexity in the Automotive Business", Booz-Allen and Hamilton, Inc., paper presented at Fifth World Motor Industry Conference, Geneva, Switzerland, May 24, 1984) and press accounts of internal studies by U.S. auto companies indicate that the landed cost advantage of Japanese producers may equal $2,000 per unit. While the continued appreciation of the dollar against the yen probably accounts for some of the differences between these two sets of cost estimates, other factors also may be involved.

According to the National Academy of Engineering, 1981 * * * this issue, differences in U.S. and Japanese labor unit costs came to about $1,700 for a subcompact automobile. Labor content in purchased materials and components account for about $800, or 45 to 50 percent of the overall U.S.-Japan auto production cost gap. This figure incorporates differences in hourly wages, white collar salaries and worker productivity in independent component production. The remaining $900 is attributed to higher U.S. hourly and salaried worker costs in vehicle assembly and "captive" supplier plants. Non-labor-related differences in purchased material costs are excluded from these estimates.

Differences in total U.S. and Japanese unit labor costs are a result of Japanese advantages in both productivity and wage and salary levels. The previous set of cost estimates is based on an estimated 18 percent productivity advantage and a ratio of Japanese to U.S. compensation costs of approximately 0.5 in 1980.

Using more recent data on differences in U.S. and Japanese hourly compensation rates, the Office of Automotive Industry Affairs reexamined the importance of this factor in explaining the total U.S.-Japan manufacturing cost differential. Table III-5 shows the estimated average hourly cost of total production worker compensation in U.S. and Japanese motor vehicle and equipment manufacturing during the 1975-1983 period.

Data in the table, while not fully comparable suggest that lower Japanese production worker compensation still accounts for an important share of the U.S.-Japan cost differential. Available evidence indicates that higher white collar compensation and the proportionately larger number of such workers in the United States also continue to be significant factors in the U.S.-Japan difference in total unit labor costs.

Japanese auto industry workers, for example, receive many benefits in kind from their employers, some of which probably are not fully reflected in published compensation comparisons.

After adjusting for exchange rate shifts, estimated Japanese auto production worker compensation as a percentage of U.S. auto production worker compensation remained fairly stable at 54 percent from 1975 to 1979 and then fell to about 46 percent during the 1980-83 period. Assuming an equal labor content of 50 man hours of assembly and capitive supplier plant labor per subcompact vehicle in both industries (roughly the Japanese rate), the difference in 1983 U.S.-Japan hourly compensation rates alone would result in a $564 Japanese labor cost advantage on each vehicle built (excluding independent component production). If exchange rate movements since 1978 are excluded from this calculation, this 1983 compensation differential would fall only slightly to about $510 per unit.

[1] 1982 and 1983 data are preliminary and subject to future revision.

[2] Yen/dollar exchange rates used: 1975—296.7; 1976—296.4; 1977—267.8; 1978—208.4; 1979—218.2; 1980—225.7; 1981—220.1; 1982—249.1; 1983—237.6.

[3] Adjusted figures based on 1978 average yen/dollar exchange rate of 208.4/$1.00.

Differences in productivity are another key element underlying the current U.S.-Japan auto production cost gap. Estimates of the disparity between U.S. and Japanese labor productivity in motor vehicle manufacturing vary considerably, according to the period examined and the scope of the industry-to-industry comparison being made. Japanese automobile assemblers are typically less vertically integrated than U.S. manufacturers (although close relationships between Japanese vehicle and parts producers often approximate formal U.S. "captive" supplier plant arrangements), and this greatly complicates any analysis of productivity differences. The issue is further complicated by indications that first-tier suppliers of Japanese vehicle companies may be somewhat more productive than their U.S. counterparts, while second-tier Japanese suppliers are often small firms with comparatively poor productivity levels. However, solid data are not available.

To surmount these problems, most researchers have either adopted a "macro" approach using aggregatec industry data or have concentrated on estimating productivity differences in specific vehicle assembly operations, relying on detailed data available from the largest manufacturers. In the latter case, general adjustments typically are made to assembly plant data as a second step, based on a less rigorous analysis of productivity differences within the automotive parts manufacturing sectors of the two countries. Recent analyses of this type have found productivity variances between the U.S. and Japanese industries of 15 to 20 percent. (*The Competitive Status of the U.S. Auto Industry*, National Academy Press, Washington, D.C. 1982, Appendix A). Time series analysis of U.S.-Japan productivity differences during the post-1979 period suggest that this gap ranges from about 10 to 40 percent (*Joint U.S.-Japan Automobile Study*, pp. 162–63).

Based on the Department's more limited analysis of productivity trends in "captive" (integrated) motor vehicle manufacturing operations in Japan and the United States, U.S. producers made significant progress during the 1980–83 period toward reducing the Japanese industry's productivity advantage. As Table III–6 shows, annual U.S. vehicle output per worker rose 28 percent from 1980 to 1983, while Japanese vehicle output per worker fell by 16 percent during the same period. The productivity decline in Japan in recent years appears to be largely related to the lower capacity utilization rates which have resulted from slower domestic demand and export sales growth. Consequently, this negative short-term trend could be reversed in the future if Japanese output expands significantly in response to the global economic recovery.

Direct comparisons of U.S. and Japanese unit output per worker in captive manufacturing activities are not possible due to extreme differences in the degree of vertical integration between the two auto industries. However, a valid comparison of trends within the two industries can be made.

TABLE III–6.—ANNUAL VEHICLE OUTPUT PER WORKER UNITED STATES AND JAPAN

Period	U.S. output per worker index value (1978=100)	Japanese output per worker index value (1978=100)
1978	100	100
1979	96	98
1980	82	107
1981	83	103
1982	87	96
1983	105	92

Source: Annual reports for General Motors, Ford, Chrysler, Toyota and Nissan.

The reasons for higher labor productivity levels within the Japanese auto industry are numerous and complex. They include more flexible work rules and greater worker participation in Japanese plants, more efficient manufacturer-supplier coordination, and the lower degree of product line complexity. The positive effect of close manufacturer-supplier relations and cooperative labor-management relations on the productivity of the Japanese auto industry have long been recognized. However, industry analysis only recently have begun to examine systematically the overall cost and productivity implications of growing product complexity.

One recent study of the complexity issue estimated that the effects of structural produ-t line complexity, excluding vehicle options, account for as much as $800 of the current ($2,500) estimated gross Japanese cost advantage per unit.[6] A major portion of this $800 cost difference appears to lie in the productivity advantage that results from less complex Japanese product and manufacturing strategies. According to the Booz-Allen study, rising product line complexity—defined as the number of distinct vehicle platforms, engines and nameplates (each associated with its own trim, seat and equipment options levels)—has been both a cause of and a response to the challenges which U.S. producers continue to face: a maturing of their principal markets, fuel price uncertainties, and Japanese competition. Based on this analysis, the increase in U.S. product line complexity accounts for much of the estimated $2,100 rise in average real vehicle production costs between 1968 and 1982. Therefore, balancing the need for product line complexity to meet specialized consumer demands against the pressure to minimize production costs is a critical on-going strategic objective for full-line U.S. manufacturers seeking to reduce the overall cost advantage of Japanese producers.

Based on discussions with several U.S. vehicle manufacturers, the $800 per unit figure probably represents an upper limit on the extent of complexity-related cost differences. Nonetheless, this cost factor seems to play a more important role in the overall Japanese production cost advantage than is generally recognized.

Recent evidence suggests that U.S. vehicle manufacturers have begun to address the complexity issue more effectively through improving the focus of their product strategies and the flexibility and integration of their manufacturing systems. In many cases, domestic suppliers are participating actively in this process, which includes efforts to increase component standardization, reduce inventories, rationalize model and option offerings, and invest in flexible manufacturing technologies. According to many industry executives, even modest progress in these areas could result in significant real cost reductions for the U.S. industry as a whole over a period of a few years.

Total	1,978	1,925	1,910	1,960
Percent of Market	19.1	18.0	18.0	18.0

[1] Small Japanese noncaptive imports were projected by a detailed examination of product lines and a consensus of industry observers.

[2] Includes estimated sales of 100,000 Isuzu Spectrums, 50,000 Suzuki Sprints, and 125,000 Mitsubishi-built Dodge and Plymouth models in 1985; 200,000 Spectrums, 75,000 Sprints and 150,000 Mitsubishi products in 1986; and 200,000 Spectrums, 100,000 Sprints and 150,000 Mitsubishi products in 1987. These figures are based on company announcements.

[3] Projects sales of 150,000 U.S.-built accords and Civics, 100,000 Novas (NUMMI), and 25,000 Sentras in 1985; 225,000 Accords and Civics, 200,000 Novas, and 100,000 Sentras in 1986; and 300,000 Accords and Civics, 250,000 Novas, 100,000 Sentras and 25,000 Mazda 626's in 1987. These figures are based on company announcements.

[4] Mid-Size Japanese imports (Maxima, Cressida, Galant, future Honda Acura, and perhaps other models) are projected to grow 20 percent annually from 1984–85 and to more than double from 1985–87 (largely due to introduction of the new Toyota Crown, Nissan Cedric, Mazda 929, and Honda Acura). Estimates based on a consensus of industry observers.

[5] Midsize European imports are projected to maintain their 3.3 percent share of 1984 sales during the 1985–87 period; small European imports, like U.S./Canadian-built models, lose share to small Japanese cars.

ATTACHMENT VII.—SCENARIO II: JAPANESE IMPORTS MAINTAIN 1984 SALES SHARE (RESTRAINED MARKET)

[Thousand of units]

	Actual 1984	Percent of total	Forecasted sales 1985	1986	1987
Total U.S. car sales	10,391	100.0	10,700	10,600	10,900
Smnall car sales					
Japanese noncaptive [1]	1,696	16.4	1,745	1,645	1,600
Japanese captive [1]	105	1.0	105	105	110
U.S.-built Japanese [2]	133	1.3	275	525	675
European-imports	198	1.9	185	185	185
U.S./Canadian-built	2,474	23.7	2,505	2,310	2,335

Total	3,807		3,960	3,920	4,035
Percent of market	36.6	36.6	37.0	37.0	37.0
Large car sales					
U.S./Canadian-built	1,978	19.1	1,925	1,910	1,960
Total	1,978		1,925	1,910	1,960
Percent of market	19.1	19.1	18.0	18.0	18.0

[1] Captive and noncaptive Japanese car imports hold their 1984 sales share in 1985–87 period. Midsize noncaptive Japanese car sales are expected to grow dramatically during this period due to the introduction of new products and the strong incentives for selling more profitable cars if a fixed unit restraint continues.

[2] Based on public statements of Japanese car manufacturers with current or planned U.S. assembly facilities. See note 3 to Scenario I.

[3] Midsize European imports maintain their 1984 sales share during the 1985–87 period.

Note: Small European imports and small U.S./Canadian-built cars divide the non-japanese car portion of the small car segment during 1985–87 in proportion to their 1984 sales shares (e.g., U.S./Canadian car sales calculated by subtracting estimates of 1985–87 midsize Japanese and European import sales from total forecasted midsize segment sales.

APPENDIX: JAPANESE "COMPREHENSIVE ECONOMIC MEASURES"

ATTACHMENT TO QUESTION 2

The Japanese Government has announced five broad sets of market liberalizing measures over the past four years. These measures were meant to fulfill Japan's commitment to a market open to international trade.

Trade Initiative of December 16, 1981 and January 10, 1982

The first trade inititative, announced in December 1981, accelerated the timing of tariff cuts agreed to in the Multilateral Tariff Negotiations, and established a Japanese Government committee to study opportunities for imports in the Japanese market. One of the results of this group's work was the announcement in January 1982 of a list of measures which would be implemented to alleviate non-tariff barriers in the standards and customs areas. In January, the Japanese Government also announced the establishment of an Office of Trade Ombudsman, which would be charged with responding to foreign complaints regarding barriers to market entry.

Trade Initiative of May 28, 1982

The second trade initiative included tariff eliminations or reductions on a wide variety of products, among which those on photographic film, cut diamonds and several others were of interest to the United States. It also contained a commitment by the Japanese Government to undertake a series of "generic" remedies in such areas as customs procedures, and foreign access to participation in the formulation of industry standards.

Trade Initiative of December 25, 1982 and January 13, 1983

The third trade initiative was announced by the Government of Japan in December 1982 and January 1983. In December, tariff reductions were announced on chocolate, tobacco products and paper. In January, the Japanese Government announced a commitment to undertake a high-level review of Japanese standards and certification procedures. This review eventually led to the passage of some sixteen laws which, as they are implemented at the administrative level, could represent the most significant and wide-ranging removal of foreign barriers to the Japanese market since the conclusion of the Multilateral Trade Negotiations in 1979.

Also included in the January announcement were commitments to expand the number of retail outlets permitted to distribute foreign cigarettes, undertake a study of the possible liberalization of Japan's distribution system for tobacco products, and ensure the participation of foreign firms in NTT procurement.

Trade Initiative of October 21, 1983

The fourth initiative included tariff reductions on 44 items. Also included was a one-year acceleration of rates committed to in the Multilateral Trade Negotiations on some 1200 items.

The October announcement also promised "steady implementation" of improvements in Japanese standards and certification procedures, further efforts to promote procurement by Japanese Government agencies from foreign firms, and a review of the "designated company" system, which limited foreign investment in eleven Japanese industries.

Trade Initiative of April 27, 1984

This initiative included cuts on sixty-five tariff classifications covering wine, paper products, color photo paper, black-and-white film, hay balers and a wide range of agricultural products. Also included was a commitment to eliminate or liberalize quotas on thirteen agricultural categories.

The statement referred to pending legislation to liberalize the Japanese tobacco and telecommunications markets. Statements in the initiative also promised improvements in standards and certification procedures. Other commitments included in the April initiative were an expansion of the mandate of the Office of Trade Ombudsman to cover investment restrictions, and Japanese Government efforts to resolve legal services issues. Also included in the April announcement were a policy statement covering procurement by Japanese Government agencies and NTT of foreign satellites, and a commitment to postpone the introduction into the on-going Diet of a proposal to remove computer software from copyright protection.

In addition, in May a joint report on yen/dollar exchange rate issues was released which contained elements by the Japanese Government to liberalize Japan's financial and capital markets.

ATTACHMENT TO QUESTION 8

AN ANALYSIS OF AUTOMOTIVE LOCAL CONTENT LAWS IN OTHER COUNTRIES

(Prepared by the U.S. Department of Commerce International Trade Administration, Office of International Sector Policy, October 1983)

Since the early 1960s, a growing number of countries have established local content requirements to promote the development of national motor vehicle industries. Presently, 23 nations require all vehicle manufacturers selling in their markets to achieve specified levels of domestic content in local car and truck production. Most of these countries also impose quotas and/or high tariffs on motor vehicle imports to protect local producers. Four other countries (Bolivia, India, Pakistan and Yugoslavia) combine industrial incentives and trade restrictions to encourage domestic manufacturers to source a large share of automotive components locally. A survey of the specific requirements in selected countries is attached. (See Attachment I).

While domestic content regulations have fostered import substitution and reduced balance of payments pressures in countries applying them, they have done so at considerable economic cost. Consumers in these countries generally pay much higher prices for automobiles than their counterparts in other nations. The number of vehicle makes and models available in the local market is often severely limited. To some extent, national local content policies also have complicated regional auto sector development efforts (as in the Andean Pact and ASEAN nations). Finally, local manufacturers in these countries tend to be uncompetitive with foreign producers, as evidenced by the high tariffs maintained on motor vehicle imports. The last of these economic effects is most likely to reach serious proportions in small countries with limited market potential or in nations which impose disproportionately high local content requirements on their industries.

Overview of Domestic Content Regulations in Developing Countries

As Table I indicates, local content requirements are virtually always imposed by developing countries seeking to build their own motor vehicle industries. In developing countries, these requirements are used to meet the industrial development goals set for the auto industry. These objectives usually fall into three catgories or stages.

During the first stage of motor vehicle industry development, foreign auto manufacturers are encouraged to establish (directly or indirectly through licensing or joint venture agreements) vehicle assembly oper-

ations in the developing country. Often, a two-tiered tariff structure and minimal domestic content requirements (usually 35 percent or less) are imposed to accomplish this goal. Under this system, high tariffs are levied on imports of finished vehicles, while much lower duties are assessed on imports of the component knock down (CKD) vehicle kits used in local assembly operations.

Once domestic assembly operations have been established, motor vehicle production may enter a second stage. Government policies are redirected to emphasize the development of a local automotive parts industry, and domestic content requirements are increased to achieve this objective. Governments may also seek to reduce the number of vehicle assemblers to improve industry efficiency, increase the scale of production and ensure a greater commitment from those firms that remain. Such government efforts took place in Mexico between 1962 and 1964, and led Toyota and several other companies to abandon their small assembly operations. A similar process now appears to be occurring in Indonesia, where small assembly operations proliferated during the 1970s.

The third stage of auto sector development begins when the local industry becomes capable of producing a broad range of components in addition to assembling vehicles. At this point, the focus of government policies tends to shift from encouraging greater import substitution to promoting exports—thereby attempting to achieve the higher economies of scale necessary to compete in international markets. Export performance requirements are often established at this stage, and may be linked to more flexible domestic content regulations and incentive arrangements aimed at raising production volume. Mexico and Brazil adopted this approach during the 1970s.

The conditions that have fostered various types of content requirements in developing countries find no parallel in the United States. Foreign auto manufacturers have already chosen to make major investments in the United States; the U.S. has a well-developed parts industry; and domestic auto manufacturers have achieved large economies of scale in serving a North American market that grew steadily until recently. Current projections indicate slower growth, but higher productivity for the North American auto industry in the 1980s. Domestic content requirements in other nations therefore represent neither justificiation for similar requirements in the United States nor a precedent for the response by Japan or other nations to such requirements.

Overview of Domestic Current Regulations in Industrialized Countries

Three industrialized nations—Portugal, Spain and Australia—also impose domestic content requirements on their motor vehicle industries. However, Spain and Portugal plan to eliminate all domestic content regulations upon their entry into the EEC sometime between 1985 and 1987. Portugal requires only minor use of locally-made components (22 percent of total vehicle value) in order to sustain a small assembly industry, and plans to phase out these requirements in the mid-1980s. Similarly, Spain, the largest vehicle producing nation with domestic content regulations (55 percent local content required), is expected to eliminate such restrictions by 1986 or 1987.

Australia, which has encouraged vehicle manufacturers to achieve high local content levels since the late 1940s, continues to have a highly protected industry. In 1980, because of the high economic cost of past auto industry policies, Australian leaders began to push for reduced protectionism in the auto sector and recommended that several major liberalization steps be taken. As part of this process, the government adopted an export credit scheme which allows manufacturers to maintain somewhat lower domestic content levels in vehicle production in exchange for higher exports of automotive products of all types. Further modest liberalization steps are currently planned beginning in 1985 or 1986.

Response of Multinational Vehicle Manufacturers to Domestic Content Restrictions

U.S. and European vehicle manufacturers are more experienced than Japanese producers in dealing with domestic content requirements. This is due to basic differences in their global manufacturing approaches (Japanese producers favor a more centralized manufacturing arrangement) and in the nature of the major regional markets where they have traditionally operated. Nonetheless, most large, multinational vehicle manufacturers have responded in similar ways to the adoption of domestic content measures, especially in those rapidly growing markets which they view as central to their long-term business strategies. Thus, U.S. auto manufacturers continue to invest heavily in Latin America, particularly in Brazil and Mexico; European auto producers maintain a large stake in Africa and Latin America; and Japanese auto makers continue to play a leading role in much of east Asia and the Pacific (e.g., Australia, Indonesia, Malaysia, South Korea and Taiwan). At the same time, U.S., European and Japanese auto producers have all terminated production or have not invested in other, less critical developing country markets when the imposition of domestic content rules, major shifts in government trade policies, or local market position made such investments uneconomical.

Japanese auto manufacturers, like their U.S. and European counterparts, have not taken retaliatory actions against countries which have imposed domestic content rules. Several factors appear to account for this decision. First, all but five nations which have local content rules assemble or produce fewer than 200,000 automobiles annually, so that the per country volume of trade lost by producers in industrialized nations has been quite small. This is particularly true with respect to the Japanese, who had very limited automotive trading relationships with countries outside of the East Asian and Pacific regions prior to the imposition of domestic content regulations. In those countries where industrialized producers did have important production bases or bilateral trading relationships prior to the adoption of domestic content regulations, expectations of sustained profit potential were usually sufficient to offset the difficulties of complying with these new restrictions. Second, with the exception of Australia, all of the GATT countries maintaining domestic content regulations are considered eligible under Article XVIII or Part IV of the GATT to use trade and other measures for development and balance of payment reasons—measures which the advanced industralized GATT signatories are prohibited from adopting.

It is difficult to extrapolate from the experiences of other countries with domestic content regulations when analyzing the potential effects of similar measures in the United States. Conditions within the U.S. market and the scope of U.S.-Japan automotive trade differ dramatically from those in most developing countries which now maintain domestic content regulations. U.S. production of passenger cars and light trucks in 1982 totaled about 6.8 million units and Japanese exports of such vehicles to the United States equalled 2.1 million units during the same year. During that time, U.S. producers were operating at about 55 percent of their total production capacity. While U.S. auto industry sales, production and capacity utilization are expected to increase markedly during 1983-84, long-term growth in U.S. auto demand is only projected at 1 to 2 percent annually. This contrasts with the much higher rates of auto sales growth expected in many developing countries during the 1980s.

If the proposed domestic content legislation were enacted in the United States, Japanese and other vehicle producers would face a very different situation than they have encountered in other countries. Japanese producers would face a continuing excess production capacity problem in the United States; expectations of modest future U.S. sales growth; increasingly competitive U.S. car models; and an achievable U.S. content level of up to 40 percent which would permit each of them to ship as many as 400,000 units to the United States. Under these circumstances, Japanese auto producers would not automatically maintain or add to production capacity in the United States. Rather, Japanese producers would carefully assess several alternative responses which are more consistent with the current world over-capacity situation and their traditional strategies of centralized production. In this context, the Japanese would consider closing down U.S. capacity and restricting U.S. exports of other commodities as serious options.

In summary, a review of local content requirements in other countries demonstrates that these measures have not fostered the development of competitive auto industries, and could not accomplish this objective in the United States. The large size of the U.S. market and the importance of the U.S.-Japan automotive trade relationship would lead Japan to respond very differently to U.S. enactment of a domestic content law than it has to the adoption of similar measures by other countries in the past.

TABLE I.—OVERVIEW OF AUTOMOBILE INDUSTRIES IN COUNTRIES MAINTAINING DOMESTIC CONTENT RULES

County	Percentage of local content required	Import duty on cars	Date local content rules established	Foreign manufacturers of vehicles in local market			1981 production of passenger cars	Export performance requirements	Industry export incentives	GATT member
				U.S. firms	Japanese firms	European firms				
Argentina	80 percent (down from 96 percent in 1979).	55 percent ad valorem (down from 95 percent in 1980).	1969	Ford; GM (withdrew in late 1970's); Chrysler (facilities sold to VW in 1979).	Home	Evel (Fiat-Peugot); Renault; Volkswagen; Citroen (withdrew in 1980); Daimler.Benz (trucks only).	139,428	No	Yes	Yes.
Australia	88 percent (can be reduced somehwat through exports).	35–57.5 percent ad valorem, depending on stage of assembly; 150 percent for imports over quota.	1976 [1]	GM Holden; Ford; AMC/JEEP (trucks only).	Mitsubishi (purchased) Chrylser operations in late 1970's); Toyota; Nissan.	None	343,000	Yes	Yes	Yes.
Bolivia	Government recommends 45 percent after 3 years.	115–155 percent ad valorem (imports temporarily prohibited in 1982).	1978	None	None	Renault (supplies truck components to local assembler).	Less than 100 assembled from imported knockdown kits.	No	Yes	No.
Brazil	95 percent required by law, but actual percentage negotiated with each firms.	185–205 percent ad valorem imports of cars generally prohibited.	1956	Chrysler (purchased by VW in 1979); Ford; General Motors.	Toyota (utility vehicles and trucks only).	Fiat; Volkswagen; Mercedes-Benz (trucks only).	621,073	Yes	Yes [2]	Yes.
Chile	30 percent	20–60 percent ad valorem, depending on engine displacement.	1975	General Motors	None	Citroen; Fiat; Peugeot-Renault.	20,612	No	No	Yes.
Colombia	33 percent initially; efforts underway to increase local content to 55 percent.	180 percent ad valorem plus 35 percent sales tax and other charges.	1978	General Motors	None*	Renault; Fiat (under a licensing arrangement with local interests.	35,558	Yes	Yes	Yes.
Egypt [3]	40 percent or less; for existing ventures; 40–60 percent for new assembly operations.	85–200 percent ad valorem, depending on engine type and size; duty payable in "hard" currencies.	Mid-1970's	American Motors (Jeeps only).	None	Fiat; Volkswagen; Mercedes-Benz.	17,489	No	No	Yes.
Greece	25 percent	11 percent ad valorem for non-EEC countries.	1964	General Motors	4 joint venture companies assembling Japanese cars of various types.	Citroen	Less than 5,000 units/ year.	Yes	No	Yes.
India	98 percent local content achieved via full range of national trade policies.	Import licenses for autos are rarely issued.	Not applicable	None	None	None	42,000 (est.)	No	Yes	Yes.
Indonesia [4]	More stringent content requirements are now being instituted in accordance with local industry capabilities.	Built up car and truck imports prohibited in 1974 and 1969, respectively.	1976	None	Mitsubishi; Toyota; Daihatsu; Isuzu.	Mercedes-Benz	52,000 (est.)	No	No	Yes.
Malaysia	18 percent (est.), expected to increase in accordance with plans for the Malaysian car.	60–100 percent-plus ad valorem, depending on vehicle price; 15 percent duty on knock down imports; significant road taxes favoring small vehicles.	Late 1960's	Ford (assembles only non-U.S. makes).	Mazda; Honda; Fuji (Subaru).	Peugeot; Fiat;	86,000 (est.)	No	No	Yes.
Mexico	Cars: 50 percent minimum rising to 60 percent in 1987; light trucks: rising to 70 percent in 1985; other vehicles: 65–70 percent minimum rising to 80–90 percent in 1987.	100 percent ad valorem	1962	Chrysler; Ford; General Motors; AMC.	Nissan	Volkswagen; Renault	355,497	Yes	Yes	No.
Morocco [5]	40 percent for existing operations; 50 percent for new investments within 3 years.	57–112 for knock down imports; 750–169 percent for built up vehicles (including taxes).	About 1960	None	None	Citroen; Talbot-Fiat; Renault-Berliet.	13,574	No.	No	No.
Nigeria	Government targets range from 30 percent (3d year) to 100 percent (by 12th year of operation); no manufacturer has been able to meet this schedule.	33⅓–200 percent ad valorem certain luxury car imports banned.	About 1975	None	None	Volkswagen; Peugeot; other (trucks only).	85,000 (est.)	No	No	Yes.
Pakistan [6]	No formal content rules, but use of local components encouraged and estimated to equal 40–80 percent currently.	75–350 percent ad valorem depending on engine size.	Mid-1970's	None	None	None	1,500 (est.)	No.	No	Yes.
Peru	30 percent now, to increase to 50 percent by 1986. Somewhat lower requirements for components; new law being considered to set maximum at 34 percent by 1985.	60 percent ad valorem, plus 10 percent surcharge and other fees.	1972	None	Nissan; Toyota	Volkswagen	22,000 (vehicles of all types).	No	Yes	Yes.
Philippines [7]	55 percent (1983), 60 percent (1984).	30 percent ad valorem for knock down imports; 50 percent for assembled cars.	1973	General Motors; Ford; Chrysler.	Mitsubishi; Toyota; Isuzu; Nissan.	None	25,000 (est.)	Yes	No	Yes.
Portugal [8]	22 percent in 1980, declining to zero by 1985, when Portugal is expected to join the EEC.	4.5 U.S. cents/kilo (about $400–$700/unit).	1963	General Motors; Ford	Hino (trucks only)	Renault; Fiat; Citroen	60,910	No	No	Yes.
South Africa	66 percent by vehicle weight.	100 percent ad valorem on assembled cars; 20 percent on knock down imports.	1961	Ford; General Motors	None [9]	Volkswagen; Fiat; British Leyland; Renault; Opel (see GM); BMW; Alfa Romeo.	301,528	No	No	Yes.
South Korea [10]	Varies from 20 to 95 percent, depending on model; most cars have 60–95 percent local content.	100–150 percent ad valorem.	1966	None	None	None	66,602	No	Yes	Yes.

TABLE I.—OVERVIEW OF AUTOMOBILE INDUSTRIES IN COUNTRIES MAINTAINING DOMESTIC CONTENT RULES—Continued

County	Percentage of local content required	Import duty on cars	Date local content rules established	Foreign manufacturers of vehicles in local market			1981 production of passenger cars	Export performance requirements	Industry export incentives	GATT member
				U.S. firms	Japanese firms	European firms				
Spain	55 percent for cars; local content rules will be phased out when Spain enters EEC.	68 percent ad valorem, plus 13 percent import tax and 24 percent luxury tax.	1964	Ford; General Motors	None [13]	Renault; Talbot; Peugeot Citroen; Volkswagen (with seat).	835,325	Yes	Yes	Yes.
Taiwan [11]	70 percent and manufacturer must also agree to produce certain types of components.	45 percent for CKD imports; 30–92 percent for built up cars; 57–80 percent for built up trucks.	1979	Ford	Nissan; Toyota; Fuji; and Mitsubishi vehicles assembled under license.	None	85,882	No	No	No.
Thailand [12]	35 percent in 1980, increasing to 45 percent by 1983.	150 percent ad valorem on models not made locally.	Early 1970's	Ford; General Motors (both terminated assembly opera during the late 1970's or early 1980's.	Toyota; Nissan; Isuzu; Mitsubishi; Togo Kogyo (Mazda); Daihatsu; Fuji (Sabaru).	Fiat; Volvo; Volkswagen; Peugeot; BW; others.	26,650	No	No	Yes.
Turkey	Varies by vehicle type and with foreign exchange situation.	175 percent ad valorem; car imports normally prohibited.	1959	Ford (license arrangement).	None	Fiat; Renault (both joint ventures with local firms).	25,306 (prelim.).	No	No	Yes.
Uruguay	25–32 percent by vehicle weight.	55 percent ad valorem	1973	General Motors; Ford	None	Volkswagen; Fiat; Peugeot-Citroen; Renault; BMW.	16,239 (1979 car assemblies).	No	No	Yes.
Venezuela	53 percent increasing to 59 percent in 1985.	Specific duty of 100 Bolivars/kilo plus ad valorem tariffs for vehicles not made locally; 40–100 percent for imports identical to locally made vehicles.	1963	Ford; General Motors; AMC (Jeeps only).	Toyota (utility vehicles).	Renault; Fiat	82,785	Yes	Yes	No.
Yugoslavia [14]	Local content percentages and other performance each assembler requirements negotiated with.	25 percent ad valorem for assembled cars. 21–23 percent ad valorem for knock down units.	Not applicable	None	None	Volkswagen; Fiat; Citroen; Audi (all under licensing arrangements).	175,000	No	No	Yes.

* Toyo Kogyo currently negotiating possible entry into Colombian market.

[1] The Australian Government first considered local content requirements for the auto industry in 1947. Although formal regulations were not established until 1976, the Government has closely national manufacturers' use of local components and devised tariff restrictions and industrial incentives to promote higher content levels since the late 1940's.

[2] Certain export subsidies now being phased out under GATT rules.

[3] American Motors, Fiat, Volkswagen, and Mercedes vehicles are currently assembled in Egypt through licensing arrangements with state-owned or controlled entities.

[4] A very wide range of vehicle makes (including United States, European, and Japanese products) are assembled in Indonesia under licensing arrangements. This situation has greatly slowed Government efforts to increase local content through new parts production.

[5] Someboa, owned jointly by Fiat, Talbot, and the Government, assembles Renault, Fiat, Opel Simca, Talbot, and Peugeot cars under license. Other local firms assemble AMC Jeeps, Volkswagon products and several United States, European, and Japanese makes of trucks.

[6] PACO Ltd., a state-owned corporation, exercises monopoly control over the domestic auto industry. It has licensing arrangements with United States, European, and Japanese firms to assemble passenger wagons, jeeps and trucks of all types.

[7] Ford, General Motors, Chrysler, Mitsubishi, Toyota, and Isuzu assemble cars in joint ventures with local firms.

[8] Other European and Japanese vehicles are also assembled in Portugal under license.

[9] Toyota, Nissan, Mazda, Mitsubishi, Peugeot, Honda, and Mercedes-Benz automobiles are also produced under license in South Africa.

[10] There are 3 domestic car manufacturers in Korea: Hyurdor Motors, Daewoo Motors, and Kia Motors, all of which have either equity or technical relationships with United States or Japanese auto firms.

[11] Taiwan has 4 domestic motor vehicle manufacturers: Yue Loang Motor Co., Ford Li olb Motor Co., China Motor Co., and Prince Motor Co., most of which have production and/or technical arrangements with United States or Japanese vehicle manufacturers.

[12] Most firms listed as manufacturing in Thailand are companies whose vehicles are assembled either under licensing or joint venture arrangements.

[13] Nissan holds a controlling interest in Motor Iberica, a local truck manufacturer, but does not assemble cars in Spain.

[14] Companies listed as manufacturing in Yugoslavia are firms whose vehicles are assembled either licensing or joint venture arrangements.

Survey of Local Content Requirements and Other Automotive Trade Restrictions Maintained by Selected Nations

ATTACHMENT I

Industrialized countries maintaining local content rules

AUSTRALIA

Trade restrictions

Australia maintains an 85 percent local content requirement on all cars produced for domestic sale or export. However, under the export facilitation scheme established last year, Australian car manufacturers are permitted to credit exports of all types of automotive products against their local content requirements. Maximum credits under this program will increase from 5.0 percent in 1982 to 10 percent in 1985. If this system is fully utilized, manufacturers will be able to reduce local content to 75 percent by 1985. In addition, independent suppliers may earn content credits by exporting passenger car components up to a maximum of 20 percent of their original equipment sales in the Australian market.

By 1985, the Australian Government will also discontinue its current quota, which limits auto imports to 20 percent of the market, and replace it with a tariff quota system linked to market growth rates. At that time, each domestic auto manufacturer will receive a fixed import quota of 7,000 cars per year; the balance of each year's import quota will be divided among companies that do not produce cars (and/or other vehicles) in Australia. Duties on imports entering the country before the annual quota is filled will remain at the current 57.5 percent rate. Tariffs on imports above quota will be 150 percent until 1987, and then decline gradually to 125 percent in 1992. Comparable duties will be levied against imports of original equipment components, including CKD kits, during the 1987–1992 period.

Foreign participants in market

Five foreign companies produce passenger cars in Australia: General Motors, Ford, Mitsubishi, Nissan, and Toyota. Ford holds about 24 percent of the Australian market and General Motors about 20 percent, with the balance shared by the three Japanese subsidiaries producing locally and imports (primarily from Japan). Ford, GM, Toyota, Nissan, Mitsubishi, Suzuki, Toyo Kogyo and Daihatsu participate in the Australian truck market. The five local manufacturers will invest just under A$1 billion between 1978 and 1983, and plan additional outlays through 1985–86. Much of this spending has gone into plant improvements and tooling for new model introductions, but a significant portion of future outlays will be used for modest capacity expansion in the components and assembly areas.

PORTUGAL

Trade restrictions

Since 1963 Portugal has maintained domestic content requirements. Initially, a 25 percent minimum was set for passenger cars, with the expectation that this percentage would be gradually increased until the goal of developing a viable national auto industry had been achieved. This policy was reversed in 1979 in view of past failures and the need to eliminate local content rules as a condition of entry into the EEC. Portugal is new reducing local content requirements from 22 percent in 1980 to zero percent by 1985.

Portugal also maintains quotas on auto imports from all sources. The government allows annual imports of two cars from non-EEC/EFTA sources for each vehicle of the same make assembled in Portugal during the perceding year. Separate quotas of 400 cars per make (rising to 600 in 1984) have been established for each of 20 manufacturers located in Europe. Both quota systems are expected to be eliminated by the late 1980s, although import restrictions will remain for non-EEC/EFTA vehicle imports. Tariffs on these vehicles are expected to remain at 10 to 15 percent. In recent years the government has allowed assemblers to compensate for shortfalls in local content and to obtain additional quotas through new investments and exports.

Foreign participation in market

General Motors, Ford, Renault, Citroen and Fiat have car assembly plants and Hino a truck assembly facility in Portugal. Because Portugal has relatively low labor costs and is entering the EEC, Ford was considering a major new investment to build additional assembly capacity for the North

American and European export markets. Worldwide market conditions have resulted in termination of this project. Information is not available concerning the investment plants of the other car assemblers in Portugal.

SPAIN

Trade restrictions

Spain has maintained local content requirements for all cars manufactured in the country since 1964. The most recent industry decree (published in 1979) established a new local content requirement of 60 percent, but allowed the more established producers to reduce this to 55 percent by early 1984. There are also export requirements for passenger cars which vary by manufacturer. These requirements were established to offset incentives offered to attract specific investors (e.g., General Motors and Ford) to the Spanish market. Manufacturers receive an 11.5 percent tax credit on each unit exported. There are no quotas on imports of cars, but Spain currently uses an import licensing system to limit commercial vehicle imports and to keep Japanese car and truck imports out of the local market. Spain imposes a 68 percent duty of non-EEC car imports and recently decided to replace its 36.7 percent duty on EEC-source car imports with a sliding tariff quota system based on engine size. A luxury tax and other import assessments further encourage the purchase of domestic over imported vehicles.

Foreign participation in market

Six foreign manufacturers—Ford, General Motors, Renault, Talbot/Citroen/Peugeot and Volkswagen (jointly with Seat, a national company)—produce automobiles in Spain. Nissan recently acquired a majority interest in Motor Iberica, a local truck producer. Total investments in the Spanish auto industry during the 1979-1982 period are estimated at approximately $3-4 billion.

Developing countries maintaining local content rules

ARGENTINA

Trade restrictions

Argentina has applied local content regulations since 1959. In 1979, in a major policy reversal, the Argentine Government decided to reduce local content minimums for automobiles from 93 to 88 percent by 1982. More substantial cuts were made in import tariffs on automobiles, from 95 percent in 1979 to 55 percent in 1982. These actions contributed to a substantial increase in car imports in 1979 and 1980. This situation was reversed with the devaluation of the peso in 1981, and imports are now suspended.

Foreign participation

Five foreign producers—Ford, Fiat-Peugeot, Renault, Mercedes Benz and Volkswagen—currently manufacture automobiles and/or trucks in Argentina. Three other producers—General Motors, Chrysler and Citroen—ceased all production activities in Argentina between 1979 and 1981. GM reportedly closed its local facilities due to declining market share and the shift in government trade policy; Chrysler as part of its worldwide retrenchment; and Citroen as a result of heavy losses and declining market share. Volkswagen acquired Chrysler's manufacturing facilities when the latter terminated its local assembly operations. While investment figures are not available for the post-1980 period, most manufacturers are not available for the post-1980 period, most manufacturers have reportedly made large investments over the past few years to modernize local plants and equipment.

BOLIVIA

Trade restrictions

Since 1978, Bolivia has attempted to establish a small auto assembly industry as part of the larger Andean Pact integration effort. Although the Government recommends 45 percent local content after three years of operation, this objective has not been achieved since batteries are the only important automotive components now produced in Bolivia. Bolivia temporarily banned imports of automobiles in November 1982 because of a foreign exchange crisis; previously, the country levied tariffs on auto imports ranging from 115 to 155 percent, depending upon the stage of completion. Theoretically, certain components may be imported duty free for incorporation into locally assembled vehicles if the value of such imports is offset by an equal or greater value of exports during a two-year period. In practice, however, the formula for imports of parts is extremely complex, and has been a source of problems for the only assembly operation in the country.

Foreign participants in market

Ford has contracts with local Ford dealers and Enauto, a government-owned company, to supply component kits and technical assistance to the Enauto truck assembly operations. Ford ceased supplying kits in 1982 when foreign exchange was no longer available. Renault has a similar arrangement with Enauto, which reportedly is now assembling only a few Renault trucks per month.

BRAZIL

Trade restrictions

Since 1956 Brazil has imposed some form of local content requirements on its motor vehicle industry. Domestic content minimums of 95 percent are required under Brazilian regulations, but actual percentages are now negotiated with individual vehicle manufacturers based largely on their company trade balances. The government grants export incentives in the form of an "over-rebate" of the industrial products tax on automotive exports. This general export subsidy will be eliminated in 1985, but export incentives specifically incorporated in BEFIEX contracts with foreign vehicle producers that expire after that date will continue for several more years. Imports of passenger cars are generally prohibited, but tariffs of 185 to 205 percent remain in effect. These duties are assessed using a system of minimum import values determined by the government.

Foreign participation in market

Ford, General Motors, Fiat, Volkswagen and Mercedes Benz (trucks only) manufacture passenger cars and/or trucks in Brazil, and Toyota produces utility vehicles and trucks. Chrysler Corporation sold its local manufacturing operations to Volkswagen in 1979 as part of its worldwide retrenchment. Brazil has the largest auto sector of any developing country in the world. As such, it has become one of the few important bases for automotive exports among developing nations. High rates of subsidization and government export requirements have encouraged this process.

CHILE

Trade restrictions

Chile has imposed domestic content regulations since 1975 to help sustain a small local assembly industry. A minimum local content requirement of 30 percent has been in effect since May 1979. The government also levies tariffs of 20 to 60 percent on imports of automobiles, depending on the amount of engine displacement. The 60 percent tariff will be reduced to 10 percent by 1986. A consumption tax is levied on other than the very smallest cars as follows: if the factory price times a factor of 3.4 exceeds $15,200, a 75 percent additional tax is levied on the amount exceeding $15,200. This tax cannot excedd 50 percent of the Chilean sales price. While Chilean auto industry policy is still somewhat protectionist, the 1979 law significantly reduced tariffs on imported vehicles and eliminated numerous indirect import prohibitions. These policy changes were based on the government's recognition that it is less expensive to import passenger cars than to produce them in Chile for a very limited market. However, the current economic crisis in Chile has led to temporary government measures, including a 10 percentage point increase in tariffs, to protect local industry.

Foreign participants in market

General Motors, Fiat, Peugot-Renault and Citroen (in a joint venture with the government) produce automobiles in Chile. These assemblers, faced with tough foreign competition under the new, more liberal trading regime and a major economic downturn, are cutting back on production and/or closing certain local manufacturing operations. Imports also have virtually ceased due to current economic conditions.

COLOMBIA

Trade restrictions

Colombia enacted local content regulations of at least 33 percent in 1978, and recently increased this minimum to about 55 percent. The current administration also raised import duties on cars from 150 to 180 percent and continues to assess a 35 percent sales tax and other charges against imported units. Colombia also requires assembling firms that import CKD kits to export 20 percent (about 80 percent by 1986) of their production (mostly spare parts) to compensate for local employment lost to imports. Various incentives are made available to local manufacturers to encourage parts exports.

Colombia, like Bolivia, is a part to the Andean Pact's automotive sectoral agreement. Although the Colombian Government is trying to encourage the development of a national auto parts sector, local technology reportedly is inadequate for sophisticated parts production. Moreover, most of the easily manufactured parts already have been incorporated into local assembly programs and the more technologically sophisticated ones are not economic to produce due to low volume demand in Colombia.

Foreign participation in market

Two foreign firms—General Motors and Renault—currently produce automobiles in Colombia. Chrysler sold its local assembly facilities to General Motors in 1979. Fiat automobiles are now assembled by Compania Colombiana Autowotriz (CAA), which was recently purchased from Fiat by the Kassim Group (a group of local companies already involved in auto parts production). Fiat will continue to provide technical assistance and its name. CCA is currently seeking government approval to produce Mazda vehicles either in addition to or as a substitute for Fiat vehicles. Foreign manufacturers are expected to invest well over $100 million in Colombia between 1982 and 1985 to modernize existing facilities, add as-

sembly capacity and introduce new products.

EGYPT

Trade restrictions

Egypt has maintained domestic content requirements since the mid-1970's. Previously, imports were carefully controlled by the government through a stiff quota system and subjected to extremely high tariffs. Local content minimums for both established and new manufacturing programs (Mercedes, Ford, GM) range from 40 to about 60 percent, depending on the manufacturer. Import duties for built-up cars range from 85 to 130 percent (based on engine displacement) for cars with four-cylinder engines to 200 percent for cars with 8-cylinder engines. Other import taxes add about 12 percent to the landed cost of imports. All import duties must be paid in "hard" convertible currencies. No export requirements exist.

Foreign participation in market

Four foreign companies, American Motors, Volkswagen, Mercedes and Fiat, assemble motor vehicles in Egypt through arrangements with state-owned or controlled entities. General Motors, Ford, Mercedes and other major auto manufacturers are in various stages of making investments in manufacturing facilities in Egypt.

GREECE

Trade restrictions

In 1964 Greece adopted domestic content regulations to attract foreign investment in the auto sector, promote industrialization and generate employment. The government currently requires no less than 25 percent domestic content in all cars assembled locally, which does not appear to be a major hindrance to production. Tariffs of 11 percent are levied on auto imports from non-EEC countries. However, in 1979, temporary measures designed to restrain imports were adopted and contributed to subsequent large reductions in import levels (from 101,472 units in 1978 to 20,634 in 1980). These measures were rescinded in April 1980. To assist the local auto assembly industry the Greek Government provides investment grants, interest credits and retail credit at preferential rates for purchases of locally assembled units.

Foreign participation in market

General Motors and Citroen currently assemble passenger cars in Greece, along with four joint venture companies owned by Japanese vehicle manufacturers and local interests. Automobile assembly activities in Greece are still in their beginning stages. Local operations have tended to focus on the Greek market for small horsepower cars and light trucks.

INDIA

Approximately 98 percent local content is achieved by nationally-owned auto manufacturers in India, although no formal local content law exists. India's trade policies have had much the same effect as content laws in other countries by encouraging local production and discouraging imports of automotive products available from domestic sources. Import licenses are required to import all types of vehicles, but are rarely issued for passenger cars. Exports are encouraged through cash subsidies to producers. There is no foreign investment in India's automotive sector, although Suzuki and other firms have been negotiating with the Indian Government to initiate cooperative agreements with local producers.

INDONESIA

Trade restrictions

Indonesia adopted local content regulations in 1976 and has subsequently issued several decrees in an effort to rationalize local auto production and create a domestic auto parts industry. In 1976, the Indonesian Government set a 1984 target date for achieving virtually 100 percent local content in all domestically-assembled vehicles. Due to the proliferation of distinct makes and models, however, there are virtually no economies of scale for local production of most components. Consequently, local assemblers for the most part have ignored unrealistic government decrees regarding local content requirements. While the Indonesian Government continues to push for greater use of local components, most car assembly operations in the country still rely almost entirely on imports of CKD kits. Built-up truck imports have been prohibited since 1969 and built-up car imports were suspended in 1974. There are no export requirements or quantitative restrictions on CKD imports of passenger cars. Since 1977, all tires, paint and batteries have had to be sourced locally. Beginning in 1980, several other components, including shock absorbers, leaf springs, automotive glass and mufflers, were added to the list of locally sourced items.

Foreign participation in market

Mitsubishi, Toyota, Daihatsu, Isuzu and Mercedes Benz all operate car assembly plants in Indonesia. In addition to building their own vehicles, these companies assemble a wide range of other vehicle makes under licensing arrangements. Approximately 57 makes and 140 models of passenger cars are now assembled in Indonesia, but these numbers are expected to decline to about 30 and 72, respectively, by the end of 1984. Mitsubishi and Toyota, in particular, have begun to consolidate their marketing gains and in 1981 assembled 35,000 and 18,000 units, respectively. Japanese producers as a group already dominate the local market, building approximately 67 percent of all passenger cars now assembled in Indonesia.

MALAYSIA

Trade restrictions

Malaysia has assembled cars for 17 years and appears to have maintained some form of domestic content requirements during much of this period. The current requirement is estimated to be 18 percent, and includes tires, glass items, seat belts, leaf springs, batteries and mufflers as locally sourced parts. Malaysia levies tariffs ranging from 60 to more than 100 percent on imports of assembled automobiles, and charges 15 percent duty on imports of CKD kits. Approximately 86,000 of the 93,000 cars sold in Malaysia during 1981 were assembled from such CKD kits. No export requirements or quantitative restrictions on car imports are known to exist, although imported built-up vehicles require a license.

Foreign participation in market

Ford, Mazda, Honda, Fuji Heavy Industries (Subaru), Peugeot and Fiat maintain car assembly operations in Malaysia. In December 1982, the Heavy Industries Corporation of Malaysia (HICOM) signed a letter of intent with Mitsubishi to enter into a joint project to design and produce a "Malaysian" car. Malaysia has less value added in its auto industry than do most other ASEAN countries, and the government plans that this project will produce a substantial increase in local parts production.

MEXICO

Trade restrictions

Mexico has maintained domestic content requirements since 1962 in order to generate employment, conserve foreign exchange and promote the development of other, related industrial sectors of its economy. Current local content regulations were established for the Mexican auto industry by a government decree published in September 1983. This decree set minimum levels of domestic content in passenger car production at 50 percent in model years (MY) 1984 and 1985, 55 percent in MY 1986 and 60 percent in MY 1987 and subsequent years. The decree also establishes minimum local content levels for light trucks of 65 percent in MY 1984 and 70 percent in MY 1985 and beyond. Local content minimums of up to 90 percent will apply to other classes of motor vehicles by MY 1987.

In addition, the new Mexican auto decree requires foreign-controlled vehicle producers to at least offset their imports of components and services with exports of domestically produced vehicles and parts, beginning in MY 1984. Locally controlled (truck) producers are required to achieve a comparable foreign exchange balance by MY 1987. The Mexican decree also imposes new restrictions on the number of car lines and models that each manufacturer can produce and excludes foreign-controlled assemblers from manufacturing gasoline fueled medium trucks beginning in MY 1986.

Export subsidies formerly available to vehicle manufacturers under the CEDI tax rebate program were suspended indefinitely following the August 1982 devaluation of the Mexican peso. Similarly, under the new decree, the Mexican Government will no longer grant vehicle manufacturers waivers on import duties for necessary component imports. Tariffs on imported passenger cars are set at 100 percent, although such imports are prohibited under the new decree.

Foreign participation in market

Chrysler, Ford, General Motors, American Motors, Renault, Nissan and Volkwagen manufacture passenger cars and trucks in Mexico. Renault recently purchased the government's majority interest in both its and AMC's joint ventures with government companies. Until 1982, Mexico had one of the fastest growing automotive markets in the world. Despite a projected one-third decline in vehicle output in 1983, no foreign firms are contemplating leaving the market.

Foreign manufacturers have made substantial investments in Mexico since 1978 to comply with Mexican decrees and participate in rapid auto sector growth. Between 1980 and 1983, total new investment in the Mexican auto sector is estimated at $2 billion. A large portion of this investment has gone into plants capable of achieving the economies of scale (and cost structure) necessary to compete in international markets.

MOROCCO

Trade restrictions

Since roughly 1960 Morocco has maintained some form of domestic content regulations. Currently, vehicle manufacturers must achieve 40 percent local content in their existing operations and 50 percent local content in any new production ventures within three years. The Moroccan Government has no export requirements on assembled vehicles but exports of locally produced parts can be counted toward meeting local content minimums. Imports of passenger cars are generally prohibited. Duties

and other taxes on built-up auto imports, when permitted, total 150 to 269 percent depending on engine size, while duties and other taxes on CKD kit imports range from 57 to 112 percent.

Foreign participation in market

All auto assembly operations in Morocco are partially or totally Moroccan-owned. Somaca, the largest of these operations, assembles Renault, Talbot, Fiat, Opel, Simca and Peugeot cars under licensing agreements. Other local firms assemble AMC Jeeps, Volkswagen products and several U.S. European and Japanese makes of trucks.

NIGERIA

Trade restrictions

Since the mid-1970's Nigeria has negotiated local content targets with domestic vehicle manufacturers. These local content targets increase from about 30 percent after three years of operation to nearly 100 percent by the twelfth year of operation in the domestic market. Domestic auto producers have so far failed to meet Nigeria's rising local content objectives due to poor infrastructure and the small size of the market, which have prevented a significant auto parts sector from developing. Government austerity measures have recently aggravated this situation by suppressing local demand and restricting the importation of necessary CKD kits.

Tariffs on imported automobiles range from 33⅓ to 200 percent, depending on vehicle price, and "luxury" imports (cars priced over $20-25,000) are normally banned. Import licenses are used to limit imports of assembled cars generally to levels that will allow local assemblers to operate a full capacity (about 24,000 imported units authorized in 1981). A 200 percent pre-import deposit is also required. No export requirements are maintained.

Foreign participation in market

Volkswagen and Peugeot assemble passenger cars in Nigeria, primarily from imported CKD kits. Both operations were established in 1975. In addition, five European manufacturers assemble a variety of trucks in Nigeria. No information is available on the local government plans of any of these manufacturers.

PAKISTAN

Trade restrictions

Pakistan does not maintain formal local content requirements, but has encouraged approved domestic vehicle assemblers (all government owned and/or controlled) to increase their use of local parts through other regulatory mechanisms since the mid-1970's. Local content for approved assemblers ranges from 40 to 80 percent. Extremely high tariffs, ranging from 75 to 350 percent, are levied on built-up imports according to engine size. Imports licenses for assembled vehicles are generally issued only to expatriate Pakistanis (one vehicle after being abroad two years). No export requirements are maintained.

Foreign participation in market

PACO Ltd., a state-owned corporation, exercises monopoly control over the Pakistani motor vehicle industry. It maintains licensing arrangements with a large number of U.S., European and Japanese firms for the assembly of passenger wagons, buses, utility vehicles and trucks of all types. PACO controls the importation of both CKD kits and finished vehicles (excluding those issued to expatriate Pakistanis).

PERU

Trade restrictions

Peru has maintained local content regulations since 1972. Local content in Peruvian-assembled automobiles must now equal 30 percent (based on value) and must be increased to 50 percent by 1986 for new models. Components now produced in Peru must include 10 percent domestic content by 1983 and 30 percent by 1986; newly-introduced components will be required to have 5 percent local content initially and 30 percent by the seventh year of local production. A new local content bill is currently under debate in the Peruvian Congress. If passed, it would require assemblers to use a minimum of 31 percent local content until the end of, 1984, increasing to 34 percent on January 1, 1985. Import tariffs are 60 percent on automobiles. Exports are encouraged by rebating duties and sales taxes paid on imported components which are incorporated into exported vehicles or automotive subassemblies.

Foreign participation in market

Nissan, Toyota and Volkswagen currently produce passenger cars and light trucks in Peru. Volvo produces heavy trucks. Chrysler terminated its car assembly operations in Peru during the late-1970's as part of its general reduction in overseas activities. No information is available on the local investment plans of these manufacturers, but there are reports that the Peruvian Government is trying to persuade Ford and General Motors to reopen plants which they closed in the early 1970's. As part of this effort, the Government hopes to reduce the 50 percent local content requirement to a maximum of 34 percent in 1985.

PHILIPPINES

Trade restrictions

Local content regulations have been in effect in the Philippines since 1973 and require domestic auto manufacturers to achieve at least 55 percent national content in their current production, and 60 percent beginning in 1984. Import tariffs are 30 percent for car CKD kits and 50 percent for assembled cars. The government also reportedly maintains limited export requirements.

Foreign participation in market

Ford and General Motors produce passenger cars as well as certain major components and subassemblies (body stampings and transmissions) through joint venture arrangements in the Philippines. Other joint venture companies build Chrysler/Mitsubishi, Toyota/Isuzu, and DMG Industries/Nissan vehicles. A locally-owned firm manufactures Tamarau utility vehicles and trucks, mostly for military use.

SOUTH AFRICA

Trade restrictions

South Africa has gradually increased domestic content requirements since 1961 from 15 percent to 66 percent currently (by weight). Import licenses are required to import CKD kits and components for local assembly, but are routinely granted to manufacturers whose production programs have received the approval of the Economic Ministry. Most imported vehicles are brought into the country unassembled because the duty on them is 20 percent, compared to 100 percent for completely manufactured units. A 95 percent excise tax is charged on cars with less than 66 percent local content. For those with 66 percent local content, the excise tax is 13 percent or less. This rate declines proportionately for vehicles containing local content in excess of 66 percent. There are no export requirements in South Africa.

Foreign participation in market

Fiat, Ford, General Motors, British Leyland, Renault, Volkswagen, BMW, and Alfa Romeo produce passenger cars in South Africa. Toyota, Nissan, Mitsubishi, Peugeot, Honda, Daimler-Benz and Mazda automobiles are also produced locally under licensing agreements.

SOUTH KOREA

Trade restrictions

Since 1966, Korea has maintained domestic content requirements for passenger cars. These requirements now range from 20 to 95 percent, depending on the vehicle model, with most cars containing 60 to 95 percent national content. In 1974 the Government introduced a long-term auto production plan which called for the gradual elimination of pure assembly operations and the development of a 100 percent Korean car by 1986. There are not specific local content levels for trucks, although engines and cabs must be locally sourced. A variety of incentives, including tax breaks, are offered to vehicle producers that meet these demanding requirements. Tariff rates on auto imports range from 100 percent for cars with up to a two-liter engine to 150 percent (temporary rate) for cars with more than a 2-liter engine. Imports of built-up vehicles are not permitted.

While the Korean Government does not impose export requirements, it does establish export targets and uses moral pressure to see that they are achieved. The auto industry has been designated as a "strategic export industry" to earn foreign exchange and foster the development of related industries. In line with this policy, the government has instructed individual companies to specialize in certain types of vehicles. The industry exported over 45,000 cars, trucks and buses in 1981 and expects to expand truck and bus exports significantly in the next five years. Automotive parts exports totalled $91 million in 1981 and are projected to more than double by 1986. Quality problems, however, could hamper the industry's export program.

Foreign participation in market

There are three domestic car manufacturers in Korea—Hyundai Motors, Daewoo Motors, and Kia Industrial Company—all of which have either equity or technical relationships with U.S. or Japanese firms. Hyundai recently formed a joint venture with Mitsubishi Motors of Japan for a new car manufacturing plant which will be completed in 1985. Daewoo Motors has several joint venture and technical agreements with General Motors to produce transaxles as well as automobiles. Kia Motors receives technical assistance from Honda, largely with regard to truck production activities. Kia Industrial Company will withdraw from the passenger car manufacturing business once it has used up its inventory of CKD automobile kits. Under the government's current investment plan for the motor vehicle industry, nearly $1.3 billion is expected to be spent to expand capacity and develop new products between 1982 and 1986. About one-third of this planned spending would come from foreign sources.

TAIWAN

Trade restrictions

Since 1979 Taiwan has used domestic content rules in an effort to establish a largely

self-sufficient national auto industry. Currently, the country requires domestic manufacturers to achieve 70 percent local content in all cars they produce, and to make at least one of the following subassembles or component groups: 1) engines; 2) pistons, piston pins and connecting rods; 3) crankshafts; 4) transaxles or transmissions; 5) automotive springs; 6) cylinder valves. Import duties range from 45 percent for CKD components to 80-92 percent for built-up cars and 57-80 percent for trucks. Companies meeting local content requirements receive tax exemptions and other financial benefits. No export requirements exist, but up to 21 percentage points of the required local content may be achieved through net foreign exchange generated from the export of locally made components.

Foreign participation in market

Taiwan has four established motor vehicle manufacturers: Yue Loong Motor Company, Ford Lio Ho Motor Company, China Motors Company and Prince Motor Company. Most of these companies have joint production or technical assistance agreements with U.S. or Japanese auto manufacturers. Toyota recently entered into a joint venture with local interests (public and private) to build a new car assembly plant which could achieve a capacity of 300,000 units by 1994. About half of this planned capacity eventually would be aimed at export markets.

THAILAND

Trade restrictions

Since the early 1970's, Thailand has set local content requirements for its motor vehicle assembly industry. In 1978, the government established local content targets of 35 percent in 1980, 40 percent by 1981, 45 percent by 1982 and 50 percent by 1983. These deadlines have been allowed to slip and the current target is 45 percent by August 1983. From 1978 to 1982, local assemblers were protected by a ban on imports of completely built-up automobiles. This ban was partially lifted in 1982 and replaced with a 150 percent tariff on imports of models which are not assembled in Thailand. There are no export requirements.

Foreign participation in market

A large number of foreign motor vehicle manufacturers assemble passenger cars in Thailand either directly or through joint venture or licensing arrangements with local companies. These include seven Japanese companies (Toyota, Nissan, Isuzu, Mitsubishi, Togo Kogyo (Mazda), Fuji (Subaru) and Daihatsu) and more than ten European concerns (Fiat, Volvo, Volkswagen, Peugeot, Renault, BMW and others).

TURKEY

Trade restrictions

Turkey passed a local auto assembly law in 1959, but apparently did not implement it until the mid-1960's. The Turkish version of the domestic content requirement is called the "foreign exchange savings" ratio and is administered through government allocations of foreign exchange to importers. All locally produced vehicles contain at least 60 percent domestic content. Except for a few cars imported by returning expatriates, all built-up auto imports are prohibited. A 175 percent imports tariff remains in effect for those automobiles which are imported. No export requirements are maintained.

Foreign participation in market

Three foreign vehicle manufacturers currently produce passenger cars in Turkey. Since 1966, Ford has licensed auto production to a local assembler. In 1968 and 1969, respectively, Fiat and Renault entered into joint venture agreements as minority partners with local assemblers to produce passenger cars. Production of automobiles in Turkey has declined steadily since 1975 and capacity utilization is now approximately 30 percent. Local assembly operations are believed to be inefficient by world standards. Most major U.S. and West European truck manufacturers have licenses in Turkey which produce trucks with high local content. Japanese manufacturers do not participate in the local market.

URUGUAY

Trade restrictions

Since 1973 Uruguay has required vehicle manufacturers to achieve specified levels of domestic content in all passenger cars they assemble locally. Currently, local content requirements are 25 to 32 percent of total vehicle weight, depending on the make and model involved. Between 1973 and 1979, the government effectively restricted imports of fully assembled vehicles through high tariffs and a complex system of prior deposits on imports. Import restrictions were reduced significantly in 1980, leading to a rapid expansion of trade in Japanese, European and Brazilian-made cars. Currently, a 55 percent duty is levied on imported cars.

Foreign participation in market

General Motors, Ford, Volkswagen, Fiat, Peugeot-Citroen, Renault and BMW assemble passenger cars in Uruguay. No information is available on the investment plans of these manufacturers.

VENEZUELA

Trade restrictions

Since 1963 Venezuela has maintained some form of domestic content requirements. These requirements were to peak at 81 percent beginning in 1975. The recently revised regulations call for 55 percent local content in 1983, rising to 59 percent in 1985. Duties on imports of automobiles remain high; For imported vehicles identical to locally produced models tariffs are 40 percent for heavy trucks, 60 percent for cars under 1150 kg and light trucks, and 100 percent on cars over 1150 kg. The government levies a specific tariff of 100 Bolivars per kilo of vehicle weight (in addition to somewhat lower ad valorem tariffs) on all imported models which are not produced locally.

Venezuela also maintains export performance requirements and provides tax credits for part of the value of nontraditional exports (including most automotive products). Current regulations require that exports of vehicles and parts should compensate for the value of CKD imports in a fixed proportion to the annual total sales revenue of each manufacturer. Under this scheme, each firm's exports must equal or exceed three percent of its local production by 1985, up to the value of its total CKD imports. Through 1985, a portion of each manufacturer's exports can be credited against local content requirements.

Foreign participation in market

Ford, General Motors, Renault, and Fiat produce passenger cars and trucks in Venezuela, and Toyota and AMC produce utility vehicles. Net investment by foreign auto manufacturers totalled approximately $575 million from 1978-1980. More recent investment data is not available.

YUGOSLAVIA

Trade restrictions

Although Yugoslavia has no formal local content requirements, the government normally established trade, investment and employment performance targets through negotiations with motor vehicle producers. A 25 percent tariff is levied on imports of assembled cars, while 21 to 23 percent tariffs are charged on CKD imports. Quotas are maintained on auto imports from the USSR, East Germany and Czechoslovakia. Export requirements, like local content minimums, are negotiated with individual producers.

Foreign participation in market

Fiats, Ladas (USSR), Volkswagens, Audis and Citroens are assembled locally under licensing or other technical agreements. Recent data on auto industry investment in Yugoslavia is not available.

SECRETARY OF COMMERCE,
Washington, DC, March 12, 1985.

Hon. JOHN D. DINGELL,
Subcommittee on Oversight and Investigations, Committee on Energy and Commerce, House of Representatives, Washington, DC.

DEAR JOHN: Thank you for your letter regarding the Japanese automobile export restraint.

I have enclosed information which addresses the additional questions you raise. We have asked the Department of Transportation to respond directly to your Subcommittee on sections (b)ii and (b)iii of question 5. These sections deal with possible administrative and legislative options for modifying existing Corporate Average Fuel Economy (CAFE) standards.

I hope that the additional information we are providing will be helpful to you and other members of the Subcommittee.

Sincerely,

SECRETARY OF COMMERCE.

Question 1. In reply to my question numbered 2, the Department provided a list of trade initiatives announced by Japan and included an attachment entitled Japanese "comprehensive Economic Measures." However, the reply appears to show some vagueness as to the status of each measure. For example, in discussing the third initiative, the Department states that "passage of some sixteen laws" in 1983, "as they are implemented at the administrative level, could represent the most significant and wide-ranging removal of foreign barriers to the Japanese market" since 1979. But I do not feel assured by these comments that implementation is complete or even well underway. Please provide a more detailed status of each of these initiatives, including the "NTT Agreement" and the "yen-dollar accord."

Answer. In answer to your request for a more detailed status report on the implementation of various Japanese trade measures, we have attached a comprehensive report compiled last fall on this subject by an interagency task force. Commerce participated in this group.

Since this report was completed, little has changed regarding implementation. The Government of Japan has given us assurances that the procurement provisions contained in the U.S.-Japan NTT Agreement will continue in effect despite NTT's "privatization" on April 1, 1985. The tariff measures contained in the April 27, 1984 set of trade measures will be implemented on April 1 as scheduled. Further talks have been held between Treasury and the Japanese Ministry of Finance on implementation of the yen-dollar accord.

Considerable progress has been made to date in implementing the agreed measures contained in the Yen/Dollar Report released by the U.S. Treasury Department and the Japanese Ministry of Finance in May 1984. Since the agreed measures are to be phased-in over time, it is too early to draw any definitive conclusions about the success of the agreement; however, so far, Japan has taken all the agreed steps on or before the dates specified in the Report. Nevertheless, much more needs to be done to fulfill the entire letter and spirit of all the agreed measures. Treasury continues to monitor Japan's implementation carefully through Embassy reporting from Tokyo, consultations with the private sector about market developments, and periodic follow-up meetings with the Ministry of Finance. The next follow-up meeting will take place in Spring 1985.

In addition, recent revisions in Japanese standards laws have been implemented by MITI with respect to the Electrical Appliances Law and the Consumer Products Safety Law. Two U.S. laboratories have been approved as designated testing laboratories for type approval of electrical equipment. Implementation by other Ministries has been limited and in no other instances have U.S. laboratories been designated. When these laws are fully implemented, their effect will be far-reaching, but progress to date has been disappointing.

The Administration is continuing to encourage those ministries which have not yet implemented recent changes in Japanese standards laws to do so, and has begun disseminating information about this process to the U.S. business community. This latter effort includes a series of seminars sponsored by the U.S. Foreign Commercial Service, which is scheduled to begin in April 1985.

The Administration's current bilateral trade efforts focus on intense sectoral negotiations to improve U.S. access to Japanese markets. This process was launched by President Reagan and Prime Minister Nakasone at their January 1985 summit. Its initial focus is on telecommunications, electronics, medical/pharmaceutical and forest products. Our objective is the elimination of all Japanese barriers in these sectors, in which U.S. firms currently hold internationally competitive positions.

Question 2. The reply also states that Commerce and the Council of Economic Advisors "each prepared studies on the restraint issue with input from other government agencies." Please provide a copy of the CEA studies and copies of the "input" from other agencies. Please also identify the independent consultant mentioned in answer to question 7.

Answer. We also have attached a copy of the Council of Economic Advisors' analysis of the Japanese automobile export retraint. As mentioned in our February 14 reply to the Subcommittee, the Commerce Department's study of the restraint included input from other agencies.

This input consisted of oral comments on various drafts of the study and, in some cases, statistical data which was presented in the Department's report. The Department developed many of the projections of industry financial performance using company-specific forecasting models designed during 1984 with assistance from Jack Faucett Associates, Inc. of Chevy Chase, Maryland, a private consultant. Key elements of these models were described in our previous response to the Subcommittee.

Question 3. What is the Administration doing to open Japan's market to U.S. car exports such as opening Japan's "vehicle distribution system" and allowing "self-certification testing to show compliance" with Japan's emission and safety standards?

Answer. The Administration worked closely with the Motor Vehicle Manufacturers Association and its member companies during 1981-83 to obtain Japanese Government approval of a self-certification approach toward demonstrating compliance with Japanese safety and noise standards. The Japanese Government responded to the U.S. industry's proposal in March 1983 by announcing several changes in its "type designation" vehicle certification procedures. According to the Japanese Government, these changes were designed to facilitate use of the type designation system by foreign manufacturers.

On December 21, 1984, The Japanese Ministry of Transport approved the first type designation application for an American car under the revised system. U.S. vehicle manufacturers are currently evaluating the new type designation system to determine if it is more cost effective than the "type notification" procedures they generally have used in the past. Future Administration efforts to obtain Japanese Government acceptance of a self-certification system will depend on the results of the U.S. industry's present evaluation of the revised type designation system.

Major Japanese automobile manufacturers reportedly do not allow their dealers to sell unaffiliated vehicle makes, but General Motors, Ford, Chrysler and American Motors all have an established distribution systems in Japan. These companies have not asked for U.S. Government assistance in creating alternative distribution systems there. The inability to use the distribution system of Japanese manufacturers may have been a substantial impediment to U.S. manufacturers in the past (and contrasts sharply with the extent to which Japanese manufacturers were able to utilize the existing distribution system of U.S. manufacturers to reach U.S. consumers). However, now that U.S. manufacturers have invested substantial time and resources in developing an independent distribution system in Japan, this lack of access is no longer significant. U.S. auto manufacturers are continuing new marketing approaches in Japan to increase sales volume and contain their distribution costs.

Question 4. In reply to question 10, the Department states that without the VRA, about 110,000 auto jobs would be lost by 1987, but the Department believes that a "significant" portion of the loss "could occur through employee attrition" which usually means retirement due to age or health. I question this, because the loss will be due to a reduction of 1.1 million units of small cars. To achieve that reduction, whole lines and plants where small cars are produced would probably have to be closed. I doubt that attrition could be a real factor in such closures. Do you agree? Please explain. Also, what is the effect of a loss of 110,000 jobs on the local economy?

Answer. U.S. Big Four vehicle manufacturers currently assemble small cars (subcompact and small specialty) in ten plants in the United States and in one plant in Canada. These U.S. facilities are located in seven states (Georgia, Illinois, Michigan (2), Missouri (2), New Jersey, Ohio, and Wisconsin (2)), indicating a fairly wide geographical dispersion of small car production. Component production for these assembly plants also is believed to be spread among several states.

If U.S. small car production fell by one million units due to removal of the restraint, it is likely that certain small car assembly plants would close as production was consolidated. Component plants, particularly in the Midwest, also could be affected seriously. In cases where entire assembly plants closed, major layoffs would occur and worker attrition probably would not be an important factor in softening the economic effects on workers and communities. In other instances, particularly in component and material supplying industries, worker attrition could be a significant element in the adjustment process.

Given the large size of the auto industry, worker turnover should be sufficient to offset anticipated job losses due to productivity advances, and perhaps to offset some layoffs resulting from potential declines in small car production volume during the 1985-87 period. The greatest short-term employment losses and burden on local economies would be felt in those states which are most dependent on small car production and related activities: Michigan, Missouri, Ohio, and Wisconsin. Other small car manufacturing states would be less affected and the adjustment process would be somewhat easier.

Question 5(a). The analysis states that Commerce did not "specifically assess the effect of unrestrained Japanese car imports on the U.S. companies' ability to meet the Corporate Average Fuel Economy (CAFE) standards." Please explain why Commerce did not make such an assessment. If the VRA is not extended and as the analysis estimates, 1.1 million units of small cars are not produced domestically, can the domestics meet the CAFE or use "carryback" credits without severe cutbacks in production of intermediate and large cars with attendant loss of jobs? Is that factor a serious concern to your Department and the Department of Transportation?

Answer. The Department of Transportation, National Highway Traffic Safety Administration (NHTSA), has principal responsibility for administering the Corporate Average Fuel Economy (CAFE) standards. Because of NHTAS's role in this program, it alone has access to the data necessary to perform the type of future-oriented analysis suggested in your February 19 letter. For similar reasons, NHTSA will respond directly to the Subcommittee on possible administrative and legislative changes to the CAFE program (Questions 5(b)ii and 5(b)iii).

During the preparation of its analysis, the Department recognized that elimination of the Japanese export restraint could complicate the efforts of U.S. auto manufacturers to meet future CAFE requirements. Due to the post-1981 shift in consumer demand back toward larger vehicles, full-line U.S. producers were forced to carry forward credits earned during the early 1980s to comply with the model year (MY) 1983 CAFE standard. A similar situation is likely to occur with respect to the MY 1984 standard. Thus, separate from the issue of the Japanese restraint, the Administration has become increasingly aware of and concerned about the possible need for changes in the CAFE program.

Question 5(b). The analysis also states that:

"While Administrative mechanisms are available to reduce the existing 27.5 mpg standard, the best way to resolve the problems appears to be legislative. While this ap-

proach is full of difficulties (i.e., in many circles, CAFE is seen as the only element of the Administration's energy policy), it is one we may have to pursue if the restraint is lifted."

(i) Was the Department of Transportation, (DOT) and the National Highway Traffic Safety Administration (NHTSA), consulted regarding this statement? What was their input?

Answer. The Department did not consult NHTSA or other agencies within the Department of Transportation regarding its staff's views on the feasibility of modifying the CAFE program through administratives or legislative action. The CAFE language cited on page two of your February 19 letter was intended only to alert senior Administration officials to the range of options available to modify existing CAFE standards. At this stage, the Administration has not made any decisions regarding the future of the CAFE program.

Questions 5(b)ii and 5(b)iii. See response to 5(a).

Question 5(b)iv. If both administrative and legislative measures are not "available," or if the are not "available" in a timely fashion, should the VRA be ended?

Answer. The Administration believes that U.S. Government decisions regarding the Japanses export restraint and the CAFE program should be made on the merits of each issue. While the restraint decison could affect CAFE compliance to a major degree, the reasons for continuing or removing the restraint have little to do with the national energy policy objectives on which the CAFE program is based. Consequently, the Administration does not believe that the policy decision on either issue should be linked automatically or directly to the policy outcome on the other.

Question 5(b)v. If a firm does not meet the CAFE, what will be the effect on future capital investment and R&D spending which is essential to developing new products, modernizing facilities, and increasing productivity?

Answer. To the extent that elimination of the Japanese export restraint reduces the ability of U.S. producers to comply with post-MY 1984 CAFE standards, future domestic industry profitability would be affected adversely. The potential decline in profits attributable to the CAFE progam would result from lower profits on small cars as prices were reduced, on large cars as production volumes were cut, and on total U.S. operations if fines had to be paid due to company noncompliance with the Energy Policy and Conservation Act (EPCA). Civil penalties for noncompliance with the EPCA amount to $5 per vehicle produced for each 0.1 mile per gallon (mpg) a manufacturer falls below the standard. Based on 1984 production levels, such fines would total $370 million for each 1.0 mpg that the U.S. Big Three manufacturers fell below the MY 1985 standard if CAFE credits were not available to cover shortfalls. If such shortfalls were large, the impact of CAFE regulations on the domestic industry's profitability could be substantial, reducing the U.S. companies' ability to fund necessary capital investments and R&D spending from internal sources.

Question 6. The Department's analysis "did not" assume a "price war" as a result of ending the VRA. However, it states that it is "likely that consumer prices for Japanese cars will decline "absent VRA, "if only as a result of the elimination of additional markups" "if only as a result of the elimination of additional markups" by dealers. The extent of such a reduction "easily could increase" Japanese car sales levels that you forecast. What would be the increase? What will be the impact of such an increase on jobs, profits, and CAFE for the domestic industry? Does the Department doubt that a price war will result?

Answer. The Department did not assume a price war between Japanese producers following removal of the restraint for several reasons. First, the Department believes that elimination of existing restraint-induced dealer premiums alone would be sufficient to support the level of additional Japanese car sales forecasted in its restraint analysis. Further price cuts, while possible, would not be necessary and might not increase Japanese car sales to the same degree as the initial price reductions.

In addition, it is unlikely that small Japanese producers, despite their interest in expanding U.S. market share, would be able to afford a prolonged price war with the larger, and financially stronger, Japanese firms already represented in the U.S. market. Given likely pent-up demand for Japanese products in the first 1-2 years following elimination of the restraint, major sales increases for both small and large Japanese manufacturers could occur without massive price reductions.

If a sustained price war on Japanese cars did occur, U.S. consumers presumably would increase their purchases of Japanese cars beyond the levels estimated in the Department's analysis. Because it is virtually impossible to predict how U.S. manufacturers would respond to this kind of severe challenge, or the scope of any price war (only subcompacts affected or larger cars as well), we are not able to provide valid estimates of the potential sales, profit, CAFE or employment effects of a prolonged price war scenario.

Question 7. The analysis states:

"It should be emphasized that the Department's forecast analysis assumes constant real average variable profits. In an unrestrained market, where higher imports primarily reduce U.S. small car volume, average small car variable profit margins can be expected to drop. Thus, the resultant decline in domestic companies' earnings probably would be more severe than the model forecasts. In addition, companies whose sales are primarily in the small car segment would be affected even more adversely in these circumstances."

How much "more severe" would they be? Which companies "would be affected even more adversely?" What would be the result?

Answer. The Department's forecast assumes linear revenue and variable cost curves for U.S. auto manufacturers. This technique, which is widely used in linear break-even studies, produces constant average variable profits (although average variable profits in the Department's model vary according to car size class). Most manufacturing companies actually have nonlinear revenue and cost curves. Neither the Department nor outside industry observers have a way of estimating the degree to which unit variable profits change with output. The principal drawback of the linear method is that it becomes less accurate at the extreme low and high ends of production ranges. Since the Department's analysis focuses primarily on output ranges between the two extremes, our results should be reasonable trend indicators.

The Department's analysis states that U.S. auto companies whose sales are primarily in the small car segment would be affected the most.

Question 8. Can the U.S. afford a $7 billion or greater increase in our trade deficit with Japan, particularly if there is no end in sight concerning such increases? Please explain.

Answer. The $7 billion estimate cited in our analysis referred to the potential increase in the 1987 U.S. import bill from elimination of the Japanese auto export restraint. We do not believe that such an estimate will be totally additive to either our overall trade deficit or that with Japan. If the export restraint is eliminated, this will result in a greater demand for yen to cover increased U.S. purchases of Japanese cars. U.S. dollars will be used by the U.S. distributors of Japanese cars to purchase the yen.

This outflow of dollars and increased demand for yen will, in isolation, cause the dollar to weaken and the yen to strengthen. This will make U.S. products more attractive to Japanese consumers and make Japanese exports more expensive and thus less attractive to U.S. consumers. Since the exact magnitude of these changes in currency values cannot be predicted, we cannot forecast the net effect on our overall trade deficit.

We are very concerned about our trade deficit with Japan and are working hard to reduce it. We believe that the trade deficit should be reduced through increased U.S. exports to Japan, rather than through limitations on Japanese exports to the United States. To this end, we are pursuing vigorously new market access measures with the Japanese. We have been disappointed by the results to date and believe more can and must be done by the Japanese Government to improve our access to the Japanese marketplace.

Question 9. When will the Administration inform the Subcommittee of its decision on the VRA? After preparing the restraint analysis, what is your recommendation concerning the VRA?

Answer. On March 1, President Reagan announced that the Administration would not request the Government of Japan to extend its restraint on car exports beyond March 31, 1985.

The Cabinet Council on Commerce and Trade and the Trade Policy Committee met on February 19 to discuss the restraint issue. A Cabinet Council recommendation on the U.S. Government's handling of the matter subsequently was forwarded to President Reagan for consideration. The Department's analysis of the Japanese restraint was designed to provide an objective evaluation of the issue, but did not contain any recommendations.

Question 10. Pursuant to section 12(b) of the Chrysler Corporation Loan Guarantee Act of 1979, your Department provided to the Subcommittee a copy of "The U.S. Automobile Industry, 1983," an annual assessment of the state of the automobile industry. However, the report was approved by you on January 11, 1985. Please explain why the report was not released until now. If there were printer delays, please explain them. Also, please explain why copies could not have been transmitted to Congress early in January, even though multiple copies from the printers may not have been available.

Answer. The Department generally does not release copies of reports it prepares until a final version is available. Because the Executive Branch's annual report on the U.S. auto industry is transmitted to all

members of Congress, a single mailing typically is used. Four weeks were required to print and deliver this year's report on the industry to Congress, a period which we consider reasonable.

Question 11. I understand that the VRA does not cover Japanese vehicles shipped to Guam, the Virgin Islands, and the Trust Territories. Reportedly, a large number of Japanese vehicles are being shipped through these areas and are not being counted against the yearly VRA total. I also understand that your Department monitors these shipments. Please explain why the VRA does not cover these vehicles. Please provide a table showing these shipments for the period of the VRA and indicate how and to what extent these vehicles are shipped to the continental U.S. Are these shipments increasing? If so, why? Has this loophole been discussed with the Japanese? What has been the result?

Answer. The Japanese automobile export restraint does not cover shipments of vehicles to Guam, the Virgin Islands, and the Trust Territories since these areas lie outside of U.S. Customs territory. In contrast, shipments to Puerto Rico, which falls within U.S. Customs territory, are included under a separate restraint measure.

We believe that Japanese car exports which enter the United States as transshipments from U.S. protectorates or third countries have increased as a result of the business activities of independent distributors. The problem has been raised with Japanese Government officials on at least two occasions. Until recently, exports of Japanese cars arriving from U.S. protectorates and third country ports accounted for less than 10,000 units annually. The table below presents annual data on the size of these shipments since the Japanese automobile export restraint began.

U.S. imports of Japanese cars and vans through third countries and U.S. protectorates [1]

	Units imported
1st restraint year (April 1981–March 1982)	0
2nd restraint year (April 1982–March 1983)	2,175
3rd restraint year (April 1983–March 1984)	9,394
4th restraint year (April 1984–December 1984)	20,334

[1] Data are based on date of export from Japan, and thus are incomplete due to lag time for shipments in transit.

Question 12. I note that your department shares my doubts that the Japanese would constrain exports to the U.S. if the VRA is ended. Should that occur, however, what, if any, antitrust problems might arise?

Answer. We understand that U.S. antitrust problems could arise if the Japanese Government sought to restrain exports to the United States in an informal manner. We suggest that the Subcommittee contact the U.S. Department of Justice if it would like a more complete analysis of this issue.

COUNCIL OF ECONOMIC ADVISERS,
Washington, DC, January 24, 1985.

To: The Trade Policy Review Group.
From: William A. Niskanen.
Subject: Effects of Voluntary Restraint Agreement.

INTRODUCTION

This memorandum reports the results of the CEA analysis of the effects on the U.S. automobile market of the Japanese voluntary restraint agreement (VRA) on automobile exports. Because changes in imports of Japanese small cars would affect the demand for U.S. small cars and thus the corporate average fuel economy [CAFE] of U.S. manufacturers, the analysis also examined the effects of U.S. CAFE regulations on the automotive market and the interaction of the VRA and the CAFE regulations.

We examined the effects of changes in these two policies on the following economic variables:

Prices of U.S. and Japanese automobiles.

Domestic automobile production and U.S. assemblies of Japanese automobiles.

New-car average fuel economy for U.S. cars and for U.S. and foreign cars combined.

Automotive industry employment, including jobs in assembly, parts production, materials supply, and ports.

Consumer welfare and U.S. and foreign producer earnings.

The analysis is a comparative statistics analysis designed to simulate the effects of alternative VRA and CAFE policies. It is based on 1984 market conditions, including both macroeconomic conditions and product offerings of domestic and foreign manufacturers, except that U.S. assemblies of Japanese automobiles are assumed in the base-case scenario to increase to their expected 1985 levels.

The analysis thus isolates the effects of the policies considered, but it is not a forecast of the changes in the market that would take place in the future. Actual future changes will depend not only on changes in these two policies but also on a host of other changes in demand and supply conditions not explicitly incorporated in the analysis. However it is important to note that the restrictive effect of a quota of 1.85 million Japanese exports increases as the U.S. economy grows. Hence to the extent that U.S. growth is anticipated, the quota would have to be increased to maintain the same level of restrictive effects on the total market.

METHOD OF ANALYSIS

Market Segmentation: The CEA auto demand model used in the analysis incorporates five market segments, two Japanese and three domestic, based on standard industry classifications of car lines:

The Japanese and U.S. Basic Small car segments include regular minicompacts (Tercel, Civic) and regular subcompacts (Escort, Cavalier, Sentra, Corolla). These are the less expensive small cars.

The Japanese and U.S. Luxuary Small car segments include specialty subcompacts (Camaro, Mustang, Prelude, RX7) as well as compacts (Reliant K, Tempo, Accord, Stanza). These are the more expensive small cars.

The U.S. Large car segment includes intermediate and full size cars (Cutlass, full-size Chevrolet, Ford LTD).

In the demand analysis, European cars (about five percent of the market) are included in the "domestic" segments. They are included with Japanese imports in the calculations of economic welfare changes and auto industry employment changes.

Consumer Demand: On the demand side, the model incorporates the best available information about the responses of consumers to price changes in each market segment. The demand elasticities used in the analysis are displayed in Table 1. The overall price elasticity of demand in the model is —1. Market demand elasticities are highest for the smaller cars and lowest for the larger cars. The model thus accounts for the greater responsiveness of consumers to price changes on basic small cars, and their lesser responsiveness to price changes on more luxurious smaller cars, and also takes account of the fact that there is no U.S.—Japanese competition in the large car segment. The cross price elasticities take into account substitutibility both among size classes and between Japanese and domestic cars. The elasticities and cross elasticities satisfy technical conditions of internal consistency.

Producer Response: The responses of U.S. and Japanese manufacturers to changes in policy cannot be predicted with certainty. As indicated in table 1, we have assumed supply elasticities of 2.0 for Japanese imports and U.S. production and a supply elasticity of 1.0 for U.S. assemblies of Japanese automobiles. The 2.0 supply elasticity assumption implies that manufacturers respond to a demand change by changing both price and quantity, but that the percentage change in quantity is twice as great as the percentage change in price. This supply elasticity, in conjunction with the demand elasticities in Table 1, is also consistent with estimates that the Japanese manufacturing cost advantage on small cars is on the order of $2,600 at current levels of output and that the effect of the VRA is to increase the price of Japanese cars by about $1,200.

The estimated effects of the VRA on imports, domestic production, and prices depend critically on the elasticity of supply. If the actual supply elasticity for imports is larger than 2.0, then Japanese producers would respond to an elimination of the VRA with larger price reductions and greater volume increases than shown in our analysis. Thus, our estimate of the increase in imports without the VRA would be understated. Further, if the actual supply elasticity of domestic production is larger than 2.0, then domestic manufacturers would respond to an elimination of the VRA with smaller price reductions and larger output reductions than shown in our analysis. To check the sensitivity of the simulations to supply elasticities, we also performed an alternative set of computations using assumed supply elasticities of 4.0 for both Japanese imports and U.S. production.

By the end of 1984, Honda's assemblies of Accords in its Ohio plant had reached about 135,000 units per year. It and several other companies plan to add substantially to U.S. assembly capacity in the next few years. In addition, Mazda is expected to import 50,000 GLCs per year from Mexico beginning in 1987. Table 3 displays current and planned future capacity for U.S. assembly of Japanese automobiles, based on manufacturers announcements. We assumed 260,000 assemblies in the base case, somewhat less than expected 1985 capacity of 275,000 units, and an elasticity of supply of 1.0. Thus the analysis captures short-run responses to changes in market prices but does not incorporate changes in assembly capacity plans in response to VRA or CAFE changes.

Employment Effects: Effects on automotive industry employment were estimated using cars-per-job multipliers, shown in Table 1, for the three classes of domestic cars, U.S. assemblies of Japanese cars, and imports. These factors capture the employment effects on assemblers, first and second tier parts suppliers, and materials suppliers. The factor for imports captures the effect on port employment.

In the long run, any effects on total employment in the economy of a change in VRA or CAFE regulations would likely be negligible. Workers released from automo-

tive industries eventually would be absorbed in other industries. Automotive industry employment change estimates are nonetheless of interest because they indicate the magnitude of adjustment involved and because automotive workers are a highly visible constituency group.

Consumer and Producer Welfare Effects: Gains to consumers were estimated by changes in consumer surplus. Changes in earnings of domestic and foreign producers were estimated by changes in producer surplus.

Trade Balance: The overall balance of merchandise trade depends largely on macroeconomic conditions and little, if at all, on conditions in individual product markets. Thus, an increase in automobile imports following a lifting of the VRA would cause the dollar to depreciate by enough, other things equal, to offset the increased automotive imports with increased exports and reduced imports of other goods and services.

CAFE Regulations: In order to estimate the interaction of the VRA and CAFE regulations, an elimination of the VRA was analyzed under two alternative assumptions about the CAFE regulations:

1. CAFE standards are relaxed sufficiently to be non-binding. This implies that U.S. manufacturers respond to increased import competition by greater specialization in large cars.

2. CAFE regulations are continued. U.S. manufacturers reprice their cars so as to maintain a market mix yielding a fleet average of 26.0 mpg. The actual fleet average for the model year 1984 domestic cars was 25.3 mpg, even though current regulations specify a CAFE standard of 27.0 mpg for model year 1984 and 27.5 mpg for model year 1985 and thereafter. General Motors and Ford are not meeting the standard, but they have complied with the law by carrying forward credits earned in previous years and borrowing credits from future production. Although this scenario captures some of the effect of the CAFE regulation, it underestimates the full effect of the 1984 or 1985 standards, barring market improvements in the fuel economy of specific car classes.

Initial Conditions: The initial conditions used as a base case scenario are displayed in Table 2, along with actual conditions in model year 1984. We have assumed that demand and supply conditions identical to actual model year 1984 conditions, except for imports and U.S. assemblies of Japanese automobiles. Because the VRA year begins in April, actual model year imports may not exactly match the quota level; we have assumed model year imports of 1.85 million rather than the actual 1.885 million units that were imported in model year 1985. Actual assemblies were 117,000 for model year 1984 and 134,000 for calendar year 1984. In the analysis, we assumed total assemblies of 261,000 units, consistent with 1985 capacity plans displayed in Table 3. This results in an increased supply of 144,000 U.S. assembled Japanese automobiles over model year 1984 sales.

RESULTS OF THE ANALYSIS

Tables 4 and 5 display the results of the analysis, assuming respectively that CAFE standards are relaxed so as to be nonbinding and that domestic manufacturers reprice their small and large cars so as to achieve a domestic fleet average of 26.0 mpg.

Scenario 1—VRA Eliminated, Cafe Regulation Nonbinding: Table 4 shows Japanese imports about 690,000 units higher and U.S. assemblies about 35,000 units lower than the base case. Prices of Japanese imports fall about $1200. U.S. producers lose about 240,000 sales, 200,000 small cars and 40,000 large cars. Prices of U.S. small cars decrease by about $260, while prices of U.S. large cars are virtually unchanged. The Japanese share of the market increases from 18.2 percent to 28.2 percent in this scenario.

In this scenario, the elimination of the VRA increases the supply of Japanese cars and depresses prices and sales of U.S. small cars, but has a much more modest effect on the large car market. The U.S. fleet average fuel economy falls, but only by 0.1 mpg, to 25.2 mpg. Because the increase in sales of Japanese small cars is greater than the decrease in sales of U.S. small cars, the average mpg of all cars sold increases 0.4 mpg, from 26.7 to 27.1 mpg.

Consumers gain about $4.1 billion in this scenario, $3.0 billion on Japanese cars and $1.1 billion on U.S. cars. U.S. producers lose $1.1 billion in earnings, eighty percent of which is lower earnings on small cars. Earnings of foreign producers fall by $2.2 billion, 98 percent of which is borne by Japanese producers. U.S. automotive industry employment is about 30,000 lower. Consumer gain is about $136,000 per automotive job reduced.

To check the sensitivity of the results to the supply elasticity assumption, we performed alternative simulations setting the supply elasticities of Japanese imports and U.S. production equal to 4.0, rather than 2.0. This alternative assumption results in a price reduction for Japanese cars of about $1600, and an increase in imports of 960,000 units. Total production of U.S. cars falls by 450,000 units, and prices of U.S. small cars fall by about $200. Compared to the results reported in Table 4, the increase in Japanese imports is about 40 percent greater and the reduction in U.S. output almost twice as great.

Scenario 2—VRA Eliminated, U.S. Fleet mpg Increases to 26.0: Table 5 shows Japanese imports about 620,000 units higher and U.S. assemblies about 38,000 units lower than the base case in this scenario. Prices of Japanese imports fall about $1500 for basic small cars and $1100 for luxury small cars. To shift market mix from large to small cars, and to respond to the increased supply of Japanese cars, U.S. producers reduce prices of basic small cars by about $1,000 and prices of luxury small cars by about $300, while increasing large car prices nearly $500. Sales of U.S. basic small cars increase by about 550,000 units, while sales of U.S. luxury small cars and large cars decrease by 30,000 and 520,000 units respectively, offsetting the increase in small car sales. The Japanese share of the market increases from 18.2 percent to 25.1 percent in this scenario.

In this scenario U.S. manufacturers reprice their cars to shift sales from large to small cars in the face of increased supplies of Japanese imports, increasing the average fuel economy of the U.S. fleet from 25.3 mpg to 26.0 mpg. Average fuel economy of all cars sold increases from 26.7 mpg to 27.6 mpg, an increase of 0.9 mpg, reflecting both the increase in Japanese small car sales and the 0.7 mpg increase in U.S. fleet fuel economy.

Consumers gain about $3.7 billion in this scenario, $3.2 billion on Japanese cars. In the U.S. car market, consumers gain $2.4 billion in the small car segments but lose $1.9 billion from the increase in large car prices, for a net gain of $0.5 billion on U.S. cars.

This scenario also shows U.S. producer earnings falling by $1.5 billion. Small car earnings fall by $3.1 billion, but large car earnings increase by $1.6 billion. Foreign producer earnings are also lower than in the base case, by about $2.5 billion. U.S. automotive industry employment is about 11,000 lower. Consumers gain about $326,000 per automobile job reduced.

To check the sensitivity of the results of this scenario to the supply elasticity assumption, we again performed alternative simulations setting the supply elasticities of Japanese imports and U.S. production equal to 4.0, rather than 2.0. This alternative assumption results in a price reduction of about $1,800 for Japanese basic small cars and $1,500 for Japanese luxury small cars, and an increase in imports of 840,000 units. This increase is about 35 percent greater than that shown in Table 5. Sales of U.S. basic small cars increase by 540,000 units and prices fall by about $1,100 per unit, roughly equal to the amounts shown in Table 5, but a greater reduction in large car sales results in a net loss of 130,000 U.S. sales.

TABLE 1.—PARAMETERS USED IN THE ANALYSIS

Demand elasticities	Japanese		United States		
	Basic small	Luxury small	Basic small	Luxury small	Large
Japanese basic small	−4.00	0.83	2.74	1.15	
Japanese luxury small	0.37	−3.50	0.62	1.63	2.57
U.S. basic small	0.83	0.42	−4.00	0.64	0.63
U.S. luxury small	0.24	0.77	0.45	−3.50	1.85
U.S. large	0.02	0.10	0.04	0.16	−2.50

Supply elasticities: U.S. production, 2.0. Japanese cars: Imports, 2.0. U.S. assemblies, 1.0.
Employment factors (cars per job): U.S. production: basic small 8.1; luxury small 7.3; and large 6.6. Japanese imports: 234. U.S. assemblies: 31.

TABLE 2.—INITIAL CONDITIONS

	Model year 1984 market	Base case scenario
Sales (in thousands):		
Japanese cars:		
Imports:		
Basic small cars	915	882
Luxury small cars	969	969
Subtotal	1,885	1,851
U.S. assemblies:

JAPANESE GOVERNMENT "EXTERNAL ECONOMIC MEASURES:" THE U.S. GOVERNMENT'S ASSESSMENT OF THEIR IMPLEMENTATION AND IMPACT, OCTOBER 1984

ATTACHMENT TO QUESTION 1

INTRODUCTION

This report assesses Japan's implementation to date of commitments contained in five sets of "external economic measures" which the Japanese Government has announced over the past three years, and evaluates the impact of those commitments as market opening measures.

The report discusses Japan's commitments in the context of the markets or sectors they were intended to liberalize. The description of Japanese liberalization commitments is divided into three parts for each market. First, we identify the market opening commitments that were contained in each trade initiative. Second, we describe the implementation to date of those commitments. Finally, we evaluate the effect that the implementation of those commitments has had on market access, and identify any remaining barriers to trade in that market. The appendix contains a brief description of Japan's five sets of "external economic measures."

This report is not intended to comprise a catalogue of every bilateral trade commitment made by the Japanese Government over the past three years. Japan has made a number of market opening commitments outside of the context of the five trade initiatives. Instead, this report focuses on the "external economic measures" as the most visible and comprehensive Japanese Government attempts to address the concerns of the United States and Japan's other trading partners regarding the need for increased foreign access to the Japanese market.

By focusing on the Japanese Government's unilaterally issued "external economic measures," however, this report necessarily excludes some issues of interest to the United States on the U.S.-Japanese bilateral trade agenda. Because the trade initiatives have been presented as comprehensive sets of market opening measures, addressing issues of interest to all of Japan's trading partners, the Japanese Government has been selective in its response to U.S. concerns, and several outstanding bilateral issues have never been addressed in the trade initiatives.

The U.S. Government compiled a comprehensive list of Japanese trade barriers in a report released in November 1982, entitled "Japanese Barriers to U.S. Trade and Recent Japanese Government Trade Initiatives." An update of that report is in progress. We refer the reader to that report or its update for a full description of impediments to market access in Japan.

OVERVIEW

The goal of U.S. trade policy towards Japan has been to achieve access for U.S. goods, services, and investment in the Japanese market equal to that enjoyed by Japan in the U.S. market. One of the stated purposes of Japan's "external economic measures" has also been to improve the access of foreign products, investment and services to the Japanese market. This goal is reflected in statements accompanying several of Japan's trade initiatives:

"These measures have been designed with the overall aim of firmly maintaining the free trading system and contributing to the revitalization of the world economy through achieving an expansion of trade on a balanced basis . . . Japan's market opening measures are not only a demonstration of Japan's commitment to this system, but also willingness to assume equivalent domestic political risks in support of this system." (January 13, 1983)

". . . by taking various steps . . . the Government intends to move beyond mere market opening into the realm of active import promotion." (October 21, 1983)

"Japan has steadfastly implemented the series of economic measures hitherto decided upon, thus making efforts in opening its markets and promoting imports." (April 27, 1984)

It is thus appropriate to review these commitments and their implementation in the context of the degree to which they have improved foreign access to the Japanese market.

The scope for increasing Japan's imports of primary products is limited; thus, the goal of many of Japan's market opening measures has been to increase imports of manufactured products. Between 1980 and 1983, Japan's share of manufactured imports as a percent of total imports increased about 3 percent, from 21 to 24 percent. Japan's manufactured imports rose in value from $30 to $31 billion over this period. Japan's imports of manufactured products from the U.S. increased from approximately $10.1 billion in 1980 to $11.8 billion in 1983.

Most of the increase in Japan's ratio of manufactured imports to total imports, however, resulted from an absolute decline in total and non-manufactured imports. Furthermore, the rise in the value of Japan's manufactured imports largely reflected price increases.

The increase in Japan's manufactured imports from the United States also cannot be directly linked to Japan's market opening measures. First, bilateral trade flows are influenced by a wide range of factors, such as exchange rates and divergent economic cycles, and thus it is difficult to isolate the effects of individual market opening measures. Second, many of the Japanese Government's trade liberalization measures have not yet been fully implemented, so their impact has not been felt. Finally, U.S. exporters cannot expect to reap the full benefits of market opening measures, as third country exporters also benefit from such policies. Therefore, this report evaluates Japan's market opening actions by assessing the extent to which they have created new opportunities in the Japanese market for U.S. exporters and investors.

On the whole, Japan's external economic measures have improved foreign access to the Japanese market. However, significant barriers to trade remain in a number of sectors.

Some of the commitments announced by the Japanese Government could remove key barriers to market access and result in substantially expanded market opportunities for foreign exporters and investors. These commitments, which concern Japan's tobacco, telecommunications and financial services markets, have all been made within the last year, however, and their market opening impact will depend very heavily on the manner in which they are implemented.

The primary barrier to foreign penetration of the Japanese tobacco market has been the presence of the Japan Tobacco and Salt Public Monopoly Corporation (JTS), a government monopoly controlling pricing and distribution in the Japanese manufactured tobacco market. Early Japanese commitments to reduce tariffs and expand retail distribution outlets available to foreign brands were implemented, but have had little effect on the U.S. share of the Japanese market. In April 1984, the Japanese Government announced that it was submitting legislation to the Diet which would end the JTS monopoly and liberalize the Japanese tobacco market. The market opening impact of this legislation, which will take effect on April 1, 1985, will depend very heavily on the manner in which it is implemented.

U.S. penetration of Japan's telecommunications equipment and services markets has been kept low due to the presence of another government monopoly, the Nippon Telegraph and Telephone Public Corporation (NTT). Also in April, the Japanese Government announced that it was submitting legislation to the Diet to privatize NTT and liberalize the Japanese telecommunications market. The actual impact of this legislation, once passed, will also depend on the manner in which it is implemented.

Commitments in the trade initiatives have resulted in partial market opening in the areas of standards, tariffs, agricultural quotes, customs procedures, NTT procurement, direct investment, and energy.

All five announcements have included commitments to liberalize Japanese standards and certification practices. Although the statutory framework for implementing the Japanese Government's commitments has been completed, full implementation at the administrative level has not yet been achieved. Because progress has been slow, many of the policy pronouncements included in recent announcements repeat previous commitments regarding standards and certification.

Tariff reductions have also been included in each of the five sets of external economic measures. Although Japan has the lowest average overall tariff rate in the industrialized world, tariffs on individual items remain high, particularly on certain manufactured and high value-added agricultural products. Japan has reduced tariffs on items of significant trade interest to the United States. However, many tariff cuts included in the trade initiatives have been of only marginal benefit for U.S. exporters, due to the small size of the reductions or the low volume of U.S. exports of affected products. Many items remain on which tariff cuts would afford a significant increase in market opportunities for U.S. exporters.

The Japanese Government has begun to implement its commitments to expand agricultural quotas. In announcing measures to expand its beef and citrus quotas in August 1984, the Japanese Government addressed the leading agricultural trade issue between the United States and Japan. However, the United States is still seeking a commitment from the Japanese Government to eliminate its residual import restrictions on all agricultural products.

Japanese Government commitments to improve customs procedures have also been implemented, but have had only a marginal impact because the problems addressed by the commitments have not constituted significant market impediments for U.S. exporters. The Japanese Government has expressed little willingness to study a U.S. suggestion that Japanese Government ministries delegate more clearance authority to Japanese Customs so as to expedite clearance procedures.

Included in the external economic measures has been a Japanese Government commitment to improve NTT procurement practices, through implementation of the bilateral agreement with the United States covering NTT procurement practices. NTT has implemented the technical and procedural aspects of the Agreement, but the United States believes that further progress can be made in increasing NTT's procurement of sophisticated core network telecommunications equimpent from U.S. firms.

The Japanese Government has implemented commitments to improve procedures for approving and facilitating foreign direct investments. However, the U.S. Government believes that it would be helpful for the Japanese Government to improve further the investment climate, which would enhance the ability of U.S. investors to compete in Japan and, thus, stimulate greater investment flows.

On Energy, the Japanese Government has implemented commitments to send a private sector coal mission to the United States and to encourage energy feasibility studies. However, meaningful commitments to increase purchases of U.S. coal or gas have not yet materialized.

Areas in which Japanese commitments have not been specific or remain unimplemented include government procurement, services, and import promotion.

In its October 1983 trade initiative, the Japanese Government made a commitment to ensure that its government procurement practices are in conformity with the GATT's Government Procurement Code. However, Japanese Government agencies continue to use single-tendering procedures extensively.

The only commitment included in the Japanese trade initiative affecting services was a commitment to "work toward an appropriate solution" on legal services. A number of services issues remain unaddressed, including Japanese restrictions on the use of maritime high cube containers, the inability of U.S. shipping lines to obtain contracts for shipment of leaf tobacco, and restrictions on the access of U.S. firms to Japan's Bank Related Credit Card Association.

Japanese trade initiatives have included a variety of import promotion measures, including the creation of an Office of Trade Ombudsman to respond to foreign complaints regarding market barriers, import promotion missions, and high-level statements encouraging increased imports of manufactured products. The practical effect of such actions and statements is impossible to evaluate, however, because they have never been accompanied by any yardsticks with which to evaluate their success.

Finally, the most recent set of external economic measures included two statements which were not market opening measures, per se, but which dealt with two areas of primary importance to the United States.

The first statement was that foreign satellite procurement by Japanese Government agencies would be permitted, subject to considerations of "consistency with the national space development policy." The U.S. Government has sought clarification of this condition, but so far the Japanese Government has not responded to this request. It remains to be seen whether this policy statement will lead to purchases of foreign-manufactured satellites.

The second statement noted the Japanese Government's decision to delay the introduction to the Diet of a proposal to eliminate copyright protection for computer software, and to consider "international harmony" in developing new proposals. No commitment was made to abandon the proposal.

INDUSTRIAL TARIFFS

I. Japanese market opening commitments

Trade Initiative of December 16, 1981

The Japanese Government announced it would accelerate implementation of Japan's Tokyo Round tariff reductions which were scheduled for 1983 and 1984. This measure affected 1,653 items, of which 1,539 were mining and manufactured products. The tariff acceleration covered about 43% of all Japan's dutiable imports. As a result, the average tariff rate of the affected items was reduced from 8% to 6.75%. Among the non-

agricultural products covered were computers, integrated circuits, scotch whiskey, aluminum ingots, tungsten, golf balls and some auto parts.

Trade Initiative of May 28, 1982

The Japanese Government announced it would eliminate tariffs on 96 industrial products, including certain machine tools, cut diamonds, some domestic appliances (air conditioning equipment, refrigerators, vacuum cleaners, washing machines and microwave ovens), watches, boilers and turbines, electric generators, digital calculating machines, televisions and electric generators. This increased the number of industrial products that enter Japan duty free to about 550.

The Japanese Government reduced rates on 102 industrial items, including computers, nuclear reactors, telephone switchboards, and medical and diagnostic equipment, on an accelerated schedule. The 7% tariff rate on computers and 8.7% rate on computer parts were jointly reduced to 4.9%. Duties on computer peripherals dropped to 6%. The Japanese Government also reduced tariff rates two years ahead of schedule on several other industrial products (automotive tires, catalytic agents and steel) to levels below the proposed rates agreed upon in the Tokyo Round. Some 36 articles, such as lighters, eyeglass frames and ballpoint pens, were no longer subject to a surcharge. As a result, the average tariff rate on the affected 198 industrial items fell from 6.2% to 3%, and the average tariff rate for all industrial products fell from 3.45% to 3.27%.

Trade Initiative of December 25, 1982

The Japanese Government announced that it would reduce or eliminate tariffs on 28 industrial products. Japan's kraft paper tariff was reduced from 11.8% to 9.3%. Other items receiving a tariff reduction included blank magnetic tapes, cash registers and paperboard. The 5.9% tariff on farm tractors and the 7.5% tariff on numerically controlled machine tools were completely eliminated. The duty exemption on several other types of farm equipment (hay balers, mowers, harvesters, feeders and silos) was extended until 1986. The May and December tariff packages together affected 11% of all Japan's dutiable imports.

Trade Initiative of October 21, 1983

The Japanese Government announced that it would reduce or eliminate tariffs on 47 items, including paper products and agricultural machinery. In particular, the 13.1% particleboard tariff was reduced to 12%, and the 11.6% tariff on wrapping paper fell to 9.3%. Japan offered to eliminate its tariffs on semiconductors if the United States would do the same. In addition, Japan committed itself to accelerating scheduled Tokyo Round tariff reductions on 1,280 items, most of which were manufactured products, by one year. The package covered 27.6% of all Japanese dutiable imports.

Trade Initiative of April 27, 1984

The Japanese Government announced that it would reduce or eliminate tariffs on 31 industrial items. Tariffs will be reduced on color photographic film and kraft paper. The Japanese bottled wine tariff (which varies according to price) will also be reduced, although the tariff reduction will be accompanied by an excise tax increase. Japan also proposed advanced implementation by two years of its scheduled Tokyo Round reductions on 1,130 industrial products if the European Community and the United States would do likewise. Furthermore, Japan committed itself to expand the number of items allowed duty-free entry under the GATT Agreement on Trade in Civil Aircraft.

II. Implementation of commitments

Tariff cuts announced on December 16, 1981, were implemented on April 1, 1982. Tariff cuts announced on May 28, 1982, and December 25, 1982, were implemented on April 1, 1983. Reductions announced on October 31, 1983 were implemented on April 1, 1984. However, elimination of Japan's semiconductor tariff still awaits implementation of parallel U.S. legislation.

The tariff cuts announced on April 27, 1984, will be deliberated by Japan's Tariff Deliberation Council, which makes the final decision on all tariff changes, when it holds its annual meeting in December. There is no reason to believe that the Council will not endorse the announced tariff reductions, which would become effective on April 1, 1985. The Diet has already passed legislation to expand the list of duty free civil aircraft items beginning January 1, 1985. Japan's willingness to accelerate its Tokyo Round Tariff reductions is dependent upon similar action by the United States and the EC. The Congress has not yet passed such legislation.

III. Applicability to U.S. interests

Japan has the lowest average tariff rate in the industrialized world; Japan's average tariff rate is 2.5%, compared to the European Community's average rate of 2.6%, and an average rate of 3.2% for the United States. However, certain Japanese tariffs for manufactured (and value-added agricultural) products remain high, and inhibit penetration of the Japanese market by competitive foreign imports. In response to U.S. concerns, Japan has included unilateral tariff reductions in each of its five sets of market opening measures. These tariff reductions have been of interest to all of Japan's trading partners, and have not exclusively benefitted U.S. exporters.

The impact of the tariff accelerations announced in December 1981 was thought to have only a marginal impact on U.S. exports to Japan.

Tariff reductions in the May 1982 trade initiative which were of particular interest to U.S. exporters included computers and related items, photographic film, medical equipment and machine tools. The impact of many of the reductions, however, was regarded as limited since foreign companies would have to compete for market share with highly competitive Japanese producers of these items. Moreover, since the affected tariffs were generally already quite low, further reductions probably had a limited impact on trade.

Although the December 1982 tariff concessions covered roughly $180 million in U.S. industrial products exports to Japan in 1981, the tariff cuts were too small to spur increased exports. The concessions on paperboard and kraft paper, for example, affected meaningful levels of bilateral trade, but ranged from only one to three percentage points on existing tariffs which were in a range of six to twelve percent. Another tariff reduction of interest to the United States affected magnetic tape. The elimination of tariffs on numerically controlled machine tools was regarded as a response to the pending Houdaille trade petition. The continuation of the tariff exemption on certain agricultural equipment was a response to a U.S. request.

Approximately 14 of the 47 industrial products tariff reductions contained in the October 1983 trade initiative were of existing trade interest to the United States. Of special interest were the tariff reductions on wrapping paper and particleboard. In general, however, the tariff reductions were quite shallow and, at most, may have had a slight positive impact on U.S. exports. Elimination of Japan's semiconductor tariffs would significantly assist U.S. exports of similar products.

When implemented, the April 1984 tariff reductions will reduce or eliminate certain tariffs in several areas of real trade interest to the United States, including photographic film, farm machinery and alcoholic beverages. Of the 31 tariffs on manufactured products on the list, 25 are of interest to the United States. These items account for roughly $500 million in 1983 U.S. exports to Japan. Other tariff reductions of U.S. interest include hay balers, unwrought magnesium, and auto emission catalysts. The tariff reductions in the April package, the most comprehensive to date, will have a positive impact on U.S. exports. The effect of the cuts on individual items will depend upon specific price elasticities. A major disappointment of the April 1984 initiative, however, was continued inaction on repeated U.S. request for tariff cuts on other products, notably forest products.

Subsequent to the announcement of the April initiative, the U.S. Government submitted an updated list of tariff reduction requests to the Japanese Government. This list included outstanding requests, in addition to requests for tariff cuts on several new items which would increase market opportunities for U.S. exporters, such as wrought and unwrought aluminum and aramid fiber.

AGRICULTURAL TARIFFS

I. Japanese market opening commitments

Trade Initiative of May 28, 1982

In early May 1982, the U.S. Government provided a tariff reduction request list to Japan which included 93 categories of agricultural products. The total value in 1981 of Japan's imports in these categories was over $1,075 million.

On May 28, 1982, the Japanese Government offered to accelerate tariff cuts to the final MTN rate for several items on the U.S. request list and to unilaterally reduce the duty on other items. Of the 15 agricultural items covered in the trade initiative, the tariff cuts on seven items fully met the U.S. requests. Among the products on which tariff cuts were accelerated were: turkey meat, lemons and limes, sweet almonds, macadamia nuts, soybean oil, corn oil, chocolate confectionery products, pastry biscuits, lemon and lime juice, and salad dressings. The Japanese Government offered to reduce tariffs below the final MTN rate (though still higher than the requested U.S. cuts) on duck meat, pistachios, and peanut butter.

Trade Initiative of December 25, 1982

The Japanese Government announced tariff reductions on a total of 60 agricultural products. Of particular note were the large tariff reductions on chocolate confectionery and biscuits with sugar. Some 18 items in the package, including a number of horticultural products and brandy, were not on the U.S. tariff request list.

Trade Initiative of October 21, 1983

This initiative included tariff reductions on three agricultural products: boneless chicken, bananas and palm oil.

Trade Initiative of April 27, 1984

This initiative included tariff reductions on 32 agricultural products. Twenty of these cuts constitute new tariff reductions, while the remaining twelve cuts are accelerations of the final Tokyo Round tariff reductions.

II. Implementation of commitments

The tariff reductions announced in May 1982 became effective on April 1, 1983. The reductions announced in October 1983 became effective on April 1, 1984. The cuts announced in the April 1984 trade initiative are expected to become effective on April 1, 1985.

III. Applicability to U.S. interests

The total value of Japan's imports of agricultural products covered by tariff reductions announced in the May 1982 trade initiative was $146 million. The average duty on these items was reduced from 19.4% to 16.8% (excluding the specific duties on corn oil and soybean oil). Before the cuts, tariffs on these items ranged from 5.9% to 36.3%. After the cuts, this range was 4% to 34%.

The December 1982 trade initiative covered $152 million in U.S. exports of agricultural products to Japan in 1981. The tariff cuts reduced the average tariff on these items from 14.5% to 11.8%. Before the cuts, this range was 0% to 30%.

It is not possible to assess the precise impact of the tariff cuts contained in the 1982 trade initiatives due to the incremental nature of the reductions. The impact of these cuts, if any, has probably been minor.

Although one of the three agricultural categories included in the October 1983 tariff cuts was on the U.S. tariff reduction request list (boneless chicken), the decrease in the duty from 20% to 18% on this product will primarily benefit Southeast Asian producers. The value of Japan's imports of boneless chicken from the United States in 1981 was $25.5 million. The impact of these tariff cuts on U.S. exports is expected to be small.

The 1982 value of U.S. exports to Japan of agricultural products on which tariff cuts were announced in the April 1984 trade initiative was $460 million. While the overall impact of these cuts on U.S. agricultural exports is expected to be minor, some items may benefit measurably from the cuts, including meat products, whey, peanut butter, soy protein and canned corn.

The U.S. Government recently submitted an updated tariff reduction request list to the Japanese Government, which includes requests for tariff cuts on 50 agricultural items. Included on this list are fresh grapefruit, walnuts and wine.

AGRICULTURAL QUOTAS

I. Japanese market opening commitments

Trade Initiative of April 27, 1984

As the result of numerous bilateral consulatations over the past two years, the Japanese Government announced the elimination of quotas on hi-test molasses and other sugars, certain fruit purees and pastes, some fruit pulps, selected fruit juices, and various other food preparations containing added sugar. Import quotas on prepared and preserved pork will be eliminated in Japan Fiscal Year 1985 (which begins on April 1, 1985), while quotas on grapefruit juice will be eliminated in Japan Fiscal Year 1986.

The Japanese Government will retain import quotas, but expand their size, on beef, fresh oranges, orange juice, peanuts, non-citrus fruit juices, tomato ketchup and sauce, as well as a number of other value-added agricultural products.

II. Implementation of commitments

Japan is now beginning to implement its commitments to expand its agricultural quotas. Some U.S. followup may be necessary to ensure that certain aspects of Japan's trade liberalizing measures are implemented on schedule.

III. Applicability to U.S. interests

The estimated value of increased beef and citrus trade as a result of Japanese measures to liberalize imports is approximately $400 million over the next four years. It is too soon to make a precise assessment of the impact of Japan's liberalization of other import quotas. However, the U.S. Government estimates that U.S. exports will increase by several million dollars.

As a result of Japan's actions expanding its agricultural import quotas, the U.S has postponed for two years its GATT action against Japan on 13 of the 18 agricultural categories subject to imports quotas. In Japan Fiscal Year 1987 the U.S. and Japanese governments will again discuss liberalization of Japan's beef and citrus imports.

The U.S. objective in this area is complete elimination of Japan's import quotas in 18 agricultural categories. The U.S. believes these quotas have been inconsistent with GATT rules since 1963.

STANDARDS

I. Japanese market opening commitments

Trade Initiative of January 10, 1982

This initiative included a list of 99 trade problems, 94 of which were standards-related. The Japanese Government took measures to resolve only 10% of these issues. Specific standards issues which were addressed included:

Sporting goods: Guidance will be given to sports organizations to accept foreign-made products;

Cosmetics: foreign test data will be accepted. Registration procedures for formula changes will be simplified. Approval procedures will be simplified;

Health care: Permission for transfer of manufacture and import licenses among enterprises will be given. Foreign non-clinical test data will be accepted.

Trade Initiative of May 28, 1982

Transparency.—Foreign participation in standards drafting committees will be allowed.

Specific products.—Sporting goods: Further official guidance will be given to sports organizations directing national treatment, conformity with international standards, simplification of inspection procedures, and publication of standards and approval system;

Cosmetics: Additions were made to list of approved ingredients. JCIA will publish ingredients. Registration for minor formula changes and name changes will be simplified. Foreign animal test data will be accepted;

Pharmaceuticals; Toxicity test standards will be clarified. Standards for drugs for material use will be established. Foreign animal test data will be accepted.

Trade Initiative of January 13, 1983

A review of standards and certification systems was announced. The review resulted in further commitments to improve Japan's standards and certification system, announced on March 26, 1983. These commitments are described below.

General provisions.—To amend laws to prevent discrimination against foreign firms. Foreigners will apply for and receive certification directly, and receive equal treatment in testing methods;

To simplify certification procedures for motor vehicles, pharmaceuticals, medical devices, electrical appliances, and animal and plant quarantine;

To simplify pre-import procedures.

Transparency.—To compile and publish a directory of standards-drafting and revising activities, and to provide notification of such activities through government and private sector publications;

To provide a mechanism for comment from the outset of the standards drafting process;

To extend the Standards Code comment period from 45 days to 9 weeks;

To take steps to ensure that transparency, non-discrimination, and conformity with international standards are maintained in non-governmental standards drafting bodies.

Specific products.—Chemicals: To work towards early introduction of Good Laboratory Practice standards (GLPs);

Plywood: Standards revised, New standard will be adopted on plywood with "white pocket";

Electric appliances: To accept foreign inspection data;

Cosmetics: List of additional permissible ingredients will be published. Consumer preference testing will be permitted as of April 1983;

Health care: Transfer of approval for imports among enterprises will be simplified as of April 1983;

Pharmaceuticals: Distinction between pharmaceuticals and food stuffs will be clarified. Foreign generated non-clinical test data which was not previously accepted will now be accepted;

Agricultural products: Commitment made to take steps to approve new food additives.

Trade Initiative of October 21, 1983

No commitments were announced. The initiative refers to "steady implementation" of the revisions to the laws governing standards and certification procedures. These laws were effective August 1, 1983. Followup measures will be taken based on the amendments to the laws to ensure the transparency of standards drafting processes, promote the internationalization of standards, etc.

Trade Initiative of April 27, 1984

General provisions.—Test data from foreign testing organizations which meet certain criteria will be accepted. Clear guidelines setting forth these requirements will be drawn up and published with respect to each certification system by the end of 1984.

Specific products.—Chemicals: CLPs for the testing of new industrial chemicals are to be drawn up and published soon. GLPs for agrochemicals will be adopted by March 31, 1985;

Pharmaceuticals: Further study will be given to acceptance of foreign clinical test data, including consultations with foreign countries on ethnic-based physiological differences, and an interim report will be issued by March 31, 1985. Examinations of approvals can start before "long term stability tests" are completed;

Electrical appliances: Japan has joined an international certification program for electrical appliances and is promoting harmonization with international standards;

Motor vehicles: The quantity of vehicles that can be approved under the "low volume

exemption" will be increased from 300 to 500.

II. Implementation of Commitments

Trade Initiative of January 10, 1982

Despite commitment of official guidance on sports equipment, U.S. metal baseball bats were not accepted until the fall of 1983. Commitments on cosmetics have been implemented. Transfer of health care products licenses has not been permitted, but foreign non-clinical test data is now accepted.

Trade Initiative of May 28, 1982

The inclusion of a commitment to permit foreign entities to participate in standards drafting activities seemed to be an earnest attempt to implement changes in traditional Japanese standards practices. The effectiveness of this commitment was undermined by the Japanese Government's failure to ensure that each affected agency issued guidance to the relevant industrial organizations. A significant number of American experts has not yet served on Japanese standards drafting committees.

Further guidance on sporting goods proved ineffective. Commitments on cosmetics were implemented; simplified registration and acceptance of foreign animal test data were implemented on March 31, 1982. The effect of clarification of toxicity test standards and the establishment of standards for drugs for material use were not precise enough to result in administrative reform. The commitment to accept foreign animal test data for pharmaceuticals was implemented on March 31, 1982.

Trade Initiative of January 13, 1983

The March 1983 recommendations included proposed revisions to 17 Japanese laws to establish the principle of non-discriminatory treatment of foreign products during approval procedures. The legislation to implement these changes was submitted to the Diet and passed in May 1983.

From March to December 1983, the Japanese Government provided notification to the GATT of 69 regulations under the Standards Code. Of these, 29 had comment periods of 9 weeks or more, 35 had comment periods of between 45 days and 9 weeks, and five had comment periods of less than 45 days.

Implementation of commitments in health care area was mixed. All non-clinical foreign test data is now accepted, but foreign clinical tests are still not accepted. Foreign clinical test data may be accepted by the spring of 1985. "Unfriendly" product approval transfers are permitted only in limited cases.

Excellent progress was made by the Ministry of Health and Welfare in resolving problems affecting the importation of cosmetics, such as publication of ingredients lists, simplified registration procedures, and acceptance of non-clinical test data.

Revision of the plywood standard was implemented. Progress was also made in the designation of new food additives. However, the promise to clarify the distinction between pharmaceuticals and health foods was not implemented. In addition, the Japanese Government did not establish a GLP for agricultural chemicals until October 1984.

Trade Initiative of April 27, 1984

The statement on acceptance of foreign generated test data was not new, but simply repeated previous Japanese Government commitments.

The commitment to adopt GLPs for industrial and agricultural chemicals also repeated previous statements by the Government of Japan. Despite a previous commitment in March 1983, the Japanese Government has moved slowly in adopting GLPs. Final GLPs for agricultural chemicals were issued in October 1984. Final GLPs for industrial chemicals will become effective in April 1985.

Despite a Japanese Government commitment to accept foreign clinical test data, no guidelines for the acceptance of such data have yet been established. As an example, the Ministry of Health and Welfare (MHW) has stated that the results of foreign clinical test data are "basically" acceptable for medical devices immune to ethnic differences. However, the MHW has repeatedly rejected U.S. requests to approve one such device based solely on foreign generated clinical test data. The MHW has retreated from its commitment by stating that its statement does not apply to "new modalities." In fact, the MHW has established no criteria for determining whether devices are immune to racial differences.

The commitment to examine applications for approval before long term stability tests are completed will benefit U.S. manufacturers by speeding up the approval process.

U.S. motor vehicle manufacturers utilize the low-volume exemption in the Japanese approval process for motor vehicles, but do not ship significant quantities to Japan. Hence, the increase in the exemption will have little impact on U.S. exporters.

III. Applicability to U.S. interests

In the past, U.S. exporters to Japan faced numerous technical barriers imposed by various Japanese ministries. Foremost among these barriers was the Japanese Government's policy of only permitting producers or products within its territory to obtain product approvals. As a consequence of this policy, all imported products were subject to burdensome and costly dock-side inspection procedures, to determine whether or not they conformed with Japanese requirements. Other barriers faced by U.S. exporters included non-transparent procedures, lack of adequate appeal mechanisms and a prohibition against access to important standards development committees. Since 1982, the Government of Japan has attempted to address standards-related trade barriers in each of its trade liberalization initiatives.

The most significant commitments made by the Japanese Government in this area have been to:

Make arrangements for foreign participation in standards-drafting committees;

Provide for direct access to Japanese approval schemes; and

Accept foreign-generated test data.

The statutory and regulatory framework for implementing these commitments has been completed, as evidenced by, for example, the revision in May 1983 of sixteen Japanese laws to provide for "direct access." However, full implementation of these commitments at the technical level has not yet been achieved.

Factory Inspection and Product Testing

Japanese regulatory procedures describe a two-step approval process. First, a producer's factory is inspected and registered. Second, sample products are tested and approved. These steps are generally conducted by quasi-governmental bodies called "designated entities."

American and other foreign suppliers gained "direct access" to the two-step Japanese approval process as a result of revisions made to sixteen regulatory statutes in 1983. The revisions have not benefitted a significant number of American suppliers because, wary of inspections and tests conducted by officials from "designated entities," Americans fear loss of business confidential information. To resolve this problem, the U.S. Government has requested that Japanese ministries designate U.S. testing firms to conduct inspections and tests in the United States according to Japanese criteria.

Towards this goal, the Ministry of International Trade and Industry has approved two U.S. testing firms to conduct factory inspections for American suppliers. In addition, the Ministry of Health and Welfare has approved one U.S. testing firm to test food products, and the Ministry of Agriculture, Forestry and Fisheries also approved a U.S. supplier to grade and label exports.

The announcement in the April 1984 trade initiative that Japanese ministries will accept American generated test data repeats past Japanese policy pronouncements on this issue. These previous announcements have not achieved significant results. For example, three years of efforts to obtain acceptance by the Ministry of Health and Welfare of clinical test data for health care products have been unsuccessful.

The recent announcement does not contain agreement by Japanese ministries to designate U.S. and other foreign firms to conduct the product tests required in step two of the Japanese approval process. On the contrary, some Japanese ministries are asking that U.S. testing firms enter into contracts with designated entities concerning the acceptance of test data. In the past, such contracts have been characterized as "mutual arrangements" and have been based on concepts of sectoral reciprocity. The incorporation of such concepts in Japan's unilateral instutition of import promotion activities is inappropriate in the context of the U.S.-Japan trade relationship.

Participaton in Standards Drafting Committees

American experts have yet to benefit from a Japanese commitment in the May 1982 trade initiative to permit foreign input in standards drafting committees. The 1982 announcement set up a means for American experts to participate in the activities of "private" associations, since foreign nationals cannot directly participate in ministerial activities under Japanese law. Many "private" Japanese associations draft technical specifications that are subsequently adopted as regulations by Japanese ministries. However, only MITI admits that this relationship exists and other ministries have largely ignored this commitment.

In 1983, MITI issued a list of 250 standards activities that eventually will be approved as "Japanese Industrial Standards" (JIS). No Americans actually joined in these activities, as adequate administrative procedures were not in place to process their requests. A new list, issued by MITI in July 1984, is currently being circulated to interested American experts.

CUSTOMS PROCEDURES

I. Japanese market opening commitments

Trade Initiative of January 10, 1982

The Japanese Government announced five new measures intended to facilitate clearance of imports by Japanese Customs. The measures were:

1) an "After Permit Examination" system, under which Japanese Customs may issue import permits before final examination of all relevant import documentation;

2) abbreviated examination of documentation for goods regularly imported by the same importer from the same exporter;

3) streamlining of documentation required by Customs to complete entry;

4) exemption from repeat physical inspection for repeat shipments, when the goods in each shipment are identical and when the importer and exporter are the same; and

5) a classification center at Tokyo Customs House to centralize classification problems.

Trade Initiative of May 28, 1982

The Japanese Government announced two new measures:

1) dismantling of the requirements for an importer of certain pharmaceuticals to file an import report to the Ministry of Health and Welfare, and broadening of the exemption from import formalities for small quantities to cover larger sample quantities; and

2) a system allowing food importers to file required import reports with the Ministry of Health and Welfare before the arrival of perishable products.

II. Implementation of commitments

All the measures described above, except the change for pharmaceuticals, were implemented by April 1, 1982. The pharmaceuticals change was implemented on May 1, 1982.

III. Applicability to U.S. interests

U.S. exporters have traditionally complained that Japanese customs clearance procedures are time-consuming and implemented in an inconsistent manner.

The measures included in the trade initiatives apply across-the-board to imports from all sources. U.S. producers ship large quantities of agricultural commodities which are uncontroversial and easily identifiable (such as corn and soybeans), and therefore likely to benefit from the measures designed to facilitate entry of repeat shipments. However, there have never been difficulties getting such agricultural products into Japan. The marginal effect on U.S. exports to Japan is therefore small.

The other measures generally ease Customs clearance procedures. Since Customs clearance procedures themselves do not pose significant barriers to U.S. goods, making entry procedures easier, though welcome, will not have major impact on bilateral trade flows. Nevertheless, certain exporters (pharmaceuticals, perishable products) are likely to gain direct benefits of importance to their businesses.

An outstanding U.S. concern in this area is the fact that the Customs Service holds goods on the docks in Japan until they have been cleared by other Japanese ministries, which can result in costly delays.

TOBACCO

I. Japanese market opening commitments

Trade Initiative of January 13, 1983

Tariffs on cigarettes and cigars to be reduced from 35% to 20%, with a compound tariff rate introduced for cigarettes. Tariff on pipe tobacco to be reduced from 60% to 35%. Tariff cuts to be effective as of fiscal year 1983.

Expansion of the number of retail outlets authorized to handle foreign brands to include all outlets in major cities other than Tokyo and Osaka, as of March 31, 1983. Outlets in Tokyo and Osaka to be included as of October 31, 1983. "Efforts will be made" to permit all outlets which wish to sell foreign products to do so by March 31, 1985.

Commitment to study the possibility of establishing an independent distribution network for imported tobacco products in tandem with the Japanese Government's analysis of the future of the Japan Tobacco and Salt Public Monopoly Corporation (JTS) as part of its overall efforts at administrative reform.

Trade Initiative of October 21, 1983

"The Government will actively promote improvement in the distribution systems for imported tobacco products."

Trade Initiative of April 27, 1984

Announcement that legislation has been introduced in the Diet by the Ministry of Finance to privatize JTS, end its monopoly on the importation and distribution—but not the manufacture—of tobacco products, and allow independent importation and distribution of tobacco products after registration with the Ministry of Finance. Pricing policies are to be set by manufacturers with Ministry approval. Among the conditions for approval will be that: (1) price must be uniform in all parts of Japan; (2) pricing policies do not violate Japan's Antimonopoly Laws; and (3) pricing does not constitute dumping.

The excise tax will be revised from wholly ad valorem to partially specific. The excise tax will now be composed of an 80% ad valorem component (based on the retail price), while the remaining 20% will be a specific tax.

Importers will be free to choose their own retailers. Efforts to expand number of retail outlets handling imported tobacco products will continue to be made while legislation is pending.

II. Implementation of commitments

Effective May 1, 1983, Japanese tariffs on imports of cigarettes and cigars were cut from 35% to an ad valorem equivalent of 20%, and those on pipe tobacco from 60% to 35%. However, concurrent with the tariff reduction, a tax surcharge of 20 yen per pack was imposed on cigarettes. Consequently, although the price differential between domestic and imported brands was reduced, the retail price of imports remained high.

As of March 31, 1983, the Japanese Government expanded the number of retail outlets authorized to handle foreign brands to include all outlets in major cities other than Tokyo and Osaka. According to U.S. industry sources, some 36,000 outlets were handling imported brands as of June 1983. Expansion in authorized retail outlets to Tokyo and Osaka proceeded on schedule.

Legislation to privatize the JTS was passed by the Japanese Diet on August 7, 1984. This legislation has an effective date of April 1, 1985.

III. Applicability to U.S. interests

For many years American tobacco manufacturers have been seeking increased access to the Japanese market, which had estimated retail sales of $10 billion in 1983. To date, U.S. producers, who are highly competitive in the world market, have been unsuccessful in securing more than a two percent share of the Japanese market. This small market share has been largely the result of pricing and other controls imposed by the Japan Tobacco and Salt Public Monopoly Corporation (JTS), the government monopoly controlling tobacco sales.

A November 1980 agreement between the U.S. Government and the Government of Japan resulted in tariff reductions on manufactured tobacco products from 90% to 35%; an increase in the number of retail outlets licensed to carry imported brands from 14,000 to 20,000; and the elimination of some marketing and advertising restrictions. In the wake of the agreement, U.S. sales increased only slightly, from 1.3% to 1.4% of the Japanese market.

The January 1983 tariff reductions covered approximately $60 million in U.S. exports of manufactured tobacco products. Although smaller than desired by the U.S. industry, these represented significant cuts. The effect of the tariff cuts on the competitiveness of U.S. products was reduced by the imposition of an additional surcharge on sales of tobacco products, however.

The presence of the JTS monopoly has severely limited the competitiveness of imported tobacco products in the Japanese market. Marketing restrictions include a requirement to test market new brands under conditions laid down by JTS that are more restrictive than those covering JTS' own brands. Restrictions on advertising expenditures, though ostensibly nondiscriminatory, work in favor of established domestic brands which are already familiar to Japanese consumers and against new foreign brands attempting to achieve market recognition.

Consequently, the passage by the Japanese Diet of legislation to privatize JTS represents a potentially significant market opening measure. Once implemented, the new measures will end the Japanese Government monopoly on distribution, enable U.S. firms to set prices independently of government direction (although prices will be subject to approval by the Ministry of Finance), and continue the expansion of the number of retail outlets permitted to handle tobacco products.

The actual market opening effect of this legislation will depend very heavily on the manner in which it is implemented, however. A significant U.S. concern is that the price approval process be truly transparent, essentially automatic, and neither arbitrary nor discriminatory. The U.S. Government will be following the implementation of these measures very closely.

The revision of the excise tax on cigarettes from a wholly ad valorem tax to one with a specific tax component is also a positive step. Although U.S. exporters would prefer that the excise tax be wholly specific, in order to eliminate the "tax on tax" effect in which the impact of the tariff is compounded by the excise tax, revision of the excise tax to include a specific component should enable a reduction in the retail price of imported cigarettes.

The statement in the April package that importers will be free to choose their own retailers is a response to a long-standing U.S. request. Although such retailers will have to be chosen from those licensed to sell tobacco products, criteria for new retailers to obtain licenses appear to be reasonable.

With an independent distribution system and fair price competition, the U.S. industry has estimated that it could increase its share of the $10 billion Japanese tobacco market from its current 1.8 percent share to a share of 20 percent.

TELECOMMUNICATIONS MARKET LIBERALIZATION

I. Japanese market opening commitments

Trade Initiative of April 27, 1984

Reference was made to two bills pending in the Japanese Diet, the Telecommunications Business Bill and the Nippon Telegraph and Telephone Company Bill.

The Telecommunications Business Bill is "designed to introduce the idea of competition into the telecommunications market," which is currently dominated by Nippon

Telegraph and Telephone Public Corporation (NTT), a government-owned monopoly. Under the provisions of the bill, there are to be no restrictions on foreign investment in "Class II" telecommunications enterprises. (Class II enterprises are defined in the bill as those firms that lease telecommunications lines, rather than owning their own lines.) The Japanese Government made a commitment to ensure that, once the bill is passed, registration and notification procedures for Class II businesses will be simple and transparent. Implementation of the legislation will be reviewed within three years.

The Nippon Telegraph and Telephone Company bill will transform NTT into a private company. The Japanese Government made a commitment to ensure that competition between the privatized NTT and other telecommunications firms is fair.

II. Implementation of commitments

Both telecommunications bills are still pending in the Diet. The legislation is expected to pass the Diet in December 1984, and to become effective on April 1, 1985.

III. Applicability to U.S. interests

Until now, Japan's telecommunications services market has been closed to foreign firms due to the presence of NTT. In addition, imports have played a very small role in Japan's telecommunications equipment market, accounting for only 1.4% of consumption in 1983. Japan is the second largest national market in the world for telecommunications equipment, accounting for approximately 9% of world consumption and 11% of world production. NTT also accounts for the low level of import penetration in the telecommunications equipment market, as NTT's procurement comprises 40% of the market.

Passage of the telecommunications market liberalization bills could open up significant new opportunities in the Japanese market for U.S. exporters and investors. The real value of market liberalization, however, will depend very heavily on the manner in which implementing ordinances are framed and administered. U.S. Government officials are monitoring the progress of this legislation closely. Among the factors that will have an important effect on the ability of U.S. firms to compete in the Japanese telecommunications market are:

Registration and notification procedures:

Procedures which are transparent, objective, and non-discriminatory. Confidentiality for business plans submitted for registration purposes. Timely processing of applications.

Cross-subsidization between services:

Accounting procedures which prevent firms operating basic telecommunications services (such as NTT) from using fees from such services to subsidize rates for services in which they face foreign competition.

Standards:

Non-discriminatory testing procedures for certification of telecommunications equipment.

Passage of Japanese telecommunications liberalization, if implemented in a manner which permits foreign firms to compete on an equal basis in the Japanese market, could significantly expand market opportunities in two areas. First, it should expand opportunities for U.S. investors in Japan's telecommunications services market. Second, it should increase competition in Japan's telecommunications equipment market, thus creating new opportunities for U.S. telecommunications equipment producers.

NTT PROCUREMENT

I. Japanese market opening commitments

Trade Initiative of January 13, 1983

"[A]s part of the continued sincere implementation of internationally non-discriminatory and competitive procurement procedures, measures will continue to be actively taken to publicize information concerning the procedures and other aspects of procurement and to respond readily to those foreign companies wishing to participate in the NTT procurement, so as to facilitate their participation."

II. Implementation of commitments

NTT has fully implemented the technical and procedural requirements of the NTT Agreement. They have also taken a number of measures to help U.S. firms' sales efforts, such as holding seminars in Tokyo and several U.S. cities on how to sell to NTT. Sales by U.S. firms to NTT have increased from $15 million in 1981 to $140 million in 1983. However, the U.S. Government believes that U.S. firms can, and should, do considerably better.

III. Applicability to U.S. interests

During the first three-year agreement opening NTT procurement to foreign firms, which expired in December 1983, sales by U.S. firms to NTT increased from a negligible level in 1980 to about $140 million in 1983. But despite the sharp growth, 1983 sales accounted for only 4.5 percent of total NTT procurement. Moreover, little of what NTT has purchased from American firms has been high technology equipment of the type that is central to the telecommunications network and likely to promote the development of long-term relationships with American suppliers.

Nevertheless, given the importance of being able to compete for a share of the Japanese telecommunications market, which is the second largest in the world, the U.S. Government negotiated a renewal of the Agreement in 1983. The new three-year agreement, signed on January 30, 1984 by Ambassador Brock and Foreign Minister Abe, is one that we expect will enable our highly competitive firms in this field to make inroads into sales of sophisticated network-related equipment to NTT over both the short and long term.

The revised agreement reaffirms Japan's commitment to open NTT's sizable purchases to U.S. exporters, while strengthening that commitment in a number of ways. Among the improvements incorporated into the revised agreement are commitments by NTT to: treat U.S. and Japanese firms on an equal basis in all of NTT's R&D activities; accept bids in English at NTT's New York office; and aggregate purchases so as to make them commercially attractive to foreign suppliers. The new agreement also mandates annual reviews of NTT's performance in implementing its commitments. The key criteria that the United States will be looking for in the review are:

(1) significant and increasing sales volume and value;

(2) purchases of sophisticated core network equipment; and

(3) purchases of equipment of the type that will lead to long-term supplier relationships.

In addition, the U.S. Government will closely monitor the implementation of pending legislation to liberalize Japan's telecommunications market. Passage of this legislation could have two effects on NTT procurement from U.S. firms. First, changes in the legal status of NTT could affect the procurement agreement. The United States will continue to consult closely with the Government of Japan to ensure that this does not occur. Second, liberalization of Japan's telecommunications market should introduce an element of competition which should create a strong incentive for NTT to purchase equipment from the most competitive sources, regardless of nationality. With competitive procurement procedures, U.S. firms should be able to improve the volume of their sales to NTT.

GOVERNMENT PROCUREMENT

I. Japanese market opening commitments

Trade Initiative of October 21, 1983

"In line with the spirit of the Agreement on Government Procurement and from the viewpoint of continuing to ensure non-discrimination between nationals and non-nationals, even further efforts will be made to put the purport of the Agreement into practice (promotion of procurement through competitive tendering procedures, facilitation of the procedures for the qualification of suppliers, etc.). The attention of local governments will be drawn to the spirit of the Agreement."

II. Implementation of commitments

We have seen no evidence of action to open the government procurement market in Japan to foreign products through increased use of competitive procurement procedures. Japanese Government agencies continue to make extensive use of non-competitive procurement procedures.

III. Applicability to U.S. interests

The U.S. Government has been seeking an explanation from Japan on the extensive use by a number of Japanese Government agencies of the Government Procurement Code's exception for single-tendering. We are working to resolve bilateral government procurement issues within the context of the GATT Government Procurement Code.

LIT PROCUREMENT

I. Japanese market opening commitments

Trade Initiative of April 27, 1984

The Government of Japan stipulated that, once telecommunications legislation passed the Diet, private firms will be able to purchase foreign-made communications satellites. In addition, a privatized NTT will be permitted to purchase foreign-made satellites, but only to the extent such purchases are "consistent with the space development policy." Similar conditions were applied to procurement of foreign satellites by other Japanese Government agencies.

II. Implementation of commitments

Implementation of the commitment to permit private firms to purchase foreign satellites is dependent upon passage of the pending legislation to liberalize Japan's telecommunications market. The vague wording of the conditions under which Japanese Government agencies will be permitted to purchase foreign satellites raises concerns regarding the practical effect which this statement will have in promoting actual purchases of foreign satellites.

III. Applicability to U.S. interests

The "Long-Range Vision on Space Development," published in July 1983, expresses concern over Japan's past reliance on U.S. space technology, and states that, "in the future, Japan should aim at receiving orders from other countries for developing and launching satellites by means of techniques which have been accumulated by her independent technical development." Thus,

Japan has identified the space industry not only as necessary in order to keep Japan in the forefront of technology, but as an important potential export industry.

In July 1984, the head of the Japanese Government agency in charge of the space development policy, the Science and Technology Agency, was quoted in the Japan Times as saying that Japan must develop its own space technology because equipment purchased from Europe and the United States is unreliable. Director-General Michiyuki Isurugi said that, by the end of the century the Japanese Government plans to send about 50 satellites into orbit, "none of which will be purchased from other nations."

MITI officials have informed the United States that Director-General Isurugi's statement does not reflect any Japanese Government consensus. However, in light of Japan's policy of self-sufficiency in satellite development, Director-General Isurugi's statement raises concerns that the April 1984 statement will not result in any improvement in market access for U.S. satellite producers.

It is for this reason that the United States is continuing to seek clarification of Japan's satellite procurement policy. Although the U.S. Government has officially requested clarification of the statement in the April 1984 trade initiative, the Japanese Government has not yet responded. The vague wording of the April policy pronouncement raises concerns that NTT and other Japanese Government agencies are committed to purchase of Japanese satellites through at least the mid-1990s.

Japan's satellite procurement policy creates two concerns for the United States. First, it denies competitive U.S. producers access to a potentially major commercial market. Second, it presents the threat of the creation of potential domestic and third country competitors behind a wall of infant industry protection, through subsidized research and development and preferential government procurement policies.

SOFTWARE PROTECTION

I. Japanese market opening commitments

Trade Initiative of April 27, 1984

The Japanese Government made a commitment not to send any proposal for new legislation affecting software protection to the current session of the Diet. However, the Japanese Government reiterated its intention to develop new modes of software protection, while "noting the need for international harmony."

II. Implementation of commitments

At present, the rights of computer software developers in Japan are adequately protected by Japanese copyright laws. A proposal to change the basis for the legal protection of software remains under consideration within the Japanese Government.

III. Applicability to U.S. interests

Adequate protection of computer software is of profound importance to the competitive and financial positions of U.S. companies in the world information industry. The United States believes that only legislation which would base computer software protection on Japanese copyright laws, can adequately protect the rights of computer software program developers.

Legislation under consideration within the Japanese Government would establish a sui generis form of protection for computer software, based on patent concepts. This proposal raises issues of substantial concern to the United States.

First, the United States is firmly committed to the protection of software as a work of authorship under copyright norms. The proposed legislation would undercut the fragile international consensus on this issue, and provide the developing countries with support for proposals that would sharply curtail the rights of software program developers. The United States would probably consider any legislation to remove computer software from copyright protection a violation of Japan's international obligations under the Universal Copyright and Berne Conventions.

Second, the specifics of the proposal greatly diminish protection for software developers.

1. *Compulsory systems*: The Japanese Government, upon request, would have the authority to grant a compulsory license. Licensees could then distribute programs to users at minimal expense. As a result, software developers would lose control over the distribution of their programs and be unable to recover development costs. Japanese Government assertions that developers would receive fair compensation do not assuage U.S. concerns.

2. *Reduced protection period*: Under current Japanese copyright law, the term is 50 years following the death of the copyright holder. The proposal would shorten the term of protection to two to fifteen years. U.S. copyright laws covering software extend protection for 50 to 100 years.

3. *Registration*: The proposal would require the registration of software, which would entail submission of actual programs by their developers. The United States is concerned that confidentiality would not be preserved.

The United States has made it clear to the Japanese Government that passage of a bill removing computer software from copyright protection would disrupt bilateral trade in high technology. Passage of such legislation could have the following effects:

The United States would consider instituting the "role of the shorter term," reducing the protection available to Japanese computer software developers in the United States.

U.S. computer suppliers would consider curtailing the software support which they provide to Japanese customers.

U.S. companies could cease computer software development activities in Japan.

Imports of Japanese products embodying disputed software could be enmeshed in a web of private lawsuits.

To the extent that such an action undermined the international consensus in support of copyright protection for computer software, Japanese and U.S. firms could find their software subject to reduced protection in developing countries.

DIRECT INVESTMENT

I. Japanese market opening commitments

Trade Initiative of October 21, 1983

This initiative included a Japanese Government commitment to undertake measures to encourage capital inflow. Specifically, the Japanese Government promised a review of the "designated company system." This system consisted of foreign ownership limitations in eleven specific Japanese industries.

This commitment was followed in November by a joint statement of Japanese Foreign Minister Takeshita and Treasury Secretary Regan, in which the Japanese Government made a commitment to submit a bill to the Diet to reform the designated company system.

Trade Initiative of April 27, 1984

This initiative included a commitment to four specific steps to promote international investment:

(1) an improved system of information dissemination under the Japan External Trade Organization (JETRO) "Headquarters for Promotion of Industrial Cooperation;"

(2) strengthening the Office of Trade Ombudsman (OTO) to deal with investment as well as trade complaints;

(3) support for investment promotion missions; and

(4) procedural improvements to further expedite the notification processing period for foreign direct investment in Japan.

In addition, the Japanese Government indicated it would introduce legislation to remove foreign ownership restrictions in value-added network telecommunications services (VANS) enterprises.

The commitments in this initiative were followed by a Ministry of Finance announcement in the May 29 "Yen-Dollar Report" of a new policy that will allow licensed foreign banks to participate in trust banking in Japan by either establishing their own trust banks or entering into joint venture with Japanese trust banks. However, partnerships with non-licensed Japanese firms (e.g., securities firms) are not permitted.

II. Implementation of commitments

On May 18, 1984 the Diet passed a bill eliminating the designated company system.

On VANS, the Japanese Government has introduced several telecommunications reform bills to the diet which would permit foreign ownership of most VANS enterprises The bills are expected to pass later this year. Implementing regulations for telecommunications services are expected to be in place by the spring of 1985.

JETRO has established the Headquarters for Promotion of Industrial Cooperation. This group held its first meeting on July 5, 1984 and is currently in the process of determining methods of improving information dissemination activities.

The OTO's mandate has been expanded to include investment complaints. The Japanese Government's support for investment promotion missions has traditionally been very good and is expected to continue.

Implementing regulations permitting foreign participation in trust banking are expected to be in place by the spring of 1985.

The Japanese Government has stated that the processing period under their investment notification system will not, in practice, exceed two weeks. In addition, Japanese officials have indicated that the Japanese Foreign Investment Council will meet to consider further shortening of the time period.

III. Applicability to U.S. interests

The U.S. goal has been to facilitate greater bilateral investment flows with Japan in accord with market forces. In particular, the United States has sought to reduce government barriers to investment and to improve administrative procedures governing new and established investment.

Over the past year the Japanese have eliminated the designated company system and allowed for foreign entry into telecommunication services and trust banking as of 1985. In addition, the Japanese Government has taken steps to promote increased foreign investment in Japan, although it still maintains a two-week pre-notification system for foreign investment.

The U.S. Government believes that the following additional steps by the Japanese Government would encourage additional bilateral investment:

Issuing a joint investment policy statement with the United States at an appropriate time;

Sponsoring a private sector review of U.S. and Japanese investment climates;

Considering methods of reconciling U.S. and Japanese bilateral investment statistics; and

Further bilateral discussions focused on standards for treatment of established investors in both the United States and Japan.

Further U.S. direct investment in Japan should serve to improve U.S. exports to Japan. In addition, continued bilateral discussions, encouraging greater Japanese investment in the United States, should result in such benefits as job creation and technology transfer. The U.S. objective in these discussions is to reinforce our general commitment to foreign investment based on market forces.

LEGAL SERVICES

I. Japanese market opening commitments

Trade Initiative of April 27, 1984

The Japanese Government noted that the Japan Federation of Bar Associations (JFBA) is "making further efforts to come to a domestically and internationally appropriate solution" on the question of foreign lawyers' activities in Japan. The government made a commitment to "work to have an appropriate solution materialize as early as possible."

II. Implementation of commitments

There has been little progress since the April announcement. The Japanese Government has placed particular significance on the formation of a Special Committee on Foreign Lawyers by the JFBA, and noted that this committee was working for an appropriate solution. The Japanese Government has yet to inform us of the Committee's recommendations.

III. Applicability to U.S. interests

American attorneys have been prohibited from giving advice on U.S. and international law to clients in Japan since 1955. Over the past thirty years, demand for U.S. legal talent in Tokyo (as evidenced by the hiring of U.S. lawyers as "legal trainees" by Japanese law firms) has grown dramatically, with the increasing internationalization of Japanese capital markets and Japanese corporations. In discussions with Japanese officials, the U.S. objective has been to make it legal for U.S. law firms to provide advice in Japan on U.S. and international law.

Japanese law and the JFBA rules on practice of law prohibit attorneys who are not members of the Japanese bar from acting as lawyers (giving any legal advice in any field of law) in Japan. The efforts of the Japanese Government on this issue have not produced changes in JFBA rules so far.

The JFBA appears to have realized that it will not be able to maintain its current, restrictive rules indefinitely. Japanese officials have informed us that negotiations are now underway within the JFBA over language for a potential amendment to the Lawyers' Law. An agreement is possible by fall. Should such an agreement be reached, the amendments could be submitted for Diet approval in the spring.

The major U.S. concern regarding the proposed changes is that they are likely to include a reciprocity clause. Such a clause would make access to the Japanese market in legal services conditional on access for Japanese lawyers to practice in some minimum number of U.S. States. Currently, only New York and Massachusetts have provisions permitting foreign lawyers to practice law on a limited basis without passing the bar examination. The Japanese would also like to obtain such provisions in the District of Columbia, Illinois and California. Japanese lawyers already have access to these states, since they are already permitted to take the bar examinations and they would become eligible to practice upon passing the exam. This option is essentially closed to any foreigner in Japan. Admission to the Japanese bar is contingent upon admission to the Legal Research Institute, which admits only the four hundred or so applicants with the highest scores on its admission examination out of the thousands who take the test each year. Foreign applicants, obviously, have virtually no reasonable expectation of being admitted to the bar under such a system. In light of these facts, the United States does not consider a reciprocity provision appropriate.

ENERGY

I. Japanese market opening commitments

Trade Initiative of April 27, 1984

In the April 1984 package, the Japanese undertook to follow up on the Reagan-Nakasone Joint Statement on Energy Cooperation, issued in November 1983. Specifically, the Japanese promised to send a private sector coal mission to the U.S. and to encourage feasibility studies on energy resource development, a more limited agenda than set forth in the Joint Statement.

Implementation: The private coal mission visited Washington in May but was discouraging regarding early opportunities for increased coal exports to Japan. The discussions, however, resulted in the establishment of a private Standing Technical Committee (STC) to explore ways to implement the Joint Statement. This committee met in Tokyo for the first time in September. The Japanese were no more encouraging than in May, but the talks will continue. On a positive note, Japanese and U.S. companies have recently announced plans for prefeasibility studies on the possible development of Alaskan coal and North Slope natural gas to export to Japan.

Applicability to U.S. Interests: We hope these discussions and studies, primarily a result of the Reagan-Nakasone Joint Statement, will lead to expanded U.S. energy exports to Japan. While the prospects are not favorable in the short term, it is important to continue this process for the medium and long term.

The November 1983 Joint Statement gives the governments of both countries a clear framework in which to encourage their respective private sectors to find ways to increase energy trade. It calls on the private sectors of both countries to explore joint development of U.S. energy resources and possible steps to increase use of secure U.S. fuels as a subsititute for less secure oil imports. We created forums where governments and private businesses can talk frankly, and the talks have been frank, especially on coal. U.S.-Japan coal trade has stagnated and the U.S. remains the swing coal supplier to Japan. This problem will require sustained high-level attention by both governments. Still, however, without the Joint Statement and the U.S.-Japan Energy Working Group, U.S.-Japan coal trade might well have declined even more severely than has been the case. We have kept U.S., coal and gas in Japan's energy picture and given U.S. suppliers a better chance to compete for a larger piece of the Japanese energy market in the years ahead.

IMPORT PROMOTION MEASURES

I. Japanese market opening commitments

Trade Initiative of January 10, 1982

The Japanese Government announced the establishment of an Office of Trade Ombudsman (OTO), with a mandate to respond to foreign complaints of inadequate access to the Japanese market. Commitment made that there would be no delays and that action would be forthcoming.

Trade Initiative of May 28, 1982

While continuing to use the OTO to respond to foreign complaints, the Japanese Government will explore ways to improve it.

The Committee for Manufactured Goods Import Measures will investigate specific problems which arise from the distribution system and business practices and take steps to correct them where possible.

Japan will continue to implement the foreign currency lending scheme for emergency imports aimed at promoting imports of "important" goods to ease trade frictions.

Under the Commerce Promotion System to be established, such organizations as JETRO and the Japan Trade Council will maintain a roster of private business consultants to whom foreign exporters can be referred, as necessary, for advice on exporting to Japan.

Trade Initiative of January 13, 1983

To strengthen the role of OTO in resolving foreign trade complaints, a high-level Advisory Council will be established to give it more political clout, filing of proxy complaints will be permitted, and procedures for processing complaints will be improved.

Further efforts to expand imports of manufactures will be made in the light of information developed by the Committee for Manufactured Goods Import Measures, including foreign comments about shortfalls in the Japanese distribution system and its business practices.

Greater use of the business consultant service system will be made to resolve trade differences.

The Japanese Government will lend its support to the Import Promotion Council of the Japan Foreign Trade Council in its efforts to encourage private sector initiatives to promote increased imports.

Trade Initiative of October 21, 1983

Further efforts will be made to enhance the effectiveness of OTO in removing barriers to selling in Japan.

Low interest financing of manufactured imports will become available from the Japan Export-Import Bank and other steps to facilitate import financing will be considered as needed.

Information about the Japanese distribution system will be publicized, and efforts made to improve the system for imports.

The Japanese Government will designate an import promotion month, send import promotion missions abroad, and encourage import promotion efforts by exporters.

Trade Initiative of April 27, 1984

To promote imports of manufactures, the Japanese Government will implement programs which assist in penetrating the Japanese market for specific foreign manufactured goods, and support the staging of exhibits for these products.

II. Implementation of commitments

Office of Trade Ombudsman: The effect of subsequent procedural changes in increasing the effectiveness of OTO has been questionable, since changes have not changed OTO's status; OTO still functions as a clearing-house, and not as a true ombudsman, that is, with the authority to resolve problems by overruling decisions made within individual ministries. In 1984, the mandate of the OTO was expanded to cover investment issues.

Manufactured Imports Promotion Committee: The Committee has not been given a broad mandate to consider private sector trade barriers, e.g., buy national attitudes, as envisioned in the May 1982 initiative.

System of Business Consultants: The system has been implemented, in accordance with the commitment in the May 1983 initiative. The consultants are based on Japanese trading company offices in New York, Chicago, Houston, Los Angeles and San Francisco. However, JETRO has declined to provide the names of these consultants to U.S. Government officials, stating that JETRO wished to pre-screen to the U.S. companies seeking the consultants' services.

Import Promotion Missions: The Japanese Government has conducted a number of seminars and trade missions in the United States. Over the past year, these have included: a JETRO-sponsored medical import promotion visit to Los Angeles, Houston, Chicago and New York; a JETRO-sponsored U.S. States Trade Fair in Tokyo; a seminar on U.S.-Japan trade problems in New York; a U.S.-Japan trade seminar in Birmingham, Alabama; and a Trade Week seminar in San Francisco.

III. Applicability to U.S. interests

The recommendation for the creation of an Office of Trade Ombudsman was originally included in a 1981 Japan-U.S. Economic Relations Group Report. The report recommended that this office not be attached to any single government ministry, but have the authority to intervene in the administrative processes of all ministries dealing with trade and investment issues and to review policy decisions having trade significance made by domestically-oriented ministries.

While OTO has been a valuable tool in tracing trade problems to their roots, it is basically a clearing-house, receiving complaints and channeling them to the relevant ministries, and then reporting the results of the ministries' investigation to the complainant. OTO's impact could be improved if it could exert pressure on the ministries to revise their regulations and practices to facilitate imports. Moreover it does not provide an effective mechanism for appealing rulings that do not provide relief to the complainant. The U.S. would like to see OTO function as an active problem solving entity with an effective system for appealing adverse rulings.

The system of business consultants was established at Japanese Government initiative, rather than in response to a U.S. request. As such, it exceeds U.S. objectives and expectations.

Japanese Government sponsored trade missions, studies of the Japanese distribution system, and high-level statements encouraging the purchase of goods manufactured abroad, while welcome, are difficult to evaluate as effective market opening measures, because they have never been accompanied by any yardsticks with which to evaluate their success.

APPENDIX: JAPANESE "COMPREHENSIVE ECONOMIC MEASURES"

The Japanese Government has announced five broad sets of market liberalizing measures over the past four years. These measures were meant to fulfill Japan's commitment to a market open to international trade.

Trade initiative of December 16, 1981, and January 10, 1982

The first trade initiative, announced in December 1981, accelerated the timing of traffic cuts agreed to in the Multilateral Tariff Negotiations, and established a Japanese Government committee to study opportunities for imports in the Japanese market. One of the results of this group's work was the announcement in January 1982 of a list of measures which would be implemented to alleviate non-tariff barriers in the standards and customs areas. In January, the Japanese Government also announced the establishment of an Office of Trade Ombudsman, which would be charged with responding to foreign complaints regarding barriers to market entry.

Trade initiative of May 28, 1982

The second trade initiative included tariff eliminations or reductions on a wide variety of products, among which those on photographic film, cut diamonds and several others were of interest to the United States. It also contained a commitment by the Japanese Government to undertake a series of "generic" remedies in such areas as customs procedures, and foreign access to participation in the formulation of industry standards.

Trade initiative of December 25, 1982, and January 13, 1983

The third trade initiative was announced by the Government of Japan in December 1982 and January 1983. In December, tariff reductions were announced on chocolate, tobacco products and paper. In January, the Japanese Government announced a commitment to undertake a high-level review of Japanese standards and certification procedures. This review eventually led to the passage of some sixteen laws which, as they are implemented at the administrative level, could represent the most significant and wide-ranging removal of foreign barriers to the Japanese market since the conclusion of the Multilateral Trade Negotiations in 1979.

Also included in the January announcement were commitments to expand the number of retail outlets permitted to distribute foreign cigarettes, undertake a study of the possible liberalization of Japan's distribution system for tobacco products, and ensure the participation of foreign firms in NTT procurement.

Trade Initiative of October 21, 1983

The fourth trade initiative included tariff reductions on 44 items. Also included was a one-year acceleration of rates committed to in the Multilateral Trade Negotiations on some 1200 items.

The October announcement also promised "steady implementation" of improvements in Japanese standards and certification procedures, further efforts to promote procurement by Japanese Government agencies from foreign firms, and a review of the "designated company" system, which limited foreign investment in eleven Japanese industries.

Trade Initiative of April 27, 1984

This initiative included cuts on sixty-five tariff classifications covering wine, paper products, color photo paper, black-and-white film, hay balers and a wide range of agricultural products. Also included was a commitment to eliminate or liberalize quotas on thirteen agricultural categories.

The statement referred to pending legislation to liberalize the Japanese tobacco and telecommunications markets. Statements in the initiative also promised improvements in standards and certification procedures. Other commitments included in the April initiative were an expansion of the mandate of the Office of Trade Ombudsman to cover investment restrictions, and Japanese Government efforts to resolve legal services issues. Also included in the April announcement were a policy statement covering procurement by Japanese Government agencies and NTT of foreign satellites, and a commitment to postpone the introduction into the on-going Diet of a proposal to remove computer software from copyright protection.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan [Mr. KILDEE].

Mr. KILDEE. Mr. Speaker, I rise in support of House Concurrent Resolution 107, a resolution submitted by the House Committee on Ways and Means which expresses the sense of the Congress that the President take action to reduce the growing U.S. merchandise trade deficit and that he take action to respond to unfair international trade practices of Japan. However, I do so with some reluctance. I would have preferred much stronger action by the House of Representatives on this issue. I would have preferred action on the resolution offered today by Representative DINGELL and BROOMFIELD, of which I was a cosponsor; or action similar to that which the Senate took last week when it passed S. 774, a resolution which called on the President to recommend legislative changes in the trade policy of the United States with respect to Japan, including denial of most favored nation treatment, should the Japanese Government persist in its unfair trade practices. Instead, this resolution, while it does express our grave concern about Japan's predatory trade practices, merely calls on the President to work within existing, inadequate U.S. trade laws.

Several weeks ago the President announced that there would be no request on the part of the United States for an extension of the voluntary restraints on the shipment of Japanese automobiles into the United States. That announcement came immediately following the release of the trade statistics for 1984. The 1984 trade numbers showed that the United States ran a bilateral deficit with Japan of approximately $37 billion. The estimates of the effect of limiting the voluntary restraints on automobile imports are that this will mean an increased level of Japanese auto sales in the United States of somewhere between $4 billion on up.

Mr. Speaker, for years, the United States has attempted to practice so-

called free-trade policies while Japan has played by a different set of rules. The result of this has been an overall trade deficit of $123 billion in 1984—a deficit which would well exceed $170 billion by the end of 1985. In the case of Japan, the United States trade deficit has grown from $10 billion in 1980 to $37 billion in 1984.

The United States opens its doors wide; the Japanese barely crack theirs. The U.S. automotive trade deficit since 1981 has more than doubled—from $11 billion to $27 billion. The trade deficit in telecommunications equipment has grown from $516 million in 1979 to $1.9 billion in 1984. Japan's barriers to other U.S. exports such as pharmaceuticals, medical equipment, wood products, agriculture produce, and other good and services have become intolerable.

Our negotiators in the Office of the U.S. Trade Representative have knocked on every door, met with every official, and used every argument and means of friendly persuasion in the effort to open the Japanese market to our exports. First, we were told that U.S. companies just were not competitive. Then it was a question of changing the regulations and turning the Japanese economy more toward private sector control. And as these excuses have worn themselves out, we are now informed that, despite Prime Minister Nakasone's best efforts, the career bureaucrats who run the Japanese Government just listen politely and then ignore instructions of their political superiors.

Mr. Speaker, this Congress and the American people can no longer tolerate lame excuses from the Japanese Government.

No nation has contributed more to our trade deficit than has Japan. And few U.S. industries have been harder hit by foreign imports than has our domestic automobile industry. Of the $37 billion trade deficit we had with Japan last year, Japanese automotive products caused over half. Japan exported more than 1.9 million cars into the United States last year while we exported less than 4,000 of our autos to Japan.

Mr. Speaker, I will support the resolution offered by the Ways and Means Committee. But I cannot help but feel it is not a strong enough statement to the Japanese Government of our intolerance for their unfair use of our market. In the coming months, I hope this body will take up stronger legislation, such as H.R. 1050, the Made in America Act introduced by Representative JOHN DINGELL and cosponsored by 45 of our colleagues. Instead of relying on voluntary actions by the U.S. President or the Government of Japan, this legislation would legally limit foreign auto imports to a fixed, reduced percentage of the domestic market.

I hope my colleagues will join with me and, in the coming weeks, support more far-reaching legislation. This matter is urgent. The time has come for the United States to take more decisive action on the U.S. trade deficit with Japan.

□ 1910

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey [Mr. FLORIO].

Mr. FLORIO. Mr. Speaker, I rise in support of the resolution and commend the chairman of the committee for bringing this important matter to the floor.

Our trade problems have gone from bad to worse. For the third straight year, our trade deficit has reached a recordbreaking high. Last year's $123 billion deficit is expected to be topped this year by a deficit that will exceed $150 billion.

The greatly overvalued dollar has made foreign imports too cheap for Americans to resist. As a result, foreign firms have captured large shares of even those domestic markets in which American companies are highly competitive: Telecommunications pharmaceuticals, medical equipment and machinery, aircraft equipment, and a growing list of others.

But, another equally important cause of our trade decline is the fact that many foreign markets remain closed to U.S. goods and services. As a result, U.S. exports have increased only marginally while imports have risen much more sharply.

This imbalance in trade opportunities has become so severe that industries in which American companies have a comparative advantage cannot penetrate many world markets. On the other hand, industries in which foreign firms have a comparative advantage have won a large share of our domestic markets.

This imbalance is fundamentally unfair, and, if allowed to persist, will destroy the competitiveness of even our most technologically advanced industries. Telecommunications is one such industry that is of great concern to me and my committee.

Strong action must be taken against foreign firms in our market, if we are to convince our trade partners that we are serious when we demand open access and meaningful market opportunities for telecommunications and other American industries. Under legislation my committee developed last year, the President was given important new authorities to take action against any foreign firms, including foreign telecommunications firms. It is now time for the President to use these and other powers to retaliate against Japan and other countries for their unfair trade practices against our companies.

In the past, the President has often complained that such retaliation would start a trade war and destroy our free trade system. To this I say, there is no free trade in too many sectors of world today.

Thus, failure to retaliate does not preserve free trade. Instead, it lets our trade partners believe they can continue to discriminate against our firms without suffering any penalty for their action.

Until our trade partners become convinced of the seriousness of our resolve, our trade deficit, and our economic fortune with it, will continue to decline. By adopting this resolution today, we take perhaps that first important step in demonstrating the strength of our will in the trade area.

I urge my colleagues to vote for this resolution.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Ohio [Ms. KAPTUR].

Ms. KAPTUR. Mr. Speaker, I rise in strong support of House Concurrent Resolution 107 which expresses the sense of the Congress that the President take action to reduce unfair Japanese trade practices.

The U.S. merchandise trade deficit with the world has reached historic heights, over $123 billion in 1984. One-third of that total deficit is solely with Japan and exceeded $37 billion in 1984, with motor vehicles alone exceeding $19 billion. In fact, between 1983 and 1984, there was a 7-percent increase in the trade deficit with Japan.

The trade deficit with Japan has continued to grow progressively regardless of fluctuations in the yen-dollar exchange rate over the same period. At the same time, Japanese markets, as well as those of certain other nations, have remained restricted to many U.S. products in key merchandise areas.

The economy of this Nation is seriously jeopardized by the continued deepening of this imbalance in international trade and its implication for further job losses in the United States. It is estimated 3 million jobs in the United States have been lost since 1981 due to the trade deficit.

Because of the particular severity of our trade imbalance with Japan, and its implications for retention of key manufactures in the United States, immediate attention should be given to the causes of, and the means for redressing, that imbalance, especially in view of the fact that although the President recently lifted and the voluntary restraints on motor vehicles, the Japanese gave no commensurate concessions with respect to the closure of their markets to American telecommuncations, steel, textiles, agriculture, timber, finished wood, pharmaceuti-

cals, medical equipment, and financial services. In fact, the Japanese Government has already announced it would increase its auto exports by 25 percent more in 1985, bringing just the Japanese U.S. market share in automobiles to over 25 percent of the entire U.S. auto market.

Though Congress must take strong additional steps to bring back fair trade, this resolution calls on the President who has sufficient authority to undertake immediate action and use his full authority to do so.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. GIBBONS].

Mr. GIBBONS. Mr. Speaker, this resolution tells it like it is, and it is not a good message. Our problems are deep, and they must be solved; and perhaps this resolution is the beginning of it.

Yes, we have trade problems with Japan; yes, the Japanese market is not as open as we would like it to be; if it were fully open, we would eliminate some of our trade deficit.

And if other markets were fully open, we would eliminate some of our trade deficit. But the real problem, the real problem that this resolution talks about, is our economic policy. Our economic policy is a disaster. It is rapidly decapitalizing the farms and factories of America. You cannot run the kind of fiscal deficit that we are running in this country and expect anything to happen other than what is happening today.

Our dollar is not overvalued; it is just highly inflated. We are drawing in money from all over the world to pay for the interest on our national debt. We are living on borrowed capital. We are really enjoying ourselves. It is a serious problem, and unless we face up to that, flailing a foreigner is not going to do anything to cure the basic problems of America. I do not condone for 1 minute the tactics that I find our Japanese trading partners following as far as closing their markets is concerned. But let us not kid ourselves: If they open their markets wide open, it would not solve the American problem. It would help, but it would not solve it. That is our serious problem.

There are some other serious problems.

We need to reexamine the General Agreement on Tariffs and Trade and look at some of the basic provisions that we agreed to in 1947. The world has changed fundamentally since then.

At that time, we were trying to save Europe and Japan from communism. We did. We granted them major concessions, and I believe it may be time to reexamine some of those concessions.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN] for a unanimous consent request.

Mr. GLICKMAN. Mr. Speaker, I ask unanimous consent that in the matter just preceding, in H.R. 1869, the following statement be inserted at the appropriate place in the committee report thereon:

We feel the IRS regulations may not reflect reasonable valuations both in the case of personal use of business aircraft and in the case of "empty seat" travel on business flights. Among other factors, these valuations may need to be adjusted to take into account differences in fares on commercial airlines on high-density as compared to low-density routes and the fact that for many routes on which business aircraft travel, there are no comparable commercial air fares. As a result, SIFL may not accurately reflect the realities of various markets.

Likewise, the present valuation scheme may fail to take into account the wide variations in types of business aircraft and the nature of the travel they provide.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, the gentleman read a statement that purported to be the feelings of the committee on which the committee has taken no action nor come to any conclusion.

The SPEAKER pro tempore. The Chair would state to the gentleman from Minnesota that the gentleman [Mr. GLICKMAN] may extend his remarks, but he should not ask to amend the committee report.

Mr. FRENZEL. I thank the Chair.

Mr. Speaker, I withdraw my reservations of objection.

PARLIAMENTARY INQUIRY

Mr. GLICKMAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GLICKMAN. Mr. Speaker, I do not understand the ruling of the Chair.

The purpose of my remarks was to attempt to amend the committee report of the prior bill that was just passed.

The SPEAKER pro tempore. The gentleman may make the statement as far as the debate, but the House should not change the committee report.

Mr. GLICKMAN. I appreciate the ruling of the Chair.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. GAYDOS].

Mr. GAYDOS. I want to thank the chairman. At the outset I want to express my feeling on this matter that I will support the resolution but do it most reluctantly. The reason for that reluctant support is the fact that in the resolution again we are practicing self-flagellation, as usual, and that is making reference to the strong dollar and the fiscal deficit of this country.

I want to remind my colleagues, and I respond primarily to the gentleman from Minnesota when he made mention of the other body's resolution, I read that resolution and that resolution is concise, to the point, and does not mince any words.

Our resolution, which I will support, is all over the lot. It talks about so many different reasons.

Again it practices and places, primarily, the responsibility for the problem that we have on this country.

I want to point out to my colleagues it is not this country which in the past and at present has been accused and found guilty internationally of dumping or subsidizing. That has never happened to this country, either in an international court or a court in this country, although we find example after example of all the countries, particularly Japan and the common bloc countries and Brazil and Taiwan and South Korea, all of them at one time or another found guilty of dumping or found guilty of other infraction of the international agreement on trade which we call the tariff business.

Now I point this out: If we are going to talk about passing a resolution I would have supported one much more affirmatively if that resolution would state these affirmative facts and not, again, go back and accuse this country as if we started the international trade war. It is not true. The facts do not justify it. The committee well knows it.

I want to close by saying that this country over the years has been asking, through this body and through other private enterprises, the AISI, has been asking, to no avail, for legislation and for a resolution, many, many years ago. It is about time this resolution has been presented.

Mr. FRENZEL. Mr. Speaker, I yield 7 minutes to the distinguished gentleman from Pennsylvania [Mr. SCHULZE], a member of the Trade Subcommittee.

Mr. SCHULZE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I take the well this evening disappointed. I am disappointed at the way this measure was brought before us today without time for due deliberation and disappointed that it is here on the floor tonight when there are those who wish to leave, and I am disappointed at the content of this legislation. The other body at the other end of the Hall in its deliberations passed a resolution which was, as the gentleman from Pennsylvania stated, fairly concise and fairly tough. In the news media this week we saw it had an impact and it had an impression.

So what should the great people's body, the House of Representatives—what should we do? Should we go along and add to that? No, indeed. What we are going to do is pass two different versions of a resolution.

Do you know what that means? There is no conference committee. That means, like a ping-pong ball, this resolution will go from one body to the other, back and forth: "You take this part, I will take that part."

If we wanted to send a weaker message across the seas, we could not do that except for what we are doing tonight.

In our resolution it says that we are to blame, that we are to blame; we have done it, please forgive us.

If I were the Japanese Trade Minister, I would write a resolution the way we have written it and the way we are passing it tonight.

So, Mr. Speaker, I am sorely disappointed at what we do here.

□ 1920

The chairman of our committee, whom I respect and admire says, "This is the beginning." This is the beginning. I have been on the Trade Subcommittee for 8 years. Eight years. Our trade deficits have been soaring; they are enormous. For every dollar of trade deficit, it means somebody who is not working.

Comparative advantage. This resolution is so feckless, so weak, in committee today I said that it was like a young man who saw a magnificent woman on a television set and gave her a big kiss. It is just about as exciting. I will tell you, that CRT was probably made in Japan. Because, when you talk about comparative advantage, the comparative advantage stops at the water's edge. Their markets are not open.

My distinguished ranking member on the Trade Subcommittee said that our hands are not clean, that we do not open our markets at all places.

Let me tell you something: International trade is like a balloon filled with water or air, and when you squeeze one place, it goes out another. When the Japanese or other major countries deny access to their markets, we are the major dumping ground for that excess capacity. We are the ones who bear the brunt of that kind of closed markets; even though they may be closed to us, they are also closed to other countries, and we are the ones that bear the burden of that.

I am disappointed that this is a resolution. This should be legislation. It should be very strong legislation.

We have heard in this well tonight that the strong dollar is to blame for this deficit. Let me give you a few facts. Although, in my opinion, the growth in the bilateral trade deficit can be attributed partially to that imbalance, there is no explanation, for example, for the fact that the yen has appreciated 36 percent against the German mark since 1981, and yet German exports to Japan have barely grown by one-half of 1 percent per year.

The yen has appreciated 48 percent against the Korean chon since 1981 with a bare 2 percent per year increase in Korean exports to Japan.

Remember what I said: When these other markets—when this market is blocked to these other countries, we are the ones who end up as the dumping ground.

Now while the yen depreciated by about 30 percent against the dollar since 1980, it has appreciated by 80 percent against the French franc and 75 percent against the British pound without substantial increases in exports from those countries to Japan.

The dollar imbalance is not the main culprit in this issue.

Since my time is growing short, I want to share with you a letter which I received from a gentleman in London, and I will close with this. It is about another bill that I have, but you will find it relates.

He says:

My reason for writing is to applaud you for introducing your bill for a surcharge of 20% on imports. I simply can't imagine how total lack of action on the part of somebody is going to solve anything at all. It never will. It'll get worse.

Incredible as it may seem, it appears as if nobody in authority in the United States understands that when the Japanese attend negotiation sessions, they have absolutely no intention of negotiating or even concluding anything resembling an agreement. Every Japanese negotiation team has one aim in mind which is to "stall" long enough till they can pass their hot seat on to the next guy who then starts off on a different tack with the same aim in mind. The Japs even have a word for it called HARAGE (pronounced Ha-Rah-Gay) which basically means saying one thing when you really mean the opposite.

This gentleman goes on to explain that on an airplane flight one day he found himself sitting next to a very high official in the Ministry of Trade. He says:

Having been born and raised in that country we naturally lapsed into Japanese, and after a few drinks I asked him point blank how Japan can justify putting all those blocks on imports when they have free access to the American market.

His reply was simplicity itself. He said, just because they're crazy doesn't mean we have to be as well. How about that for fairness?

Mr. Speaker, it is time that we passed legislation, not resolutions; it is time that we said we mean business. We are not going to roll over and play dead and open our markets until we get some reciprocity.

I urge a "no" vote on this resolution to send a strong message.

Mr. GAYDOS. Will the gentleman yield?

Mr. SCHULZE. I would be happy to yield.

Mr. GAYDOS. For a point of emphasis and information, I ask the gentleman: In the resolution, two items have been cited as cause of our problem. No. 1, the deficit; and the strong dollar.

What is the gentleman's opinion?

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. DURBIN].

Mr. DURBIN. Thank you, Mr. Chairman.

I would like to commend the chairman of the Committee on Ways and Means for bringing this resolution to the floor, but I think it must be made clear that we are not here tonight because we have just discovered that the Japanese are taking advantage of us.

We are here tonight, and the other body considered legislation last week because of the President's decision to suspend the automobile import quotas. That is why we are here.

That decision was reached, that major trade concession was given to the Japanese without any requirement that there be reciprocity on their part. At the time when we were arguing in this body over the plight of the American farmer, we gave this major trade concession to the Japanese despite the fact that they systematically exclude our citrus, our beef, our soybean products, and our wood products.

At a time when this country is still haunted with dislocated workers from the last recession, we gave away a major trade concession to a country which systematically excludes our manufactured products.

The purpose of this resolution is to tell the Japanese and the President that enough is enough. The President and the Japanese will get that message loud and clear with this resolution.

Mr. ROSTENKOWSKI. Mr. Speaker, I yield 3 minutes to the gentleman from North Dakota [Mr. DORGAN].

Mr. DORGAN of North Dakota. I thank the gentleman for yielding, and I will be brief.

Mr. Speaker, I come from a State where free trade is important. We need markets for our wheat and our barley and corn, and we understand that the ability to market those around the world is critical to agriculture in this country.

But I do not agree with those who say that we are hasty when we stand up here in the U.S. Congress and by resolution say to the Japanese that this is not the 1950's; this is not the late forties and early fifties. You are a strong, tough competitor, and you expect to serve our markets? We want you to open yours; when beef from North Dakota or Iowa tries to move into Japan, it finds all kinds of restraints. And yet, when the Japanese want to move products in here, they want a willing country and a willing consumer.

I guess all I am interested in saying today is that resolutions of this type are bargaining chips in many respects.

They are bargaining chips for our negotiators who say to the Japanese, "We really want fair trade." I do not want to get involved in a sense of economic nationalism here that says, We want to fire the first salvo in a trade war; the worst thing in the world that could happen to this country is any kind of a trade war.

The most important thing that can happen to us, in my judgment, is for us to say to the Japanese and other trading partners that we expect reciprocity; we expect you to open your markets; we expect fair trade.

There is a lot of talk about free trade; there is some talk about fair trade. We expect it; we would begin to demand it from the rest of the countries in the world.

Now I would like to just respond briefly to a comment made by the gentleman from Pennsylvania about whether or not the American dollar is overpriced. Yes it is overpriced. It is overpriced vis-a-vis the guilder, the mark, the pound, the yen. Yes, indeed, the dollar is overpriced and one of the root causes of that is fiscal policy and monetary policy in this country.

This resolution asks the President to begin developing a plan. What is the plan to deal with the trade deficit? That trade deficit hurts this country. What is the plan to deal with budget deficits that help create that trade deficit? What is the plan?

Well, there is no plan at this point. This kind of resolution says, we want to see a plan. This resolution, I think, is a signal to the Japanese, a bargaining chip for our negotiators that says, we expect that kind of plan.

Mr. DAUB. Will the gentleman yield?

Mr. DORGAN of North Dakota. I am glad to yield to the gentleman from the committee.

Mr. DAUB. While not wanting specifically to comment on the bill itself, I would point out that we have made some progress on beef and citrus, and that they import about $2 billion of our ag products, in an island country, which is something I think we should acknowledge.

Mr. DORGAN of North Dakota. If I might reclaim my time, let me say that the progress made on beef is painfully slow progress, and woefully inadequate, and this kind of thing simply gives our negotiators the ability to say to the Japanese, "We have got a lot of folks back home that want your markets open to our producers, just as markets are open to yours." That is fair trade, and by God, it makes good sense for both of us.

Mr. FRENZEL. Mr. Speaker, I yield 2 minutes to the distinguished minority leader, from Illinois [Mr. MICHEL].

Mr. MICHEL. Mr. Speaker, I commend the Ways and Means Committee for bringing this resolution to the floor.

In February, I introduced a resolution similar to the Danforth resolution that passed the other body last week.

The resolutions from both Houses of our Congress send a message to both our Government and the Japanese Government that stronger steps must be taken to turn around the massive trade imbalance between our two nations.

The decision by the Japanese Government to allow the import of 450,000 more automobiles into this country and their intransigence in opening up other markets, will lead to an even further worsening of the $37 billion trade deficit we had with Japan last year.

As long as the Japanese don't give the same access to our products that we give to theirs, then an erosion of our relations is inevitable. As long as the Japanese fail to do what they can to help rectify the dollar/yen imbalance as they have promised to do, then an erosion of our relations is inevitable.

This message is as much for the ears of our own administration as it is for the Japanese. I don't like the course we are on. It is not a course for more and freer trade. It is a course that, in my judgment, spells further trouble down the road.

Mr. FRENZEL. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Wisconsin [Mr. ROTH], a member of the International Economic Policy Subcommittee of the Foreign Affairs Committee.

Mr. ROTH. I thank the gentleman from Minnesota for yielding.

Mr. Speaker, this is a very serious matter. We are suffering a trade deficit this year of $120 billion. A Milwaukee newspaper, 2 days ago, said, "Japanese yawn at American protests."

There is no teeth in a resolution like this. The Japanese are laughing at us. Look at the facts. Sixty percent of all TV's sold in this country come from Japan; 20 percent of all the cars; 90 percent of all the motorcycles; 20 percent of all the machine tools. When the Japanese wanted to come into American banking, they bought the Bank of California. When we got 4.5 percent of the pharmaceutical markets of Japan, there was a hue and cry like we have never heard out of Japan. No, we are not declaring a trade war on Japan. They are declaring a war on us, and we are hoisting the white flag.

Mr. FRENZEL. Mr. Speaker, I yield myself such time as I have remaining.

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. FRENZEL] is recognized for 1 minute.

Mr. FRENZEL. Mr. Speaker, I have already praised the committee for improving on the Senate's work in presenting to this body a better resolution. Nevertheless, I think at a time when our President and the Prime Minister of Japan are engaged in crucial negotiations, and they seem to be going rather well, my preference would be not to move swiftly with a resolution that would tend to perhaps confuse the signals that are now emanating from both sides of the Pacific Ocean and being received with different perceptions on each side of that ocean.

So my preference would be that this resolution not be approved.

On the other hand, I know the pressures that brought it forth. I respect those. I think the committee has done a splendid job and has presented to this House the best resolution it could.

● Mr. BIAGGI. Mr. Speaker, I rise in full support of this resolution calling on President Reagan to retaliate against Japan's unfair and discriminatory trade policy—a trade policy that reeks of greed.

Simply put, America has been too generous for too long. As the United States continues to keep its doors wide open to Japanese products, the Japanese have slammed their trade doors closed and turned the key. The numbers tell the story. While the U.S. trade deficit with Japan swelled to $37 billion in 1984, Japan's trade surplus with the United States reached $4.2 billion in February—the highest level since last July's $4.7 billion gap. The result: Japanese businesses get rich and American workers lose their jobs, by the thousands.

In January, there was optimistic news from the White House. President Reagan and Japanese Prime Minister Yasuhiro Nakasone had apparently agreed that Japan should open its markets to competitive American products. A cause for celebration? Hardly.

As a good-faith gesture, President Reagan lifted a voluntary restraint agreement on Japanese auto imports shortly after his January meeting with Nakasone. In turn, the Japanese proceeded to increase its auto shipments to the United States by a whopping 25 percent, rationalizing that this would represent a 2.3-million unit "limit." Knowledgeable observers tell us that this so-called "limit" is actually Japan's full productive capacity. So much for good-faith gestures.

To add insult to injury, Commerce Department officials tell us that Japan has agreed to only two of nine U.S. objectives designed to assure U.S. access in Japan's telecommunications market, and negotiations to open Japan's markets in three other areas—sophisticated electronics; wood and paper products; and pharmaceuticals and medical equipment—have yet to begin.

Mr. Speaker, today we are considering a nonbinding resolution that sends a strong signal to the President that retaliatory measures are necessary to force the Japanese to end their unfair

and totally unacceptable trade practices. The passage of this legislation is clearly action worth taking. Yet, for the sake of the American work force, whose jobs are at stake, I believe we must go further by acting soon on legislation to mandate trade retaliation measures against Japan. It seems that anything less is simply not enough.●

● Mr. BROOMFIELD. Mr. Speaker, earlier today, Congressman JOHN DINGELL and I introduced a resolution expressing the deep frustration and impatience of the House of Representatives with the trade policies of Japan—a policy that effectively closes their markets to our businessmen while fully exploiting our own markets.

Our resolution was similar to that which unanimously passed the Senate last week and carried an effective message to Japan, Inc.

However, what is important is that the Japanese fully appreciate the depth of feelings about our trade problems, and not whose resolution is finally accepted.

They must understand that we have long passed the period when we will be mollified by smiles and promises. This is now the time for positive action, for we are headed in a collision course that will seriously and permanently damage a relationship marked by mutual cooperation and friendship.

Earlier, I warned of a possible full-blown trade war if the Japanese do not change course in their trade practices. Hopefully, the Japanese will heed our warnings and be sensitive to our concerns to help prevent such a trade war by finally opening their markets to fair competition.

Mr. Speaker, I urge my colleagues to provide a clear and resounding voice to our concern and our outrage at the current state of our trade relations with Japan by fully supporting this resolution before us today.

● Mr. MARKEY. Mr. Speaker, it is with great reluctance that I rise to support this resolution.

Ever since I came to Congress in 1976, there has been talk that the Japanese have enjoyed free access to our Nation's markets, but that American firms could not crack the Japanese wall of trade barriers. For the past 8 years, we have seen many high level talks, and very little concrete action.

Today, we consider a resolution that I would have termed "extreme" a few years ago. Now, however, I do not view this resolution as extreme, but instead I find this proposal a reasoned response to the tremendous obstacles American firms face in Japan.

When I talk with firms in my district, firms who have spent millions of dollars and years of effort to get into the Japanese market, they are frustrated. They are disappointed. They see nothing good on the horizon unless and until our country forces Japan to be fair.

And that is what this resolution offers us today: A statement that the United States seeks fair trade with the world. This resolution states that we can no longer tolerate the one-way street, a street running from Japan directly into American markets, that have characterized past Japanese-American trade relations. This resolution seeks fair trade; fair trade means goods and services must move down both sides of a two-way street.

I support this resolution as a statement of the House's intent to deal seriously and resolutely with the Japanese trade situation. We can no longer accept promises of further high-level talks; we can only accept specific, concrete alterations in Japan's trade barriers.

Absent such specific, detailed action by the Japanese, then I believe we should not hesitate to step forward with continued pressure on the Japanese to open up their markets. American firms cannot continue to watch ships come in with goods marked "made in Japan," and sent back filled with "promises, made by Japan." I urge my colleagues to support this resolution as a measure of this House's commitment to free trade.●

● Mr. SMITH of New Jersey. Mr. Speaker, I rise to urge passage of House Concurrent Resolution 107, a concurrent resolution expressing the sense of the Congress that the President should develop a plan for correcting the U.S. trade deficit and directing him to take certain actions to reduce the trade imbalance between the United States and Japan.

Mr. Speaker, we have watched with great alarm as our trade deficit with Japan has grown over the past several years. Our trade deficit with Japan is the largest single slice of our current $123 billion trade deficit. In fact, Mr. Speaker, the U.S. trade deficit with Japan has grown from $10 billion in 1980 to $37 billion in 1984. At least $20 billion of that amount is a direct result of auto imports. In addition, the U.S. Trade Commission has estimated that the removal of the import cap on autos will result in a $4 to $5 billion increase in Japanese cars flooding our market. That is totally unacceptable and will do irreparable damage to our domestic auto industry. It will hurt American auto workers.

Mr. Speaker, while the strong dollar has no doubt contributed greatly to the size of our trade deficit, lack of U.S. access to the Japanese market must share the blame. It would seem that the President hoped that Japan would respond to the lifting of a voluntary restraint agreement by opening up their market for U.S. goods and services. But this has not been the case, nor will it be. It would appear that we are about to be had—again.

Mr. Speaker, the Japanese have responded to the President's action with a 25-percent increase in automobile shipments and a continuation of its closed door policy to U.S. exports. For too long, Japan has benefited from free trade without bearing any of the responsibilities that the free trade system imposes on trading partners, namely, reciprocity. American producers, particularly in the fields of medical equipment, porcelain china, telecommunications, agricultural products and pharmaceuticals, have been unable to penetrate Japanese markets. They are in a word—locked out.

While I continue hope that trade negotiations with Japan will result in the opening of Japanese markets to American goods, I would suggest we have waited too long. It is time that the President made it clear that this Nation will no longer tolerate Japan's unfair and discriminatory trading practices. Japanese industry has been permitted to expand at the expense of our own workers and that must change.

It is estimated, Mr. Speaker, that 3 million jobs in the United States have been lost since 1981 due to the trade deficit. The immense trade deficit with Japan must bear the lion's share of the blame for this situation. The American worker must be protected whatever it takes.

The resolution which we consider today will send a clear message to Japan that stronger steps must be taken to address our massive trade imbalance.

Mr. Speaker, let me conclude by saying that this is only a step. I believe the Congress must pass into law reciprocity legislation and a comprehensive domestic content bill. The time for small talk is over. The time for meaningful action has arrived.●

● Mr. LENT. Mr. Speaker, I speak today in support of House Concurrent Resolution 107, dealing with our trade problems, especially those we have with Japan. I have long supported measures designed to assure open markets, a free flow of goods and a strong international trading system. I have opposed actions which would threaten that system.

My vote today is consistent with that position. The United States, and particularly the Reagan administration, has been patiently but consistently pressing Japan for years to make tangible trade concessions that will end Japan's dependence on domestically produced goods of all types. Like all protectionism, Japanese trade barriers have been an expensive, counterproductive burden to the Japanese people.

Our country has also sought to assure the integrity of our international commitments and the fairness and due process inherent in our trade laws.

Unfortunately, Japan was one of the first nations to take advantage, often unfair advantage, of that system. Now, of course, many other nations have followed the Japanese lead and subsidized their industries or condoned dumping and other unfair trade practices.

Now, more so than at any point in the past, these problems with Japan have reached massive proportions. The resolution cites our $37 billion trade deficit with Japan, and some of its causes.

Yet, in the face of this long and unfortunate record, and the current economic threat of our trade deficit, Japan has not sought to strengthen but to weaken our world trading system.

The lack of Japanese commitment to carry out its recent agreements with respect to financial measures, and telecommunications purchases, is one sign of this problem. Japan's uncooperative attitude in current telecommunications negotiations is another. Japan's outright refusal to purchase lumber and electronic goods is another. Japan's continuing record of unfair trade practices—patent infringement, dumping, and subsidies—is one more. Finally, in the face of U.S. trust in Japan's good judgment with respect to auto imports, Japan has announced a massive increase.

I am convinced that we must press for strong measures to demonstrate to Japan that America will insist on positive, tangible commitments to free trade. The resolution sets up a process by which the President is pressed to take steps that will show Japan that its current attitude must not prevail. All these actions will be within existing law.

I urge my colleagues to join me in voting in favor of this resolution.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois [Mr. ROSTENKOWSKI] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 107.

The question was taken.

Mr. SCHULZE. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 1373, de novo;

H.R. 1869, by the yeas and nays; and

House Concurrent Resolution 107, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

DESIGNATING POINT REYES NATIONAL SEASHORE WILDERNESS AS THE PHILLIP BURTON WILDERNESS AREA

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 1373, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the bill, H.R. 1373, as amended.

The question was taken.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 342, nays 69, not voting 21, as follows:

[Roll No. 43]

□ 1950

The Clerk announced the following pair:

On this vote:

Mr. Jones of Tennessee and Mr. Ortiz for, with Mr. Hartnett against.

Messrs. SWINDALL, WHITTAKER, ROWLAND of Connecticut, and CHENEY, and Ms. FIEDLER changed their votes from "yea" to "nay."

Mr. RALPH M. HALL changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. KANJORSKI. Mr. Speaker, on rollcall No. 43 on consideration of H.R. 1373, the wilderness bill, the bell did not sound in the House caucus room, the Cannon caucus room, and my pager did not sound.

Had I been present in the Chamber I would have recorded my vote in the affirmative.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time in which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

REPEALING CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS ADDED BY TAX REFORM ACT OF 1984

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 1869, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois [Mr. ROSTENKOWSKI] that the House suspend the rules and pass the bill, H.R. 1869.

The vote was taken by electronic device, and there were—yeas 412, nays 1, not voting 19, as follows:

[Roll No. 44]

□ 2000

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

● Mr. JONES of Tennessee. Mr. Speaker, due to illness in my family, I unavoidably missed the vote on the motion to suspend the rules and pass H.R. 1869, recordkeeping with regard to mixed-use vehicles. I support this legislation and would have voted "aye" on its passage.●

PERSONAL EXPLANATION

Mr. TAUZIN. Mr. Speaker, I rise to explain my absence from the Chamber.

Mr. Speaker, when H.R. 1373, rollcall 43 and H.R. 1869, rollcall 44, occurred, I was inadvertently away from

the Chamber and, therefore, missed these votes.

Had I been here, I would have voted in the affirmative on both issues, and I wish this statement to appear in the RECORD.

EXPRESSING SENSE OF CONGRESS THAT THE PRESIDENT TAKE ACTION RELATING TO TRADE DEFICIT AND UNFAIR TRADE PRACTICES OF JAPAN

The SPEAKER pro tempore. The pending business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 107.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois [Mr. ROSTENKOWSKI] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 107, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 394, nays 19, not voting 19, as follows:

[Roll No. 45]

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

BIOMASS ENERGY AND ALCOHOL FUELS ACT OF 1980 AMENDMENTS

Mr. MARKEY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill, S. 781 to amend the Biomass Energy and Alcohol Fuels Act of 1980 to clarify the intention of section 221 of the act.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 781

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first sentence of section 221 of the Biomass Energy and Alcohol Fuels Act of 1980 is amended by inserting before the period at the end thereof the following: ", except that all conditional commitments for loan guarantees under this subtitle which were in existence on September 30, 1984, are hereby extended through September 30, 1985".

(b) Enactment of this Act shall not be interpreted as indicating congressional approval with respect to any pending conditional commitments under this Act.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. MARKEY] is recognized for 1 hour.

Mr. MARKEY. Mr. Speaker, this bill makes a technical clarification of the Biomass Energy and Alcohol Fuels Act of 1980. That act permitted the Department of Energy to enter into loan guarantees with respect to ethanol plants. The authority to enter into loan guarantees expired on September 30, 1984.

□ 2010

The Energy Department has entered into four conditional commitments called loan guarantees. However, because of the complexities of the commitment and other related issues, the Department was not in a position to finalize the loan guarantees by September 30, 1984.

This bill permits the Department to continue its negotiations over these loan guarantees until September 30, 1985.

The projects involved here committed 4 years to finalization of their commitments and they deserve an opportunity to see them through. The bill provides no new authority and no new spending. The Department must still judge each project on its merits

and the Department retains its full discretion.

The bill makes clear that its passage should not be interpreted as indicating congressional approval.

We have consulted with the minority and majority committees of jurisdiction and other interested parties, and we know of no objection to this matter, and I urge its immediate passage.

Mr. DAUB. Will the gentleman yield?

Mr. MARKEY. I will be happy to yield.

Mr. DAUB. Mr. Speaker, I extend my thanks to the chairman of the committee and the ranking member for bringing these technical amendments to the floor, as well as to the gentleman from Ohio [Mr. BEDELL], especially for the work that he has done. I appreciate the efforts that everyone has made.

Mr. Speaker, the technical amendment we are considering clarifies the intention of Congress with regard to the Biomass Energy and Alcohol Fuels Act of 1980. The amendment involves no new authority or spending but allows the four remaining fuel ethanol projects under the Office of Alcohol Fuels to finalize their conditional commitments.

This legislation was passed by the House on February 27 as an amendment to the Emergency Credit Act. The Senate passed the measure last Thursday.

To repeat, the bill involves no new commitments under the Alcohol Fuels Act but strictly extends to September 30 of this year four commitments that were first made in 1981.

In response to Government solicitations made at that time, these four projects have in good faith committed nearly 4 years of effort and millions of their own dollars to finalize their conditional commitments. It is only right that they now be provided the opportunity to see those efforts through and that in the process we establish a clear and definite termination date for the program.

The legislation—while simple—is absolutely necessary to allow the continued progress toward finalization of the conditional commitments. This is due to an unintended technicality in the original law that failed to distinguish between existing conditional commitments entered into well before the program expiration date of September 30, 1984, and new commitments after that date. The bill will not open the process to new commitments but rather allow the four remaining projects the opportunity to finalize by September 30, 1985.

The ethanol industry brings with it positive public benefits. For our troubled farm economy, it will generate immense demand for stockpiled grain and corn. Environmentally, the plants are pollution free; they recycle their byproducts; and they produce a gasoline substitute that moves us toward our national goal of removing lead from gasoline. Additionally, they enhance our energy independence.

I urge the support of my colleagues for this clarification of Congressional intent with regard to the Biomass Energy and Alcohol Fuels Act of 1980.

● Ms. SNOWE. Mr. Speaker, I rise in support of this legislation offered by the gentleman from Nebraska. This bill makes a technical correction to the Biomass Energy and Alcohol Fuels Act of 1980 to allow four ethanol projects from Louisiana, Maine, Minnesota, and Nebraska—under the review of the Department of Energy's Office of Alcohol Fuels—to utilize their conditional commitments obtained before the statutory expiration date last September 30 for 1 year. These projects, now caught on a technicality, would gain an extension through the end of this fiscal year through passage of this bill.

By not closing the door on these approved projects, Department of Energy loan guarantees will still be made available. No new or uncommitted projects would be eligible—only the four projects which had commitments before last September. The four projects that depend on an extension of this expiration date have already met the Government's cost requirements and the test of time.

Allow me to reiterate that Congress never intended back in 1980 to cut off projects that received commitments before the expiration date. With that in mind, these four ethanol projects can be completed with an extension of the loan guarantee applicability through this September. It makes no sense to cut off economically sound, Government-approved projects under the authority of this act. Each of these four projects remain in place after millions of dollars have been spent to meet Federal requirements to obtain their conditional commitments. Passage of this simple extension would be a fair and logical step to take.

Ethanol production is a practical objective for several reasons: In the first place, ethanol is used to enhance fuel octane, and it will very adequately replace lead as an additive. The Environmental Protection Agency has recently moved to phase out the use of lead in gasoline, and this legislation will serve as a catalyst to enhance the availability of ethanol as a substitute for lead. Second, ethanol is produced through the distillation of feed grains. These four ethanol projects will serve as a significant market outlet for feed grain, approximately 40 million bushels per year.

Given all of these certainties about the benefits achieved by completing these projects, the simple fact of the matter remains that these four projects need their authority clarified through the end of this fiscal year to complete negotiations. This extension allows no new obligations, and I commend the gentleman from Nebraska for his efforts on behalf of this simple, clarifying legislation.

I strongly support passage of this bill.●

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WORLD HEALTH WEEK AND WORLD HEALTH DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 50) to designate the week of April 1, 1985, through April 7, 1985, as "World Health Week," and to designate April 7, 1985, as "World Health Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object but would simply like to inform the House that the minority has no objection to the legislation being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 50

Whereas the health of a nation depends upon the health of its people;

Whereas improvement of the health of the people of our Nation contributes to world health, and world health contributes to the health of our Nation—a principle enunciated in the Constitution of the World Health Organization and accepted by the United States;

Whereas the United States is an active member of the World Health Organization and has both benefited from and contributed to the achievements of the Organization;

Whereas the countries of the world, acting through the World Health Organization, are committed to the goal of "Health for All by the Year 2000";

Whereas primary health care is recognized as a key to the attainment of "Health for All by the Year 2000";

Whereas health education and health awareness, prevention, and treatment of common diseases and illnesses, basic sanitation and adequate nutrition are essential elements of primary health care;

Whereas the World Health Organization has established April 7 of each year as World Health Day to call attention to what individuals and governments can do to fur-

ther the health of human beings everywhere, and the American Association of World Health has sponsored and assisted in this endeavor; and

Whereas it has been the custom for the President to call attention to World Health Day each year in the form of a public message: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of April 1, 1985, through April 7, 1985, is designated as "World Health Week" and April 7, 1985, is designated as "World Health Day" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to oberve such week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMMEMORATING 25TH ANNIVERSARY OF U.S. WEATHER SATELLITES

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from the further consideration of the Senate joint resolution (S.J. Res. 62) commemorating the 25th anniversary of U.S. weather satellites, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I would simply like to inform the House that the minority has no objection to the legislation being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 62

Whereas United States' weather satellites have tracked the Earth's weather since April 1, 1960, and have brought unique benefits to the American people and to the world;

Whereas weather satellites have proven exceptionally valuable in detecting, monitoring, and giving early warning of hurricanes, severe storms, flash floods, and other life-threatening natural hazards, on a local, national and international basis;

Whereas the international weather satellite search-and-rescue program has saved over three hundred lives since 1982;

Whereas the achievements of the scientific and aerospace communities in developing weather satellites have contributed significantly to the United States leadership in satellite technology, international cooperation in space, and an integrated global weather forecasting system;

Whereas television and radio weather forecasters have made major contributions to public health, safety, and welfare through the use and general dissemination of weather satellite information;

Whereas weather satellites have evolved into environmental satellites that also monitor snow and ice cover, frost damage, vegetation, forest fires, volcanic eruptions, sea surface temperatures, and ocean currents;

Whereas environmental satellite data are used for research and for commerical purposes in meteorology, hydrology, agriculture, oceanography, forestry, and fisheries;

Whereas the United States international prestige is enhanced by the direct dissemination of environmental satellite data to more than one hundred and twenty countries;

Whereas the National Aeronautics and Space Administration has been the world leader in the development of experimental and prototypical weather and environmental satellites; and

Whereas the National Oceanic and Atmospheric Administration of the Department of Commerce has demonstrated outstanding leadership in the management of operational weather and environmental satellite systems and programs: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 31 to April 6, 1985, is hereby designated as "National Weather Satellite Week" in recognition of the twenty-fifth anniversary of weather satellites and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies.

● Mr. LUJAN. Mr. Speaker, I lend my full support to this resolution which commemorates the 25th anniversary of our Nation's weather satellites.

At first glance, it might seem that the weather satellites are not really all that important to our daily lives. Well, that might have been true when the idea was still on the drawing board over 25 years ago, but it certainly is not the case today.

Today, information provided by the weather satellites operated by the National Oceanic and Atmospheric Administration has direct economic and social benefits for all of us. This information affects many different industries: wholesale and retail marketing, construction, the fishing industry, travel, shipping, and agriculture. Based on weather patterns, for example, a farmer may decide when to plant new crops or harvest the ones he has in the ground.

When the going gets rough, in the face of severe and violent weather, our satellite early warning system has sharply reduced the numbers of lives lost to hurricanes, tornadoes, severe storms, and other violent weather patterns.

Early frost warnings can save citrus growers millions of dollars per day on the cost of heating their groves, as well as warning them when the weather might be severe enough to put them out of business altogether.

Satellite ice monitoring also helps to extend shipping on the Great Lakes well into winter months. This in turn generates extra economic activity for Middle America and neighboring provinces in Canada.

In addition to improving the quality of our daily lives, our weather satellites form one of our key tools for international cooperation in space.

Today, more than 120 countries make regular use of U.S. weather satellite information and products. Nine countries are, in fact, active partners with the United States in the actual operation of the weather satellites. From their very inception, the weather satellites have provided data to the entire world.

The weather satellites also carry equipment on board used for another very important international program, the Search and Rescue Program. On October 5, 1984, the United States signed an agreement in Leningrad with Canada, France, and the U.S.S.R. to provide an operational worldwide satellite-aided Search and Rescue System for downed aircraft and ships in distress. This program, known as SARSAT, began as an experimental effort under NASA, with active participants of the Air Force and Coast Guard; it is now an operational NOAA program.

SARSAT is already a proven success, and has saved over 350 lives in a little more than 2 years. Right now, countries all over the world are beginning to develop ground stations to receive this data so that they may become part of the international search and rescue network. This program is an ideal example of international space cooperation at its very best.

I am glad that we are celebrating the 25th anniversary of our Nation's weather satellites—certainly, this program has earned its silver anniversary celebration. I urge my colleagues to support this Senate Joint Resolution 62 and the program whose anniversary it commemorates.●

● Mr. SCHEUER. Mr. Speaker, I rise in support of the resolution.

Senate Joint Resolution 62 provides for the commemoration of the 25th anniversary of the U.S. Weather Satellites Program by designating the week of March 31 to April 6, 1985, as "National Weather Satellite Week" and by directing the President to issue a proclamation in observance of the event.

The civilian meteorological satellite [METSAT] system, comprised of two orbiting and two stationary satellites, has become one of the most valuable elements of our national space program.

Metsats are critically important in the National Weather Service's ability to provide early warning of hurricanes, severe storms, flash floods, and other life-threatening natural hazards.

Weather satellites also carry search-and-rescue equipment—which has

saved over 300 lives in the past 2 years—and provide information which is of great commercial value to farmers, foresters, and fishermen throughout the United States.

In addition, the U.S. international prestige has been, and continues to be, enhanced by the direct dissemination of weather satellite data to more than 120 countries.

The development and utilization of weather satellite technology over the past 25 years has spawned tremendous accomplishments which have benefited not only the American people but people the world over.

I urge my colleagues to help commemorate these accomplishments and the people who made them possible.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL ORGAN DONATION AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 35) to authorize and request the President to issue a proclamation designating April 21 through April 27, 1985, as "National Organ Donation Awareness Week", and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not, however, object. I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. MORRISON of Washington. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. Mr. Speaker, under my reservation I would like to yield to the gentleman from Washington [Mr. MORRISON], who is the chief sponsor of House Joint Resolution 123, the National Organ Donation Awareness Week.

Mr. MORRISON of Washington. Mr. Speaker, I would first like to take this opportunity to thank the subcommittee chairman, BOB GARCIA, and the ranking Republican, JIM HANSEN, for their assistance.

On January 31, I introduced House Joint Resolution 123 to designate the week of April 21 through 27 as "National Organ Donation Awareness Week." Two dozen of my colleagues were principal cosponsors. Since that time, the number of cosponsors has reached 227.

The reason for having a week set aside to draw attention to organ donation, is graphically illustrated by the fact that in an average year, only 1 person out of the 10,000 persons needing a donated organ actually receives this second chance at life.

The United States has many generous folks who have not signed donor cards. I believe that the only reason that more people haven't, is because they either don't know they can, or don't know how easy it really is, to make this beautiful lifesaving gift. And, for those Members of the House who have not had the chance to make this pledge, they will be able to sign a donor card on April 24 in the Capitol.

Mr. Speaker, the senior Senator from the State of Washington, SLADE GORTON, introduced the companion legislation in that body, which I report has now been passed. So at this time, I encourage my colleagues in the House to do no less, and vote for passage of this legislation proclaiming April 21 through 27, 1985, as "National Organ Donation Awareness Week."

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution as follows:

S.J. RES. 35

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating April 21 through April 27, 1985, as "National Organ Donation Awareness Week".

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FAIR HOUSING MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 79) to designate April 1985, as "Fair Housing Month," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but would simply like to inform the House that the minority has no objection to the legislation being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 79

Whereas the year 1985 marks the seventeenth anniversary of the passage of title VIII of the Civil Rights Act of 1968 as amended (commonly referred to as the "Federal Fair Housing Act"), declaring a national policy to provide for fair housing throughout the United States;

Whereas the Federal Fair Housing Act prohibits discrimination in housing on the basis of race, color, religion, sex, or national origin;

Whereas fairness is the foundation of our way of life and reflects the best of our traditional American values;

Whereas invidious discriminatory housing practices undermine the strength and vitality of America and her people; and

Whereas in this seventeenth year since the passage of the Federal Fair Housing Act, we must work to strengthen enforcement of fair housing laws for all Americans so as to make the ideal of fair housing a reality: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of April 1985, is designated "Fair Housing Month". The President is authorized and requested to issue a proclamation designating April as "Fair Housing Month" and to invite the Governors of the several States, the chief officials of local governments and the people of the United States to observe that month with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

TRIBUTE TO COL. GEORGE H. HALLANAN (RETIRED)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York [Mr. MARTIN] is recognized for 5 minutes.

Mr. MARTIN of New York. I thank the Speaker.

Mr. Speaker, a devoted and valued member of my staff, Col. George H. Hallanan, retired, is leaving Capitol Hill after 40 years of exemplary service to our Nation.

Colonel Hallanan rose in rank from private to colonel in the U.S. Army during a career spanning three major conflicts. Upon completion of his active military service, he joined the staff of my immediate predecessor, former Congressman Robert C. McEwen, for 6 years; he has served

ably and loyally on my staff for the past 4 years.

During World War II, Colonel Hallanan, then a captain, commanded the first tank company organized in the 1st Cavalry Division. He received the Purple Heart and the Silver Star for his combat efforts in the Pacific. He was in the first contingent to march into Tokyo the day the surrender was signed ending World War II.

Later in his career, Colonel Hallanan served our Nation in Korea and Vietnam. He also served in the Office of the Deputy Chief of Staff for Operations in the Department of the Army, as Director of Mass Communications in the Army Combat Developments Command and as Deputy Installation Commander of Fort Dix, NJ.

In addition to the Silver Star and Purple Heart, Colonel Hallanan's decorations include the Legion of Merit with Oak Leaf Cluster, the Meritorious Service Medal, the Army Commendation Medal with Oak Leaf Cluster, the Philippine Presidential Liberation Medal, and Vietnamese Minister of Defense's Psychological Warfare Medal.

An assignment which was one of the highlights of Colonel Hallanan's career, and which was to influence his later work, was command of an armored battalion which he first organized. While training his battalion at Fort Drum, NY, in my congressional district, he came to realize that this was an outstanding training area which would allow the preparation of combat units for immediate commitment anywhere in the world.

When he later joined the staff of former Congressman McEwen, then ranking Republican on the Military Construction Appropriations Subcommittee, Colonel Hallanan shared with my predecessor and many others the conviction that Fort Drum's 107,000 acres, used only for summer training of Reserve component units, were greatly underutilized. He developed briefings for Congressman McEwen showing the many advantages of this outstanding post, and these were presented to the Adjutants General of the nine States of the Northeast, to Members of Congress and to Department of Defense, and Department of the Army military and civilian officials. He extolled the virtues of Fort Drum to all who would listen.

Colonel Hallanan recently had the great satisfaction of seeing the 10th Mountain Division activated at Fort Drum for permanent stationing there. Having been most helpful in achieving that goal, he is leaving my staff to seek new challenges.

Throughout his career, Colonel Hallanan has had tremendous support from his wife, Alice, particularly in her outstanding job of caring for six fine children while duty called her husband far from home. I wish George and Alice Hallanan happiness and success in all their future endeavors.

INTRODUCTION OF THE "BUREAU OF INDIAN AFFAIRS FISCAL ACCOUNTABILITY ACT OF 1985"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona [Mr. UDALL] is recognized for 5 minutes.

● Mr. UDALL. Mr. Speaker, today I am introducing, on behalf of myself and Messrs. MCCAIN and RICHARDSON, a bill to provide for fiscal accountability in the allocation and expenditure of funds appropriated to the Bureau of Indian Affairs.

HISTORY OF THE BUREAU OF INDIAN AFFAIRS

The Bureau of Indian Affairs is the principal Federal agency charged with carrying out the government-to-government relationship between the United States and the Indian tribes; implementing the trust and fiduciary responsibility of the United States for the Indian tribes and their lands and resources; and providing or funding various educational, social, economic, and governmental programs to meet legal, moral, and historical obligations of the United States.

The Bureau was created as an agency of the War Department on March 11, 1824, by order of the Secretary of War Calhoun. By the act of July 9, 1832 (4 Stat. 564; 25 U.S.C. 1-2), Congress authorized the President to appoint a Commissioner of Indian Affairs who was to have "* * * the direction and management of all Indian affairs, and of all matters arising out of Indian relations * * *." He was under the direction of the Secretary of War and subject to the regulations prescribed by the President.

Two years later, the act of June 30, 1834 (4 Stat. 735) was passed "* * * to provide for the organization of the department of Indian affairs." This constituted, in effect, a reorganization of the field force of the War Department having charge of Indian Affairs and has been considered to be the organic law of the Bureau of Indian Affairs.

In 1849, under section 5 of the act of March 3, 1849 (9 Stat. 395), by which the Department of the Interior was established, the Bureau of Indian Affairs passed from military to civil control. The act provided "That the Secretary of the Interior shall exercise supervisory and appellate powers now exercised by the Secretary of the War Department, in relation to all acts of the Commissioner of Indian Affairs."

The Bureau continued in the Department of the Interior, with major statutory authorities in the field of Indian affairs vested in the Commissioner of Indian Affairs subject to the supervisory and appellate powers of the Secretary. Then, in 1950, pursuant to the Reorganization Plan of 1950, all existing functions and authorities of the Commissioner were transferred to the Secretary with power to delegate. In practice, through delegations from the Secretary, the Commissioner continued in effective control of the Bureau.

Finally, in 1977, the Bureau was placed under the leadership of an Assistant Secretary for Indian Affairs by order of Secretary Andrus. The position of Commissioner has essentially been left vacant since that order.

APPROPRIATIONS PROCESS

Beginning in 1865, when the Committee on Appropriations was established, until 1885, all general appropriation bills in the House of Representatives were within the jurisdiction of, and referred to, the Committee on Appropriations. In 1885, the rules of the House were changed to permit some general appropriation bills to be referred to other committees. Finally, in 1920, the rules were again changed to revest the Committee on Appropriations with jurisdiction over all appropriations measures.

The current rules of the House continue the separation of the authorization and appropriation process. The legislative committees have jurisdiction over any bills authorizing the appropriations of money for any purpose within their substantive jurisdiction. Legislative committees may not report any bill containing an appropriation. Any such bill is subject to a point of order on the floor.

Conversely, as noted, the Committee on Appropriations has jurisdiction over all appropriation bills, but, in general, may not report a bill containing appropriations for a purpose not authorized by existing law and may not report a bill containing legislative matter. Again, such a bill would be subject to a point of order on the floor.

During the period between 1885 and 1920, the House Committee on Indian Affairs had jurisdiction over both legislative and appropriation bills relating to the Indian Department or Bureau of Indian Affairs. The Appropriations Acts reported by the Indian Affairs Committee were entitled "An Act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending ——." In fact, these acts generally contained both appropriation and substantive legislative provisions.

After the revesting of all appropriation jurisdiction in the Appropriations Committee in 1920, Members began to raise points of order against bills making appropriations for Indian purposes on the grounds that there was no law authorizing appropriations for such purposes. In response to this

practice, the Committee on Indian Affairs reported legislation which was enacted as the act of November 21, 1921 (42 Stat. 208; 25 U.S.C. 13) to provide authority for the appropriaton of funds for the Bureau of Indian Affairs.

THE SNYDER ACT

That act, commonly known as the Snyder Act, provides extemely broad authority for the appropriation of funds for Indian purposes and has no monetary or fiscal year limitation. Its brief provisions are as follows:

The Bureau of Indian Affairs, under the supervision of the Secretary of the Interior, shall direct, supervise, and expend such money as Congress may from time to time appropriate for the benefit, care, and assistance of the Indians throughout the United States for the following purposes:

General support and civilization, including education.

For relief of distress and conservation of health.

For industrial assistance and advancement and general administration of Indian property.

For extension, improvement, operation, and maintenance of existing Indian irrigation systems and for development of water supplies.

For the enlargement, extension, improvement, and repair of the buildings and grounds of existing plants and projects.

For the employment of inspectors, supervisors, superintendents, clerks, field matrons, farmers, physicians, Indian police, Indian judges, and other employees.

For the supression of traffic in intoxicating liquor and deleterious drugs.

For the purchase of horse-drawn and motor-propelled passenger-carrying vehicles for official use.

And for general and incidental expenses in connection with the administration of Indian affairs.

The Snyder Act, in effect, says that such sums as are deemed necessary are authorized to be appropriated for such purposes as are deemed necessary to carry out the responsibilities of the United States in the field of Indian affairs for as long as may deemed necessary. The Snyder Act is the basic law authorizing the various programs funded by the Congress and administered by the Bureau of Indian Affairs.

Since the Snyder Act has no fiscal year or monetary limitation, there is no need for the periodic enactment of reauthorization legislation to continue the programs and functions of the Bureau of Indian Affairs as is the case with most Federal agencies and programs. As a consequence, the Snyder Act is considered by the Indian tribes to be the centerpiece of this Nation's commitment to its legal, moral, and historical obligations to the Indian tribes. They would be strongly opposed to any effort to repeal, suspend, or substantially modify the act.

Since the Snyder Act is an extremely broad authorization statute, it has the needed flexibility to permit the administration and the Appropriations Committees to periodically fashion and fund new programs or efforts to meet the changing needs and problems in Indian affairs. Almost all of the programs and efforts of the Bureau—and of the Indian Health Service in the Department of Health and Human Services—were developed through the appropriation process under the broad umbrella of the Snyder Act. The legislative committees are able to maintain some degree of involvement in this process through their legislative and oversight jurisdiction and through the congressional budget process.

BIA APPROPRIATIONS

The very features of the Snyder Act which establish the permanency of the Bureau and the Nation's commitment to Indian tribes and which gives the Bureau and the Appropriations Committees the needed flexibility to craft and fund programs to meet changing needs also give rise to the potential for administrative abuse in the apportionment or diversion of appropriations and to a lack of accountability for appropriation apportionment and expenditure.

Appropriations for the Bureau are included in the annual Appropriation Act for the Department of the Interior and related agencies. Because of the broad language of the Snyder Act and, in part, because the various programs of the Bureau are primarily developed through the appropriation process and not through specific legislative authority, the BIA appropriation language is in the form of three lump-sum appropriations: Operation of Indian programs; construction; and road construction. Appropriations relating to Indian trust funds and to direct or guaranteed loans are not relevant and not considered. While there may be specific appropriation language on line-items, set-asides or limitations relating to these lump-sum appropriations, they are not additions to the lump-sums.

These three lump-sum appropriation figures are based upon the breakdowns contained in the BIA budget justification submitted to the Congress for each fiscal year. The budget justification allots the requested lump-sum amount among the various activities, subactivities, and program elements within the appropriation. For instance, under the operation of Indian programs appropriation, there are the following activities: Education, Indian services, Economic Development/Employment Programs, natural resources development, trust responsibilities, facilities management, and general administration.

Each activity has two or more subactivities and each subactivity is further broken down into its constituent program elements. In each case, the justification shows the proposed allotment of the requested funds and personnel positions among the activities, subactivities, and program elements. In addition, it shows how the Bureau proposes to distribute the total allotment of each subactivity to the tribe/agency level, the area level, and the central office level.

The justification is submitted to support the Bureau's request for the lump-sum appropriations and also represents their intention to allot whatever funds are appropriated among the various activities, subactivities, and program elements. In general, the justification is used by the Appropriations Committees to accept, increase, or decrease the lump-sum requests based upon their decisions to accept, increase, or decrease proposed funding in the subdivisions within the appropriation.

After the appropriation process is completed and the Interior Appropriation Act is passed, it is expected that the Bureau would allot and expend or obligate funds appropriated to it as stated in the budget justification subject to the express language of the Appropriation Act and the directives of the Appropriations Committees as found in the reports of such committees, including any conference committee report.

However, since the statutory language of the Bureau's appropriation is on a lump-sum basis subject to any limitations within the language, there does not appear to any independent legal prohibition, except for the reprogramming procedure, to prevent the Bureau from transferring or diverting funds allotted to any particular activity, subactivity, or program element to another activity, subactivity, or program element within the same appropriation. While to be found doing so may subject Bureau officials to the wrath of the two Appropriations Committees, there does not appear to be clear legal penalty in existing law, including chapter 15 of title 31, United States Code, for doing so. In short, there is general lack of a legal requirement that the Bureau account for how it allots its appropriations among the various programs and how it, in fact, expends or obligates funds within those programs.

The legislation I am introducing today will establish a legal requirement that the BIA clearly set forth its allotment of appropriated funds based upon the budget justification as modified by appropriation language and directives of the Appropriations Committees; that, subject to certain exceptions, it must actually allot and expend or obligate those funds as set forth; and that the Bureau account for how it, in fact, did expend or obligate the funds.

EL SALVADOR ELECTION

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Oklahoma [Mr. JONES] is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, it was my great privilege to be appointed by the President to lead the official American observer delegation to the legislative and municipal elections held Sunday in El Salvador.

In addition to my distinguished colleague, the gentleman from Arizona [Mr. KOLBE], our group included former Ambassador to El Salvador Angier Biddle Duke, Mr. Howard K. Smith, Mr. Maurice Sonnenberg, Dr. Howard Penniman, Rabbi Morton Rosenthal, and Mr. Max Singer.

Ours was a diverse group, from different political parties and different lines of work, but we all agreed on one thing: the election was free, open, and fair.

I commend to my colleagues' attention the following official statement which was unanimously adopted by the observer delegation:

STATEMENT OF THE OBSERVER DELEGATION OF THE UNITED STATES OF AMERICA TO THE EL SALVADOR ELECTIONS, APRIL 1, 1985

Yesterday we witnessed El Salvador's third national election in less than a year. The unanimous conclusion of this bipartisan observer delegation of elected officials and private citizens is that the election was fair, that the election machinery was conducted efficiency, and that it represents a most encouraging symbol for the future of democratic institutions in El Salvador.

In all, this small delegation visited nearly thirty towns in most parts of the country. We spoke with election officials, candidates, and most important, voters of all parties.

This election differed in several ways from those held last year. First, since this was not a vote for a nationwide candidate, voters were required to cast ballots in their home towns. Further, the penalty for not voting had been lifted. Other mechanical changes were implemented as the country fine-tuned its voting procedures.

The delegation notes that the Salvadoran military took obvious pains to remain impartial in the contest. They were stationed well away from the polls, and refused to be drawn into political disputes.

Disagreements at the polls were, for the most part, inconsequential, and generally settled on the spot by representatives of the various parties. These disputes centered on mechanics and procedures of the elections, and we saw no evidence of intimidation or coercion that would raise a question of the fundamental fairness of the vote.

The mechanics of the election ran without serious incident. The Central Election Council deserves particular praise for its fine coordination of the process.

Guerrilla threats and attacks comprised the most serious challenge to voting. This delegation notes the inconsistency between the guerrillas' initial posture that the elections were meaningless, and their subsequent attempts to thwart the electoral process through violent intimidation. In spite of their attempts at intimidation, more municipalities were able to participate this year than last. Whereas 42 towns were unable to vote last time in the Presidential elections because of terrorist intimidation, only about half that number were denied the privilege of voting Sunday.

The election itself, then, must be hailed as a free, open, and fair contest, and we expect all parties to respect the results.

El Salvador now has in place its Presidential, legislative, and municipal leadership for the next three years. This delegation recognizes the need for continued American support for El Salvador as she addresses her continuing economic and military problems through her democratic institutions.

The delegation was struck by the rather consistent answer we got to the frequently asked question, "Why are you voting?" The vast majority of voters' answers centered on the hope for peace, and the desire to live in tranquility.

In our meeting with President Duarte after the polls closed, he confirmed his commitment to peace by building confidence among his people, through judicial reform, agrarian reform, and economic development. In addition, he reaffirmed his commitment to make every effort to bring the guerrillas to the peace table, and to put an end to the random violence which has so torn this nation.

This delegation commends the great strides made in this nation. Nowhere are they more evident than in this election. We look forward to working with the people of El Salvador to build on this election, further nurturing her democratic institutions, and we call on all factions, regardless of ideology, to join in that process.

We would be remiss if we did not mention the outstanding job performed by outgoing Ambassador Tom Pickering. He clearly has performed his duties in El Salvador in the highest tradition of American diplomacy. We know that he will continue to make a positive contribution to U.S. foreign policy.

Our delegation unanimously agreed that this election could be described as routine even by the historical standards of elections in the United States. That speaks volumes of how successfully the recently planted democratic institutions in El Salvador have taken root.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington [Mr. BONKER] is recognized for 5 minutes.

● Mr. BONKER. Mr. Speaker, due to a longstanding commitment to be in my district today to host the Southwest Washington Economic Summit, I missed the vote of the conference report on H.R. 1239, providing supplemental appropriations for famine relief and recovery in Africa. For personal as well as professional reasons, I wanted to make clear that had I been here, I would have voted "aye" in favor of making the appropriations.●

□ 2020

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will ask that all Members who wish to exhibit pictures to address the Chair and avoid direct references to the television audience.

GENERAL LEAVE

Mr. EDWARDS of Oklahoma. Mr. Speaker, I ask unanimous consent that all Members participating in my special order this evening may have 5 days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

MISSING CHILDREN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma [Mr. EDWARDS] is recognized for 60 minutes.

Mr. EDWARDS of Oklahoma. Mr. Speaker, last summer I began a project to use the televised proceedings of the House of Representatives to help find some of the 160,000 children who each year are reported kidnaped either by strangers or by a parent who does not have custody.

□ 2030

At that time, I discussed the cases of two young girls from Oklahoma City. One is Cinda Leann Pallett, shown here, and the other is Charlotte J. Kinsey, shown here. These two teenaged girls were reported kidnaped from the State Fair of Oklahoma in 1981, and they were both 13 years old when they disappeared from the fair, and were last seen leaving the area in a truck, and they have not been seen since that time.

The federally funded National Center for Missing and Exploited Children which has provided information on these and other cases to my office has asked that anyone having information about their whereabouts or the whereabouts of any of the other missing children you will hear about, call 1-800-843-5678.

I very much regret that after all this time, these two children have not yet been found, but the search goes on, and their parents and friends continue to hope and pray.

Mr. Speaker, I wish it were possible to predict that all of these cases will have happy endings. I am afraid that we cannot do that. When I first organized this special order for tonight, I had planned to discuss the case of 3-year-old Chris Gayner of Ponca City, OK, who disappeared from his home last February 24, and I am sad to report that his body was found in a pond near his home last week, and at last report, the authorities still did not know if he had met with foul play.

I know that all of my colleagues join me in sending our heartfelt condolences to Chris' family.

As we all know, television is one of the most effective methods of communication, and I hope it will prove to be

an effective tool in helping us to find these missing children. That is why I am going to continue to use the televised proceedings of the House to help find as many of them as possible, and I am pleased that so many of my colleagues have joined with me today in this very important effort.

When will we begin to solve the problem of missing children? Not until we strengthen the laws to punish those who kidnap our children; not until we punish those who abuse our children, and not until those who recognize the young men and women in these pictures begin to help us to return these children.

Mr. Speaker, I would now like to recognize a number of my colleagues who have asked to participate in this. Several have stated to me the need to go on fairly early, and I am going to try to proceed in the best order I can and would ask, because there is such a great interest here in doing this, that each Member limit his remarks or her remarks to 1 or 2 minutes so that we can have the opportunity to discuss as many of these cases as possible.

I would first like to recognize my colleague from Minnesota, Mr. STANGELAND.

Mr. STANGELAND. Mr. Speaker, I have been informed by the federally funded National Center for Missing and Exploited Children that a child of JoAnn Ayotte—a-ot—a constitutent, has been kidnaped. It is my hope that by participating in this special order, he or any of the other children mentioned here today will soon be found.

Kevin Jay Ayotte, age 5, of Bemidji, MN, was last seen playing in the upstairs of Mrs. Ayotte's cottage, September 30, 1982. Kevin has blue eyes, light brown hair, and when last seen, was 3 feet 2 inches tall and weighed approximately 60 pounds. He has an identifying scar on the right side of his chin.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having information about Kevin call 1-800-843-5678, or contact Sergeants Leach, Bergstrom, or Cross of the Bemidji Police Department at 218-751-9111.

Mr. Speaker, I would like to take this time to commend the recent private sector initiatives aimed at finding kidnaped and missing children. As many of us know, certain businesses have begun placing photos of such youngsters on mediums like grocery shopping bags and milk cartons. Last week, this led to the discovery of two girls in Washington State. While I realize the extensive role of Government in helping to rectify this unfortunate and tragic problem, I am pleased to see private citizens and business making great contributions for their fellow Americans.

Mr. EDWARDS of Oklahoma. I thank the gentleman from Minnesota.

I would like to now recognize the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. Mr. Speaker, each year between a half million and 2 million American children disappear. Christi Lynn Meeks, a youngster from my district in Mesquite, TX, is one of them.

Tonight, we do our small part toward fulfilling our obligation as representatives of a caring society to do everything possible to see that children like Christi Meeks are found and returned to their families.

Christi Meeks, whom police believe to be a victim of the child kidnaping that has become almost epidemic throughout the country, was only 5 years old when she was last seen playing with other children outside her east Dallas County home on January 19.

Christi's sixth birthday has come and gone in the weeks since her disappearance.

Christi is 3 feet 6 inches tall, weighs 40 to 50 pounds, has medium length brown hair, and has a missing lower front tooth.

Sadly, this young girl is just one tiny symbol of a national problem that has grown large and tragic.

Of the literally hundreds of thousands of children who disappear each year, some are abducted by strangers, some by family members or acquaintances. Some run away from and others are thrown out of their homes. And some are just lost or the victims of an accident and simply unable to find help.

Although many cases end happily with the safe return of a lost child, there are more than 50,000 unsolved child disappearance cases every year—almost equal to the 57,000 American lives lost in the 16 years of the Vietnam war. And every year there are hundreds upon hundreds of heartwrenching cases that end in tragedy.

I was proud to be a part of the last Congress response to the devastating problem that has touched the families of Christi Meeks and so many other children. As a cosponsor of the Missing Children's Act that established a national system to help trace and identify missing children, I am hopeful that we can further increase public awareness of the tragedy of missing children and help conduct coordinated searches that will restore lost children like Christi Meeks to their loved ones.

Mr. Speaker, the Mesquite, TX, Police Department and the National Center for Missing and Exploited Children ask that anyone who has information about this child of our community, Christi Lynn Meeks, or any other missing children, call the toll-free Missing Children Hotline: 1-800-843-5678.

Mr. EDWARDS of Oklahoma. I thank the gentleman.

I would like to recognize the gentleman from Florida [Mr. SHAW].

Mr. SHAW. I, too, would like to compliment the gentleman from Oklahoma for bringing this most important hour before this House.

Mr. Speaker, I have been informed by the National Center for Missing and Exploited Children that one of my young constituents has been kidnaped. I am participating in this special order, because I want to know that I have done everything necessary to call attention not only to this case, but to the tragedy of the other missing children that will be represented here tonight, in hopes that one or more of them will be found.

Maurice Jefferson, the young man whose photograph appears next to me, age 17 of Fort Lauderdale, FL, was last seen on November 28, 1983, when he left home to go to basketball practice. He never made it to practice.

He is a black male, 5 feet 11 inches tall, with brown eyes and black hair, and weighed 158 pounds at the time of his disappearance.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having information about Maurice Jefferson call 1-800-843-5678. That same number applies to most of these children you will be seeing photographs of this evening.

The problem of missing children, Mr. Speaker, unfortunately, is not a new one. In 1982, in response to a tragedy in my home district regarding Adam Walsh, a missing child later discovered murdered, I introduced the Missing Children's Act, which became law and provided for a National Computer Network for storing information regarding missing children.

I am pleased to see the National Center for Missing Children continuing its efforts in this cause and am pleased to have the opportunity to participate today, in hopes that our efforts will help locate some of these children.

Mr. EDWARDS of Oklahoma. I would like to recognize now the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. Mr. Speaker, once again I want to commend the gentleman from Oklahoma for his excellent work and commitment to this crucial issue. And, once again, I want to tell him that if just one solid lead comes out of this presentation and others like it, they are well worth our time.

And, unfortunately, Mr. Speaker, once again I am here to call attention to the case of Kevin Collins of San Francisco. I held up this photo of Kevin last year and I am sad to say that, as of this date, Kevin is still missing.

Kevin Collins, age 11, has been missing since February 10, 1984. Kevin, who is 4 feet 10 inches tall, weights 70 pounds, has brown hair and gray/

green eyes, left for school on the morning of the 10th as usual. He had basketball practice after school; therefore, he was not expected home until 6:30 p.m. Kevin left the St. Agnes Church gym in the Haight-Ashbury section of San Francisco at 6 p.m. to take the bus home. He was last seen at a bus stop, 1 block from the church.

That night, the police conducted an immediate search of the neighborhood. Later, scores of volunteers canvassed the area, going door to door and searching every inch of the surrounding parks and lots. These searchers yielded nothing; not then, and not since, although every lead is checked. Even Kevin's picture on milk cartons, grocery bags, and the cover of Newsweek has so far led to nothing, but we are still trying.

The Kevin Collins family and other concerned citizens have formed a foundation—the Kevin Collins Foundation—which is actively involved in both search and rescue operations and in changing policy procedures to effectuate a speedy return of missing children. They are also working with legislators to enact legislation and are developing briefing material for distribution to parents, teachers, child care providers, and children. So far the foundation has worked with 27 families in 11 States who face the trauma of the loss of their children.

We in Congress must continue our efforts to alleviate the pain and suffering of families like the Collins. Today's program is an important step. If we are successful in finding just one child, our efforts have been worthwhile. Kevin could be anywhere. He could be in the East, the West, the South, or the North. That is why this is so important. Again, I want to commend the gentleman from Oklahoma.

Anyone having any information about Kevin should contact the Kevin Collins Foundation at (415) 863-6333 or toll free (800) 272-0012.

□ 2040

Mr. EDWARDS of Oklahoma. I thank the gentlewoman from California.

Mr. Speaker, I would only point out, before I call on the next Member, that of the four people I have called on so far, two are Republican, two are Democrat, and it emphasizes to the whole country that this is an issue that knows no political dimensions. It is a concern that the whole country ought to share and to feel very deeply.

I yield to the gentleman from Colorado [Mr. KRAMER].

Mr. KRAMER. Mr. Speaker, we owe the gentleman from Oklahoma a real vote of thanks for his work on this tragic national problem.

More children are reported missing each day than lives were lost on Korean Airlines flight 007. We must commit ourselves to stopping this horrible exploitation of America's next generation.

The National Center for Missing and Exploited Children has a Colorado girl on its list of children missing and believed kidnapped.

Elizabeth Ann—Beth—Miller was last seen on August 16, 1983, walking past a friend's house near her home in Idaho Springs, CO. She is 15 years old, 5 feet 4 inches tall, 105 pounds, with blond hair and blue eyes. When she disappeared, Beth had no money or extra clothing with her. Foul play is suspected.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone with information about Beth Miller call 1-800-843-5678.

President Reagan recently highlighted the need to help find this Nation's missing children. In his remarks, the President mentioned another young missing Coloradan, Jonelle Matthews of Greeley, and I'd like to join President Reagan and my distinguished colleague from Colorado, Mr. BROWN, in urging people with information about Jonelle Matthews to call the National Center for Missing and Exploited Children at 1-800-843-5678.

Parents seeking help in finding missing children can also call the National Center for Missing and Exploited Children at the same number.

These two young people from Colorado are only the tip of the iceberg. About 1.8 million children were reported missing last year, and of that number 50,000 will probably never be found. Mr. Speaker, this needless exploitation of our Nation's most precious natural resource—our children—must be stopped.

Mr. EDWARDS of Oklahoma. I thank the gentleman for his comments.

Mr. Speaker, I yield to the gentleman from New York [Mr. MOLINARI].

Mr. MOLINARI. I thank the gentleman for yielding.

Mr. Speaker, I have been informed by the federally-funded National Center for Missing and Exploited Children that one of my young constituents, Holly Ann Hughes, is believed to have been abducted. I am joining my colleagues in participating in this special order because I want to do everything I can to help call attention to her case, in the hope that she might be found.

According to a fact sheet provided to me by the Center, Holly Ann Hughes, born January 23, 1974, of Staten Island, NY, was last seen July 15, 1981, at Park Avenue and Richmond Terrace, in Staten Island, NY. Holly, now 11 years old, has very blue colored eyes with long lashes, brown hair, and a very faint burn mark on her right forearm which is best seen when bathing or swimming.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having information about Holly Ann Hughes call 1-800-843-5678.

I am hopeful that our efforts today on behalf of missing children like Holly Ann, will be helpful in locating these innocent children. I thank my colleague, Mr. MICKEY EDWARDS, for taking this special order.

Mr. EDWARDS of Oklahoma. I thank the gentleman for his comments.

Mr. Speaker, I yield to the gentleman from Oregon [Mr. WYDEN].

Mr. WYDEN. I thank the gentleman and, like all of our colleagues, I want to tell him how much I appreciate his taking out this special order today.

Mr. Speaker, I rise today to bring attention to the case of a young boy who is missing from my district in Portland, OR. It is my hope that this special order may help to locate him.

His name is Luke Aaron Treadway. Luke is a white male; age 10; with brown eyes and blond/dark hair. He weighs 70 lbs. and is 4 feet tall. He was last seen on May 23, 1984, in Portland, OR.

Mr. Speaker, the National Center for Missing and Exploited Children and the Portland Police Department have asked that anyone having information about Luke Treadway call 1-800-843-5678.

I want to commend the National Center for Missing Children for their excellent work. Recently, John Walsh from the Center visited my district and discussed ways to increase public awareness to prevent the kidnaping and exploitation of children. In addition, I have been working with the Portland Public Schools and the police department to establish Project Safe Child—a cooperative effort to protect children in the Portland area.

I hope that these efforts will help to locate Luke Treadway and other missing children and will protect other young people from kidnaping or exploitation.

All of us are saddened to hear about youngsters who are missing. Let's work hard in the days ahead to make sure we hear more about youngsters who are found, safe, secure, and happy.

Mr. EDWARDS of California. I thank the gentleman from Oregon.

Mr. Speaker, I yield to the gentleman from California [Mr. LOWERY].

Mr. LOWERY of California. Mr. Speaker, each year hundreds of thousands of children disappear. Many of these innocent children are kidnaped.

While many return home safely, thousands are exposed to serious danger, exploitation, and even death. The criminal and sexual exploitation of children is a growing epidemic confronting families, communities, and

the agencies of our criminal justice system.

Mr. Speaker, no one is certain of the exact magnitude of the problem, but the National Center for Missing and Exploited Children estimates that at least 1,500,000 children are missing from their homes each year.

Additional estimates of the number of children who are the victims of noncustodial parental kidnaping vary from 25,000 to 500,000.

The estimated number of children abducted by unknown individuals ranges from 4,000 to 20,000.

Finally, between 20,000 and 50,000 children disappear each year whose cases remain unsolved.

Mr. Speaker, I have been informed by the California Center for Missing and Exploited Children that one of these victims is my constituent. I want to do everything I can to help call attention to the case, in the hope that he might be found.

According to a factsheet provided to me by the center, 6-year-old Adam David Falk of San Diego, CA, was taken from San Diego by his father who does not have legal custody, just 3 weeks before Christmas, on December 5, 1984. They are believed to be in the Sonora, CA, area. Adam has brown hair, brown eyes, and a pox scar beneath his right eye. Adam's birthday is December 30, 1978.

The California Center for Missing and Exploited Children has asked that anyone having information about Adam Falk call 235-4434 in San Diego or the national toll free line of the National Center for Missing and Exploited Children at 1-800-843-5678.

Mr. Speaker, recent studies show that 85 percent of the children who were criminally or sexually exploited were missing from their homes at the time they were abused.

Unbelievably, although the number of kidnapers convicted in U.S. courts increased 57 percent from 1983 to 1984, the percentage of those imprisoned actually decreased 36 percent. Furthermore, the average sentence in 1984 was only 14 years.

Mr. Speaker, legislation I have introduced, the Kidnaping Reform Act, H.R. 1318, addresses this grave and tragic situation by substantially reforming the Federal statutes with respect to the kidnaping of minors.

H.R. 1318 makes two major changes in Federal criminal kidnaping statutes. First, it requires mandatory minimum 10-year sentences without probation for those adults convicted of kidnaping children that are not related to them or who are not in their legal custody.

Second, the bill requires a mandatory life sentence for those who kidnap and seriously abuse the child victim. According to the measure, if the convicted kidnaper sells the child, sexually abuses the child, uses the child for pornography, intentionally denies the child food or medical care to a life-threatening extent, intentionally harms the child to a life-threatening extent, or causes the child to be subjected to any of these activities by another person, then the bill will require a mandatory life sentence without probation.

Again, any parent, grandparent, brother, sister, aunt, uncle, or legal guardian of the victim will not be affected by these mandatory minimum sentences. If any of these individuals are convicted of kidnaping in a U.S. court, current law will apply—providing for any sentence of years up to and including life.

Clearly, Mr. Speaker, this legislation is only a small first step toward addressing America's growing epidemic of child abduction. However, I am sure you will agree that it is a necessary first step to restore justice. I am sure my colleagues agree that those who sexually abuse or otherwise harm children should not go free. I encourage my colleagues to join me in supporting the Kidnaping Reform Act. Mr. Speaker I commend my colleague Mr. EDWARDS of Oklahoma for requesting this special order and allowing Members of Congres to participate in this very personal way in the battle to reunite children with their parents.

□ 2050

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from Colorado [Mr. BROWN].

Mr. BROWN of Colorado. I thank the gentleman for yielding to me.

Mr. Speaker, on December 20, 1984, 12-year-old Jonelle Matthews performed in a school choir concert and returned to her Greeley, CO, home for the evening. That was the last day her family saw her. She disappeared from her home that night, and it is feared that she was kidnaped.

Jonelle is 5 feet, 3 inches and weighs 115 pounds. She has brown hair and brown eyes, a full set of braces on her teeth and a scar under her chin. Jonelle and her family would have celebrated her 13th birthday in February. Information about Jonelle Matthews should be reported to local police or the Greeley, CO, police at 303-353-6123.

We should acknowledge the role of Eileen Huff, who has taken the lead in uniting concerned citizens in Greeley in helping to find Jonelle and other missing children throughout Colorado. Mrs. Huff's efforts to find Jonelle have included organizing a letter writing campaign to President Reagan, which prompted him in an address to the National Newspaper Association to ask for help in publicizing Jonelle's disappearance. She has also been active in contacting the news media, disseminating posters of Jonelle nationwide, initiating a countywide search for any clues of Jonelle's whereabouts and starting a fingerprinting program for children in Greeley.

What makes Jonelle Matthews' situation even more tragic is that Jonelle is only one of thousands of innocent American children who are abducted each year. The National Center for Missing and Exploited Children is established to help publicize and find missing children such as Jonelle. But, more efforts must be made to stop the exploitation of our country's most valuable resource—our children.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. I thank the gentleman for yielding to me.

Mr. Speaker, Jason Amini of Sagle, ID, was kidnaped by his father February 25, 1982

Jason and his father, Parviz Amini, were last seen at Los Angeles International Airport in California. At the time Jason had blond hair, brown eyes, weighed 75 pounds and was 4 feet 6 inches tall.

The whereabouts of the two is not known but speculation is that they are in the Silicon Valley of California or in France or Iran where the kidnaper father has relatives.

Jason will be 11 years old May 14th.

The real tragedy of Jason's story is that it is too common. The National Center for Missing and Exploited Children reports that every year there are at least one and a half million children missing from their homes. Of those, 1 million are thought to be runaways, only about 20,000 are abducted by strangers. As many as 500,000 are victims of parental kidnaping.

Just because these 500,000 victims of parental kidnaping are with a parent does not mean they are well. Many of the children kidnaped by parents are physically and sexually abused.

I hope this information will inspire all law enforcement officials and American citizens to view the kidnaping of a child by a parent just as they would view the kidnaping of a child by a stranger.

Whereever Jason is we hope that he will come home soon. We hope that all children victimized by kidnapers will find safety where there is danger, love where there is hate, and happiness where there is sadness.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. I thank the gentleman for yielding to me.

Mr. Speaker, I want to mention in this instance two boys specifically. One is Eugene Martin, who is 15 years of age. The West Des Moines Police Department could be called at the number of 515-283-4864.

The other one is John Gosch, and in that case, the Des Moines Police Department, he is aged 14, could be called at 515-246-9988.

However, I also want to mention this: In Iowa, there are almost 300 missing children. There is not just one or two. In neither one of these cases is it a parental abduction. As far as they know, they did not run away from home; they disappeared on paper routes, and the chances are very great that they did not run away.

But we know this: That 300 in the State of Iowa alone are missing, and that means that more people, whenever they see anything suspicious, should get ahold of the Center for Missing Children. We passed that last year, as some of you will remember, as part of the continuing resolution. It was funded in a bill that I handled prior to that time in anticipation that it would be passed.

They need to know all the information they can get to put into that computer.

□ 2100

Also, the FBI Director was before our subcommittee this morning and said that they are willing to take any calls if anybody has any trouble getting their information in to a local police department or in to a computer locally. Call the FBI and they will take care of it.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I would like to yield to the gentleman from Colorado [Mr. SCHAEFER] and would like to again urge my colleagues to try to keep their remarks to a minute or a minute and a half. We are going to use up our 60 minutes and not have time for everybody to participate.

Mr. SCHAEFER. I thank the gentleman for yielding, and I would certainly like to thank my colleague from Oklahoma, Mr. EDWARDS, for holding this special order tonight. It is indeed important to all of us.

Mr. Speaker, child kidnaping has become an American epidemic, with 160,000 children abducted each year. In my home State of Colorado, over 11,000 children are listed as having been abducted.

One of those children is Jerritt Jeramy Pace, or "J.J.," who was abducted from his home in Lakewood, CO, on March 3, 1981. Information provided to me by the Jefferson County, CO, Sheriff's Department and Mrs. Van Pace, his mother, reveal that he is of average height and weight, and has sandy brown hair and dark brown eyes. Jerritt is now 4½ years old, and has been missing for 3 years.

Mr. Speaker, the authorities have asked that anyone having information about Jerritt Pace call their local law enforcement agency or the National Center for Missing and Exploited Children's hotline at 1-800-843-5678.

While serving in the Colorado State Legislature I was very active in promoting legislation to prevent the abuse of children. This issue remains a top priority for me here in the House of Representatives. I support the National Center for Missing and Exploited Children and other Federal efforts to address this tremendous problem.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. I thank the gentleman for yielding, and I thank the gentleman from Oklahoma and all my colleagues for taking this time to deal with this very, very, very emotional and touching subject.

Mr. Speaker, I am joining my colleagues today to talk about the painful issue of missing children. It is important that we air this issue as broadly as possible so that people are aware of the number of missing children and the difficulties of finding them. I hope, as more people become aware of the severity of this problem, that they will watch out for the children in their neighborhoods and keep an extra close watch on their own children.

I have been informed by the National Center for Missing and Exploited Children that Jennifer Anne Douglas has been missing from her home in Denver, CO, since July 16, 1984. She is 17 years old, white, with gray/blue eyes and blond, curly hair that is shoulder length. She is 5 feet tall and petite, weighing about 87 pounds. She was last seen riding her bicycle in a Denver suburb. The bicycle is a black Univega, 12-speed with red wrapped handle bars.

The center has asked that anyone having information about Jennifer call 1-800-843-5678.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. I thank the gentleman for yielding.

Mr. Speaker, the problem of missing children is an increasingly growing concern for every individual, parent or otherwise, in our society today. The unfortunate fact is that over 1.5 million children are missing from their homes each year. While many of these children are found and safely returned home, many others, approximately 50,000 each year, remain unsolved cases. I am very concerned about this problem and am, consequently, participating in this special order to help call attention to it.

I have been informed by the federally funded National Center for Missing and Exploited Children that one of my young constituents has become one of these unsolved cases. According to a fact sheet provided me by the center, Jennifer Sophia Marteliz of Tampa, FL, age 9, was last seen on November 15, 1982, at approximately 3 p.m. about one block from her home after leaving school. Jennifer Marteliz is a white-Latin female, with dark brown eyes and black hair. On the date last seen, she was 4 feet tall and weighed 60 pounds. She was wearing an orange-pink dress with yellow flowers at the time of her disappearance; she had on maroon shoes, a hair comb with ribbons and flowers; and heart gold post earrings. She has pierced ears and three beauty marks located at the top bridge of her nose near the right eye, on her upper chest, and her collar bone. Since her disappearance, Jennifer Marteliz has been sighted once in Chantilly, VA, during April 1983. She was reportedly with a white female, age 25-30, who was approximately 5 feet, 5 inches tall and weighed 150 pounds.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having information about Jennifer Sophia Marteliz call 1-800-843-5678.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from Florida [Mr. LEWIS].

Mr. LEWIS of Florida. I thank the gentleman for yielding and think this is a very worthwhile program of the gentleman from Oklahoma.

Mr. Speaker, last May, 8-year-old Christy Luna innocently walked to her neighborhood general market in Greenacres, FL. Tragically, this beautiful brown-haired child has not been seen since that time. Local law enforcement officials in Greenacres believe Christy was the victim of foul play.

For the past 10 months, Christy's parents have agonized—waiting for word that their child is safe. She has brown hair, hazel eyes, weighs approximately 60 pounds, and is 4 feet tall. I ask that anyone with information about Christy call the National Center for Missing and Exploited Children at 1-800-843-5678.

Unfortunately, Christy Luna is only one of approximately 1 million-plus children who disappeared during 1984. The majority of these children are runaways. However, an untold number of these children were abducted. Shockingly enough, up to 50,000 of these children remain missing, and there is little information available to law enforcement to use in locating them. Clearly, this program is much too serious to ignore. We no longer can afford to be passive in protecting our children and simply hope that the problems of child abduction, sexual, and physical abuse will disappear.

Therefore, Mr. Speaker, I have introduced legislation which is a positive step we as Members of Congress can take to protect our children.

My bill, H.R. 604, provides matching grant funds for States to establish statewide missing children clearinghouses to operate within State law en-

forcement agencies alone or in cooperation with other State agencies. My bill encourages these State clearinghouses to educate parents, children, community agencies, and private organizations in ways to prevent abductions, to provide information to assist in locating and returning missing children, and to establish an in-State toll-free WATS line to report a missing child as quickly as possible.

I believe it is essential that there be a link between all levels of law enforcement—local, State, and national. After all, when a parent loses a child, they first go to the local police. Therefore, we should do all that we can to ensure that the police are experts in knowing how to handle this kind of situation.

These State clearinghouses can work hand in hand with the National Center for Missing and Exploited Children to ensure that everything is being done at every level to help locate and protect our children.

In addition, I have introduced House Joint Resolution 33, which designates April 29 to May 5 as National Child Safety Week. This special week will allow Members of Congress, community organizations, and local law enforcement officials the opportunity to work together to secure a child's safety.

For example—last year I helped to organize a Child Safety Weekend in my district, Members of my staff and volunteers from the community teamed up to help compile statistics for parents on their young children. Should one of these children later be reported missing, law enforcement will be armed with the kind of information that is critical for their search. Over 1,000 children participated in this event!

With the help of this booklet which is published by the ACTION agency, you too can help plan and participate in a Child Safety Day in your district.

Mr. Speaker, ensuring the safety of our children is no doubt one of the most important issues facing us as public servants today. Many private and community organizations are already working as a team to help solve the problems of missing children.

Let me express my appreciation to those colleagues who joined with me in cosponsoring House Joint Resolution 33 and I encourage all of you to cosponsor H.R. 604, to set up the much needed State clearinghouses.

In closing, I want to thank my colleague from Oklahoma, Congressman EDWARDS, for requesting this worthwhile special order, and once again, I encourage anyone who has information regarding Christy Luna, please call 1-800-843-5678, tonight.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. I thank the gentleman for yielding, and I thank my good friend and colleague, the gentleman from Oklahoma, for his public service this evening. It is the essence of what responsible membership in this body is all about.

We have heard the data, we have heard the statistics. There is no point in repeating it. I think it is important that we focus on the hard-core 50,000 who are lost for over a year each year, people who in some cases are never found and we know there are hundreds of children each year found but not identified, buried in John and Jane Doe graves around the country.

The horrifying statistics have motivated many parents, many community activists, and Congress got the message and in the enactment of the Missing Children's Act and the creation of the National Clearinghouse made our contribution to the solution of some of these problems.

I would simply like to mention and pay tribute to Senator PAULA HAWKINS of Florida and Senator and former Congressman PAUL SIMON of Illinois, who led the fight in the House of Representatives for that entity. It was PAUL who pointed out that we spent more time and money in our society computerizing and tracking lost vehicles than lost children. He set about to change that, and succeeded.

No community in this country is free of this frustrating dilemma. In my own congressional district, in the city of Fairfield, some 45 miles northeast of San Francisco, we have lost Clark "Toshiro" Handa, age 4. He was last seen August 23, 1984. An unknown suspect entered the Handa's residence, took Toshiro, and left a ransom note. Toshiro is of Asian descent and approximately 3 feet 2 inches in height.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having information about Toshiro Clark Handa call the familiar number, 1-800-843-5678, or contact the Fairfield City Police Department at 1-707-426-5505. Any assistance would be greatly appreciated by the parents of this young fellow who have not heard from him or seen him for almost a year now. Let us not let him become one of those unidentified bodies. Let us see whether or not the attention that you give tonight to this special order will produce the breakthrough that the Handa family needs.

□ 2110

Mr. EDWARDS of Oklahoma. I would like to again remind my colleagues that we have about eight more Members who have said they want to participate and our hour is running short, so make it as brief as you can.

Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Mr. Speaker, I thank the gentleman for yielding. I thank him for his excellent and impassionate work on this very important issue. I wish I did not have to be here tonight to show these beautiful, but tragic pictures, but I do welcome the opportunity to play some role to help parents locate their missing children.

I hope that, after hearing about the plight of these children, my colleagues will join me and other interested Members in holding child safety programs to fingerprint, photograph, and hold safety training courses. Let me assure my colleagues and all parents that these efforts will not result in any invasion of privacy. They are voluntary and all documents, such as fingerprints and photographs, are turned over to the parents to keep in case their child is ever taken. We can provide help so that parents and police can work quickly together to identify and recover missing children.

I have been informed by the National Center for Missing and Exploited Children and Children's Rights of Pennsylvania that 3 young children from my district have been taken. This is tragic. Indeed, it's criminal.

Mr. Speaker, the first child is Louis Mackerly. He is now 8 years old. He was born on February 15, 1977, and was last seen in Allentown, PA, on June 7, 1984. He has not been seen or heard from since. He had four front teeth missing, blonde hair, blue eyes, weighed about 44 pounds and is about 4 feet 1 inch. He uses medication in the form of Ritalin, which must be administered twice daily and without medication may have memory lapses. He is reported to be very friendly and uninhibited. He likes to be near the water, and likes to fish. He usually stands and converses with both or one hand on his hips. He walks with a slow gait, head down and leans forward.

Mr. Speaker, the second and third children are brother and sister. They are James Karl and Jessica Laura Watts. They were last seen on May 9, 1982, in Allentown, PA. Jessie was born on November 22, 1975, and is 9 years old. She has light brown hair and brown eyes. Jimmy was born on March 13, 1978, and is 7 years old. He has blonde hair and blue eyes.

The question has been asked: "Am I my brother's keeper?" Mr. Speaker, I want to asure my colleagues that we, the parents and adults are the keepers of the children. No parent can be with their children 24 hours a day. We send them off to school, off to play, and entrust them at times to the care of other adults. The children of this world and of our country occupy a special place. There is a trust amongst adults that children are to be cared for and not abused, stolen, or exploited. In the case of Louis Mackerly, and

Jimmy and Jessie Watts, that sacred trust has been broken.

Anyone who has information related to these three children should please call 1-800-843-5678.

I want to thank my colleague, the gentleman from Oklahoma [Mr. EDWARDS], for arranging this special order for us today. His leadership on this issue, is deeply appreciated by his colleagues and the thousands of families nationwide who wait for news of their child.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from New Hampshire [Mr. SMITH].

Mr. SMITH of New Hampshire. Mr. Speaker, I thank my colleague from Oklahoma and all the individuals who have participated in this special order today.

Mr. Speaker, one of my young constituents has been missing since November 13, 1984. I am participating in this special order because I want to do everything I can to help call attention to the case, in the hope that she might be found.

Her name is Tammy Belanger. She is from Exeter, NH. She is 8 years old, has long brown hair and brown eyes. She is 4 feet 6 inches tall, and slender. Like thousands of children, Tammy started off to school that morning of November 13 and has not been seen by her parents since. The National Center for Missing and Exploited Children assist parents and local enforcement officers in finding missing children.

I ask that anyone having information about Tammy Belanger call their number 1-800-843-5678, toll free.

Mr. Speaker, Exeter is a small New Hampshire town of 11,000. Child abuse and kidnaping, as we all know, has encompassed all areas of the Nation. It is not limited exclusively to metropolitan cities. It has raised its ugly head in smalltown America as well. Something must be done. The FBI reports that sexual offenders have the highest rate of repeat offenses. Seventy to ninety percent will be released to repeat their crimes. Reports on missing children are equally staggering. Child kidnaping by strangers ranges from low estimates of 5,000 to as high as 20,000 yearly. Those of us in Congress must make a bipartisan effort to enact strong legislation confronting this frightening and repulsive tragedy facing our families and especially our children.

I have cosponsored H.R. 605 which amends the criminal code to provide a mandatory life sentence for any nonparent who kidnaps an individual under the age of 18, and imposes the death penalty in cases where the victim dies as a result of the kidnaping. We have the power and the responsibility to keep these criminals away from our children. It is time to get on with that job.

Mr. Speaker, the hope of rehabilitating any 5, 10, 20, or even 50 time offenders is not worth risking the safety of one innocent child. We must get these despicable people off our streets and we must help their victims. Mr. Speaker, $3.9 million was spent last year for Government chaffeur driven limousines for low level government officials. How many children like Tammy may have been found with that money?

Mr. Speaker and my colleagues, please help us find Tammy Belanger and bring her home.

Thank you, Mr. Speaker.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. COYNE].

Mr. COYNE. Mr. Speaker, I thank my colleague, Mr. EDWARDS, for calling this special order. I am here today to call attention to the case of one of my young constituents, Nicole Lynn Bryner, who has been missing for 3 years.

According to the National Center for Missing and Exploited Children, Nicole was abducted on March 11, 1982, from a shopping cart in a southside Pittsburgh, PA, grocery store where she was shopping with her mother. This is a picture of Nicole taken shortly before her abduction. At the time she was 3 years old. She is a white female with brown hair and brown eyes and had her sixth birthday on March 11, 1985.

The National Center has asked that anyone having information about Nicole call 1-800-843-5678.

It is my hope that through the combined efforts of all concerned citizens Nicole and other missing children will be reunited with their families and through increased public awareness these tragic situations can be prevented in the future.

I want to thank the gentleman from Oklahoma for taking this time.

Mr. EDWARDS of Oklahoma. Mr. Speaker, I thank my colleague.

I told my colleagues that I have good reason to believe that the Speaker in his great kindness is going to see to it that we all do get to participate.

Mr. Speaker, I yield to the gentleman from Texas [Mr. COMBEST].

Mr. COMBEST. Mr. Speaker, as I am sure you are well aware, approximately 1.5 million children are reported missing each year. Many of these youngsters are subjected to great danger and exploitation. Others are never returned to their homes safely. This problem is escalating, and it is my belief that the 99th Congress must seriously consider legislation imposing stringent Federal penalties on kidnapers and child abusers.

The National Center for Missing and Exploited Children, which assists families and law enforcement agencies in these matters, has informed me that one of my constituents is missing. I am participating in this special order program in an effort to give his case public exposure. I hope that this publicity will help to bring the long search for this young man to an end.

According to the list of vital statistics that the center has provided me with, Chris Harvey of Andrews, TX was last seen on Wednesday, July 11, 1984 in Pagosa Springs, CO. Chris had been vacationing with his parents at their summer home in Colorado when he disappeared. On the morning of July 11, Chris packed his bags in preparation for the return trip to Texas. He went less than 100 yards from his parents' home to say goodbye to some friends, left the friends' home but never returned to his parents' house.

The National Center for Missing and Exploited Children tells me that Chris' parents have exhausted nearly every resource available in the search for their son. Chris has no history of running away, did not take any money and has not attempted to withdraw his money from the Andrews Texas Bank.

Chris Harvey is 15 years old, 5 feet 11 inches tall and weighs approximately 135 pounds. His hair is light brown and his eyes are hazel.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having any information about Chris call toll free, 1-800-843-5678. It is my sincere hope that someone, somewhere in the country will have information that would help Chris.

Because I find this case as well as the rising numbers of missing children so disturbing, I am cosponsoring legislation that would make two significant changes in Federal criminal kidnaping statutes. The first provision of H.R. 1318, Congressman BILL LOWERY'S Kidnaping Reform Act, requires a mandatory minimum 10-year sentence for those adults who kidnap, but do not harm, children who are unrelated to them or who are not in their custody. Second, H.R. 1318 would require a mandatory life sentence for those adults who kidnap and abuse a child that is unrelated to them or not in their custody.

Mr. Speaker, I would like to urge my colleagues to cosponsor H.R. 1318. A bill such as this transcends partisan limitations, since the constitutional rights of our children are being seriously violated. As legislators, we must stiffen the Federal penalties in an effort to eliminate the terrible crimes being committed against young people like Chris Harvey.

Again, any persons having information about Chris Harvey should call the National Center for Missing and Exploited Chidren at 1-800-843-5678.

□ 2120

Mr. EDWARDS of Oklahoma. I now yield to the gentleman from Colorado [Mr. WIRTH].

Mr. WIRTH. I thank the gentleman from Oklahoma for this excellent service to families and children throughout the country.

Mr. Speaker, I am participating in this special order today to aid the National Center for Missing and Exploited Children in locating a constituent from my district. On the afternoon of August 16, 1983, Elizabeth Ann Miller of Idaho Springs, CO, decided to go jogging after school. She asked her younger sister to run with her, but her sister was not properly dressed and could not go. Elizabeth has not been seen since that day. She had no extra clothes or money and foul play is suspected.

Before her abduction, Elizabeth was 5 feet 4 inches, and weighed 105 pounds. She had long blond hair and hazel-green eyes. Elizabeth was to have celebrated her 15th birthday with her family this past summer.

We cannot possibly imagine the trauma and uncertainty that her parents have been through in this ordeal. Anyone having information on her whereabouts should report it to the National Center at 1-800-843-5678 or contact the Idaho Springs Police in Colorado at (303) 567-4421.

Mr. Speaker, Elizabeth's case is one of millions throughout Colorado and the Nation. Indeed, the pictures of two other Colorado children will be shown here today who have suffered similar fates as Elizabeth—Jonelle Matthews of Greely and Jennifer Douglas of Denver. More than 1.5 million children have been disappearing each year—this is a national problem we cannot ignore.

I join my colleagues in condemning this senseless abduction of American children. Through continued sessions like this in Congress, and increased funding and expansion of the National Center for Missing and Exploited Children, we can help increase the focus on this problem, and locate children like Elizabeth Ann Miller.

Thank you, Mr. Speaker.

Mr. EDWARDS of Oklahoma, I now yield to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. I thank my colleague from Oklahoma and congratulating him on his leadership in bringing this subject once more to the attention of our colleagues and to a saddened country.

I dare say there is not a single Member of Congress of the 535 Members of the House and the other body who do not have a missing child or missing children in their districts. In the case of my district, the Eighth District in New York, one of my constituents has been missing since last July 16, Antonella Mattina.

This beautiful, lovely girl is 12 years old, 5 feet tall, white, brown eyes, and weights 90 pounds. She was last seen as she walked to the Flushing Lindenvue Shopping Center, last July 16, as I said.

The National Center for Missing and Exploited Children, and the 109th Precinct in New York have asked that anybody having information about Antonella Mattina or her whereabouts will please call the National Center toll free at 800-843-5678. The plight of these missing and exploited children is one that should concern us all. It is not only the tragedy of the kids themselves, these beautiful children whose pictures you have seen one after the other, one more delightful and beautiful than the next, but it is the anguish and the heartache that besets the parents as well as the communities from whence they came.

I thank my colleague.

Mr. EDWARDS of Oklahoma. I now yield to the gentleman from New York [Mr. LAFALCE].

Mr. LAFALCE. I thank the gentleman from Oklahoma for yielding and for his efforts.

Mr. Speaker, child abduction is probably the most tragic crime committed in this country. Today, a number of my colleagues and I are joining in an effort to find some of these children and return them safely home. The federally funded National Center for Missing and Exploited Children has asked me to discuss a particular youngster from my district who has been kidnaped.

Russell John Mort was abducted from a fenced-in yard in Niagara Falls, NY, on May 5, 1982. According to information provided by the Center, the child has light brown hair, brown eyes, weighed 30 pounds, and was 3 feet tall when he was kidnaped, and is now 5 years old.

Possible suspects in this crime are a white female in her midtwenties with dark brown curly hair and a white male in his late twenties to early thirties with light brown hair and a mustache. They were seen driving a 1965 white Corvette with a black convertible top with a child in the area of Hyde Park Boulevard and Packard Road in Niagara Falls the afternoon that Russell was missing.

The National Center for Missing and Exploited Children has asked that anyone having information about Russell John Mort call 1-800-843-5678.

Much has been accomplished in the years since the disappearance of a child, Adam Walsh, focused national attention on the heinous crime of child abduction. As the result of a law which I coauthored in 1981, the Missing Children Act, names and descriptions of children reported missing are entered into a computer at the National Crime Information Center run by the FBI. Mandating that the FBI utilize its resources to assist in child abduction cases was a necessary first step, but much, much more needs to be done to coordinate State, local, and Federal agency efforts to locate missing children.

Mr. Speaker, as a parent I understand the anguish and personal suffering that must be endured by parents of kidnaped children. I will continue my efforts to locate children who are missing and to hopefully prevent any further tragedies. If today's undertaking results in the reunion of even one child with his or her parents, our efforts will not have been in vain.

Mr. EDWARDS of Oklahoma. I now yield to the gentleman from Kentucky [Mr. MAZZOLI].

Mr. MAZZOLI. I would like to first thank my friend and colleague from Oklahoma [Mr. EDWARDS] for having sponsored this special order.

Mr. Speaker, in an effort to build an awareness across this land of the extent of the tragedy of missing children, today the House of Representatives is conducting a special order on missing children.

I commend our distinguished colleague from Oklahoma, MICKEY EDWARDS, for arranging this special order to give us the opportunity to bring to the people of the United States a special awareness of this tragedy touching all of our congressional districts; all of our lives.

Annually, nearly 2 million children disappear from their homes. Some are runaways. Many are taken by estranged parents. Some are abducted by strangers. This tragedy of missing children has touched my district in a most poignant and heart-rending way.

On June 1, 1983—almost 2 years ago—12-year-old Annya "Ann" Gottlib disappeared from the Bashford Manor Shopping Mall in Louisville. All Federal, State, and local law enforcement agencies and their personnel have cooperated and coordinated. Our community has come together like never before in support of efforts to locate Ann. But, unfortunately, Ann has not been found.

Ann was born May 5, 1971. She has auburn hair and grey eyes. Distinguishing marks include freckles, pierced ears, white eyelashes and eyebrows. Ann is a Russian Jewish emigree who speaks fluent English and Russian.

If anyone has information about Ann Gottlib, please contact the Louisville Office of the Federal Bureau of Investigation, at 502-583-3941, or call the missing children's toll free hotline: 1-800-342-0821.

The plight of families of missing children is anguishing. They deserve our prayers and our help.

● Mr. GARCIA. Mr. Speaker, I have been notified by the National Center for Missing and Exploited Children

that one of my young constituents has been kidnaped. I am participating in this special order because I want to do everything I can to help call attention to this case, in the hope that he might be found.

Kirk Quintons, from the Bronx, NY, is the tragic victim of abduction. At the tender age of 12 years old, this personal, loving child was cruelly removed from his home, family, and friends for no apparent reason on September 18, 1983. He is a black male, 4 feet 9 inches, weighs 70 pounds, with brown eyes and black hair. If anyone has any information about Kirk Quintons, please call the Center for Missing and Exploited Children at 1-800-843-5678.

Unfortunately, Kirk's case is not unique or an isolated incident. As many as 1.5 million cases of missing children are reported each year, 50,000 of which remain unsolved. Frequently, these children are victims of street crime and exploitation, and many become the tragic victims of homicide. Unfortunately, those children who survive abduction from their families usually return with lasting physical, emotional, and mental problems. As the problem has reached epidemic levels, I'm glad to see the Federal Government assisting citizen groups crack down on the sick people who would commit such crimes. The Government's participation is helping to alleviate the agony of the victims of this tragedy.

Prior to October 1982, when the President signed the Missing Children Act, which allowed parents access to a central computer file to help trace missing children, there had been no Federal initiative to help parents or law enforcement agencies in the search for missing children. By June 1984, the first nationwide center to assist parents in locating missing children was launched. The National Center for Missing and Exploited Children was established by a $3.3 million grant from the Department of Justice's Office of Juvenile Justice and Delinquency Prevention.

The Center's mission is to help parents like Mrs. Quintons alleviate the nightmare that strikes thousands of families each year. As a clearinghouse for data on missing and exploited children, it is able to distribute photos and descriptive information on missing children to the various media, in the hope that they will be found. While it provides a national clearinghouse of information on State and Federal legislation directed at the protection of children, its goal is toward a positive and permanent change.

The Center has already made significant progress in the area of prevention. By establishing a national conference it has brought together vast numbers of experienced professionals who are experts on the issue of missing children. By sharing their expertise with parents, law enforcement personnel, and community leaders, they are helping to deter the problem of missing children. The implementation of a coordinated, communitywide Child Safety Day Program is helping both parents and children tremendously in prevention efforts. By receiving safety tips from their parents, children understand that they are loved and learn how to become safety conscious. I would like to commend the efforts of the National Center for Missing and Exploited Children, and I'm praying for the success of its conscientious efforts to help return Kirk Quintons to his family.●

● Mr. STRANG. Mr. Speaker, last month President Reagan issued a plea to newspaper publishers, to help in the national effort to find missing children. The President cited as an example of the more than 1 million children who disappear from their homes each year, 13-year-old Jonelle Matthews, from Greeley, CO.

In my Third Congressional District of Colorado, 15-year-old Chris Harvey, disappeared from his parents summer home near Pagosa Springs, CO, in July last year. Chris has not been heard from since that time. Of course, there are other missing children from Colorado. It is a national tragedy.

The National Center for Missing and Exploited Children was opened last year as the first of its kind central locator system to help parents, the justice system and other organizations in locating, identifying, and returning missing children. The Center follows congressional action in 1982 which saw the passage of the Missing Children Act.

The plight of Jonelle Matthews and Chris Harvey, and the others, should encourage all citizens, volunteer organizations, and private industry leaders to participate in this national effort to address this very serious problem. I am pleased the President cited Jonelle's particular plight as a method of calling national attention to the need of all who have the ability and means to do so, to publicise the descriptions of the children who are missing. The effort that is being made today in the House of Representatives to give greater exposure to the problem and some of the children who are missing from around the Nation, allows us to get involved as well. Our efforts will continue.

I want to encourage people across the Nation, and especially our constituents in Colorado, to use the special toll-free hotline number that is available from the National Center for Missing Children: 1-800-843-5678, if they have any information they believe may be helpful in locating our missing children.

Thank you.●

● Mr. STANGELAND. Mr. Speaker, I have been informed by the federally funded National Center for Missing and Exploited Children that a child of JoAnn Ayotte, a constituent, has been kidnaped. It is my hope that by participating in this special order he or any of the other children mentioned here today will soon be found.

Kevin Jay Ayotte, age 5 of Bemidji, MN, was last seen playing in the upstairs of Mrs. Ayotte's cottage, September 30, 1982. Kevin has blue eyes, light brown hair, and when last seen was 3 feet 2 inches tall and weighed approximately 60 pounds. He has an identifying scar on the right side of his chin.

Mr. Speaker, the National Center for Missing and Exploited Children has asked that anyone having information about Kevin call 1-800-843-5678, or contact Sergeants Leach, Bergstrom, or Cross of the Bemidji Police Department at 218-751-9111.

Mr. Speaker, I would like to take this time to commend the recent private sector initiatives aimed at finding kidnaped and missing children. As many of us know, certain businesses have begun placing photos of such youngsters on mediums like grocery shopping bags and milk cartons. Last week, this led to the discovery of two girls in Washington State. While I realize the extensive role of Government in helping to rectify this unfortunate and tragic problem, I am pleased to see private citizens and business making great contributions for their fellow Americans.●

Mr. EDWARDS of Oklahoma. Mr. Speaker, I want to thank all of my colleagues who participated in this special order. I know that we speak for all of the Members of the House of Representatives in urging people to be aware of this very special problem, and help us locate these missing children.

I would close by simply repeating if you have information about any of the children that we have talked about, or any other children who are missing, if you would either contact your local police, contact your Congressman, or contact this toll free phone number: 1-800-843-5678. Then maybe together we can bring these children back home safely to be with their parents again.

I thank the Speaker.

□ 2130

FREEDOM OF HOUSE BROADCASTING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. LOTT] is recognized for 60 minutes.

● Mr. LOTT. Mr. Speaker, today I am introducing the "Freedom of House

Broadcasting Resolution of 1985," a new House rule to ensure the complete, unedited, and uncensored broadcast coverage of all House proceedings.

Mr. Speaker, 6 years ago last month the House began providing live audio and visual broadcast coverage of its floor proceedings to all accredited stations, networks and cable systems. Since that time we have seen our exposure from that coverage expand considerably, especially with the growth of cable systems in this country and the gavel-to-gavel coverage of our proceedings by the Cable Satellite Public Affairs Network, more popularly known as C-SPAN.

As a result of this exposure, I think the American people have benefited immensely, both in terms of learning how their democratically elected Government operates, and of being informed on the important public policy issues of the day. The House did the right thing in opening the TV window on this Chamber to the American people. And the broadcast networks and stations, particularly C-SPAN, are to be commended on using this coverage and helping to bring our citizens that much closer to their elected Representatives and the decisionmaking process.

HISTORY OF THE BROADCAST RULE

Mr. Speaker, the present House broadcast rule, clause 9 of House Rule I, under "Duties of the Speaker," is taken from language developed by our late rules subcommittee chairman, Gillis Long, and introduced as House Resolution 821 in the 95th Congress. I was then, and still am the ranking Republican on that subcommittee, now known as the Subcommittee on the Legislative Process and now chaired by our colleague from South Carolina [Mr. DERRICK]. And in that Congress it was my substitute for the Long resolution that was reported by the Rules Committee as House Resolution 866 and adopted by the House.

I do not claim any particular pride in authorship because my resolution simply changed the Long resolution from a House rule to a tentative authorization for House broadcasting that conditioned the final go-ahead for going public on the completion of a further study of broadcast alternatives by the Rules Committee. It was my feeling, for instance, that the only choice up to that point was between a House-operated and a network pool-operated system. Insufficient consideration had been given, for instance, to having the Public Broadcasting Systems [PBS] provide the coverage of our proceedings as was being done in States such as Florida.

The House adopted my resolution on October 27, 1977, by a vote of 342-44. On February 15, 1978, the Rules Committee, again under the leadership of Chairman Long and his subcommittee, filed its final report entitled, "Broadcasting the Proceedings of the House: Alternative Methods of Providing Complete and Unedited Audio and Visual Broadcasting of the Proceedings of the House of Representatives." The central recommendation of that report was that, "House should operate its own broadcast coverage system, following the example and building on the experience of the Canadian Parliament." The report rejected the network pool in part because the networks "demand the right to move the cameras away from the principal and official action of the proceedings." The proposed House system, on the other hand, would focus only on the person speaking.

That final report also contained four separate sets of views, three of which, including my own, questioned the advisability of that alternative. Congressman Sisk of California said "the best interests of the House would be served by allowing professional broadcasters to cover the proceedings," and suggested that the public might view a House-owned system "as some form of censorship * * * that the House is trying to hide something."

Congressman Anderson of Illinois expressed support for the network pool alternative as the least expensive, most technically competent and most compatible with first amendment rights and considerations.

Finally, my own views in that report included the observation that, of overwhelming importance is the certainty that any in-House system will appear to be politically motivated—another benefit to incumbents with the taxpayers footing the bill. And I went on to say:

> I fail to perceive of any way to avoid this appearance under a House owned and operated production. Instead of improving our credibility with the public by installing our own system we may very well be contributing to our less than popular image.

While the filing of that report was the only authority needed by the Speaker to proceed with implementing a system and making it available to the public, the House was given an opportunity to choose between the House-operated and network pool alternatives in June of that year when amendments were offered to the legislative branch appropriations bill. The House-operated system was upheld on a vote of 235-150 as a substitute for a network pool amendment.

The language from House Resolution 866 was incorporated into House rules the following January when the 96th Congress convened, and 2 months later, on March 19, 1979, the first public transmission of our debates went out over the airwaves.

TODAY'S PROBLEMS

Mr. Speaker, I have offered this brief history of the House broadcast rule because I think it is important to have some sense of where we have been if we are to determine where we should be going. The central issue which ran throughout the years of debate on House broadcasting was, "Who should control the cameras?" It is an issue which is still with us today and which was particularly underscored in the last session when the Speaker suddenly instituted a new panning policy of showing wide-angle shots of the entire House Chamber during special order speeches at the end of the day. The policy was presumably designed to show the public that the Chamber is usually nearly empty during such special order speeches, though such a truth-in-broadcasting policy apparently does not apply when committee chairmen are managing legislation during the earlier part of a day. As was brought out during the Speaker's own defense of his new policy, he did not like what some Republican Members were saying about the Democrats, and therefore decided to show the people that no one was there to listen or respond to such charges.

No one should object to giving the American people a bird's-eye view of the entire House Chamber, and the extent of Member attendance at any debate, so long as it is on a uniform basis throughout the day. However, the fact that such a policy was being applied only during that part of the day which Republicans tend to then dominate with their speeches, gave understandable rise to the charge that the House TV system was being manipulated for partisan purposes. Our worst fears of partisan news management and censorship were being realized. Ironically, it was the Speaker who was now engaging in the type of panning the Rules Committee had feared the network pool would use to embarrass the House and distort its proceedings.

TIME FOR A CHANGE

Given this evolution of the House broadcast system, I think it is time to reassess its present operation and control with a view to assuring a more balanced and objective means of covering our proceedings. I am not proposing that we ressurect the network pool option, nor the public broadcast alternative that I thought was worth further exploration back in 1978. I think we must begin with the premise that we now have a House-owned system that is of high quality, both technically and professionally. There is no need to junk what we now have—to throw the cameras and crew out with the bathwater. Instead, we must seek ways to refine the system and properly insulate it from both the prospect and perception of partisan manipulation, control, and censorship.

The resolution which I am introducing today is entitled the "Freedom of House Broadcasting Resolution" be-

cause it is designed to both free the TV system from the potential for partisan manipulation and control, and to restore the First Amendment freedoms of broadcasters who should be entitled to cover this Chamber with their traditional tools, just as print journalists are permitted to record our proceedings with their tools, rather than being forced to rely on our doctored RECORD.

PROVISIONS OF RESOLUTION

Under my proposal, the Speaker would still retain ultimate authority and responsibility for the House broadcast system since under our precedents and rules, the Speaker has absolute authority over the Chamber and the galleries. However, to assist the Speaker in this responsibility, there would be created a completely bipartisan Broadcast Advisory Board consisting of the majority and minority leaders and two other Members from each party. At present the Speaker presumably has a broadcast advisory committee consisting of two Democrats and one Republican, but it was completely defunct for nearly 4 years, and has yet to meet since its reconstitution late last year.

The other important aspect of my resolution is the provision that turns the daily operation of the broadcast system over to the Executive Committee of the Radio and Televison Correspondents' Galleries—the group which represents all the professional broadcasters accredited to the Congress. The Executive Committee would have responsibility for the hiring and supervision of the broadcast system's personnel, and for establishing the daily camera coverage policies. The resolution does require, however, that coverage by gavel-to-gavel, including special orders, a view of the Chamber while Members are voting, and periodic views of the entire Chamber on a uniform basis throughout the day in conformance with acceptable standards of House dignity and decorum.

Finally, the resolution vests in the Clerk, again subject to the direction and control of the Speaker, responsibility for purchasing equipment for the system and paying its employees; and in the Library of Congress responsibility for maintaining the recording of our proceedings for viewing and research purposes.

CONCLUSION

Mr. Speaker, it is my hope that the Rules Committee will give my proposal serious consideration as it exercises its oversight responsibilities for the House broadcast rule and system. I think my resolution will restore credibility to the system by freeing it from political control and restoring the First Amendment freedoms of broadcasters. At the same time it will ensure that coverage will continue in a manner that does not detract from the dignity and decorum of our proceedings.

At this point in the RECORD I include a brief summary of the "Freedom of House Broadcasting Resolution." The summary follows:

BRIEF SUMMARY OF LOTT FREEDOM OF HOUSE BROADCASTING RESOLUTION

Sec. 1. Title.—"The Freedom of House Broadcasting Resolution of 1985."

Sec. 2. House Rules Amendments.—(a) House Rule I, clause 9, the current House broadcast rule, would be stricken in its entirety; (b) a new House Rule LI would be added, entitled, "Broadcast Coverage of House Floor Proceedings."

Clause 1. Establishment of System.—A House Broadcast System would be established to provide complete and unedited coverage of House proceedings while the House is in session, including coverage of voting, special orders, and periodic views of the entire Chamber on a uniform basis throughout the day.

Responsibility for the implementation of the broadcast system would be vested in the Speaker who would be assisted by a completely bipartisan, six-member Broadcast Advisory Board.

The responsibility for the daily operation of the system, including the designation and supervision of employees and formulation of camera coverage policies, would be vested in the Executive Committee of the Radio and Television Correspondence Galleries.

The Clerk would be responsible for the purchase of equipment and compensation of employees,

Clause 2. Access to Coverage.—All accredited broadcast stations, networks and systems would have access to live coverage, as would House members and congressional offices. Coverage or recordings could not be used for commercial or partisan political purposes.

Clause 3. Storage of Recordings.—The Library of Congress would be responsible for maintaining recordings of House proceedings for viewing and research purposes.●

HONORING ANN CHIESA PORTO OF SAN GABRIEL, CA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. MARTINEZ] is recognized for 30 minutes.

● Mr. MARTINEZ. Mr. Speaker, I rise to pay tribute to an outstanding woman from the 30th Congressional District of California, Ann Chiesa Porto. Ms. Chiesa Porto has performed significant work as a registered nurse with the Community Hospital of San Gabriel, and, also, in donating many hours to community service.

Her distinguished accomplishments in both areas prove numerous. At the Community Hospital she has been instrumental in organizing the Auxiliary and Candystriper Program, in designing the first portable supply cart for cardiac arrest patients, in helping to formulate the format for the Stroke Rehabilitation Nurse Program, in devising a program to assist patients and families to deal with grief, and in developing a community outreach program for the widowed.

Given her remarkable record at the hospital, Ms. Chiesa Porto has, suprisingly, found the time for service to the community. She is an active member of the San Gabriel Mission Church and teaches nurse aide classes at San Gabriel High School. She is the president of the Soroptimists, a member of the San Gabriel Chamber of Commerce, and on the board of directors of the Young Men's Christian Association, the Boys' Club of West San Gabriel Valley, and the Disabled Veterans' of Greater Los Angeles.

Our town has rightfully recognized her complete dedication and hard work by giving her many honors, including the Distinguished Service Award of the Community Hospital, the Century Club Award of the YMCA, and the San Gabriel Chamber of Commerce's Business Woman of the Year Award.

She has, in addition, won the admiration of all those, including myself, who are familiar with her work. It seems to me that she deserves the title of "Superwoman" for all her great, unselfish accomplishments. I am proud to call Ann Chieso Porto my constituent. I wish her continued success in future endeavors.●

THE TRUTH ABOUT THE POLYGRAPH TEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut [Mr. MCKINNEY] is recognized for 15 minutes.

● Mr. MCKINNEY. Mr. Speaker, today I am introducing legislation to prohibit the use of polygraph—lie detector—tests in connection with applications for employment or as a condition of continued employment in private industry. There are many pressing issues presently before Congress—from the Federal deficit to taxation reform; from the plight of our farmers to the fight against nuclear war. In addition, there are many pressing issues affecting our country which have not yet gained national attention and which deserve serious consideration by the Congress of the United States. One of these matters is the use of the polygraph test in private industry. We, in Congress, and as a nation, cannot afford to ignore the frustration, humiliation, indignation, and injustice brought upon so many American citizens by the use of the polygraph.

Each year, hundreds of thousands of those seeking employment and those striving to remain employed are subjected to the polygraph test. This subjection is both an infringement upon one's constitutional right to privacy and an obstruction to the free flow of interstate commerce. These so-called lie detection tests supposedly are administered by companies to protect themselves from in-house pilferage

and other undesirable activities on the job. Instead, the polygraph, by systematically labeling innocent and honest people as liars, cause both the prevention of hiring and dismissal of reputable and productive personnel.

It is well known that the reliability of polygraph tests is extremely suspect. The polygraph machine itself cannot detect lies. The machine only measures simple physiological reactions such as heart and respiration rates and perspiration—reactions certainly not unique to being deceptive. A person's physiological reactions may be affected by a number of factors, including nervousness, mental condition, moral attitude toward lying, physical handicap, and the polygraph examiner.

Another crucial factor regarding polygraph reliability is that while the machine is the instrument which measures reactions, it is the polygraph examiner who interprets the physiological reactions and makes the final conclusions on who is and who is not lying. This allows for potential false readings of the test, further magnifying the problem of polygraph inaccuracy, and further increasing the likelihood of innocent people losing or being denied jobs. In addition, not only is the polygraph test unreliable in general, it discriminates in particular. Studies indicate that highly socialized people, concerned about their moral integrity, tend to fail polygraph tests more often than those who are poorly socialized or who are not as concerned about moral scruples. Also, because of the subjective factor of the polygraph, there is substantial evidence, brought out in a U.S. district court case in Illinois, that polygraph testing is biased toward minorities.

Studies analyzed by the Congressional Office of Technology Assessment indicate that the percentage of innocent people being found deceptive is as high as 50 percent. Polygraph examiners labeled innocent people as liars half the time. The conclusion reached by the Office of Technology Assessment in its study on the scientific validity of polygraph testing was "there is no scientific evidence to establish the validity of polygraph testing for screening a large number of people." This conclusion coincides with the President's Privacy Protection Study Commission which in 1977 stated that polygrapy use is "an unreasonable invasion of personal privacy that should be proscribed." Similar conclusions have been reached independently by two congressional committees.

Mr. Speaker, I believe it is time to pay heed to the facts which demonstrate the need for Federal legislation to prohibit the use of polygraph testing for employment purposes. Countries around the world have outlawed any sort of lie detector tests. In our own country, 20 states, including Connecticut, and the District of Columbia have led the way by passing laws prohibiting the use of polygraph testing by employers as a condition of employment.

Some of our States have placed restrictions on the use of the polygraph such as making illegal the asking of certain personal questions or guaranteeing the test-taker a copy of the test results. These sort of laws, however, only continue the barbaric use of lie detection devices by implicitly endorsing the use of the polygraph. We must insist upon an outright ban on this unscientific and unconstitutional method of job screening in private industry.

The truth about the polygraph is that it is inaccurate, unreliable, and intrusive—an unreasonable infringement on a person's right to privacy and ability to earn a living. It is ironic that despite all of the evidence produced and studies conducted that expose the polygraph as fraudulent, the use of lie detectors in private industry not only continues, but is increasing. Truly, we must work diligently to end this practice. Mr. Speaker, I wholeheartedly urge my fellow Members and citizens to endorse the Polygraph Control and Privacy Protection Act of 1985.●

THE WIC NUTRITION IMPROVEMENT ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey [Mrs. ROUKEMA] is recognized for 10 minutes.

● Mrs. ROUKEMA. Mr. Speaker, today I am introducing, on behalf of Mr. HAWKINS, Mr. JEFFORDS, Mr. LELAND, Mr. GOODLING, Mr. GEORGE MILLER, Mr. FAWELL, Mr. EMERSON, and Mr. PANETTA, a bill which will provide nutritional benefits to more than 16,000 additional women and children through the Special Supplemental Food Program for Women, Infants and Children [WIC] without any increase in budget outlays and at no cost to the Federal Government.

In these days of budgetary constraint, we must do everything in our power to ensure that our scarce national resources are used as effectively as possible. This bill, the WIC Nutrition Improvement Act of 1985, recognizes this reality. Under this act, States and localities will be prohibited from collecting sales taxes on food purchased with WIC vouchers as a condition for receiving Federal program funds. At present, every dollar collected in sales taxes is a dollar that is unavailable for direct food purchases. The consequence is that at least 16,000 women, infants, and children are denied program benefits while over $7.4 million go to State and local treasuries.

As a member of the Committee on Education and Labor and as ranking minority member of the select committee on Hunger, I have studied the WIC Program. Indeed, the select committee conducted field hearings last year to explore the benefits and the shortcomings of the program. Currently, WIC provides nutritious supplemental foods to low-income pregnant and postpartum women, and infants and children up to age 5 who are determined to be at nutritional risk. In addition to food supplementation, participants receive medical screening and nutrition education.

However, our study clearly demonstrated an area in need of reform.

There are 14 States and numerous local governments which collect sales taxes on WIC food purchases. These sales tax moneys are collected above and beyond the allowable 20 percent of WIC funds available to States and localities to cover administrative costs. There is no need for those governments to receive additional sales tax revenues to operate this program.

In essence, therefore, these State and local governments are making money on a federally funded program established to aid low-income women and children. Last year alone, over $7.4 million in Federal funds was diverted to State and local treasuries in this manner. Clearly, this is not intent of Congress.

More importantly, every dollar lost to sales tax is a dollar that is unavailable for the purchase of food. Stated differently, if sales tax adds to the price of a package of food, fewer people will be served. The loss of this revenue had the effect of denying WIC to at least 16,000 income eligible clients in these States.

Today, I offer this corrective legislation. It will allow more women, infants, and children to receive program benefits.

Although the WIC Program's authority was to expire in fiscal year 1984, it is currently authorized for this fiscal year under the fiscal year 1985 continuing resolution. Since reauthorization of the WIC Program will be considered this year, it is essential to focus on program needs now.

I urge my colleagues to support this effort to close the unintended loophole in the law that allows the diversion of WIC funds away from eligible women, infants, and children nationwide.

I thank you, Mr. Speaker.●

RULES OF SELECT COMMITTEE ON CHILDREN, YOUTH, AND FAMILIES FOR THE 99TH CONGRESS

(Mr. MILLER of California asked and was given permission to extend his

remarks at this point in the RECORD and to include extraneous matter.)

● Mr. MILLER of California. Mr. Speaker, pursuant to rule XI, clause 2(a) of the Rules of the House of Representatives, I submit for printing in the CONGRESSIONAL RECORD the rules of the Select Committee on Children, Youth, and Families for the 99th Congress, adopted by the committee on March 28, 1985:

RULES OF THE SELECT COMMITTEE ON CHILDREN, YOUTH, AND FAMILIES

(Adopted March 28, 1985)

RULE 1.—MEETINGS

The regular meetings of the committee shall be held on the third Thursday of each month at 9:45 a.m., except when Congress has adjourned. The chairman is authorized to dispense with a regular meeting or to change the date thereof, and to call and convene additional meetings, when circumstances warrant. A special meeting of the committee may be requested by members of the committee in accordance with the provisions of House Rule XI, 2(c)(2). Every member of the committee, unless prevented by unusual circumstances, shall be provided with a memorandum at least three calendar days (excluding Saturdays, Sundays, and legal holidays) prior to each meeting or hearing explaining (1) the purpose of the meeting or hearing; and (2) the names, titles, background and reasons for appearance of any witnesses. The minority staff shall be responsible for providing the same information on witnesses whom the minority may request.

RULE 2.—QUORUMS

A majority of the members of the committee shall constitute a quorum, except that two members shall constitute a quorum for taking testimony and receiving evidence. Proxies shall not be used to establish a quorum. If the chairman is not present at any meeting of the committee, the ranking member of the majority party on the committee who is present shall preside at that meeting.

RULE 3.—COMMITTEE REPORTS

Every investigative report shall be approved by a majority vote of the committee at a meeting at which a quorum is present. Supplemental, minority, or additional views may be filed in accordance with House Rule XI, 2(l)(5). The time allowed for filing such views shall be three calendar days (excluding Saturdays, Sundays, and legal holidays) unless the committee agrees to a different time, but agreement on a shorter time shall require the concurrence of each member seeking to file such views. A proposed report shall not be considered in committee unless the proposed report has been avilable to the members of the committee for at least three calendar days (excluding Saturdays, Sundays, and legal holidays) prior to the consideration of such proposed report in the committee. If hearings have been held on the matter reported upon, every reasonable effort shall be made to have such hearings available to the members of the committee prior to the consideration of the proposed report in the committee.

RULE 4.—PROXY VOTES

A member may vote by proxy on any measure or matter before the committee and on any amendment or motion pertaining thereto. A proxy shall be in writing and be signed by the member granting the proxy; it shall show the date and time of day it was signed and the date for which it is given and the member to whom the proxy is given. Each proxy authorization shall state that the member is absent on official business or is otherwise unable to be present; shall be limited to the date and the specific measure or matter to which it applies; and, unless it states otherwise, shall apply to any amendments or motions pertaining to the measure or matter.

RULE 5.—ROLLCALLS

A rollcall of the members may be had upon the request of any member.

RULE 6.—RECORD OF COMMITTEE ACTIONS

The committee staff shall maintain in the committee offices a complete record of committee actions including a record of the rollcall votes taken at committee business meetings. The original records, or true copies thereof, as appropriate, shall be available for public inspection whenever the committee offices are open for public business. The staff shall assure that such original records are preserved with no unauthorized alteration, additions, or defacement.

RULE 7.—TASK FORCES

There shall be no more than three temporary task forces of the committee; the jurisdiction of each shall be established by the chairman of the committee. Each task force shall have eleven members, divided between majority and minority party members in the ratio of seven to four. The chairman and ranking minority member of the committee shall serve ex officio on each task force.

Members of the majority party shall have the right to bid for task force chairs in order of full committee seniority. No member elected as a task force chairperson may choose a second task force position before all other members of the majority party have selected one task force assignment in order of full committee seniority. After each member of the majority party has selected one task force assignment, each may bid, in order of full committee seniority, for a second task force assignment. No member may serve on more than two task forces.

The chairperson of each task force is authorized to appoint one staff member who shall serve at the pleasure of such chairperson, and to be approved by the chairman of the full committee. Such staff members shall be paid from funds provided for the appointment of committee staff pursuant to primary and additional expense resolutions.

RULE 8.—HEARING DATES AND WITNESSES

The chairman of the committee, after consultation with the ranking minority member of the committee, shall announce the date, place, and subject matter of all hearings at least one week prior to the commencement of any hearings, unless he, after consultation with that member, determines that there is good cause to begin such hearings at an earlier date. The minority members shall supply the names of witnesses they intend to call to the chairman of the committee at the earliest possible date. Witnesses appearing before the committee shall, so far as practicable, submit written statements at least 24 hours in advance of their appearance.

RULE 9.—OPEN MEETINGS

Meetings for the transaction of business and hearings of the committee shall be open to the public or closed in accordance with Rule XI of the House of Representatives.

RULE 10.—FIVE-MINUTE RULE

A committee member may question a witness only when recognized by the chairman for that purpose. In accordance with House Rule XI, 2(j)(2), each committee member may request up to five minutes to question a witness until each member who so desires has had such opportunity. Until all such requests have been satisfied, the chairman shall, so far as practicable, recognize alternately on the basis of seniority those majority and minority members present at the time the hearing was called to order and others on the basis of their arrival at the hearing. Thereafter, additional time may be extended at the direction of the chairman.

RULE 11.—INVESTIGATIVE HEARINGS; PROCEDURE

Investigative hearings shall be conducted according to the procedures in House Rule XI, 2(k). All questions put to witnesses before the committee shall be relevant to the subject matter before the committee for consideration, and the chairman shall rule on the relevance of any questions put to the witness.

RULE 12.—STENOGRAPHIC RECORD

A stenographic record of all testimony shall be kept of public hearings and shall be made available on such conditions as the chairman may prescribe.

RULE 13.—TV, RADIO, AND PHOTOGRAPHS

When approved by a majority vote, an open meeting or hearing of the committee may be covered, in whole or in part, by television broadcast, radio broadcast, and still photography, by any of such methods of coverage, subject to the provisions of House Rule XI, 3. In order to enforce the provisions of said rule or to maintain an acceptable standard of dignity, propriety, and decorum, the chairman may order such alteration, curtailment or discontinuance of coverage as he determines necessary.

RULE 14.—STAFF

The chairman of the committee shall have the authority to hire and discharge employees of the professional and clerical staff of the committee. The authorization for the creation of new positions shall be approved by a majority vote of the committee, a quorum being present.

RULE 15.—STAFF DIRECTION

The staff of the committee shall be subject to the direction of the chairman of the committee and shall perform such duties as he may assign.

RULE 16.—AUTHORIZATION FOR TRAVEL

Travel to be paid from funds set aside for the full committee for an member or any staff member shall be paid only upon the prior authorization of the chairman. Travel may be authorized by the chairman for any member and any staff member in connection with the attendance of hearings conducted by the committee and meetings, conferences, and investigations which involve activities or subject matter under the general jurisdiction of the committee. Before such authorization is given there shall be submitted to the chairman in writing the following:

(1) The purpose of the travel;

(2) The dates during which travel is to be made and the date or dates of the event for which the travel is being made;

(3) The location of the event for which the travel is to be made;

(4) The names of members and staff seeking authorization.

RULE 17.—ADDITIONAL DUTIES OF CHAIRMAN

The chairman of the committee shall:

(1) make available to other committees the findings and recommendations resulting from the investigations of the committee as appropriate;

(2) prepare a budget for the committee and present such budget to the committee for its approval; and

(3) authorize and issue subpoenas as provided in House Rule XI, 2(m)(1), in the conduct of any investigation or activity or series of investigations or activities within the jurisdiction of the committee.

RULE 18.—AMENDMENT OF RULES

These rules may be modified, amended, or repealed by a majority vote of the committee, if at least two legislative days' written notice of the proposed change has been provided each member of the committee prior to the meeting date on which such changes are to be discussed and voted upon.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YATES (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LIGHTFOOT) to revise and extend their remarks and include extraneous material:)

Mr. LOTT, for 60 minutes, today.

Mr. MARTIN of New York, for 5 minutes, today.

Mr. MCCOLLUM, for 30 minutes, today.

Mr. KOLBE, for 60 minutes, April 3.

Mr. MCKINNEY, for 15 minutes, today.

Mr. BROWN of Colorado, for 10 minutes, today.

Mr. GINGRICH, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, April 3.

Mr. WALKER, for 60 minutes, today.

Mr. COATS, for 60 minutes, April 17.

Mrs. ROUKEMA, for 10 minutes, today.

(The following Members (at the request of Mrs. BOXER) to revise and extend their remarks and include extraneous material:)

Mr. DE LA GARZA, for 5 minutes, today.

Mr. UDALL, for 5 minutes, today.

Mr. JONES, of Oklahoma, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BONKER, for 5 minutes, today.

Mr. JONES of Tennessee, for 5 minutes, today.

Mr. MARTINEZ, for 30 minutes, today.

Mr. RAY, for 30 minutes, April 3.

Mr. FRANK, for 60 minutes, April 16.

Mr. PICKLE, for 60 minutes, May 7.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. LIGHTFOOT) and to include extraneous matter:)

Mr. CLINGER in two instances.

Mr. PORTER.

Mr. BROOMFIELD.

ADJOURNMENT

Mr. SIKORSKI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 31 minutes p.m.), the House adjourned until tomorrow, Wednesday, April 3, 1985, at 3 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

944. A letter from the Assistant Secretary of Defense for International Security Policy, transmitting a report on the funding of technology transfer control policy for the fiscal year 1984, pursuant to 10 U.S.C. 138(h) (96 Stat. 739); to the Committee on Armed Services.

945. A letter from the Executive Director, Civil Air Patrol, transmitting the 1985 Civil Air Patrol report to Congress, pursuant to the act of July 1, 1946, chapter 527, section 7; to the Committee on Armed Services.

946. A letter from the Secretary, Federal Trade Commission, transmitting the seventh annual report to Congress on the administration of the Fair Debt Collection Practices Act, pursuant to Public Law 90-321, section 815(a) (91 Stat. 882); to the Committee on Banking, Finance and Urban Affairs.

947. A letter from the Chairman, District of Columbia Retirement Board, transmitting comments on the enrolled actuary's report on the disability retirement rate for police officers and firemen, pursuant to Public Law 96-122, section 145(b)(1) (97 Stat. 727); to the Committee on the District of Columbia.

948. A letter from the Chairman, Railroad Retirement Board, transmitting a draft of proposed legislation to eliminate the December 1985 rail industry pension cost-of-living adjustment and to ensure that future indexed rail cost-of-living adjustments are consistently applied to all industry pensions, to the Committee on Energy and Commerce.

949. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to abolish the U.S. Travel and Tourism Administration, to repeal the International Travel Act of 1961, as amended; to the Committee on Energy and Commerce.

950. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Federal Railroad Safety Act of 1970; to the Committee on Energy and Commerce.

951. A letter from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting Presidential Determination 85-9, determining that it is important to U.S. security interests to use FAA funds under the special authority of section 614 of the act, pursuant to 22 U.S.C. 2364(a)(1); to the Committee on Foreign Affairs.

952. A communication from the President of the United States, transmitting copies of international agreements transmitted to Congress after the deadline for their sub-

mission, with reasons, pursuant to 1 U.S.C. 112b(b); to the Committee on Foreign Affairs.

953. A letter from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a copy of the original report of political contributions for Robert Dean Blackwell, of Maryland, for the rank of Ambassador, pursuant to Public Law 96-465, section 304(b)(2); to the Committee on Foreign Affairs.

954. A letter from the Head, Information Section, Copyright Office, Library of Congress, transmitting an evaluation of activities under the Freedom of Information Act, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

955. A letter from the State Cochairman and Federal Cochairman, Alaska Land Use Council, transmitting a study of the Kantishna Hills and Dunkle Mine areas, pursuant to Public Law 96-487, section 202(b); to the Committee on Interior and Insular Affairs.

956. A letter from the Chief Immigration Judge, Executive Office for Immigration Review, Department of Justice, transmitting reports of suspension of deportation of certain aliens of good character and with required residency when deportation causes hardship under section 244(a), Immigration and Nationality Act, pursuant to INA, section 244(c) (66 Stat. 214, 76 Stat. 1247); to the Committee on the Judiciary.

957. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend title XII of the Merchant Marine Act, 1936; to the Committee on Merchant Marine and Fisheries.

958. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend title 23, United States Code; to the Committee on Public Works and Transportation.

959. A letter from the Administrator, Veterans' Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to extend the authority of the Veterans' Administration to conduct certain health care programs, to the Committee on Veterans' Affairs.

960. A letter from the Secretary of Health and Human Services, transmitting a report of the results of a study conducted by the Health Care Financing Administration with respect to the Medicare hospital wage index, pursuant to 42 U.S.C. 1395ww nt.; to the Committee on Ways and Means.

961. A letter from the Director, Office of Legislative Affairs, Agency for International Development, transmitting the report which includes allocations of the funds appropriated separately under functional development assistance for new nutrition activities, new health activities, and for the child survival fund, for which allocation decisions had not yet been made at the time of the original report, pursuant to 22 U.S.C. 2413(a); jointly, to the Committees on Foreign Affairs and Appropriations.

962. A letter from the Chairman and President, Gorgas Memorial Institute of Tropical and Prevention Medicine Inc., transmitting a report on the operation of the Gorgas Memorial Laboratory, including the unaudited financial statements, for the fiscal year ending September 30, 1984, pursuant to the act of May 7, 1928, chapter 505, section 3 (92 Stat. 991); jointly, to the Committees on Foreign Affairs and Energy and Commerce.

963. A letter from the Acting Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting the annual report of the status of the exercise of U.S. rights and responsibilities under the Panama Canal Treaty of 1977, pursuant to 22 U.S.C. 3871; jointly, to the Committees on Merchant Marine and Fisheries, Foreign Affairs, the Judiciary, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHEAT: Committee on Rules. House Resolution 119. Resolution providing for the consideration of H.R. 1714, a bill to authorize appropriations to the National Aeronautics and Space Administration for research and development, space flight, control and data communications, construction of facilities; and research and program management, and for other purposes (Rept. No. 99-33). Referred to the House Calendar.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 1869 a bill to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes (Rept. No. 99-34). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. House concurrent Resolution 107. Concurrent Resolutions to express the sense of the Congress that the President take action to reduce the growing U.S. merchandise trade deficit and that he take action to response to unfair International trade practices of Japan. (Rept. No. 99-35). Referred to the House Calendar

Mr. ROSTENKOWSKI: Committee on Ways and Means H.R. 1866 a bill to phase out the Federal supplemental compensation program (Rept. No. 99-36). Referred to the Committee on the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FOLEY (for himself, Mr. CONTE, Mr. FISH, Mr. GLICKMAN, Mr. JEFFORDS, Mr. LEACH of Iowa, Mr. LEVINE of California, Mr. MARKEY, Mr. MCHUGH, Mr. MILLER of California, Ms. SNOWE, and Mr. WEISS):

H.R. 1865. A bill to limit the introduction of U.S. Armed Forces into El Salvador and Nicaragua for combat; to the Committee on Foreign Affairs.

By Mr. ROSTENKOWSKI (for himself, Mr. DUNCAN, Mr. FORD of Tennessee, Mr. CAMPBELL, Mr. PICKLE, Mr. RANGEL, Mr. STARK, Mr. JACOBS, Mr. JENKINS, Mr. GEPHARDT, Mr. PEASE, Mr. MATSUI, Mr. ARCHER, Mr. VANDER JAGT, Mr. CRANE, Mr. FRENZEL, Mr. GRADISON, Mr. MOORE, Mr. THOMAS of California, Mr. DAUB, and Mr. KILDEE):

H.R. 1866. A bill to phase out the Federal supplemental compensation program; to the Committee on Ways and Means.

By Mr. WIRTH:

H.R. 1867. A bill to authorize appropriations for the National Telecommunications and Information Administration for fiscal years 1986 and 1987, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MOORE (for himself, Mr. WAXMAN, Mr. STARK, Mr. GRADISON, Mr. RANGEL, Mr. PEPPER, Mr. GEPHARDT, Mr. WYDEN, Mr. MADIGAN, Mr. MCGRATH, Mr. DAUB, Mr. DOWNEY of New York, Ms. KAPTUR, Mr. SABO, Mr. CONYERS, Mr. BILIRAKIS, Mr. MRAZEK, and Mr. MILLER of California):

H.R. 1868. A bill to amend the Social Security Act to protect beneficiaries under the health care programs of that act from unfit health care practitioners, and otherwise to improve the antifraud provisions of that act; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. ROSTENKOWSKI (for himself, Mr. DUNCAN, Mr. ANTHONY, Mr. DAUB, Mr. ROEMER, Mr. PICKLE, Mr. STARK, Mr. JONES of Oklahoma, Mr. JACOBS, Mr. FORD of Tennessee, Mr. PEASE, Mr. MATSUI, Mr. FLIPPO, Mr. DORGAN of North Dakota, Mrs. KENNELLY, Mr. COYNE, Mr. FRENZEL, Mr. GRADISON, Mr. CAMPBELL, Mr. MCGRATH, and Mr. GREGG):

H.R. 1869. A bill to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes; to the Committee on Ways and Means.

By Mr. WYLIE (by request):

H.R. 1870. A bill to amend and extend certain Federal laws relating to housing, community and neighborhood development, and related programs, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1871. A bill to amend the National Flood Insurance Act of 1968 to extend certain authorities thereunder, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ASPIN (for himself and Mr. DICKINSON) (by request):

H.R. 1872. A bill to authorize appropriations for fiscal year 1986 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. STRATTON (for himself and Mrs. HOLT) (by request):

H.R. 1873. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1986 and fiscal year 1987, and for other purposes; to the Committee on Armed Services.

By Mr. BENNETT:

H.R. 1874. A bill to authorize the Architect of the Capitol to accept gifts and bequests of personal property and money for the benefit of the Capitol Buildings art collection; to the Committee on House Administration.

By Mr. BORSKI:

H.R. 1875. A bill to provide for greater balance in the proportion of military chaplains of different faiths as compared to the proportion of different faiths represented among the total membership of the Armed Forces; to the Committee on Armed Services.

By Mr. BOSCO (for himself, Mr. WEAVER, Mr. AUCOIN, Mr. CHAPPIE, Mr. ANDERSON, Mr. PANETTA, Mr. FAZIO, Mrs. BOXER, Mrs. BURTON of

California, Mr. MILLER of California, Mr. ROBERT F. SMITH, Mr. LEVINE of California, and Mr. MARTINEZ):

H.R. 1876. A bill relating to the conservation and management of the U.S. fisheries; to the Committee on Merchant Marine and Fisheries.

By Mrs. BOXER (for herself, Mr. CHANDLER, Mr. DOWNEY of New York, Mr. MORRISON of Connecticut, Mr. MCKINNEY, Mr. JACOBS, and Mr. ACKERMAN):

H.R. 1877. A bill entitled, the "Humane Products Testing Act of 1985"; to the Committee on Energy and Commerce.

By Mr. CONTE:

H.R. 1878. A bill to establish a nationwide lottery to assist in financing the Medicare Program and in reducing the Federal deficit; jointly, to the Committees on Ways and Means, the Judiciary, and Post Office and Civil Service.

By Mr. DORGAN of North Dakota:

H.R. 1879. A bill to provide for full and prompt disclosure of rail transportation contracts; to the Committee on Energy and Commerce.

H.R. 1880. A bill to modify the reversion limitation imposed on the conveyance of property to the Mountrail County Park Commission, Mountrail County, ND, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. DOWNEY of New York (for himself and Mr. FLORIO):

H.R. 1881. A bill to provide that the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 will apply to certain petroleum and to establish a separate account in the Superfund for leaking underground storage tanks; jointly, to the Committee on Energy and Commerce and Public Works and Transportation.

By Mr. ENGLISH:

H.R. 1882. A bill to amend the Freedom of Information Act, and for other purposes; to the Committee on Government Operations.

By Mr. FAUNTROY:

H.R. 1883. A bill to provide that individuals who live in the District of Columbia shall not be required to pay Federal income tax for any period during which they are without representation in the Senate and the House of Representatives; to the Committee on Ways and Means.

By Mr. FLIPPO (for himself, Mr. JENKINS, Mr. CAMPBELL, Mr. FOWLER, Mr. ANTHONY, Mr. MATSUI, Mrs. KENNELLY, Mr. DOWNEY of New York, Mr. JONES of Oklahoma, Mr. RANGEL, Mr. DUNCAN, Mr. PICKLE, Mr. MCGRATH, and Mr. JACOBS):

H.R. 1884. A bill to provide rules for computing the amount of the deductions allowed to rural mail carriers for use of their automobiles; to the Committee on Ways and Means.

By Mr. FRANK:

H.R. 1885. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income a certain portion of governmental pensions based on services not covered under the Social Security system; to the Committee on Ways and Means.

By Mr. GEKAS (for himself and Mr. HYDE):

H.R. 1886. A bill to amend title 18, United States Code, to extend the application of special forfeiture of collateral profits of crime to persons acquitted only by reasons of insanity; to the Committee on the Judiciary.

By Mr. GOODLING (for himself, Mr. FORD of Michigan, and Mr. JEFFORDS):

H.R. 1887. A bill to provide for limited extension of alternative means of providing assistance under the school lunch program and to provide for national donated commodity processing programs; to the Committee on Education and Labor.

By Mr. GUARINI (for himself, Mr. WEBER, Mr. WEAVER, Mr. SOLOMON, Mr. SMITH of New Jersey, Mr. MOODY, Mr. RODINO, Mr. TORRICELLI, Mr. COUGHLIN, Mr. WEISS, Mr. DWYER of New Jersey, Mr. SAXTON, Mrs. ROUKEMA, Mr. FRANK, Mr. RINALDO, Mr. BARTON of Texas, Mr. CARPER, Mr. HUGHES, Mr. CONTE, Mr. DELLUMS, Mr. FISH, Mr. HEFTEL of Hawaii, and Mrs. SCHNEIDER):

H.R. 1888. A bill to direct the Secretary of Transportation not to expend or obligate any Federal funds for design and construction of the Westway landfill in New York City, NY; to the Committee on Public Works and Transportation.

By Mr. HALL of Ohio (for himself and Mr. LELAND):

H.R. 1889. A bill to amend the Agricultural Trade Development and Assistance Act of 1954 and the Agricultural Act of 1949 in order to enhance the effectiveness of U.S. food assistance programs for developing countries, and for other purposes; jointly, to the Committees on Foreign Affairs and Agriculture.

By Mr. SAM B. HALL, JR. (for himself, Mr. FRANK, Mr. BERMAN, Mr. STAGGERS, and Mr. KINDNESS):

H.R. 1890. A bill to provide for an equitable waiver in the compromise and collection of Federal claims; to the Committee on the Judiciary.

By Mr. HUNTER:

H.R. 1891. A bill to direct the Secretary of the Interior to convey a certain parcel of land located near Ocotillo, CA; to the Committee on Interior and Insular Affairs.

By Ms. KAPTUR:

H.R. 1892. A bill to provide for the analysis of the causes of U.S. trade imbalance with Japan and the formulation of actions to redress that imbalance; to the Committee on Ways and Means.

By Mr. KINDNESS (for himself, Mr. BOUCHER, Mr. PETRI, Mr. JENKINS, Mrs. HOLT, Mrs. BYRON, Mr. HAMMERSCHMIDT, Mr. PENNY, Mr. MACKAY, Mr. DANNEMEYER, Mr. BENNETT, Mr. CHANDLER, Mr. STENHOLM, Mr. ARMEY, Mr. GROTBERG, and Mr. MCCAIN):

H.R. 1893. A bill to amend the Contract Work Hours and Safety Standards Act and the Walsh-Healey Act to permit employees, to whom such acts apply, to work any combination of hours in a 40-hour workweek; to the Committee on Education and Labor.

By Mr. LANTOS (for himself, Ms. SNOWE, Mr. BENNETT, Mr. BERMAN, Mr. BIAGGI, Mr. BONIOR of Michigan, Mr. BORSKI, Mr. BUSTAMANTE, Mr. COELHO, Mr. DIOGUARDI, Mr. DYMALLY, Mr. EDWARDS of Oklahoma, Mr. FAUNTROY, Mr. FORD of Tennessee, Mr. KOLTER, Mr. LELAND, Mr. MANTON, Mr. MARTINEZ, Mr. MITCHELL, Mr. MRAZEK, Mr. OWENS, Mr. REID, Mr. ROSE, Mr. SILJANDER, Mr. SUNIA, Mr. TOWNS, Mr. WEISS, and Mr. YOUNG of Alaska):

H.R. 1894. A bill to establish a commission to conduct a study of the problems of youth suicide in the United States for the purpose of providing guidance in developing national policy, and to establish a grant program for States, political subdivisions of States, and private nonprofit agencies for programs to prevent suicide among children and youth; jointly, to the Committees on Energy and Commerce and Education and Labor.

By Mr. LIPINSKI:

H.R. 1895. A bill to amend title 23, United States Code, to require that any State requesting a lower Federal share for certain types of highway projects be provided that lower share; to the Committee on Public Works and Transportation.

By Mr. MCCOLLUM (for himself, Mr. CHANDLER, Mr. COOPER, Mr. HILER, Mr. LEACH of Iowa, Mr. ROEMER, Mrs. ROUKEMA, Mr. WORTLEY, and Mr. WYLIE):

H.R. 1896. A bill to authorize the Board of Governors of the Federal Reserve System to regulate the activities of Government securities dealers; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MCDADE:

H.R. 1897. A bill to repeal the contemporaneous recordkeeping requirement and certain other recently enacted provisions of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. MOLLOHAN:

H.R. 1898. A bill to amend the Mineral Lands Leasing Act of 1920, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MONTGOMERY (by request):

H.R. 1899. A bill to amend section 4118 of title 38, United States Code, to modify the treatment of special pay paid to certain physicians and dentists employed by the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. MOORHEAD:

H.R. 1900. A bill to amend the copyright law, title 17 of the United States Code, to provide for protection of ornamental designs of useful articles; to the Committee on the Judiciary.

By Mr. NIELSON of Utah:

H.R. 1901. A bill to provide for a study regarding the radio and television, as well as other media, advertising and promotion of alcoholic beverages, and for other purposes; to the Committee on Energy and Commerce.

By Ms. OAKAR:

H.R. 1902. A bill to change the name and adjust the pay of the police force of the Library of Congress; to the Committee on House Administration.

By Mr. OBERSTAR:

H.R. 1903. A bill to provide for the use and distribution of funds appropriated in satisfaction of judgments awarded to members of the Lake Superior Band of Chippewa Indians who are members of the Minnesota Chippewa Tribe in Dockets numbered 18–S and 18–U before the Indian Claims Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 1904. A bill to provide for the use and distribution of funds appropriated in satisfaction of judgment awarded to members of the Mississippi Band of Chippewa Indians who are members of the Minnesota Chippewa Tribe in Docket numbered 18–S before the Indian Claims Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. RAHALL (for himself, Mr. BEVILL, Mr. FLIPPO, Mr. DELLUMS, Mr. MURPHY, Mr. CONYERS, Mr. MITCHELL, Mr. ROGERS, Mr. STOKES, Mr. MOLLOHAN, Mr. WEAVER, Mr. HAYES, Mr. ROE, Mr. WISE, Mr. RANGEL, Mr. UDALL, Mr. YOUNG of

Alaska, Mr. MURTHA, Mr. APPLEGATE, and Mr. WALGREN):

H.R. 1905. A bill to offset the competitive advantage which foreign coal producers have as a result of not having to meet environmental, health, welfare, and safety requirements of the kinds imposed on U.S. coal producers, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Ways and Means.

By Mrs. ROUKEMA (for herself, Mr. HAWKINS, Mr. JEFFORDS, Mr. LELAND, Mr. GOODLING, Mr. FAWELL, Mr. EMERSON, Mr. MILLER of California, and Mr. PANETTA):

H.R. 1906. A bill to amend the Child Nutrition Act of 1966 to limit participation in the Special Supplemental Food Program for women, infants, and children [WIC] to States in which State or local sales taxes are not collected on purchases of food under such program; to the Committee on Education and Labor.

By Mr. RUDD:

H.R. 1907. A bill to amend the Controlled Substances Act to provide the penalty of death for continuing criminal enterprise and dangerous special drug offender offenses; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. RUDD (for himself, Mr. SILJANDER, and Mr. SOLOMON):

H.R. 1908. A bill to reduce the percentage of the U.S. monetary contribution to the United Nations and its affiliated agencies to a percentage that is no greater than the percentage of U.S. nationals employed by the United Nations and its affiliated agencies; to the Committee on Foreign Affairs.

By Mr. SEIBERLING:

H.R. 1909. A bill to amend the Internal Revenue Code of 1954 to reduce the Federal deficit and encourage fuel conservation by increasing the tax on gasoline; to the Committee on Ways and Means.

By Mr. SEIBERLING (for himself and Mr. WEAVER):

H.R. 1910. A bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act to provide that pesticides that are used in agricultural production do not endanger human health; to the Committee on Agriculture.

By Mr. SLAUGHTER:

H.R. 1911. A bill to amend the Internal Revenue Code of 1954 to enhance the equity for spouses under the tax laws by allowing a spousal individual retirement account [IRA] of $2,000, and to maintain the relative value of IRA rights over time by indexing the maximum tax-free annual contribution limit to inflation; to the Committee on Ways and Means.

By Mr. STENHOLM (for himself, Mr. ROBERTS, Mr. ENGLISH, Mr. LEATH of Texas, Mr. WHITLEY, Mr. BOULTER, and Mr. ORTIZ):

H.R. 1912. A bill to establish the farm and crop acreage base and program yield system to provide more efficient, equitable, flexible, and predictable programs for farmers; to the Committee on Agriculture.

By Mr. THOMAS of Georgia:

H.R. 1913. A bill to provide for the payment of rewards to individuals providing information leading to the arrest and conviction of persons guilty of killing or kidnapping a Federal drug law enforcement agent; to the Committee on the Judiciary.

By Mr. TRAFICANT:

H.R. 1914. A bill to discourage domestic corporations from establishing foreign manufacturing subsidiaries in order to avoid Federal taxes by including in gross income of U.S. shareholders in foreign corporations the retained earnings of any such subsidiary which are attributable to manufacturing operations in runaway plants or tax havens, to provide that revenue from taxes imposed on such income shall be used to reduce the public debt and provide assistance to economically depressed areas, and for other purposes; to the Committee on Ways and Means.

By Mr. UDALL:

H.R. 1915. A bill to establish procedures for review of tribal constitutions and bylaws or amendments thereto pursuant to the act of June 18, 1934 (48 Stat. 987); to the Committee on Interior and Insular Affairs.

By Mr. SMITH of New Jersey (for himself, Mr. RINALDO, Mr. ROYBAL, Mr. WISE, Mr. TORRICELLI, Mr. BERMAN, Mr. SHARP, Mr. ROSE, Mr. JONES of North Carolina, Mr. BOUCHER, Mr. BENNETT, Mr. CHAPPELL, Mr. MAVROULES, Mr. GILMAN, Mr. LAGOMARSINO, Mr. BOEHLERT, Mr. LOWERY of California, Mr. MCKERNAN, and Mr. MCGRATH):

H.R. 1916. A bill to provide for a study by the Secretary of Health and Human Services to develop recommendations for correcting the disparities in the computation of Social Security benefits (commonly referred to as the notch problem) which were caused by the enactment (in 1977) of the present formula for computing primary insurance amounts under title II of the Social Security Act; to the Committee on Ways and Means.

By Mr. ROYBAL (for himself, Mr. RINALDO, Mr. FRANK, Mr. SMITH of New Jersey, Mr. ACKERMAN, Mr. ADDABBO, Mr. APPLEGATE, Mr. BENNETT, Mr. BERMAN, Mr. BIAGGI, Mrs. BURTON of California, Mr. CARR, Mr. CLINGER, Mr. CONYERS, Mr. DELLUMS, Mr. DEWINE, Mr. DICKINSON, Mr. DUNCAN, Mr. DWYER of New Jersey, Mr. DYMALLY, Mr. DYSON, Mr. FAZIO, Mr. FEIGHAN, Mr. FISH, Mr. FLORIO, Mr. GEJDENSON, Mr. GILMAN, Mr. SAM B. HALL, Jr., Mr. HAWKINS, Mr. HERTEL of Michigan, Mr. HORTON, Mr. JONES of North Carolina, Mr. KANJORSKI, Mr. KOLTER, Mr. KOSTMAYER, Mr. LANTOS, Mr. LIGHTFOOT, Mr. MCDADE, Mr. MCKERNAN, Mr. MARKEY, Mr. MAVROULES, Mr. MICA, Ms. MIKULSKI, Mr. MINETA, Mr. MITCHELL, Mr. MOAKLEY, Mr. MRAZEK, Mr. MURPHY, Mr. NEAL, Ms. OAKAR, Mr. RAHALL, Mr. ROSE, Mrs. ROUKEMA, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SCHUMER, Mr. SENSENBRENNER, Mr. SHAW, Mr. SHELBY, Mr. SMITH of Forida, Mr. SOLARZ, Mr. STOKES, Mr. TORRICELLI, Mr. TOWNS, Mr. TRAXLER, Mr. VENTO, Mr. WISE, Mr. WORTLEY, Mr. YATRON, and Mr. YOUNG of Alaska):

H.R. 1917. A bill to amend title II of the Social Security Act to restore and protect the benefit levels of workers reaching age 65 in or after 1982 (and their widows and widowers) by eliminating the "notch" between those levels and the corresponding benefit levels of persons who reached age 65 before 1982; to the Committee on Ways and Means.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

73. By the SPEAKER: Petition of the City of Southgate, CA, relative to Naval construction; to the Committee on Armed Services.

74. Also, petition of the City of Jacksonville, FL, relative to Amtrak; to the Committee on Energy and Commerce.

75. Also, petition of the Catholic War Veterans, Washington, DC, relative to their 1985 legislative program; to the Committee on Veterans' Affairs.

EXTENSIONS OF REMARKS

REDUCE THE PERCENTAGE OF FUNDS TO UNITED NATIONS

HON. ELDON RUDD
OF ARIZONA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. RUDD. Mr. Speaker, I am today introducing legislation to reduce the percentage of the U.S. monetary contribution to the United Nations to a level not more than equal to the percentage of American nationals employed as professional staff in the Secretariats of the United Nations and its various agencies.

Although the United States makes more than $1 billion in assessed and voluntary contributions to the United Nations annually, about 25 percent of total U.N. spending, the United States furnishes only about 12 percent of its entire professional staff. I ask that an agency-by-agency breakdown of U.S. staffing and contributions appear in the RECORD.

The table follows:

NUMBER AND PERCENTAGE OF SELECTED PROFESSIONAL STAFF [1] IN THE SECRETARIATS OF THE UNITED NATIONS SYSTEM (AS OF DECEMBER 1984) AND PERCENTAGE OF ASSESSED CONTRIBUTIONS TO THE REGULAR BUDGET [2]

Agency	Total staff	U.S. staff	Percent U.S. staff	Percent U.S. contribution
United Nations	3,078	477	15.50	25.00
Food and Agriculture Organization	867	76	8.77	25.00
International Civil Aviation Organization	178	16	9.04	25.00
International Labor Organization	544	48	8.82	25.00
International Maritime Organization	58	3	5.17	4.96
International Telecommunication Union	182	13	7.14	7.63
United Nations Educational Scientific and Cultural Organization*	863	82	9.50	25.00
Universal Postal Union	58			4.70
Word Heath Organization	1,017	136	13.37	25.00
World Intellectual Property Organization	74	4	5.41	5.46
World Meteorological Organizational	85	7	8.24	24.51
International Atomic Energy Agency	563	96	17.05	25.85

*The U.S. withdrew from UNESCO on December 31, 1984.
[1] Internationally recruited and financed from the agencies' regular budget.
[2] Calendar year 1984/fiscal year 1985 for all except UPU and ITU which are calendar year 1984/fiscal year 1984.
Source: Department of State.

Dr. Arkady Shevchenko of the Soviet Union, who was undersecretary general for political and security council affairs until his defection to the United States in 1978, observed how very vital that a more prominent American presence be exercised at the U.N. Secretariat. He explained that the Secretariat is extremely important in setting the tone at the United Nations by drafting committee resolutions, setting up expert teams, preparing reports, and carrying on a wide variety of other tasks—including interpreting broadly worded U.N. resolutions—that affect the degree of politicization in the organization.

The Soviet Union is well aware that strategically placing its people in the United Nations bureaucracy can be of considerable use to its government. Through years of clever maneuvering, Moscow has captured key Secretariat posts, and along with them, access to personnel files—used by the KGB to recruit new agents—and the department of public information—used for propaganda purposes.

According to Dr. Shevchenko, more than a third of all Communist bloc nationals in the Secretariat are officers of their respective secret police under the direct guidance of the KGB. Their activities range from direct recruitment of Secretariat employees, gathering information of a political nature from U.S. employees and diplomats, to using the United Nations for espionage activities throughout the United States.

FBI attempts to monitor the activities of Soviet Secretariat employees are greatly hampered by the privileges conferred by the U.N. headquarters agreement, which allows all U.N. employees—unlike mission personnel—to travel freely anywhere in the United Nations. Dr. Shevchenko confirmed this saying that Soviet KGB agents in the Secretariat take advantage of this privilege frequently to conduct high technology espionage actions.

The Soviet Union has been remarkably successful in increasing its numbers in the high-level posts of the Secretariat. In 1977, the Soviets had about 12.7 percent of their staff in senior level posts compared to 10.5 percent for the United States. By 1983, they had increased their control to 15 percent, whereas the number of posts held by Americans actually fell to 9.7 percent.

Although the United Nations often serves their purposes, the Soviets are nevertheless stingy with their monetary contributions. In 1981, they paid only 4.21 percent of the costs—voluntary or assessed—of the U.N., despite their commitment to pay about 10 percent. The American taxpayers contributed about 25 percent.

The American taxpayer has been far too patient in supporting the United Nations, which has become a forum for Soviet propaganda. It has failed its basic mission to keep the peace. Since 1945, it has failed to prevent or even resolve satisfactorily over 100 conflicts, including those in Hungary, Czechoslovakia, Lebanon, and Afghanistan. If we aren't willing to end our support for this organization, then we ought to at least cut our contributions and end the ability of our adversaries to use the organization as a base for espionage and propaganda. We ought to make our contribution proportionate to the share of Americans employed at the United Nations.

I urge my colleagues to join me in supporting this resolution. I ask that it be printed in the RECORD at this point:

H.R. 1908

A bill to reduce the percentage of the United States monetary contribution to the United Nations and its affiliated agencies to a percentage that is no greater than the percentage of United States nationals employed by the United Nations and its affiliated agencies

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS.

The Congress finds that—

(1) United States taxpayers pour more than $1,000,000,000 each year into the United Nations for part of the salaries and office operating costs of thousands of foreign nationals employed by the United Nations;

(2) many of these foreign nationals are using the United Nations as a forum for Soviet propaganda and anti-American activity; and

(3) United States nationals are grossly underrepresented in key staff positions of the United Nations.

SEC. 2. LIMITATION ON UNITED STATES CONTRIBUTION TO THE UNITED NATIONS AND ITS AFFILIATED AGENCIES.

(a) LIMITATION.—Notwithstanding any other provision of law, appropriated funds may not be expended for payment of a voluntary or assessed contribution to any United Nations agency if that expenditure would cause the total amount expended for contributions by the United States, on either an assessed or voluntary basis, to that United Nations agency (for any fiscal year of that agency) to exceed the amount which bears the same ratio to the aggregate amount of assessed and voluntary contributions made by all countries to that agency (for that fiscal year) as the number of United States nationals employed as professionals by the secretariat of that agency bears to the total number of professionals employed in such secretariat as of the time of the proposed expenditure.

(b) DEFINITION.—As used in this section, the term "United Nations agency" means the United Nations or any of its affiliated agencies, but does not include any United States peacekeeping force.●

"OPERATION MATCH" VETERANS AND EMPLOYERS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. FLORIO. Mr. Speaker, the Emergency Veterans Jobs Training Act [EVJTA] is a program through which some 24,000 veterans have been employed nationwide. It is a program which has allowed for the employment of many Korean and Vietnam era veterans for whom hope had been running out. The entire House Veterans Affairs Committee, under the leadership of its Chairman G.V. "SONNY" MONTGOMERY, can be justifiably proud of the efforts regarding this exemplary program.

Mr. Speaker, some 3 weeks ago I sponsored a major "job fair" in the First Congressional District of New Jersey. The record of New Jersey in utilizing the benefits offered by the Jobs Training Act has been very poor. The aim of my effort was to increase the awareness of thousands of unemployed veterans in southern New Jersey as to the advantages offered by the EVJTA. In effect, what transpired was the largest veterans job fair ever to be held in New Jersey. "Operation Match," as we called it, was a very successful event. It very graphically demonstrated both the positive aspects of the EVJTA and the fact that New Jersey has been lagging in the program's implementation.

Mr. Speaker, following Operation Match I testified before the Education, Training and Employment Subcommittee of the House Veterans' Affairs Committee. Chairman TOM DASCHLE of that subcommittee very astutely pointed out during the hearing that the problem of outreach is a national one. Although the program has been a success, there are many areas which can and will be improved. Chairman DASCHLE's role in the future implementation of the program's continuance will be a vital and necessary influence on its success. I am quite confident of the future of EVJTA with TOM DASCHLE's support and determination.

I would like to submit my testimony before the subcommittee as it pertained to Operation Match. If there are other Members of Congress with similar difficulties as we in New Jersey experience, I would like to make the mechanics of this successful event available to them. The veterans of your district could well benefit from such an operation. I am hopeful that the future will see many veterans, nationally, become aware of the program due to our efforts.

Mr. Speaker, the testimony follows:

STATEMENT OF HON. JAMES J. FLORIO TO SUBCOMMITTEE ON EDUCATION, TRAINING AND EMPLOYMENT TO THE HOUSE VETERANS' AFFAIRS COMMITTEE

Thank you, Mr. Chairman. I am happy to be here with you today, this time as a witness, rather than a subcommittee member. It is indicative of the importance of my report that we are here in these somewhat unusual circumstances.

I am honored to be among our colleagues who have cosponsored legislation which you have introduced calling for the extension of the Emergency Veterans Job Training Act. H.R. 1408, the Veterans Employment Amendments of 1985, will allow even more veterans to register and participate in the valuable training and employment program.

Mr. Chairman, I speak to you today from firsthand knowledge of the situation of the Job Training Act as it exists in the state of New Jersey. Last week, on March 11, I sponsored with the Veterans Administration and the New Jersey Department of Labor an event which I believe may be relevant to all of us. "Operation Match: Veterans and Employers" was a one day event which in effect was the largest veterans job fair of its type ever to be held in New Jersey. While the scope of its success is still being measured, there were several important lessons which we learned.

The primary fact of the matter remains that there are many hundreds of veterans out there who are still unemployed. Nearly 750 veterans turned out for Operation Match, a number of which was in our estimate quite large for our area in southern New Jersey. Many of the veterans were lacking complete information about appropriate procedures to follow to register for the program or even that for those purposes the program had in fact expired for new registrants. In short, it was quite apparent that a great deal more of what has been termed "outreach" needed to be done.

Fortunately, the large numbers of veterans attending were able to benefit from the hard work done by those organizing the event. Operation Match saw some 107 employers in attendance that day at Camden County College. Through the work of the Camden County offices of employment and training we were able to insure that each employer received three follow-up phone calls after having signaled his initial interest in attending. It was this type of persistence which made the event successful.

I am told that having over 100 employers present at a job fair is nearly an unprecedented occurrence. It was indeed fortunate that we did have that many prospective jobs available so as to better service the large number of veterans. But, Mr. Chairman, it was not only for the jobs that the veterans came to Operation Match. It was for other needs as well. In the areas dedicated to the national and local veterans service organizations, State agent orange commission, educational service desk and others, there was always a constant flow of traffic.

Without the hard work of the people of the Veterans Administration, Camden County, the State Department of Labor, and various veterans organizations, it is doubtful that Operation Match would be as successful as it was. I am confident that after the full figures are gathered—those that will indicate exactly how many jobs were filled on March 11—that we will be able to see a significant impact upon the total New Jersey jobs filled through the Emergency Veterans Job Training Act.

Mr. Chairman, I strongly support an extension of the Emergency Veterans Job Training Act as called for by H.R. 1408. It is important that the hundreds of veterans I met at Operation Match last week be given the added opportunities that the extension will offer them to find and maintain a job. I cannot emphasize the importance of "outreach" and the real needs associated with veterans who are unemployed. One cannot do enough—it is that simple.

For Operation Match we aired a television public service announcement featuring Ron Jaworski, quarterback of the Philadelphia Eagles, and myself, urging veterans to attend the event on March 11. That same PSA was distributed to some 22 radio stations in the Delaware valley area and, in fact, the soundtrack received relatively significant amounts of air time. We worked continuously with the veterans service organizations and all parties involved to insure that as many veterans as possible learned of Operation Match. Mr. Chairman, although we were successful I am sure that many more veterans are "out there" who were not reached by our messages. This is why this legislation is so important to all of us.

I would like to recommend that provisions be made in the upcoming extension of the Act to increase the amount of "outreach" being done. I am convinced, after what I experienced last week, that there are many thousands of veterans who have not yet benefited from the provisions of this legislation. Mr. Chairman, I would be more than willing to share our plans and ideas which created Operation Match with any Member. In my view, we have developed a textbook approach to meeting the needs of veterans in our area, and if there is any Member who feels that our experience would be helpful to him I would gladly confer with him.

Thank you very much, Mr. Chairman, for this opportunity to tell the subcommittee of our efforts to implement this program. I would be happy to answer any questions which you or the subcommittee may have.●

ST. PATRICK'S DAY 1985—AND STILL NO PEACE IN NORTHERN IRELAND

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. GILMAN. Mr. Speaker, this past March 16 and 17, I was pleased and honored to be able to participate in the festivities marking St. Patrick's Day. Each year Americans of all ethnic groups pay tribute to the rich traditions of the nation and people of Ireland and to the vast contributions made by the 40 million Irish Americans toward the health and prosperity of our great Nation. And yet, as we participated in this joyous occasion, as we donned the green and joined hands in churches and parades across the Nation, our thoughts turned to the continuing tragedy of the violence in Northern Ireland. Indeed, as we note the passage of yet another St. Patrick's Day, peace, justice, freedom, and prosperity continues to elude many in that troubled corner of the Emerald Isle.

The past 3 months have seen some encouraging developments, and some frustrations, in our efforts to achieve a real and lasting peace in Northern Ireland. On February 20, 1985, British Prime Minister Margaret Thatcher addressed a joint meeting of Congress. I was gravely disappointed that Mrs. Thatcher did not take advantage of this unique opportunity and chose instead, to decline an invitation to meet with concerned Members of Congress to discuss the situation in Northern Ireland. I would have especially liked to learn Mrs. Thatcher's specific reasons for rejecting the New Ireland Forum and inquire whether or not she would be amenable to any further exploration of the forum's recommendations.

More recently I had an opportunity to meet with the Secretary of State for Northern Ireland, the Right Honorable Douglas Hurd, during his recent visit to the United States. Just prior to Secretary Hurd's arrival here, the British press reported that Ireland and Britain had made substantive progress toward achieving peace in Northern Ireland. While we here in Congress were very heartened by these reports, Secretary Hurd was careful to note that it would be some time yet before we know whether or not the continuing dialog between Dublin, London, and Belfast, will have any practical results. I am certain that I am not alone in my wish for a successful conclusion to these negotiations and my hope that next St. Patrick's Day will see peace and justice for all, in Northern Ireland.

Our outrage at the injustices suffered by the Catholic minority in Northern Ireland and our prayers for peace in that troubled land, were expressed most eloquently in a homily by Archbishop John J. O'Connor delivered during St. Patrick's Day Mass, at St. Patrick's Cathedral in New York City, on March 16, 1985. I commend the full text of the archbishop's to my colleagues' attention:

ST. PATRICK'S DAY MASS, 1985

(By Archbishop John J. O'Connor)

Once again there are far too many distinguished visitors here to risk singling out any. I want to thank my brother Bishops for being here and my brother priests. I am very happy that the Scriptures today were read by two Christian Brothers since I owe so much of my vocation to the Christian Brothers and we are particularly pleased that our senior Archbishop, Archbishop Maguire, retired Coadjutor of this Archdiocese, is here and Bishop Furlong, one of the most senior and beloved bishops in the United States.

Many a tourist passes him by today without a glance and even the New Yorkers, aware of his presence, are dwindling in numbers. But Father Francis Duffy still stands watch in Times Square, a symbol of the 165th Regiment of New York, the famous Fighting 69th, of whom could well be said what was said of the Marines at Iwo Jima, that among them uncommon valor was a common virtue. The legendary 69th was highly instrumental in bringing the St. Patrick's Day Parade through its years of infancy. They are with us today and we are grateful that they are. We shall be remembering them and particularly their fallen numbers in a very special way in this Mass. The statue of the extraordinarily legendary Father Francis P. Duffy is the only statue dedicated to a priest in the history of New York that stands on public property and well deserved the honor.

We are equally grateful for the presence of the Ancient Order of Hibernians who did so much for the early Church of New York and so very much to launch the St. Patrick's Day Parade from the outset. I'm wearing today beneath my vestments the Cross of Archbishop John Hughes of the County of Tyrone, the first Archbishop of New York. And when the old St. Patrick's Cathedral was in danger of being burned and looted during the nativist riots of 1844, Archbishop Hughes called one thousand men of the Ancient Order of Hibernians to protect the Cathedral and so they did. A plaque still stands in the Old St. Patrick's Cathedral that they defended and it reads—"Erected to the memory of members of the Ancient Order of Hibernians of the City of New York who in April 1844, at the call of the Most Reverend John Hughes, rallied to the defense of the Cathedral when it was threatened by the forces of bigotry and intolerance." Many years later the AOH gave a magnificent chalice to Cardinal Farley, Archbishop of New York, and that is the chalice that I will be using in this Mass today.

Now having with us both members of the Fighting 69th, whose heroism symbolizes that of millions of Americans who have served our country so well and of the thousands of Chaplains who have served those who have served—and having here the AOH, symbolic of the tremendous contributions made to our country not only by Irish Catholics and others but by all Catholics and many others, including those in the Military, all this provides an exceptionally appropriate setting for an announcement of historic import that I wish to make on this Saint Patrick's Day of 1985.

On November 24, 1917, because of World War I, Pope Benedict XV appointed another Patrick, Archbishop Patrick Hayes, then Archbishop of New York, as the first Bishop Ordinary, as it was called, for the Roman Catholic Armed Forces of the United States. From that day until today, through Cardinal Spellman, Cardinal Cooke and myself, the Archbishop of New York has had responsibility for all of our Catholic Armed Forces and Veterans Administration all over the world. I formally announce today, with humility, with great pleasure, that our Holy Father, Pope John Paul II, has decreed that His Excellency, here with us today, Archbishop Joseph T. Ryan, has been appointed Military Prelate or Bishop Ordinary of the Armed Forces in my place. For the first time since its birth in 1917, the Military Vicariate will cease to be associated with the Archbishop of New York. This announcement was decreed by the Holy See to be made public today, effective date will be March 25th, one week from Monday and one week and one year after I assumed the Archbishopric of New York. It is obvious that the Holy Father, recognizing my lack of familiarity with the Military, determined that the mantle should pass to another. I warmly congratulate my good friend and loyal comrade, Archbishop Joseph T. Ryan. As I told him before Mass, he is still my subject for one more week.

I have selected today's Gospel reading with deliberation. "Simon, son of John, Simon Peter, do you love me?" "Yes Lord, you know that I love you." "Simon, Simon, son of John, do you love me?" "Yes Lord, you know that I love you." "Simon, John's son, Simon, Simon whom I have called Peter, do you love me?" "Lord, you know everything, you know well that I love you."

There are marvelously profound analyses of these words to be found in the words of our scripture scholars and they give us solid foundation for explaining some of the most important teachings of our faith. But for our purposes today I suggest one very simple explanation of Our Lord's questioning Peter three times. He simply wanted Peter to say over and over and then over again, I love you. For Our Lord knew so very well the healing power of words as He knew the destructive power of words. He knew how devastated Peter had been when in bitter words he had three times denied even knowing Our Lord, much less being his friend. Now Our Lord would begin the healing process—let words of love restore what words of bitterness had destroyed. Let words of loyalty begin the process of reconciliation ruptured by words of betrayal.

There has been horrible pain in Ireland for a long, long time. There has been bitter suffering. There has been oppression met with violence and violence met with further oppression. Men and women, and whole families, teenagers and little children of all political positions and all religious persuasions have paid dearly for months, for years, for generations. The Holy Father has pleaded passionately for an end to it all—to the injustice, the oppression, the indignity and to the violence and the terrorism and the paralysis of fear. And he has called for the use of the word, the healing word, the reconciling word, the word of reasoned dialogue.

Today the majority of us in this Cathedral of Saint Patrick will receive the Living Word, the Son of God in Holy Communion. Before we do so, after I have held His Body aloft with the words, "Behold the Lamb of God, Behold Him Who Takes Away the Sins of the World", all will say the time-honored words, "Lord, I am not Worthy but Say Only the Word and my Soul shall be Healed." I know it is said that talk is cheap—it's not cheap when we use words of love for these are reflections of the Divine Word the Living Word who is Jesus the personification of love itself. Words are not cheap when we use the words of love because they demand of us so much sacrifice, make us so vulnerable.

I know it is argued by each party that other parties won't listen but it is terribly difficult to hear over the sound of guns or tanks. I know that willingness to talk mere words can be perceived as a sign of weakness. Christ was at His strongest, not His weakest, despite all appearances to the contrary, when He cried out from the Cross, "Father forgive them for they know not what they do." And the good thief hanging on the Cross, who has seemed to have been at his strongest when he was pillaging others, now at what appeared to be his weakest, was clearly stronger than ever before in his life when he asked forgiveness of Christ, the Son of God.

I know that sometimes the powerful of the world turn back conciliatory words with public scorn. Then the words must be repeated and repeated and repeated until the

shallowness of the rebuff defeats itself. The whole world recognizes that the weak are strong in their initiatives for peace and the strong are weak in the rejection of those initiatives.

My words today may please few and displease many. They are spoken from the depths of my being. They are a passionate plea to all. My actions today may please some and displease others. For following this Mass, as Archbishop of New York, having carefully and prayerfully conferred with hosts of advisors and listening to an exceptional number of validly concerned parties, I shall review the Parade from the steps in front of the Cathedral in honor of Saint Patrick and of all Irish everywhere of whatever religious persuasion. I will do this with profound respect for my beloved predecessor, His Eminence, Cardinal Cooke, who two years ago made in honor and all integrity, with malice toward none and charity toward all, the judgment which he deemed appropriate for the circumstances of the day. In that same spirit I will do today what I believe should be done. There are those good and sincere people who will be pained by my decision and who believe it implies support for violence and terrorism. Nothing could be farther from the truth. I reiterate and reemphasize publicly what I have said repeatedly before, I cannot accept, I cannot support or encourage support of the violence in Ireland by whomever perpetrated. And that includes both physical violence and moral violence. The violence of those who shed blood and engage in acts of terrorism, the violence of those who rob a people of justice, deprive them of their birthright and inflict on them continuing indignities. I cannot and I will not condemn or indict those who legitimately struggle for justice and for their human rights in Ireland. But I must condemn and I do condemn once again in the strongest terms, all acts of violence by whomever or against whomever they are perpetrated and all acts of terrorism as well.

And finally, it is not for me to determine the political procedures for ending the conflict. I am a bishop, not a politician. But the moral course is clear, the time has come and is long overdue for those great nations of the world, truly dedicated to liberty and justice for all, to raise their voices loudly and clearly and unmistakably in the forums of the world or privately and quietly but persuasively, as they see fit, to demand that the oppression end the slaughter cease. Which nation should lead the way but our own!

Now let us pray—let us pray this Feast Day of St. Patrick, that all parties to the conflict and we ourselves, will one day see in one another what St. Patrick saw wherever he looked.—You will recall the legend on his breastplate, Christ above me, Christ beneath me, Christ beside me, Christ before me, Christ behind me, Christ all around me, Christ in the mouth of friend and stranger. God Bless you All!●

THE FUEL CONSERVATION AND DEFICIT REDUCTION ACT OF 1985

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. SEIBERLING. Mr. Speaker, I am today introducing legislation for the dual purpose of encouraging renewed concern about fuel conservation and reducing the deficit. The legislation would accomplish these objectives by increasing the Federal excise tax on gasoline by 10 cents per gallon and by earmarking the estimated $10 billion annual revenue from the tax to the Treasury General Fund.

Only a few short years ago, Americans waited in line for hours to fill up their gas tanks. The gasoline shortage prompted a wave of consumer and Government concern about energy conservation and encouraged the development and sale of fuel-efficient passenger cars. The current world oil glut has had a salutary impact on gasoline availability and gasoline prices. It has also had the unfortunate side effect of minimizing consumer concern about fuel economy and fuel conservation. Put simply, most Americans have forgotten the gas lines which were a fact of everyday life such a short time ago.

Over the past 4 years, gasoline prices have declined by some 20 cents per gallon. A 10-cent increase in the tax on gasoline would thus not put prices back to where they were at their peak, but would encourage Americans to pay a little more attention to fuel economy.

Just as important, by requiring that the $10 billion raised each year from the tax be put in the general fund, my bill would put a significant dent in the $200 billion deficits we are now facing. It is high time we stopped kidding ourselves about the ability of the economy to outgrow the deficit. I support spending reduction as one part of the deficit reduction battle. But spending cuts offer only a partial solution. If we are going to make an honest effort to cut the deficit before we return to economic stagnation, we are simply going to have to bite the bullet and find some means of raising revenue.

A 10-cents-per-gallon tax on gasoline is just such a measure. It offers a quick means of raising revenue. It is easily collectible. There are no hidden loopholes for the wealthy. And, in conjunction with other deficit reduction measures, it demonstrates that the Congress is prepared to make the hard choices necessary to cut the deficit before it cuts off economic growth.

Gasoline taxes are imposed on the producer and then passed on through the chain to the retail customer—the auto owner—by increased prices, ultimately at the gas pump. But there is reason to believe that producers affected by my bill would not end up passing all 10 cents of the tax on through the system to consumers. A 1983 study by the Congressional Research Service, for example, estimated that the 5-cents-per-gallon gas tax enacted in conjunction with the Surface Transportation Assistance Act of 1982, would result in a price increase of half that (2.5 cents per gallon) at the pump. So I am optimistic that, because of current market competition and the oil glut, a 10-cent tax will not be passed along in its entirety to the consumer. Even if the tax were passed on in full, it would still reclaim only one-half of the gasoline price drop over the last 4 years. And we cannot forget that our $200 billion deficit with its added billions in interest payments, is a"tax" of the worst kind on our economy and on the future economic health of the country.

The Congressional Budget Office's report to Congress on "Reducing the Deficit: Spending and Revenue Options" of Feburary 20, 1985, discussed the option of an additional gasoline tax as a deficit reduction measure. As the report notes, "compared to other countries, many of which levy taxes of well over $1 a gallon, the United States charges one of the lowest tax rates on motor fuel. Beyond raising revenue, an additonal motor fuel tax would reduce consumption of gasoline * * * and dependence on foreign oil * * *"

Mr. Speaker, only last February, Martin Feldstein, the former Chairman of the Council of Economic Advisers to President Reagan, endorsed a 10-cent tax increase on gasoline as one component of a deficit reduction plan. As Mr. Feldstein noted in his essay in Time Magazine of February 4, 1985, the reason that we have reached a deficit of nearly 5 percent of GNP under President Reagan is "that Government spending has increased sharply without a corresponding increase in taxes to pay for it." This is the legacy of the "supplyside" tax cuts, coupled with the massive increases in defense spending over the past 4 years. We have got to face up to this reality before it is too late to prevent economic collapse.

My bill, coupled with an equitable effort to cut spending, offers a significant step toward getting out of the deficit mess in which we now find ourselves. It is not an easy choice, and it will take strong will and political courage to enact. I hope we are up to that task, for the times demand it.

The full text of Martin Feldstein's analysis of the deficit follows:

[From Time, Feb. 4, 1985]

HOW TO GET THE DEFICIT UNDER $100 BILLION

(Martin Feldstein, who wrote the essay that follows, served from September 1982 to July 1984 as chairman of the Council of Economic Advisers in the Reagan Administration. One of the leading conservative economists, he nonetheless differed with the White House on several key budget and tax issues, in particular, what he saw as the grave danger posed by large deficits.)

There is now widespread agreement in the U.S. that the budget deficit is the most serious problem facing the American economy. This year it will exceed $200 billion, nearly

$1,000 for every man, woman and child in the nation. Without tough legislative action, the deficits will continue to increase and will reach nearly $300 billion a year by the end of the decade. If the U.S. is to continue to enjoy a healthy economic recovery and a rising standard of living, these huge deficits must be eliminated.

A $200 billion deficit this year means that the Government is adding $200 billion to our national debt—an increase that some day must be repaid or that we and our children and our children's children will have to pay interest on forever. The deficits projected for the next several years would increase the national debt by more than $1 trillion between now and the end of the decade. If this is allowed to happen, the increase in this decade alone will be greater than the entire rise in the 200 years since this nation began.

Any addition to the national debt increases the Government's future annual interest costs, even if the interest rates remain unchanged. A $200 billion increase in the national debt raises the Government's annual interest cost by some $20 billion a year. That makes the one-year increase in the Government's annual interest bill more than the entire cost of the food-stamp program. The interest that the Government pays on the national debt has soared from less than $130 per person in 1960 to more than $500 per person this year, and is heading to an annual total of almost $750 per person by 1989 even when expressed in constant 1985 dollars.

By raising interest costs on the national debt, large budget deficits make future tax increases inevitable. By 1989 nearly half of the income taxes that we pay will be used to finance interest payments on the Government debt.

Continued large deficits will also mean a slower rate of economic growth and a reduction in our future standard of living. Experience shows that the key to raising living standards is investment. New factories, offices and stores and new machinery and equipment increase the output produced by each employee. This higher productivity then permits the noninflationary increases in wages and salaries that enable employees to afford a higher standard of living. Budget deficits undermine such increases because they require the Government to borrow funds that would otherwise be available to finance investments in plant and equipment and in housing. The projected annual deficits of 5% of G.N.P. mean that Government borrowing would absorb more than half of these funds.

The competition for money between the Government and private borrowers inevitably raises the level of inflation-adjusted or real interest rates. Despite the recent fall in market interest rates, the real rates on home mortgages and corporate bonds today are about 10%—or more than three times the level in the 1970s. The principal reason for this increase has been the rise in the federal budget deficit. The high real interest rates caused by the budget deficit are also the direct source of the overwhelming trade deficit now hurting American exporters and those U.S. firms competing with imports. The rates have attracted funds to the U.S. from around the world, and the increased demand for dollars has raised the dollar's value by more than 60% since 1980.

The funds attracted to the U.S. from abroad add to the pool of funds available to finance investment in the country. This year the capital inflow will be enough to offset half of the Government's borrowing. But the current level of capital inflow cannot be sustained. Foreign assets in the U.S. have increased 50% since 1980. Even if U.S. interest rates remain high, foreign investors will eventually become saturated with dollar securities. When the inflow of funds shrinks or stops, investment in the U.S. will decline, and real interest rates here will rise even higher—unless Government borrowing has by then been brought under control.

The final major adverse effect of sustained large budget deficits is to increase the risk of an inflationary monetary policy. We already hear occasional calls for an easier monetary policy that its advocates incorrectly claim will stimulate growth, increase tax revenue and reduce future deficits. But experience shows that an excessive monetary expansion would not ony fail to achieve an increase in growth or a sustained reduction in real interest rates but would instead cause a rise in the rate of inflation.

The deficits that now loom so large were unimaginable just a few years ago. The U.S. had a balanced budget in 1960 and again in 1970. How did we get to a deficit of nearly 5% of G.N.P. in 1984? The answer in short is that Government spending has increased sharply without a corresponding increase in taxes to pay for it. But this short answer hides four important facts about the way that the composition of spending and taxes has changed.

First, the jump in spending on Social Security and Medicare—from 2.3% of G.N.P. in 1960 to 6.6% in 1984—accounts for virtually all of Government spending's increased share of G.N.P. Second, there has been an absolutely unprecedented cut of 12% since 1980 in the real outlays on all other nondefense programs. More specifically, spending on all such nondefense programs fell from 9.3% of G.N.P. in 1980 to 7.3% in 1984, and will decline to 6.2% by 1989 even if there are no further changes in the law. Third, the defense-spending share of G.N.P. fell by one-third between 1960 and 1980, and has only begun to recover its previous level. Defense spending took 9.7% of G.N.P. in 1960 and declined to only 5.3% of G.N.P. by 1980. Since then it has increased to 6.5% of G.N.P. Fourth, there has been a sharp decline in income taxes as a share of G.N.P. and a rapid rise in the payroll taxes used to finance Social Security and Medicare. While payroll taxes rose from 2.1% of G.N.P. in 1960 to 5.7% in 1984, all other taxes fell from 16.4% of G.N.P. to 13%.

The Reagan Administration inherited a deficit equal to 2% of G.N.P., but predicted that this could be eliminated in fours years by a combination of reductions in Government spending and the increased tax revenue that it calculated would result from a much improved rate of economic growth. President Reagan did cut total nondefense spending other than Social Security and Medicare by a very substantial $43 billion, measured in 1984 dollars. But these cuts were not enough to offset the continued rapid rise in Social Security and Medicare benefits, the sharp increase in defense outlays and the jump in interest on the national debt. Moreover, the 1981 and 1982 tax bills reduced total tax revenues by $90 billion in 1984 and by a projected $173 billion in 1987.

The President and his Cabinet budget group now recognize that growth alone cannot solve the deficit problem, and have called for very tough spending cuts aimed at shrinking the deficit to 2% G.N.P by 1988, or roughly $100 billion. The President's targets for budget savings properly included subsidy payments to affluent farmers, medical care for middle-class veterans, subsidized loans to small- and medium-size businesses and grants to states and local governments with budget surpluses. Nevertheless, the President's proposals cannot reduce the deficit adequately because they are restricted to a small part of total Government outlays.

To achieve the needed deficit reductions, every part of the budget will have to play a part. Congressional leaders in both parties have made it clear that their first change in the Administration's budget will be to slow the growth of defense spending. By 1989 currently projected defense outlays will be reduced by between $30 billion and $50 billion. But the combination of defense cuts that Congress will require and nondefense cuts that the Administration can achieve is not likely to reduce total spending on Government programs in 1989 by more than $100 billion. Although that would certainly be a major achievement, it would still leave an unacceptable deficit of nearly $200 billion at the end of the decade. To reduce the deficit to the Administration's target level of 2% of G.N.P. in 1988 and to achieve a balanced budget by early in the next decade, it will be necessary to go beyond these cuts in defense and nondefense programs.

Government outlays for Social Security benefits tripled in the past decade to exceed $175 billion in 1984, and are currently slated to reach $250 billion a year by 1989. During the 1970s, Social Security benefits per retiree rose 50% after adjusting for inflation, while the average earnings per employee did not increase at all after taking inflation into account. Social Security benefits are paid without regard to financial need, and most of the $175 billion of current Social Security benefits goes to individuals who are certainly not poor. Under current law, Social Security beneficiaries also receive an annual cost of living adjustment (COLA) that completely offsets the rise in consumer prices.

A simple way to reduce the future growth of Social Security benefits would be to modify the annual cost of living adjustment, restricting the automatic increase to the excess of inflation over 3%. Such a 3% threshold on the COLA would mean that benefits would rise by 1% if the inflation rate were 4%, by 2% if the rate were 5% and so forth. This would slow the growth of total benefits without denying anyone a Social Security benefit and without reducing the size of any retiree's monthly check.

Although each retiree would experience only a small reduction in the increase of monthly benefits, the cumulative effect on total benefit outlays would be very substantial. A 3% indexing threshold would reduce 1989 Social Security outlays by about $35 billion. And if the same principle for limiting indexing were extended to all other Federal Government retirement programs, the savings would rise to $50 billion a year by 1989.

A tough rethinking of the major domestic programs and a significant slowing of defense spending and of Social Security benefits can reduce total 1989 outlays—including interest on the national debt—by as much as $160 billion. But even with such savings, the deficit would still be more than $100 billion. There is thus no politically feasible way to achieve the Administration's own goal without increasing tax revenue. After the Congress has completed its search for spending cuts, it will be time to turn to the problem of raising revenue.

It is important that any revenue increase be achieved with as little damage to economic incentives and long-term growth as possible. That means that the current incentives to save and to invest should be preserved and strengthened. It also means that further increases in already high tax rates should be avoided.

Although there is never a good way to raise tax revenue, there are three ways that are better than other alternatives. The first would be a 3% threshold on the indexing of the income tax brackets. Taxes would continue to be adjusted every year to offset the effects of inflation but only to the extent that inflation exceeds 3%. This would parallel the 3% threshold on the indexing of Social Security benefits and would be a natural basis for a political trade between those who oppose any reduction in the growth of Social Security benefits and those who oppose any tax increase. By 1989 such a change in tax indexing would increase annual revenues by $35 billion.

A second source of additional revenue would be a tax on energy. The price of oil has declined more than 20% in the past three years, and is likely to go on falling. Even a relatively small 5% excise tax on energy could produce some $15 billion a year by the end of the decade. And an extra 10¢-per-gal. tax on gasoline—which would offset only half of the 20¢-per-gal. price decline that has occurred over the past four years—would raise $10 billion a year.

Finally, tax reform of the type the Treasury recently proposed provides a framework within which revenue can be raised, the incentives for good economic performance strengthened and overall tax fairness improved. I disagree with many specific features of the Treasury's proposal, particularly those that would hurt incentives for saving and business investment. But I believe that there is substantial virtue in the basic notion of changing the tax rules in a way that permits reducing currently high tax rates and simplifying compliance for the vast majority of taxpayers. It should not be difficult to design a tax reform that by changing some of the current tax deductions and special tax rules, keeps the distribution of tax payments unchanged, lowers the current high tax rates and raises as much as $50 billion a year more revenue.

In short, the economically desirable reductions in the budget deficit can be achieved politically by a comprehensive reduction in spending and a well-structured change in the tax rules. The combination of slower growth of defense spending and of Social Security benefits and actual reductions in a wide range of over-size, nondefense programs can lower outlays by $160 billion in 1989. But to reduce the deficit to less than 1% of G.N.P. and bring a balanced budget into sight will also require tax changes that raise 1989 tax revenues by $75 billion to $100 billion.

We are now at a critical point for the future of the American economy. Substantial progress has been made in the past four years in putting the economy on a path that can provide a rising standard of living for everyone. Inflation has been brought under control, incentives for saving and investment have been strengthened, and the burden of the Government on the private economy has been lightened. But that progress and the current bright prospects for the future can easily be destroyed by fiscal irresponsiblity. The next six months will test whether our political sytem can produce the tough fiscal legislation that is now required if we are to sustain the progress that has been made and realize the full potential of our economic future.●

REDUCTION OF UNLAWFUL DRUG DISTRIBUTION ACT OF 1985

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. RUDD. Mr. Speaker, I am today introducing legislation to establish the death penalty for those convicted of unlawful drug dealing.

Every year, drug traffickers smuggle into the United States as much as 4.4 U.S. tons of heroin, 77.1 U.S. tons of cocaine, and 16,530 U.S. tons of marijuana. Despite our best efforts, we have been able to intercept only a small portion of these illicit drug imports. In 1983, the quantity of combined seizures of marijuana amounted to 13.4 U.S. tons, hardly enough to dent the estimated U.S. demand in that year of 14,997 to 15,428 U.S. tons.

In 1985, despite an American expenditure of $1.2 billion to combat the drug trade, marijuana and heroin imports are expected to jump 10 percent and cocaine 4 percent.

We haven't been able to put a dent into the drug trade with just heavy fines and jail terms. Those behind the drug trade have amassed fortunes amounting to as much as $4 billion, and the profits from all drug sales are enough to encourage people to take part.

We must send the signal that we are serious about combating the illicit drug trade, and that the ultimate penalty will be imposed for those that threaten the health and well-being of our citizens and the moral fiber of our Nation with their illegal drugs.

We must make it clear that those who engage in these crimes will also pay the price for threatening our national security. There is ample evidence that money from drug dealing supports terrorists, and that terrorists reciprocate with assistance to drug traffickers. Organized crime works hand in hand with these outlaws for their own profit. According to the State Department, there is even evidence that some Communist governments are also involved.

I urge my colleagues to join me as a cosponsor of this legislation to provide the option of a death penalty for drug trafficking. Let's make it clear that we're serious about putting a dent in, if not a halt to, the illegal drug trade. The text of the legislation follows:

H.R. 1907

A bill to amend the Controlled Substances Act to provide the penalty of death for continuing criminal enterprise and dangerous special drug offender offenses

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Reduction of Unlawful Drug Distribution Act of 1985".

SEC. 2. AVAILABILITY OF DEATH PENALTY.

(a) CONTINUING CRIMINAL ENTERPRISE.—Paragraph (1) of section 408(a) of the Controlled Substances Act (21 U.S.C. 848(a)) is amended by striking out "shall be sentenced" the first place it appears and all that follows through the end of such paragraph and inserting in lieu thereof "shall be sentenced to the penalty of death.".●

(b) DANGEROUS SPECIAL DRUG OFFENDER.—Section 409(b) of the Controlled Substances Act (21 U.S.C. 849(b)) is amended by striking out "the court shall sentence the defendant" and all that follows through "otherwise authorized by law for such felonious violation." and inserting in lieu thereof "the court shall sentence the defendant to the penalty of death.".●

MY PLEDGE TO AMERICA

HON. F. JAMES SENSENBRENNER, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. SENSENBRENNER. Mr. Speaker, each year the Veterans of Foreign Wars of the United States and it's ladies auxiliary conduct the Voice of Democracy Scriptwriting Contest. This year more than 300,000 secondary school students participated in the contest competing for the six national scholarships.

I am pleased to present to the House the winning script from Wisconsin, written by Miss Roberta A. Kastelic of Elm Grove, WI. Miss Kastelic is a student of Divine Saviour Holy Angels School of Milwaukee.

Her script entitled, "My Pledge to America," is as follows:

MY PLEDGE TO AMERICA

"I pledge allegiance to the flag of the United States of America, and to the Republic for which it stands, one nation, under God, indivisible with liberty and justice for all."

How often have we mumbled those words in grade school? Have we ever examined exactly what we were promising? Most Americans have not.

"I Pledge Allegiance—allegiance—the duty of a subject to this government. What can a 16 year old pledge? I do owe my country a great deal. But I do not see my nation as an amorphous conglomerate, rather, I see America through her everyday people.

Walking along Mainstreet America, I see the faces of the individuals to whom I make my pledge. As I pass an elderly man, I notice his tattered clothing and his overstuffed bag of belongings at his side. His face has worn with years of struggle. My eyes capture his, and I smile, in this smile I

pledge my services to the underprivileged. I can encourage participating in food drives and meal programs in poor communities.

Continuing down the road, a young boy stands waiting at the bus stop. As he finishes eating his candybar, he crumbles the wrapper into a ball, aims for the nearest wastebasket and shoots it through the hoop, "Good for two," he whispers to himself. "Good for you," I reply with a grin. He returns the smile and boards the bus. To him, I make my commitment to preserve the beauty of this nation. I dispose of materials in their proper containers; I can also take part in neighborhood cleanups. Simply picking up pieces of paper off the sidewalk makes my city more attractive.

Up ahead, I can see the old restaurant that closed two years ago. Its walls are now covered with graffiti. Within this mural of hate are two unwritten pledges I must take. First I oppose all vandalism. If I overhear my peers planning to spraypaint school walls, it is my duty to persuade them not to. My influence can make a difference. I must also assist the police in discovering the vandals if I know their identities. Among the large, white Ku Klux Klan lettering, profanities and swastikas, the evil of discrimination thrives. I am enraged at these injustices. I pledge equality to all men and women of all races, religious and ethnic backgrounds. Several people at my lunch table opposed black students eating with us, I openly invited these classmates to join us for lunch. For it takes both the white and black keys and to play the "Star Spangled Banner." By spreading equality, I can help foster a more harmonious America.

Across the street, a woman pushes her father's wheelchair. To them I pledge my services to the handicapped. I never thought about Mrs. Wilson down the street; she has been confined to her home for several years. I bet she would enjoy some company or perhaps I could take her for a walk. How many people in nursing homes are physically cared for, but left emotionally starved. Here, my services are needed.

On the corner of Mainstreet, past presidential campaign posters cover a telephone pole. All the efforts put forth in both campaigns reflect the importance of voting. Each vote holds tremendous power. When I am of voting age I shall dedicate myself to following the candidates and issues to form a rational decision. Until that time, I can encourage voters to take advantage of our electoral process.

Near the park I see Mr. Williams familiar face. Today must be the Veteran's meeting for he is proudly wearing his medals and hat. His eyes manifest pride and devotion to our nation. It is to him that I pledge my services in defense of this country. All the wondrous gifts this country has bestowed on me are worth protecting.

Sitting on a park bench are a grandmother and her son watching his child feed the pigeons. These individuals represent the past, present, and future generations to whom I make my pledges. When we learn from the past we can improve the present and prepare for the future. To these individuals I pledge myself; my mind, body, spirit. I promise to utilize my potential to better my country today and perfect it tomorrow!●

THE STAR-LEDGER ON THE MURDER OF MAJOR NICHOLSON

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. COURTER. Mr. Speaker, postwar agreements between the four allied powers occupying Germany guaranteed that broad sectors be left open to military observers from each country. But the construction of the Berlin Wall, and other events, led to an unwritteen Soviet policy of aggressive antagonism of U.S. military personnel. In a half dozen instances since 1980, our soldiers in unrestricted zones of East Germany have been beaten, fired upon, or had their vehicles rammed. By contrast, Soviet officers caught in restricted zones have always been detained briefly and released. The difference in policy reflects a revealing difference in political character.

Now an American major has been shot down, and left to bleed to death under close Soviet observation.

Allow me to enter into the RECORD this assessment of the circumstances of the murder which the editorial board of the the Star-Ledger, New Jersey's leading newspaper, made in the wake of the event. The column, dated March 28, 1985, follows:

[From the Star-Ledger, Mar. 28, 1985]

A CASE OF MURDER

The trigger-happy Soviet military has been at it again. The victim this time was an American soldier, Maj. Arthur Nicholson, Jr., shot down while on a routine mission in East Germany. The State Department has described his death as "murder" and the term seems literally correct.

The action is reminiscent of the shocking case of the unarmed South Korean jetliner shot down by the Soviets with enormous loss of life, also on the flimsiest of provocations. In the more recent case, the rationale appears even flimsier because the unarmed Maj. Nicholson was in an area opened by the Soviets to Western observers in February.

He was, nevertheless, shot and killed by a Soviet sentry. The major might have survived if the Soviets had not prevented an American driver who accompanied him from attempting to rescue him and provide him with emergency medical care.

The Soviet "excuse" for this conduct is no excuse at all, an official statement that Maj. Nicholson had been "caught red-handed" with a camera in East German territory. This neglects the fact that an international agreement permitted his presence in East Germany, just as the same provision permits Soviets to move freely in West Germany.

These reciprocal privileges were built into the Potsdam agreement that came at the end of World War II. In effect, they amount to a license for intelligence gathering by both sides.

The Soviets claimed, incorrectly according to the State Department, that Maj. Nicholson was in a restricted area when he was shot. But even were this claim true, custom dictates that force not be used even when an observer strays into a restricted area. Soviet soldiers who have wandered into restricted areas in West Germany in the past have not been harmed by the American officers who discovered them.

Whether these provisions contained in an agreement some 40 years ago still make sense in today's climate is an open question. In the light of the Soviet use of deadly force, a good claim could be made that it is time to abrogate the arrangement. Repeated incidents of Soviet harshness and brutality are having an adverse effect on each U.S. attempt to reach a better understanding for a peaceful world.●

LETTERS FROM STUDENTS IN EL CENTRO, CA

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. HUNTER. Mr. Speaker, I rise today to call the House's attention to a fine group of my constituents, the students of Mary Owen in El Centro, CA. Recently, I had the pleasure of meeting with Mary and she brought me a group of letters from her students. I was impressed and touched by the sincerity and thoughtfulness with which the students expressed themselves. It reinforces my belief in the future of this country to know that America's youth does care and takes an interest in civics and government.

Mr. Speaker, I feel that these letters illustrate the fine character of students that our public school systems are producing. We hear so much about the problems in our educational system, but it is reassuring to know that there are teachers, parents, and students who are working together for the common good. I would like these letters to be included in today's CONGRESSIONAL RECORD, so that my colleagues in the House may see that American teenagers do want to have an input into the Federal Government.

DEAR CONGRESSMAN HUNTER: I would like to know how you feel about the college loans not being given to families who earn over $32,000 a year.

I am the sixth child in a family of seven and there are already two in a state university. I realize that in a few years I will probably be in college, but if I have to worry about my financial support, it will probably interfere with my academic progress. My family was insulted by the statements of the Secretary of Education concerning college students. I don't expect the government to pay my way to college, but it would be nice if I could borrow the money and pay it back. I don't feel that the students of today should be punished for the lack of responsibility of the students of the past.

Sincerely yours,

JASON MAH.

DEAR CONGRESSMAN HUNTER: I am in the eighth grade and my main concern is about my future and the future of America. What

is life going to be like for young people in ten years? Will robots and computers be doing the work of tomorrow? I am planning to go to college, but I wonder about job opportunities after I graduate. Will computers be doing the work of the business world? I am in favor of technology and science working together to find solutions for problems like disease and famine.

Sincerely,

VERONICA VALENCIA.

DEAR CONGRESSMAN HUNTER: I am worried about world peace. I know that our military must be strong, but I am not in favor of nuclear weapons. I feel that national security can be obtained by having a well-trained military and educated, compassionate, level-headed leaders.

I have faith in the government and I fully intend to do my part as a productive citizen.

Sincerely,

CYNTHIA CARLO.

DEAR MR. HUNTER: I am an American of Mexican descent. I am proud of my heritage, but I'm not proud of the way Mexico handled the D.E.A.-Enrique Camarena case.

Mr. Camarena lived in a community 15 miles from where I live, so I'm very aware of his kidnapping. Because we live so close to the Mexican border, we are concerned with our relationship with Mexico. We understand that it is important to have stable relations with Mexico, but at the same time, something should be done about Mexico's poor handling of the Camarena incident.

Sincerely,

RUBEN FELIX.

DEAR CONGRESSMAN HUNTER: I am a migrant student and at times I have worked in the fields. My dad is a full-time produce worker and the situation of the American farmer really concerns us. Imperial County is dependent on agriculture and although the farmers in our area are not in the same position as in the midwest, we are still worried about our security. I don't believe that the government should finance bad business, but on the other hand, I think something has to be done to help the farmers.

I do think it's the government's responsibility to help out the farmers of America.

Sincerely,

PEDRO CARRANZA, Jr.

DEAR MR. HUNTER: I am concerned that if a nuclear war ever broke out, we wouldn't be ready for it, and that's what worries me. I think we should get a hold of ourselves and support of increase military defense by cutting off welfare and other government services to those who don't really need it. I think Americans should have a sense of national pride.

Sincerely,

SALVADOR NUNEZ.

DEAR CONGRESSMAN HUNTER: I would like to ask you about Social Security. I have a personal concern in this area. When I was eight months old, my father had a blood clot burst in his head. As a result, he is now totally disabled. I now live with my mother and stepfather, but I am concerned about my father's income. The only source of income he has is Social Security. Is this a reliable source to depend upon? Is his future secure? Is the Social Security system stable?

Respectfully yours,

TRACY LUCAS.

Mr. Speaker, I took the liberty of editing these letters slightly for space, but I know that you can see the thought that went into them. I found it refreshing to see that young Americans do care and have sound ideas about the future direction of this country.

I know my colleagues join me in saluting Jason Mah, Veronica Valencia, Cynthia Carlo, Ruben Felix, Pedro Carranza, Jr., Salvador Nunez, Tracy Lucas, and their gifted and dedicated teacher, Mary Owen.●

TREATY COMPLIANCE AND ARMS CONTROL AGREEMENTS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. HAMILTON. Mr. Speaker, on February 1, 1985, the President released a report on "Soviet Non-Compliance with Arms Control Agreements." This report raised several questions regarding U.S. policy on arms control issues, and I wrote to Secretary of State Shultz on February 12 seeking further clarification. On March 22, I received a reply to that letter. I enclose the correspondence for my colleagues' attention.

HOUSE OF REPRESENTATIVES,
Washington, DC, February 12, 1985.

Hon. GEORGE P. SHULTZ,
Secretary of State, Department of State, Washington, DC.

DEAR MR. SECRETARY: Several recent actions and statements by the United States, including the President's February 1, 1985 report on "Soviet Non-compliance with Arms Control Agreements", raise questions regarding U.S. policy on arms control issues which I would like clarified.

I would appreciate answers to the following questions:

1. What is the rationale for detailing charges in public of Soviet non-compliance with previous arms control agreements?

2. Why can't these matters of non-compliance be left to the Standing Consultative Commission (SCC) meetings in Geneva where they have been discussed for over a decade?

3. Why is a public report detailing charges any more likely than the SCC to resolve concerns of Soviet non-compliance?

4. What specific shortcomings of the SCC process led you to go public?

5. What purpose is served if this public reporting makes arms control agreement harder to get and then harder to ratify?

6. In your view, do any of the areas of Soviet non-compliance threaten the U.S. national security and in what specific ways?

7. What specific accusations of non-compliance are the Soviets making against the United States and what is our response?

8. Does the Strategic Defense Initiative (SDI) violate the ABM treaty?

9. At what specific point do you believe the SDI would be a violation of the ABM treaty? With testing of technologies? With procurement of a prototype? With testing of a prototype? With deployment? Other?

10. Is it a fair statement that both the United States and the Soviet Union, while trying to adhere to the ABM treaty, have sought to exploit ambiguities in its provisions?

11. Ambassador Paul Nitze is reported to have said that Soviet violations, except for the Krasnoyarsk Radar, are not violations but exploitation of ambiguous wording in agreements. Does this statement represent Administration policy?

12. How is the development of the SDI initiative consistent with U.S. policy to seek to reverse the erosion of the ABM treaty?

I look forward to an early reply to these questions.

With best wishes, I am

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

U.S. DEPARTMENT OF STATE,
Washington, DC, March 22, 1985.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, House of Representatives.

DEAR MR. CHAIRMAN: The Secretary has asked me to reply to the questions in your letter of February 12 concerning Soviet noncompliance with arms control agreements.

Soviet noncompliance is a serious matter which calls into question important security benefits from arms control and undermines the confidence essential to an effective arms control process. Thus, the Soviet record with respect to compliance has an important bearing on the arms control process as a whole, and accordingly, the Congress should be informed, along with the public. The President's February 1985 report, undertaken at the request of the Congress, is a reflection of our shared concerns that Soviet compliance behavior should be properly understood.

The SCC was established under the ABM Treaty as a bilateral forum to promote the objectives and implement the provisions of that accord and the Interim Agreement. The SCC has by mutual consent also considered some SALT II issues. Serious compliance concerns beyond the SALT and ABM areas have arisen as well, and they have been raised with the USSR in confidential bilateral diplomatic channels in all cases before made a matter of public record. In the SCC, we have discussed questions regarding appropriate compliance issues in great detail, insisting on explanations, clarifications, and, if required, corrective action. We have made no secret of the fact that despite our efforts in the SCC, the Soviet Union has thus far not provided satisfactory explanations nor undertaken corrective actions sufficient to alleviate our concerns. We believe that making the US public and the Congress aware of the situation will strengthen our efforts both in the new negotiations and in seeking corrective actions from the USSR.

Soviet noncompliance activities do have security implications for the US. For example:

The aggregate of the USSR's ABM and ABM-related actions suggests the USSR may be preparing an ABM defense of its national territory. Such activities would have grave repercussions on the strategic balance, and on our ability to maintain our deterrent.

The SS-X-25, the second new ICBM the Soviets are testing in violation of their political commitment to the SALT II Treaty, represents further modernization of the Soviet missile forces, already more modern than our own.

Soviet chemical and toxin weapon violations are direct evidence that the USSR has

enhanced its chemical and biological warfighting abilities and preparedness.

As for Soviet countercharges of US noncompliance, such assertions are designed to divert attention from their own noncompliance. The US is in full compliance with all its arms control obligations. In a Pravda editorial February 9, and in a demarche containing similar allegations, the Soviets accused us of several specific arms control violations, all of which are groundless. Most of the alleged violations were made public by the USSR in 1984. We responded in detail then, and are currently updating a more detailed response, which we will provide to you as soon as it is completed.

The US Strategic Defense Initiative involves only research, which is not prohibited by the ABM Treaty. While both sides have had research programs since the signing of the Treaty, Soviet ABM deployments and research programs have been far more intensive than our own.

The undertaking "not to develop, test or deploy" in Article V of the ABM Treaty prohibits the development and field testing of prototypes or bread-board models of proscribed ABM systems or components. It does not limit conceptual design, laboratory development and testing, or construction of laboratory prototypes or models. The rationale behind the distinction between permitted research and prohibited development is that limitations apply to those activities that must be conducted in the open to be meaninful and therefore are monitorable by national technical means of verification. Moreover, the Treaty permits development and testing of fixed ground-based ABM systems and components at agreed test ranges.

We do not agree it is a fair statement that both sides have sought to exploit ambiguities in the provisions of the ABM Treaty. The US has deactivated the one area defense it is allowed under the Protocol. Soviet allegations of U.S. violations are false. The USSR, however, through its construction now of the Krasnoyarsk large phased-array radar, is violating the ABM Treaty, and we also have concerns about Soviet compliance with other aspects of the Treaty. Administration policy regarding the characterization of Soviet noncompliance with the ABM Treaty is contained in the conclusions of the President's 1985 report on the subject. The statement attributed to Ambassador Nitze in question 11 does not represent his view; Ambassador Nitze agrees with the assessment of Soviet noncompliance contained in the President's report.

Finally, current strategic policy is based on the concept of deterrence of nuclear war through maintenance of the ability to mount a retaliatory strike sufficient to dissuade any attack. The limitation of defensive systems enshrined in the ABM Treaty was and remains an essential feature of current strategic doctrine, in combination with real reductions in strategic offensive systems foreseen during SALT I but so far never achieved. The Strategic Defense Initiative will form the research basis for a possible future political decision to shift our deterrence doctrine away from total reliance on offensive nuclear weapons of retaliation toward a more stable world with greatly reduced levels of nuclear arms and an enhanced ability to deter nuclear war through a system of non-nuclear defense.

Sincerely,

EDWARD FOX,

Acting Assistant Secretary, Legislative and Intergovernmental Affairs.●

MY PLEDGE TO AMERICA

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. RUDD. Mr. Speaker, this year, 675 students from 65 schools across Arizona competed in the Veterans of Foreign Wars' Voice of Democracy Scholarship Contest. The theme of the competition was "My Pledge to America."

Tom Nadel, a 12th grader from Dysart High School in Peoria, AZ, won first place with his outstanding and inspirational speech. He pledges action, not just talk, to resolve the problems confronting our Nation, and challenges American youth to join in making the U.S. stronger, more secure and more just.

I commend Tom's speech to my colleagues. The text of it follows:

"MY PLEDGE TO AMERICA"

I believe in the United States of America as a country of the people, by the people, and for the people. Ours is a country established upon the principles of freedom, equality, justice, and humanity. These were the causes for which American patriots sacrificed their lives and fortunes. Therefore, it is indeed my pledge and duty to my country to love it, to support its constitution, to obey its laws, to respect its flag and to defend it against all enemies. Yes, "My Pledge To America" is simply to serve her with pride and strive to make her more perfect.

There are many words in our language that denote satisfaction with our country, but the greatest and the most animated is "pride." No one can deny what we feel as the flag passes by; or at the opening of sports festivities and the "Star-Spangled Banner" is sung. Can anyone deny the feeling that comes over us? Why do we feel this way? The reason lies in the element of pride we feel towards this nation. For our sense of glory and respect evolves from the very root of our American government. Our system of government did not suddenly spring into being as at the wave of some political magician's wand. Nor was it pulled out of thin air by the Founding Fathers at Philadelphia. Rather, it has developed through long centuries of experience, tradition, thought and deed. Our forefathers were not thinking of the narrow present and of themselves alone. They recognized an obligation to keep freedom alive for all future Americans as well. The ideals they stated are positive and constructive. "My Pledge to America" is to uphold these ideals and thus oppose whatever divides this nation, leads to injustice, weakens our defense, undermines our physical or economic health and threatens our basic freedoms both now and forever.

Since time began we have had men who have come to the front with progressive ideas. These men have served their country with pride and now it is my generations turn to do the same. Of course we know, that as the world grows the pressures increase upon us to react to the new ideas and methods that are constantly increasing and improving our daily life. One major question today is "what can our country look forward to ten or twenty years from now?" The answer to this question is to make America more perfect through universal peace and prosperity. For only the youth today can bring about the necessary changes to coincide with the progress of the years to come. Only the willingness of my generation to serve America with pride, can bring us the kind of future all the people of tomorrow will be using and experiencing. Yes, today's youth are the navigators for tomorrow, and the challenges facing us are as many as the mysteries that are constantly confronting America today. Thus "My Pledge To America" shall be accomplished through the knowledge, strength, and determination of my generation's answers to the important questions that are before America.

America's future is an undecided future. However, it is an open future; a future that my generation must and can create. Through our efforts we can work to eliminate such problems as starvation, sickness, and antagonism toward our neighbors, by keeping the ideals, values, and goals characteristic of this nation ever alive.

In conclusion, it is indeed time for my generation to take action. For I see America where no man fears to think as he pleases or say what he thinks. I see America where no man is another man's master, where no man's mind is dark with fear. I see America as the horizon of human hopes. To those who say the design defies our abilities to complete it, I answer, "To act with enthusiasm and faith is the condition of acting great."

So, "My Pledge To America" is a very simple one. It is time we stopped talking about who is responsible for a hunger problem, or a crime problem, or an energy crisis and direct our energies toward finding a solution. I do not care who is at fault. It doesn't make one bit of difference. All I want and expect is for my generation to solve it. For we will make our nation stronger. We will make the United States of America more perfect, and "My Pledge To America" is to serve her with pride and always make her the greatest country on earth. This is "My Pledge To America", so help me God!●

THE TRADE ADJUSTMENT ASSISTANCE ACT

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. MANTON. Mr. Speaker, this year the Congress will be preoccupied with finding ways to reduce the Federal budget deficit which threatens continued economic growth. But there is another deficit which also poses a serious threat to our economy and our workers.

The 1984 U.S. trade deficit was $123.3 billion, almost doubling the 1983 record trade deficit of $69.4 billion. The outlook for this year is bleak with our trade imbalance expected to hit $140 billion. By the end of 1985, the United States will become the largest debtor nation in the world.

Mr. Speaker, our trade imbalance has a direct impact on American workers. The 1984 trade deficit cost more

than 2 million Americans their jobs. We must develop effective strategies to improve our competitiveness in the international market while eliminating trade barriers in order to put these Americans back to work. But this will not happen overnight. In the meantime, we must assist those workers who have been forced out of work due to the flood of imports into this country.

Regrettably, the President has proposed severe cuts in the very programs designed to assist these workers. The administration's fiscal year 1986 budget proposal asks Congress to rescind in fiscal year 1985 roughly $120 million of the $222 million approved under title III of the Job Training Partnership Act which is designed to assist dislocated workers. Fiscal year 1986 funding for the title III JTPA Program would be reduced to $100 million. Furthermore, the President's budget would also terminate the Trade Adjustment Assistance Program which helps unemployed workers because of import competition. Given the administration's apparent lack of an aggressive and cohesive trade policy, these cuts, which would represent a 60-percent reduction in funds to help dislocated workers, must be rejected.

Mr. Speaker, I commend to my colleagues the following letters I recently received which clearly illustrate the negative impact the President's proposals would have on workers in New York and across the country.

ALLOMATIC INDUSTRIES, INC.

Hon. THOMAS MANTON,
U.S. House of Representatives, Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN MANTON: Allomatic Industries is a manufacturer of automotive component parts. We have been adversely affected by imports. With the help of the Metro New York Trade Adjustment Assistance Center we carefully reviewed all aspects of our operations and developed a business plan designed to keep us competitive in the world markets.

The best aspect of Trade Adjustment Assistance was the TAAC's assistance in bringing on expert consultants to scrutinize our product line for profitability. As a result, we expect cost savings to exceed $1,000,000 per year. Cost sharing with TAAC allowed us to receive this technical assistance with very little financial risk on our part.

Our business continues to recover nicely. Others can gain from this program just as we have. Please support Trade Adjustment Assistance.

Cordially,

BENNO BORDIGA,
Chairman-CEO.

DEPENDABLE KNITWEAR, INC.,
Richmond Hill, NY, February 20, 1985.

Hon. THOMAS MANTON,
U.S. House of Representatives, Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN MANTON: We understand that the Administration wishes to phase out the Trade Adjustment Program. This is most regrettable for those firms whose business has been affected by the continuing influx of imports. Our firm was certified eligible for trade adjustment assistance benefits when it's children's sweater sales were affected by merchandise coming in from abroad.

As it appeared that imports would continue to flow into the country, we requested technical assistance which would help increase our operating efficiency and lower our manufacturing costs. The consulting advice we received would have normally been beyond our means, but under the cost sharing arrangement with the government, it became attainable.

The government's investment was modest but worthwhile, as it helped safeguard the jobs of our 100 employees. These people are still gainfully employed, paying taxes rather than being on welfare rolls.

We strongly support the trade adjustment assistance program and urge it's continuation so that other firms being hurt by imports can likewise be helped.

Sincerely,

ARTHUR HUNSTEIN,
President.

DEMACO,
Ridgewood, NY, February 20, 1985.

Congressman THOMAS MANTON,
U.S. House of Representatives, Cannon House Office Building, Washington, DC.

DEAR CONGRESSMAN THOMAS MANTON: I want to express my strong support for continuation of the Trade Adjustment Assistance program. This is the only government program available to companies like mine which have been hurt by foreign competition.

My firm is the last American manufacturer of complete lines of commercial pasta making machinery. We compete against large European manufacturers who frequently receive significant subsidies from their respective governments.

Over the past eighteen months, my firm has received technical assistance through the Trade Adjustment Assistance program. Help in engineering and marketing has made us more efficient and better prepared to compete against overseas firms, especially in the worldwide market for food processing equipment.

We couldn't have gotten this assistance without the help of our local Trade Adjustment Assistance Center. They helped us develop a strategy to compete successfully. And remember, this isn't just another "giveaway" program. We've paid for 25% of all the consulting assistance we've received.

As a result of Trade Adjustment Assistance, we're a stronger firm. Our sales are increasing, our employment growing. I urge you to vote to continue this program so that my firm, and others like me, can better meet the challenge of imports, and keep Americans working.

Sincerely,

JOSEPH DE FRANCISCI,
Vice President.●

KRISTIN LINDHOLM'S PLEDGE TO AMERICA

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. WHEAT. Mr. Speaker, it is a special privilege for me today to honor, and bring to the attention of my colleagues in the House of Representatives, the winner of this year's Voice of Democracy Scholarship Program sponsored by the Veterans of Foreign Wars.

Kristin Lindholm, a 17-year-old Kansas City high school senior from Missouri's Fifth Congressional District, won the scriptwriting contest with her heartwarming script on "My Pledge to America." For her efforts, she has been rewarded with a $14,000 scholarship to help pay for her college education.

Kristin, the daughter of Mr. and Mrs. Donald Lindholm, is the top student in her graduating class at Center High School. She is president of the school's National Honor Society and the president of the school's speech team. She has also won a variety of honors in debate during her 4 years of high school.

Mr. Speaker, nearly 300,000 high school students across the Nation and overseas participated in this year's 38th annual scriptwriting contest competing for the six national scholarships. All the contestants were required to write a 5-minute broadcast script entitled "My Pledge to America." I would like to include for the record a copy of Kristin's award-winning script.

MY PLEDGE TO AMERICA

(By Kristin A. Lindholm)

One of my most vivid memories of kindergarten is the day when I finally recited the Pledge of Allegiance, by memory, without any mistakes. I was very proud of myself, but my pride stemmed more from my memorization skills than from my understanding of the significance of making a pledge to my country. I did not realize that a pledge is not a recitation; it is a solemn promise made by a dedicated person who translates the words into his actions. By the time I was mature enough to understand this, I had moved into upper grades, and the school day no longer began with the Pledge of Allegiance. Without that daily requirement, I stopped giving a pledge to my country. For too long, I have taken for granted the priceless opportunities and freedoms that my country has given me, and I have given little in return. Therefore, I need to make a new, unique pledge—my pledge to America.

The members of many organizations pledge themselves to uphold traditions, to work during the present and for the future, and to make a strong commitment to the organizations' welfare. I too decided to make that three-part pledge to America, beginning by pledging to uphold my country's traditions. My rich American heritage began over 200 years ago when the colonists dreamed about shaping America into a country where the power to govern came from the people. Adlai Stevenson, once the Ambassador to the United Nations, wrote, "America . . . is the first community in which men set out to institutionalize freedom, responsible government, and human equality." Through the efforts of George Washington, Thomas Jefferson, Abraham Lincoln and many others, America became the democratic world leader that she is today. I gladly pledge myself to uphold the ideals and history of America.

One part of a pledge is upholding the past, but pledges are useless unless they demand present action and future commitments. I pledge to serve my country now and to prepare myself for the future. Although, as a student, I do not vote or pay taxes, I can still support my country through my present actions. I can exercise my constitutional rights by keeping informed about important issues and voicing my opinions by letter or petition to my government representatives. In addition, I can provide important volunteer service for my community. Through service clubs, I have worked for the Salvation Army, Special Olympics, and a school for autistic children. By serving the people of America, I am serving America herself. Working for my country now is extremely important; but, as nationally acclaimed inventor Charles Kettering once said, "We should all be concerned about the future because we will have to spend the rest of our lives there." For my generation, preparing for the future is critical, because soon America's future will rest in our hands. We must educate ourselves about our government and our future responsibilities as tax-paying, voting citizens. As an individual, I also must realize my potential so I can make a significant contribution to my country's welfare.

Finally, I pledge to myself to make a strong commitment to America. If I do not take my pledge seriously, then it is worthless. Words are easy to write and even easier to say, but acting upon those words is much harder. I cannot pledge myself to America and then put off my service and education until later or completely forget about them. If I do, then I am guilty of apathy, perhaps the greatest threat to democratic America.

Instead of indifference, I want to give my country action. Therefore, I pledge myself to uphold America's traditions, to work during the present and for the future, and to commit myself to fulfilling this solemn promise. My pledge can make a difference in my goals and actions and possibly the goals and actions of others as well. After all, in the words of Henry Emerson Fosdick, "Democracy is based upon the conviction that there are extraordinary possibilities in ordinary people." I intend to unlock some of my extraordinary potential by giving and living my pledge to America."●

U.S. POLICY TOWARD THE SANDINISTA GOVERNMENT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, April 2, 1985

● Mr. HAMILTON. Mr. Speaker, on February 6, 1985, I received a letter from the State Department in answer to a previous query concerning U.S. policy toward Nicaragua. Subsequent remarks by the President in a press conference on February 21 seemed at variance with the reply I had received. Therefore, I wrote to Secretary of State Shultz against seeking clarification concerning the aims of U.S. policy. The correspondence follows:

U.S. DEPARTMENT OF STATE,
Washington, DC, March 26, 1985.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, House of Representatives.

DEAR MR. CHAIRMAN: Thank you for your letter to the Secretary of February 26, 1985, in which you requested further clarification of United States policy toward Nicaragua.

In your letter you referred particularly to the President's February 21 press conference statement that, "You can say we're trying to oust the Sandinistas by what we're saying." To complete the thought, however, the President then proceeded to add, "We're saying we're trying to give those who fought a revolution to escape a dictatorship, to have democracy and then had it taken away from them by some of their fellow revolutionaries, we're saying we want them to have a chance to have that democracy that they fought for." Seen as a whole, these remarks make clear that there has been no change in our policy toward Nicaragua.

U.S. policy remains as described in some detail in the Secretary's letter to you of February 6, 1985. We see no inconsistency between that letter and the President's subsequent remarks. At the same time, however, you should take the President's statements, as well as recent statements by the Vice-President and the Secretary, as a clear reaffirmation of our very strong support for the efforts of the Nicaraguan people, including democratic opposition groups, to achieve democracy in their homeland.

Sincerely,

J. EDWARD FOX,
Acting Assistant Secretary, Legislative and Intergovernmental Affairs.

HOUSE OF REPRESENTATIVES,
Washington, DC, February 26, 1985.

Hon. GEORGE P. SHULTZ,
Secretary, Department of State, Washington, DC.

DEAR MR. SECRETARY: I appreciated your reply of February 6, 1985, to my letter of December 20, 1984 regarding United States policy toward Nicaragua. This letter seeks further clarification as to what is United States policy because of recent remarks by the President.

You indicated in your letter that:

"The United States does not seek to destabilize or overthrow the Government of Nicaragua; nor to impose or compel any particular form of government there."

And later on in answer to my question as to whether you believed that the policy changes you desired from Nicaragua could be brought about by the current leadership in Nicaragua, you indicated that United States actions were predicated on an affirmative assumption to that question.

On February 21, 1985, President Reagan said in a press conference that "You can say we're trying to oust the Sandinistas by what we're saying." The President said that it was U.S. policy to seek to remove the Sandinista government unless it changed its goals and present structure and allowed the "freedom fighters" now opposing Sandinistas into the revolutionary government.

These statements appear quite different in substance and tone. I would appreciate your prompt clarification as to what exactly is policy.

With best regards,
